# British Banking in Asia

These are the territories served by THE CHARTERED BANK and its subsidiary, The Eastern Bank Limited, through a system of one hundred and thirty branches extending to most centres of commercial importance in the Middle East, South and South-East Asia and the Far East. Those branches provide complete and up-to-date banking services, sustained by expert knowledge and long experience of Eastern trade, finance and industry. An effective credit information service and skilled assistance and advice are available to merchants and manufacturers seeking new business connexions in Asian Markets.

## THE CHARTERED BANK

*(Incorporated by Royal Charter 1853)*

HEAD OFFICE: 38 BISHOPSGATE, LONDON, E.C.2.

Offices in the United Kingdom also at Manchester and Liverpool, in Germany at Hamburg and in the United States at New York and San Francisco
Branches in India at Amritsar, Bombay, Calcutta, Calicut, Cochin, Delhi, Kanpur, Madras, New Delhi and Vasco da Gama

## THE EASTERN BANK LIMITED

Head Office: 2 and 3 Crosby Square, London, E.C.3.

ASSOCIATED BANKS: The Irano British Bank (Inc. in Iran)
Limited (Inc. in India) • The Commercial Bank S.A.L. (Inc. in Libya) • The Chartered Bank of London (Inc. in California)

# CONTENTS

All possible care is taken to check the information given in this volume. But the publishers cannot take responsibility for chance errors or omissions. Authoritative corrections will be gratefully received.

There is in some cases a discrepancy between the figures from the Central and a State Government relating to the same subject. This is generally pointed out in a foot-note.

# PHYSIOGRAPHY

## STATES, TERRITORIES

The country is divided into 16 States and nine Territories. The latter are under Central administration.

The 16 States (with the capital towns in brackets) are:

Andhra Pradesh (Hyderabad), Assam (Shillong), Bihar (Patna), Gujarat (Ahmedabad*), Kerala (Trivandrum), Madhya Pradesh (Bhopal), Madras (Madras), Maharashtra (Bombay), Mysore (Bangalore), Nagaland (Kohima), Orissa (Bhubaneshwar), Punjab (Chandigarh), Rajasthan (Jaipur), Uttar Pradesh (Lucknow), West Bengal (Calcutta), Jammu and Kashmir (Srinagar).

The nine Territories (with capital towns in brackets) are:

The Andaman and Nicobar Islands (Port Blair), the Laccadive, Minicoy and Amindivi Islands (temporary headquarters: Kozhikode, Kerala), Delhi (Delhi), Himachal Pradesh (Simla), Manipur (Imphal), Tripura (Agartala), Dadra and Nagar Haveli (Sylvasa), Goa, Diu and Daman (Panjim) and Pondicherry (Pondicherry).

In addition, there is one territorial unit: The North-East Frontier Agency, administered by the Governor of Assam as Agent of the Central Government.

## GEOGRAPHY

India is about 1,850 miles from east to west, and about 2,000 miles from north to south. Its land frontier is about 9,425 miles long and the sea frontier about 3,535 miles.

The total land area is 12,61,817 sq. miles.

According to the 1961 census the total population is 439,234,771.

The percentage decade variation during 1951-61 is 21·51.

The land frontier with Pakistan is about 4,959 miles long (east and west together). Of this about 2,810 miles are demarcated.

In shape India is like a triangle with its base resting on the Himalaya Mountains in the north and its apex running far into the ocean in the south. At the southern extremity the triangle tapers with a pear-shaped curve to a point called Cape Comorin now called Kanya Kumari.

India lies entirely to the north of the equator. From south to north including Kashmir, it stretches from 8° north latitude to 37° north latitude, with the Tropic of Cancer cutting it roughly into two halves. West to east it stretches from about 66° 20′ east longitude to 97° east longitude.

Broadly speaking, India is shut off from the mainland of Asia by the Himalaya Mountains, the highest mountain range in the world. Going from west to east along the country's land frontier are Pakistan, Chinese Turkestan, Tibet, China, Burma and Pakistan.

In the south, the country is surrounded on all sides by water—the Arabian Sea in the west, the Indian Ocean in the south and the Bay of Bengal in the east.

India is so vast and diversified that expressions like 'average rainfall,' 'average temperature' have no meaning. The average annual rainfall in the Thar desert is 4 inches, while that in Cherrapunji is 425.

Similarly places in Kashmir have a minimum temperature of 49° F. while places in Rajasthan have recorded a maximum temperature of 120° F. So one can only speak of local averages rather than of national averages.

Compared with the size of the country, the coast-line is short, as there are few bays or inlets. Hence there are also very few harbours. The fact is the west coast is rocky and the sea is deep near the coast, while in the east the sea is extremely shallow so that big ocean-going ships have to weigh anchor at some distance from the shore.

The only so-called natural harbours are Bombay and Goa, while Madras, Vishakapatnam and Port Okha are examples of purely artificial harbours built by human enterprise.

The principal ports in India are (going from west to east along the coast), Kandla, Bedi Bunder, Port Okha, Porbandar, Surat, Bombay, Mormugao, Mangalore, Kozhikode (Calicut), Cochin, Alleppey, Quilon, Tuticorin, Dhanushkodi, Nagapattinam, Karikal, Cuddalore, Pondicherry, Madras, Masulipatnam, Kakinada, Vishakapatnam and Calcutta.

## MOUNTAIN WALL

India can be divided into three natural regions—1. the mountain wall, 2. the Plain of Hindustan, and 3. the Indian Plateau.

Let us take the mountain wall first. From the Pamir Knot in the far north two mountain ranges radiate one in the south-east and easterly direction called the Himalayas, and the other in a south-western direction reaching almost down to the sea, called the Sulaiman Range in the north and the Kirthar Range in the south.

In the east the mountain wall between India and Burma is called by different names in different places. In the north, for instance, it is known as the Patkoi Hills, further south as the Naga Hills. In Assam it is called Jaintia, Khasi and Garo. Southward are the Lushai Hills, then lastly there are the Arakan Yoma which finally reach the sea at Cape Negrais and continue in the Andaman and Nicobar Islands.

Of the various ranges which constitute the mountain wall of India the Himalayas are the most noteworthy. Extending like a scimitar for a distance of 1,500 miles along the northern frontiers of the country they form the loftiest mountain range in the whole world, and contain many of the highest mountain peaks, Mount Everest 29,141 ft., Mount Godwin Austen 28,250 ft., and Kanchenjunga 28,146 ft.

There are no easy ways in and out through the mountain wall which shuts off India from the rest of Asia, but there are a few difficult passes. In the very north are the Zojila Pass and the Shipki Pass which lead out of Kashmir and Punjab respectively. Then from Shipki right down to Darjeeling there is no route across the mountain wall. Across the Burma frontier again there are a few routes but they are of little use for purposes of communication.

The following is a more detailed description of the mountain region.

In the east on the border of Burma the mountain wall is much lower. Here it can more accurately be described as a range of hills rather than of mountains. This region is wet, forested and very thinly populated. The region round about Cherrapunji in Assam has the highest rainfall in the world.

Then from Darjeeling to Kashmir are the Himalayas proper, over 1,500 miles in length and 150 to 300 miles in breadth. The Himalayas are thus not a mountain chain in the proper sense of the word. They can be described as a series of parallel but converging ranges intersected by valleys and big plateaus.

Hence the Himalayas themselves can be further sub-divided into three parallel zones, the Great Himalayas with an average elevation of 20,000 ft., always covered with snow; the Lesser Himalayas, the middle range, with an average elevation of 15,000 feet; and finally the Outer Himalayas lying between the Lesser Himalayas and the plains with an average elevation of about 3,500 feet.

Two of the longitudinal valleys which separate the mountain ranges are worth a note. They are the Vale of Kashmir and the valley of Kathmandu in Nepal. Both the valleys are fertile, extensive and from a tourist's point of view a dream of beauty.

## PLAIN OF HINDUSTAN

Geologically, the Ganges plain can be considered as the fore-deep of the mountains to the north of it. This fore-deep extends thousands of feet below the sea-level, though since its formation it has been filled in by deposit. In the east this deposit consists of alluvial material from the mountains, in the west it consists of material blown by the wind. All through the deposit is fine grained made up chiefly of muds and sands.

The Plain of Hindustan extends from the Bay of Bengal in the east to the Pakistan frontier in the west; that is to say, it is about 1,900 miles long and from 150 to 200 miles broad. Throughout this vast tract of land not a hill can be seen. The slope from the mountains to the sea is so gradual that about 100 miles from the mouth of the River Ganges the surface is no more than 500 feet above sea-level.

The Plain of Hindustan is probably the most important part of the country. For one thing, it contains some of the richest soils in the world. Second, it is on the Plain of Hindustan that the whole drama of race conflict and race assimilation was played out, a drama which finally shaped the political and cultural destiny of both India and its neighbour Pakistan.

Going into more detail the Plain of Hindustan is formed by the basins of three distinct river systems. In the far west are the Beas and Sutlej, tributaries of the Indus draining into the Arabian Sea. Further east is the River Ganges with its tributaries the Jamuna, Gogra, Rapti and Gandak which flows south-eastwards into the Bay of Bengal. The capital of the Indian Republic Delhi stands on the water-shed between the Indus and the Ganges river basins. The third of the three river systems, the Brahmaputra rises beyond the Himalayas, turns east and enters India at its eastern extremity and joins the Ganges before reaching the Bay of Bengal. The Brahmaputra has no important tributaries.

The rivers of Hindustan are notable in three respects: 1. They give a constant supply of water, 2. The land through which they flow is broad, flat and fertile and eminently suitable for irrigation, 3. Because water flows perennially they are navigable through the greater part of the year.

As we go from west to east in the plain rainfall increases and so do the fertility of the soil and the density of population.

## INDIAN PLATEAU

The third of the natural regions into which the country is divided is called the Indian Plateau because it comprises a three-sided table-land covering the whole of the country in the south except for two narrow coastal strips in the east and the west.

The Indian Plateau is marked off from the Plain of Hindustan by a confused mass of hill ranges running with a general direction of east to west. Three of these ranges have been distinguished by the names of Vindhyas, Satpuras and Ajantas respectively. They stand from 1,500 feet to over 4,000 feet high and though pierced by road and railway at the present time were not easy to cross in the

* Actually a new capital is to be built outside the city.

old days and thus formed a barrier of hill and jungle between the northern and the southern portions of the country.

The Indian Plateau is higher in the west and the south than in the east and north. Along the western and eastern edges of the plateau run the Western and Eastern Ghats. They start southward, from the extremities of the Vindhya mountain system and run along the western and eastern coasts of the country and unite to form a sort of upheaved angle towards their southern extremity.

The Western Ghats run through the States of Maharashtra and Mysore and ascend to an average height of about 3,000 feet while some of the peaks are anything between 5,000 feet and 9,000 feet high.

The Eastern Ghats stretch down the States of Andhra Pradesh and Madras and have an average elevation of 1,500 feet.

The inner triangular plateau which the Western and Eastern Ghats form far in the south is seamed with little ranges of hills exceeding 4,000 feet in height the best known among which are the Nilgiris. It is on the Nilgiris that Ootacamund the famous summer capital of Madras State stands.

**Drainage Systems.**—There are three systems of drainage in the Indian Plateau—one towards the north, the second towards the west and the third towards the east. The drainage from the northern or Vindhya edge of the plateau falls into the Ganges. Two rivers Narmada and Tapti carry the rainfall of the southern slopes of the Vindhya and Satpura mountains respectively in almost parallel lines into the Arabian Sea.

Further south, as we have already stated, the plateau is much higher in the west than the east. So the drainage has to make its way across the whole breadth of the plateau eastwards until it falls into the Bay of Bengal.

The most important rivers are the Mahanadi, the Godavari, the Krishna and the Cauvery. These rivers differ from the rivers of the Plain of Hindustan in three ways: 1. They are fed only by the monsoon rains and therefore do not yield a constant supply of water, 2. Their valleys are less suitable for irrigation, 3. And finally, they are not navigable for certain seasons in the year when parts of the river dry up.

From a geological point of view the Indian Plateau consists mainly of very old crystalline rocks—much older than the Himalayan fold mountains.

On some of the edges of the plateau in the north-east for instance, are areas of sedimentary rocks from which the country obtains most of its coal. About nine-tenths of the coal resources of India lie in Jharia in Bihar and Ranigunj in West Bengal, though coal-bearing beds are also found in the valley of the Godavari and the northern slopes of the Vindhyas.

The north-west of the plateau is covered by vast stretches of lava called the Deccan lavas. This region is one of the largest areas of lava in the world, covering as it does an area of 250,000 square miles with a total thickness of several thousand feet. In spite of the great extent of the lavas there are few or no signs of volcano.

In the rest of the Plateau valuable minerals occur here and there among old crystalline rocks. Gold is obtained in Mysore, manganese in Andhra, Mysore and Madhya Pradesh, copper and iron in Bihar and Orissa, mica in Andhra and the south-east. The point about diamonds is of some interest. They occur in sand-stones or conglomerate in Panna in Madhya Pradesh or Kurnool in Andhra, though no diamond bearing igneous rocks are found.

Two groups of very small islands in the Bay of Bengal, the Andamans and the Nicobars, and one group in the Arabian Sea the Laccadives are part of the Republic of India.

So is the quasi-island of Kutch off the Kathiawar Peninsula in western India. Kutch is a dry, rocky, treeless country.

The main cultivated plants include rice, wheat, pulses and grains. Among the important seeds grown are castor, sesamum and ground-nut.

The chief fruit trees include mango, coconut, arecanut and certain citrus fruit. Apples, peaches, pears, apricots and walnuts are confined chiefly to the Himalayan valleys.

There are tea plantations over large areas on the mountains in the north-east and south, while coffee, cardamom, pepper and rubber are extensively grown in the south. In some of the damper regions the cinchona is successfully cultivated.

Among the wild animals are the tiger, the elephant, leopard, panther, the cheetah, the marbled and jungle cat, the wolf, jackal, wild dog, the black and the Himalayan bear, the rhinoceros, crocodile, wild hog, wild ass, antelope, gazelle, sambhar, spotted deer, bison, wild buffalo, many kinds of reptile (cobra, Russel's viper).

Among the domestic animals are cattle, buffaloes, sheep, goats, horses and ponies, mules and donkeys, camels, and of course, fowl.

Birds include the parrot, peacock, maina, different kinds of vulture and eagle, kingfisher, pigeons, ducks, partridges, plover, quail and snipe.

Among the more useful insects are the bee, silk worm, coceus laca (the one that gives lac). Mosquitoes abound everywhere. Locust invasions are not frequent.

Edible fish include the carp family, cat fishes the hilsa and mahseer.

# METEOROLOGY

*Note :* In the calculation of excesses and defects and their percentages, rainfall figures are taken correct to 0·1 mm.

### MONSOON RAINFALL SUMMARY—1964.

The rainfall was in large excess in the Punjab (I), Rayalaseema and north Interior Mysore and in moderate excess in west Uttar Pradesh, coastal Andhra Pradesh, the Madras State, south Interior Mysore and the Arabian Sea Islands. It was slightly more in the Bay Islands, Sub-Himalayan West Bengal, west Rajasthan, Gujarat State and Madhya Maharashtra and slightly less in Gangetic West Bengal, Himachal Pradesh and Marathwada. The rainfall was normal over the rest of the country.

*Chief Features.*—(*i*) Rapid advance of the southwest monsoon despite its slightly delayed onset; (*ii*) Normal activity of the monsoon with spells of heavy rains leading to floods in north and central India; and (*iii*) Delayed withdrawal of the monsoon from northwest India.

*June.*—Under the influence of a cyclonic storm in the Bay of Bengal, the south-west monsoon had advanced into the southeast Bay of Bengal and south Bay Islands upto Lat. 10°N towards the end of the first week of May. By the end of the month, it extended into the north Bay Islands and the remaining parts of the southeast Bay. The Arabian Sea branch of the monsoon set in over south Kerala on 5th June, about five days later than the normal date. A severe cyclonic storm of small extent with a core of hurricane winds developed over the east central Arabian Sea off the Konkan coast and moving northwards crossed the Kathiawar coast near Naliya on 12th. Under its influence the monsoon rapidly advanced northwards and set in over the entire west coast by 12th. At about the same time, the Bay branch of the monsoon began to advance into Assam and by 15th it covered the whole of northeast India. A low pressure area moving northwestwards from the northwest Bay of Bengal during the third week caused the extension of the monsoon into Gujarat State and most parts of Madhya Pradesh and of Uttar Pradesh by 25th. The last phase of advance of the monsoon was in association with a Bay depression during the first week of July and the monsoon extended to cover the entire country by 5th July.

The severe cyclonic storm in the Arabian Sea mentioned above caused large-scale destruction of life and property in Saurashtra and Kutch and along the Kathiawar coast in the second week of June.

The premonsoon thundershower activity was quite pronounced over Assam during the first week and all the rivers in Assam rose in spate following the heavy rains. With the onset of the monsoon the heavy rains continued there during the second week. The monsoon activity was fairly good and sustained during the second half of the month over northeast India. According to press reports, the Brahmaputra rose above the danger level at many places particularly during the third week, inundating and damaging vast areas of paddy and jute crops. More than four lakh persons were affected by the floods. In north Bengal also the Torsa and Teesta were in high floods during the last week. Spells of heavy rains occurred in the central parts of the country and adjoining areas during the last ten days of the month as a result of the development and movement of two low pressure areas from the head Bay of Bengal.

After the initial spell of heavy rains which occurred at the time of the setting in of the monsoon along the west coast, the monsoon remained weak to moderate or the rest of the month. However, the rainfall activity increased appreciably over the Konkan and coastal Mysore during the second half of the month. The other parts of the Peninsula also received a few spells of showers with increased rainfall during the last week.

Two western disturbances moving eastwards across the Western Himalayas caused dust or thunderstorms over many parts of northwest India during the first week. A spell of good rains occurred over this area about the middle of the month when the remnants of the severe cyclonic storm from the Arabian sea moved over to the Punjab (I). The rainfall was particularly heavy in Jammu and Kashmir where the Srinagar-Jammu road was reported to have breached at some places due to the flood waters of the Jhelum. Mainly dry weather prevailed over northwest India during the second fortnight except for the rainfall in the Western Himalayas during the last week due to the advancing monsoon current in the low levels.

*July.*—The monsoon activity was well maintained over practically the entire country during this month.

A low pressure area lying over Bihar Plateau and neighbourhood towards the end of June moved westwards and merged into the seasonal low by 3rd. This was followed by a depression which formed over the head Bay of Bengal on 3rd and moved in a northwesterly direction. Under their influence the monsoon activity was well maintained over most parts of the country, being particularly strong over the central belt of the country from Orissa to Gujarat State and also over the Konkan and Kerala. Sambalpur recorded 31 cm of rain on 5th and Broach 22 cm and Surat 21 cm on 7th.

The axis of the monsoon trough shifted to the north of its normal position and lay close to the foot of the Himalayas on most of the days during the period 8th to 18th. In association with it, the monsoon activity was more marked over

north India with heavy to very heavy rains occurring at a number of places in the Himalayas and adjoining plains. According to press reports, the Brahmaputra in Assam, the Bagamati, the Kamla and the Ganga in north Bihar, the Jumna near Delhi and the Beas and Markanda in the Punjab (I) rose in spate due to the heavy rains and flooded low lying areas. Standing crops over vast areas were damaged and a number of villages were also affected. The monsoon was weak to moderate over the remaining parts of the country except for a few spells of heavy rain along the west coast during the above period.

Two low pressure areas developing over Orissa and southeast Madhya Pradesh on 20th and over Vidarbha on 24th respectively, moved in a northwesterly direction. Under their influence the monsoon activity was sustained till the end of the month over the country outside the west coast where it was weak during the last week. As a result of the heavy rains in the central parts of the country in the third week, the flood waters of the Morna river were reported to have inundated low lying areas in Akola district and washed away standing crops over an area of about 5,000 acres.

An unusual spell of good rainfall occurred in Madras State and Andhra Pradesh during the last week as a result of a trough of low pressure moving from the east into the extreme south Peninsula. The monsoon activity revived along the west coast towards the end of the month.

*August.*—The monsoon activity along the west coast was sustained during the first week as a result of the development of an upper air trough over the east central Arabian Sea off the Konkan Kanara coasts. A cyclonic storm of very small extent developing in the Arabian Sea off Bombay on 7th caused heavy rains and squally weather in the north Konkan. The monsoon was moderate to weak over the Peninsula and also over Assam and West Bengal during the last three weeks of the month. However, spells of good rainfall occurred in Madras State and Andhra Pradesh particularly towards the end of the month.

Four depressions and a low pressure area forming in the north Bay of Bengal and moving inland during the period from 5th to the end of the month were responsible for the fairly good activity of the monsoon over the central parts of the country, and northwest India after the first week. Of these, the first three depressions were deep. The spells of heavy rains led to floods in Assam, north Bengal and north Bihar during the first week, in east Uttar Pradesh during the second and third weeks, in Madhya Pradesh during the third week and in Bihar State, east Rajasthan, the Punjab (I) and Delhi areas during the second fortnight. The floods were reported to have affected hundreds of villages and caused serious damage to standing crops and many road breaches.

*September.*—The monsoon activity was well sustained over the country outside northwest India as a result of the development and movement of five low pressure systems from the Bay of Bengal, the last two intensifying into deep depressions.

The first low pressure area formed over the head Bay of Bengal on 7th and moving west-northwestwards persisted over Uttar Pradesh from 11th to 15th. The heavy rainfall activity prevailing over northeast India during the first week extended to east Uttar Pradesh and east Madhya Pradesh during the second week. The river Bagamati in Muzaffarpur rose in floods causing damage to paddy crops and disruption of communication services in the first week. The second low pressure system developed as a trough in the southwest Bay of Bengal off the Coromandel coast on 3rd and moving across the south Peninsula persisted over the Arabian sea off Malabar Kanara coasts from 6th to 9th. Under its influence there was good rainfall activity in the Peninsula during the first week. The monsoon continued to be active over the Peninsula till the end of the third week under the influence of the third low pressure area. This system formed over the east central Bay of Bengal on 11th and moving westwards into the east central Arabian Sea across the north Peninsula recurved northeastwards to Uttar Pradesh by 21st. Later it became unimportant. Under its influence the monsoon activity was maintained over the Peninsula, the central parts of the country, Gujarat State and Uttar Pradesh during the third week. According to newspaper reports, many of the rivers in Gujarat State were in floods due to the heavy rains and inundated low lying areas and caused damage to many houses.

During the last week of the month two deep depressions moving inland from the Bay of Bengal kept up the monsoon activity over the country. The first one which formed over the head Bay on 23rd moved northwestwards to the Punjab (I) by 26th. The spell of heavy rains caused by it led to serious floods in west Uttar Pradesh and the Punjab (I) where a number of houses were reported to have been damaged and vast areas inundated. The second deep depression formed on 27th over the west central Bay of Bengal and crossing coast near Kakinada weakened into a low pressure area over Telangana and neighbourhood by 30th. It caused heavy rains in Andhra Pradesh and other parts of the north Peninsula. Rentachintala recorded 23 cm of rain on 29th.

The five low pressure systems including the two deep depressions mentioned above maintained the monsoon activity over the country upto the end of the month. Consequently the withdrawal of the monsoon was delayed. A trough in the high level westerlies which developed over West Pakistan and Afghanistan on 24th persisted there till 28th and later moved away eastwards across the Western Himalayas by 29th. In its wake, the monsoon withdrew from northwest India by 28th, about a fortnight after the normal date. By 15th October the monsoon had withdrawn from Uttar Pradesh, central parts of the country, northeast India and north Peninsula and was confined to the south Peninsula.

*Season as a whole.*—The monsoon set in over south Kerala in the first week of June about five days later than the normal date. It advanced rapidly and covered the entire country by 5th July. The monsoon activity was well maintained over the country upto the end of September. The monsoon began to withdraw from northwest India by the end of September, about a fortnight later than the normal date. The further withdrawal from the other parts of the country outside the south Peninsula was completed by the middle of October. The duration of the monsoon period in north India was two to three weeks longer than the normal. The activity of the monsoon was generally normal over the country but there were spells of heavy rains leading to floods in north and Central India.

# METRIC SYSTEM OF WEIGHTS AND MEASURES

FOLLOWING the acceptance of the metric system in principle by the Lok Sabha, the Government of India sponsored in Parliament legislation to adopt the metric system. The Standards of Weights and Measures Bill received the President's assent in December 1956. This Act defines the primary units of mass and length, units of capacity, time, electric current and luminosity, and the scale of temperature.

The metric system was chosen for its inherent advantages. It is simple and easy to learn and remember. Its use makes calculations easier. The metric system is one of the two major international systems of weights and measures recognised everywhere in the world.

## PRIMARY UNITS

The primary unit of length is the metre and of mass the kilogram. The international definitions of the metre and the kilogram have been adopted in substance. The standards of Weights and Measures Act, 1956, defined the kilogram as the mass of the platinum-iridium cylinder declared as the international prototype of the kilogram. The metre is the distance under prescribed conditions between the two median lines on the platinum-iridium bar maintained at the International Bureau of Weights and Measures, and declared International Prototype of the Metre. In October 1960, the Eleventh General (International) Conference on Weights and Measures redefined the metre in terms of the wavelength of the orange-red radiation in vacuum of krypton 86. The Standards of Weights and Measures Act, 1956, was therefore amended in 1964, adopting the new definition. According to the new definition, the metre is the length equal to 1,650,763·73 wavelengths, in vacuum, of the radiation corresponding to the transition between the $2P_{10}$ and $5d_5$ levels of the krypton atom of mass 86. The change in the definition does not make any significant difference to the length of the metre; only the basic concept underlying the definition will change.

The litre or the volume of one kilogram of water under specified conditions, would be the unit of capacity. The second, the unit of time, has been defined with reference to the length of the tropical year 1900. The unit of electric current would be the ampere, and of luminosity the candela. Temperature would be measured by the Centigrade scale.

A survey on the financial implications of the metric change-over was undertaken. The survey has revealed that the change has cost the Central and State Governments, industries, trade and the public, a total amount of Rs. 12 crores.

## NATIONAL PROTOTYPES

The Central Government are required, by law, to acquire and keep in their custody a Standard Kilogram and a Standard Metre conforming to the definitions, to a very high degree of accuracy. These would be called the National Prototypes of the Metre and the Kilogram. The prototypes must be authenticated against the International Prototypes maintained by the International Bureau of Weights and Measures. The acquisition of these prototypes was not easy; there are only a few manufacturers who can manufacture standards of such high accuracy. A Standard Kilogram and a Standard Metre were purchased with the help of the International Bureau of Weights and Measures. They have been deposited at the National Physical Laboratory, after verification against the International Prototypes, by the Director of the International Bureau. Under the Standards of Weights and Measures Rules, the N.P.L. has been declared the custodian of the National Standards. The Standards will be got verified by the Director, International Bureau, once in every 10 years.

## REFERENCE STANDARDS

Since weights and measures are enforced by the State Governments they must have standard weights and measures of high accuracy. The Act has placed on the Central Government the

duty of supplying a set of such Standards free to each State Government. These are called Reference Standards. The Reference Standards of weight and length are manufactured by the Bombay Mint, and verified against the National prototypes by the National Physical Laboratory. The Bombay Mint is the only organisation in India which is capable of manufacturing standards of this accuracy.

The Act lays down only the primary units. The Central Government has been authorised to declare secondary units with reference to primary units. There is an important stipulation that every secondary unit must be an integral power of 10, positive or negative, of the corresponding primary unit.

It was recognised that the introduction of the new system of measurement would entail much preparatory work. A period of 10 years was, therefore, allowed for its adoption in all spheres. It would be introduced gradually. The Act, therefore, gave the Government the discretion to introduce the new weights and measures by convenient stages. The Government might, for instance, introduce weights first, followed by capacity and length measures. Government might first introduce the new system in certain areas or types of undertakings, and later extend it to others in the light of experience. After the new weights or measures were introduced in an area or class of undertakings, the older weights and measures might be permitted for a period upto 3 years.

## LAW TO ENFORCE WEIGHTS AND MEASURES

While the Standards of Weights and Measures Act, 1956, laid down the standards, it has no provision to enable the State to effectively enforce the standard weights and measures. It did not give powers to punish people found using non-standard or false weights. Further legislation was, therefore, necessary for the enforcement of weights and measures.

Under the Constitution the State Legislature, and not Parliament, is the competent authority to make laws for enforcement of weights and measures. This meant the risk of each State making its own Weights and Measures Law without relevance to the laws of the neighbouring States. If this was allowed to happen, even though the metric system would have been established throughout the country, the denominations of weights and measures used, their designs and accuracy, specifications for weighing and measuring instruments, and penalties for using false or non-standard weights, would vary from State to State. Such a state of affairs would handicap trade, particularly foreign trade, and hinder the manufacture and distribution of weights, measures and instruments in India.

It was, therefore, decided by the Central Govt. to draft a Model Weights and Measures (Enforcement) Bill in consultation with the State Governments. All the States accepted the Model Bill, and State Legislatures have enacted it into law. The Union Territories of Delhi, Himachal Pradesh, Tripura and Manipur have adopted the Rajasthan Weights & Measures (Enforcement) Act, 1958. All the States and Union Territories have also accepted and enforced Model Rules recommended to them. The Weights & Measures (Enforcement) Acts in force in States and Union Territories are, therefore, virtually identical.

The main purpose of the enforcement laws is to :

*i*) specify denominations, shapes, designs and accuracy of weights and measures used in trade, as well as the capacities, sensitiveness, accuracy and constructional details of weighing and measuring instruments,

*ii*) lay down procedures for verifying weights, measures and instruments,

*iii*) prohibit the use in transactions of non-standard or false weights, measures and instruments, and prescribe penalties for their use,

*iv*) authorise the appointment of Controllers and other officers for enforcing weights and measures, and to define their duties and powers.

Specifications for weights, measures and instruments were drawn up by a Committee appointed by the Indian Standards Institution. Manufacturers, technical experts and the Departments of Weights and Measures, were represented in the Committee. These specifications were virtually incorporated in the States Weights and Measures (Enforcement) Rules.

## METRIC SYSTEM IN INDUSTRY

All the major industries have adopted the metric system. In buying materials and stores and selling products, prices and quantities are expressed in metric units. Accounts and statistics are also maintained in the metric system. So far, however, no significant changes have been introduced in the quality or design of products, to conform to the the metric system ; the bulk of the productive equipment in Industry continues to be on the inch pound system. In documents relating to sales, however, the quality descriptions are given in metric units by exact conversion of the dimensions.

The metric system was not imposed on industry from above. The dates on which it was introduced and the manner of introduction were suggested by the representatives of industry themselves. Industry was helped to change over by assistance in supply of scarce materials or imported spare parts and components. For instance, the oil companies were given licences to import parts for the conversion of petrol dispensing pumps in use throughout the country. Manufacturers of weighing machines were allowed to import spare parts for converting to the metric system a large number of weighing machines in use in industry and trade. Such imports were, of course, limited to components which are not manufactured in sufficient quantities in India. A special study showed that such components are relatively few. The value of components imported has therefore, been small.

## KILOMETRE STONES ON ROADS

The kilometre has been adopted as the unit of distance by rail. Distances along rail tracks have been marked in kilometres. With the adoption of the metric system in road transport, it has become necessary to mark distances on roads also in kilometres. But setting up kilometre stones on roads is more arduous and costly. The total length of roads including National Highways and State Roads, is about 375,000 miles or 6,000,000 kilometres. There are also other roads like District and Village Roads, Canal Roads and Forest Roads. The work will be carried out first on National Highways. The mile stones will be allowed to stand for the time being; the kilometre and the mile stones would be on opposite sides of the roads. On roads to be built in future, only kilometre stones will be set up. They will be put up on the left side of a person standing with his back to the starting point.

Kilometre stones are to be of the same design throughout the country. A suitable design recommended by the Indian Roads Congress has been accepted by the Governments. Distances will be marked on the stones in international numerals. Local or Devnagri numerals will not be used. Place names will be written in Roman, Devnagri or the local script, only one script being used on any particular stone. The writing on the stone at the starting point or zero kilometre will be in the Roman script. Successive stones will be in Devnagri, local script, Roman script, and so on, in that order. The stone will have a white background with letters in black. The top semi-circular portion will be painted canary yellow on National Highways, brilliant green on State Roads, and white on major District Roads.

## METRIC SYSTEM IN EDUCATION

The ultimate success of the metric system will depend on the young now in schools. Though the metric system is familiar to educated people in India, it has remained limited to the realm of knowledge and not of experience. Even the educated, therefore, find difficulty in using the metric system in ordinary dealings. Their minds can form concepts of weights or dimensions only with reference to the inch-pound or the Indian systems. The generation at school, on the other hand, will have experience of metric system in ordinary dealings, from a very early age. It is important, therefore, that they should be taught the metric system ; this requires teaching at a very early stage in schools ; in arithmetic and allied subjects, all examples and illustrations must be in this system.

These changes involve revision of school syllabi, and more important, of text-books ; in some cases they amount to re-writing large parts of the books. The school syllabus has been revised in many States and text-books have been suitably changed incorporating the metric system. In the field of higher education, the inch-pound system has been in exclusive use in engineering colleges. A change here would, therefore, involve replacement or recalibration of tools and instruments in addition to text-books.

Technical institutions have, however, adopted the metric system according to a phased programme. In engineering and medical colleges teaching is now based mainly on the metric system.

The metric system of weights & measures has now become compulsory throughout the country in trade and commerce. This is a significant land-mark in the history of India where a welter of weights & measures has so long prevailed.

## SIMPLE CONVERSION TABLES

# RAILWAYS

THE total route kilometrage of all the railways in India on March 31, 1964 was 57,584·80. The total electrified route kilometrage was 1,802·50.

The total route kilometrage is made up of the following :

Govt. railways (k.m.) 56,922·76.

Non-Govt. railways—662·04.

The total capital at charge of Govt. railways on March 31, 1964 was Rs. 1,988·24 crores.

There are three kinds of gauge, broad (1·676m.), metre (1·000m.) and narrow (0·762m.). There is also a light gauge usually laid on the mountains (0·610m). An example of this last is the Darjeeling-Himalayan.

The total route kilometrage by gauge was as follows :

Broad gauge : 27,459·39

Metre gauge : 25,142·95

Narrow gauge : 4,982·55

There are in all 6,854 railway stations. In any one day of 24 hours, over 5 million people travel by rail and over 5 lakh tons of goods (food, cloth, raw materials and finished products) begin a rail journey from one part to another in India.

The total number of employees, permanent and temporary, on all the railways at the end of 1963-64 was, 1,275,768, excluding casual labourers. The railways have a fleet service of approximately 11,540 locomotives, 29,551 coaching vehicles and 289,400 wagons or freight cars. About 10,000 trains run daily.

### ZONAL ADMINISTRATION*

The entire Government railway system is now grouped into eight administrations : the Southern Railway, the Western Railway, the Central Railway, the Northern Railway, the Eastern Railway, the South-Eastern Railway, the North-Eastern Railway and the North-East Frontier Railway.

The headquarters of the Southern Railway is at Madras, of the Western Railway at Bombay, of the Central Railway also at Bombay, of the Northern Railway at Delhi, of the Eastern Railway at Calcutta, of the South-Eastern Railway also at Calcutta, of the North-Eastern at Gorakhpur and the North-East Frontier Railway at Pandu.

Some of these railways comprise smaller systems.

There are ten non-Government Railways. The route kilometrage is given in brackets after the name :—

Ahmadpur-Katwa (51·25) ; Arrah-Sasaram Light (114·54) ; Bankura-Damodar River (107·91) ; Bhuktiarpur-Bihar Light (53·11) ; Burdwan-Katwa (59·57) ; Dehri-Rohtas Light (104·61) ; Futwa-Islampur (47·09) ; Howrah-Amta Light (86·35) ; Howrah-Sheakhala Light (31·04) ; Shahdara (Delhi)-Saharanpur Light (172·96).

They are all narrow gauge (0·762 m.) except the two Howrah-Amta and Howrah-Sheakhala which are 0·610 m.

The highest administrative authority for the railways is the Railway Board.

The Indian Railway Conference Association, New Delhi, is a sort of clearing house for all railways.

The railways are now organized on a Divisional basis.

There are a number of Committees which have been associated with the Railway Administration : Standing Finance Committee, Central Advisory Council, Railway Rates Tribunal, Indian Railway Fuel Committee.

There are also a number of standardization Committees such as for bridges, structure, track, signalling and inter-locking, building, locomotive, carriage and wagon, electrical, specifications.

There are also Railway Users' Consultative Committees at the zonal, regional and national level. There is a Time Tables Committee, Suburban Railway Users' Consultative Committee, Passenger Amenities Committee, Catering Supervisory Committee, Book-Stall Committee. A Public Co-operative Committee consisting of members from National Railway Users' Consultative Council and members of Parliament was formed to combat crime. Zonal Parliamentary Committees have been constituted which meet the respective General Managers of the Zonal Railways in company with the Railway Minister and the Railway Board.

There are Railway Service Commissions in Bombay, Calcutta, Allahabad and Madras.

There is a training college for railway officers and staff at Baroda and 50 Training Schools.

There is a Railway Testing and Research Centre at Lucknow and a sub-centre at Chittaranjan mainly to help in the promotion of self-sufficiency in railway stores.

* The new zone, the South Central Zone, has been set up with headquarters at Secunderabad. The capital investment of the Indian Railways as of July 1965 was Rs. 3,000 crores.

## STATISTICS

The principal statistics for the year 1963-64 are given below. The first column shows the position for all railways, the second only for Government railways :

| — | All Railways | Government Railways. |
|---|---|---|
| **Capital at charge (Rs. crores)[7]** | 2,166·49 | 1,988·24 |
| **Route kilometrage (March 31)** | 57,584·80 | 56,922·76 |
| Gross earnings (Rs. crores)[1] | 633·84* | 632·04* |
| **Total working expenses (Rs. crores)[2]** | 474·74† | 473·06† |
| Operating ratio (per cent)[3] | 74·90 | 74·85 |
| No. of passengers originating (million) | 1,887·99 | 1,867·49 |
| **Passenger k.m. (million)** | 88,942·52 | 88,526·53 |
| Earnings from carriage of passengers (Rs. crores) | 186·15* | 185·15* |
| Average earnings per passenger kilometre (Paise) | 2·09* | 2·09* |
| Freight tonnes originating (million) | 193·39 | 192·23 |
| Freight tonnes k.m. (million) | 106,905·18 | 106,840·59 |
| Earnings from carriage of goods (Rs. crores)[5] | 387·04 | 386·38 |
| Average earnings per freight tonne k.m. (Paise) | 4·36 | 4·36 |
| **Total train k.m. (million)** | 424·21 | 420·70 |
| Gross earnings per train k.m. (Rs.) | 15·9* | 15·9* |
| Working expenses[2] per train k.m. (Rs.) | 12·1† | 12·2† |
| Net earnings[4] per train k.m. (Rs.) | 3·76* | 3·79* |
| Net earnings[4] per mean k.m. worked (Rs.) | 27,574* | 27,870·00* |

([1]) 'Gross earnings' represent the true earnings in an accounting period irrespective of whether the amounts have been realised or not. They include earnings from Marmugao Harbour and also earnings awaiting realisation. ([2]) 'Working expenses' are the administrative figures of railway accounts representing true expenses of the railway system in an accounting period irrespective of whether the expenses have been disbursed. ([3]) 'Operating ratio' shown here represents the percentage of working expenses to gross earnings as defined in explanations at ([1]) & ([2]) above. ([4]) 'Freight tonnes originating, includes the tonnage of railway stores and materials carried in material/ballast trains on open lines for railway project works. These statistics were not taken into account in earlier years. ([5]) 'Earnings' from carriage goods' exclude from demurrage, wharfage etc. ([6]) 'Net earnings' represents gross earnings minus working expenses, as defined in explanation ([1]) and ([2]) above. ([7]) 'Capital at charge' includes the capital outlay on worked lines but excludes that on railway manufacturing units and miscellaneous independent projects such as the Chittaranjan Locomotive Works, the Integral Coach Factory, the Diesel Locomotive Works etc.

* Includes the element of passenger fare tax with effect from April 1, 1961. † During 1963-64, the contribution to the Depreciation Reserve Fund was Rs. 80 crores against Rs. 67 crores in 1962-63, Rs. 65 crores in 1961-62 and Rs. 45 crores in the previous years.

Other information about Indian Railways for 1963-64 is given below :—

| | |
|---|---|
| *New Lines opened to Traffic* | 407·03 k.m. |
| *Lines under Construction* | 2,206·29 k.m. |
| *Total No. of Locos (March 31, 1964)* | 11,541 |
| *No. of Steam Locos (including sentinel types)* | 10,810 |
| *No. of Diesel Electric Locos* | 414 |
| *No. of Electric Locos* | 245 |
| *No. of Diesel Hydraulic and Mechanical* | 72 |
| *No. of Passenger Carriages (excluding brake vans and Railway service vehicles) March 31, 1964)* | 29,551 |
| *Total No. of Seats (March 31, 1964)* | 1,500,612 |
| *No. of air conditioned seats* | 3,983 |
| *No. of 1st Class seats* | 103,781 |
| *No. of 2nd Class seats* | 66,761 |
| *No. of 3rd Class seats* | 1,327,087 |
| *No. of Goods Wagons (March 31, 1964)* | 329,528 |
| *Total carrying Capacity in tonnes* | 6,250,368 |
| *Total No. of Passengers Carried ('000)* | 1,867,495·6 |
| *No. of A.C.* | 198·8 |
| *No. of 1st Class Passengers ('000)* | 51,511·5 |
| *No. of 2nd Class Passengers ('000)* | 11,914·3 |
| *No. of 3rd Class Passengers ('000)* | 1,805,979·4 |
| *Total passenger k.m. ('000)* | 88,520,526 |
| *Average k.m. a passenger carried* | 47·4 |
| *Total Earnings from Passengers (Rs. in '000)* | 1,85,14,92 |
| *Earnings from A.C. Passengers (Rs. in '000)* | 1,73,25 |
| *Earnings from 1st Class Passengers (Rs. in '000)* | 13,39,71 |
| *Earnings from 2nd Class Passengers (Rs. in '000)* | 7,56,90 |
| *Earnings from 3rd Class Passengers (Rs. in '000)* | 1,62,45,06 |
| *Goods Carried ('000 tonnes)* | 192,229 |
| *Net tonne k.m. ('000)* | 106,840,589 |
| *Average k.m. a tonne of Goods was Carried* | 544·8 |
| *Total fuel consumed in terms of coal in tonnes* | 18,924,980 |
| *Value of stores imported direct (Rs. in '000)* | 28,46,85 |
| *Value of imported stores purchased in India (Rs. in '000)* | 6,53,43 |
| *Value of stores of indigenous origin (Rs. in '000)* | 2,51,69,26 |
| *Cost of Police and Railway Protection Force (in Rupees)* | 7,97,59,142 |
| *Capital at charge, Chittaranjan Works (Rs. in '000)* | 29,39,57 |
| *Capital at charge, Integral Coach Factory (Rs. in '000)* | 15,47,92 |
| *Capital at charge, Diesel Locomotive Works (Rs. in '000)* | 9,53,59 |
| *Capital at charge, D. B. K. Railway Project (Rs. in '000)* | 35,92,91 |
| *Railway Electrification (Rs. in '000)* | 76,49,79 |
| *Railway Board (Rs. in '000)* | 6,87,27 |

## STAFF

| | |
|---|---|
| *The total strength of Staff including non-gest. railways (March 31, 1964)* | 1,265,174† |
| *Class I and II Staff* | 5,874 |
| *Class III and IV Staff* | 1,269,894 |
| *Class III running staff* | 60,864 |
| *Class III Staff other than Workshop artisans and running* | 291,634 |
| *Class III Staff, Workshop artisan* | 162,884 |
| *Class IV running staff* | 26,479 |
| *Class IV other than Workshop artisan and running* | 320,490 |
| *Class IV Workshop artisan* | 202,567 |
| *The total cost of all Staff (Rs in '000)* | 2,48,46,81 |
| *The total cost of Class I and Class II (Rs. in '000)* | 6,63,84 |
| *The total cost of Class III running staff (Rs. in '000)* | 21,65,36 |
| *The total cost of Class III staff other than Workshop and artisan (Rs. in '000)* | 83,34,60 |
| *The total cost of Class III 'staff, Workshop and artisan (Rs. in '000)* | 38,74,61 |
| *The total cost of Class IV running staff (Rs. in '000)* | 5,81,01 |
| *The total cost of Class IV staff other than workshop artisan and running (Rs. in '000)* | 66,74,86 |
| *Class IV, workshop and artisan (Rs. in '000)* | 26,01,03 |
| *Total cost of workshop artisan staff, Class III or IV (Rs. in'000)* | 64,75,64 |
| *Man-days lost due to Sickness for classes other than I and II* | 18,257,615 |
| *Man-days lost due to Strikes and labour trouble by staff other than Class I & II* | 112,133 |
| *Total Man-days lost* | 18,369,748 |
| *No. of attacks by various kinds of diseases* | 478,110 |
| *No. of deaths due to various kinds of diseases* | 499 |

### Female Employees

| | |
|---|---|
| *Total No. of Female Employees* | 13,310 |
| *Class I and II Officers* | 11 |
| *Class III Staff :* | |
| *Workshop and artisan staff* | 2 |
| *Clerks* | 2,987 |
| *Stenographers* | 111 |
| *Nurses* | 1,463 |
| *Teachers* | 937 |
| *Others* | 1,296 |
| *Class IV Staff :* | |
| *Workshop and artisan staff* | 460 |
| *Other than workshop and artisan staff* | 6,043 |

## ACCIDENTS

Only one major accident took place during the year 1963-64, details of which are given below :—

On the 8th of March, 1964, 38 Down Madras-Howrah Express collided head on with goods train No. 548 Up, shortly before midnight, which was standing on the main line at Kantapur Station. As a result of the accident, 22 persons were killed and 110 injured of whom 29 received grievous injuries. The cost of damage to the railway property was estimated at approximately Rs. 6,07,000. The findings of the Additional Commissioner of Railway Safety, Eastern Circle, Calcutta, who inquired into the case was that the accident was caused by the derailment of 38 Down Madras-Howrah Express on the main line which was at the time occupied by 548 Up goods.

Accidents classified under different heads :—

*Collisions* : Collisions involving passenger trains 82 ; Collisions involving goods trains or goods vehicles 94 ; Collisions between light engines 3

*Derailments* : Derailment of passenger trains 172 ; Derailments of trains other than passenger 1,275.

*Failure of engines and rolling stock* : Failure of engines owing to faulty design, material or workmanship in the mechanical department 1,142 ; Failure of couplings and draft gear 1,471, failure of axles 4 ; Failure of break apparatus 7 ; Failure of tyre and wheels 5 ; Other rolling stock failures 320.

† Excludes Railway Board staff.

*Failure of permanent way :* Broken rails 125 ; Failure of bridges, tunnels, etc. Nil ; Flooding of portions of permanent way 33 ; Landslips 22.

*Fires :* Fire in trains, at stations and bridges 262.

*Other Accidents :* Passenger trains taking the wrong roads through points but not derailed 4 ; Train wrecking 6 ; Attempted train wrecking 74 ; Trains running into road traffic and or road traffic running into trains at level crossings 167 ; Running over obstructions 162 ; Running over cattle 1,000 ; Miscellaneous 257. Total 7,756.

*Claims :* No *ad-hoc* Claims Commissioner was appointed during the year 1963-64. Out of the total number of 200 claims on hand with the four Claim Commissioners, 48 claims were rejected and 139 settled for Rs. 4,23,661·93 Paise.

**Casualties 1962-63 & 1963-64**

| | Killed | | Injured | |
|---|---|---|---|---|
| | 1962-63 | 1963-64 | 1962-63 | 1963-64 |
| Passengers | 549 | 408 | 3,503 | 3,153 |
| Railway Servants | 316 | 332 | 23,840 | 23,981 |
| Other than passengers & Railway Staff | 548 | 507 | 508 | 524 |
| Trespassers | 4,138 | 3,977 | 2,023 | 2,176 |
| Suicides | 362 | 364 | 32 | 47 |
| Total | 5,913 | 5,588 | 29,906 | 29,881 |

## CENTRAL RAILWAY, 1963-64
(Victoria Terminus, Bombay 1)

| | | |
|---|---|---|
| *Total Route Kilometrage* | | 8,823·63 |

## RAILWAY BUDGET

(Rupees in crores)

| | Actuals 1963-64 | Budget 1964-65 | Revised Estimate 1964-65 | Budget 1965-66 |
|---|---|---|---|---|
| Gross Traffic Receipts | 632·21 | 668·00 | 660·00 | 716·00(A) |
| Working expenses net, i.e. after taking credits or recoveries | 392·13 | 414·68 | 432·68 | 457·84 |
| Appropriation to Depreciation Reserve Fund | 80·00 | 83·00 | 83·00 | 85·00 |
| Appropriation to Pension Fund | — | 19·00 | 11·50 | 12·00 |
| Net Miscellaneous Expenditure (including cost of works charged to revenue) | 14·89 | 17·22 | 15·81 | 16·02 |
| Total : | 487·01 | 533·90 | 542·99 | 570·86 |
| Net Railway Revenue | 145·19 | 134·10 | 117·01 | 145·14 |
| Payments to General Revenues : | | | | |
| (*a*) Dividend on Railway Capital-at-Charge (4·25 per cent for 1962-63, 4·50 per cent for 1963-64 and 5·75 per cent on fresh capital for 1964-65 and 1965-66) | 83·45 | 90·73 | 92·02 | 103·40 |
| (*b*) In lieu of Passenger Fare Tax | 12·50 | 12·50 | 12·50 | 12·50 |
| NET SURPLUS | 49·24 | 30·87 | 12·49 | 29·24 |
| Operating Ratio (per cent) | 74·7 | 77·4 | 79·9 | 77·5 |

(*A*) This includes Rs. 21 crores expected as additional revenue, as a result of the adjustments proposed in fares and freight rates, made up of Rs. 13·50 crores under passenger, Rs. 6·90 crores under goods and Rs. 60 lakhs under other coaching earnings.

**The Budget Estimates of working expenses under different demands for 1965-66 are given below :—**

| | (In crores of rupees) |
|---|---|
| Demand No. 4.—Administration | 52·70 |
| Demand No. 5.—Repairs and Maintenance | 167·75 |
| Demand No. 6.—Operating Staff | 106·79 |
| Demand No. 7.—Operation (Fuel) | 107·78 |
| Demand No. 8.—Operation other than Staff and Fuel | 32·84 |
| Demand No. 9.—Misc. Expenses | 30·05 |
| Demand No. 10.—Labour Welfare | 20·17 |
| TOTAL | 518·08 |
| Credits or recoveries | —60·24 |
| Net | 457·84 |

| | |
|---|---|
| Appropriation to Depreciation Reserve Fund | 85·00 |
| Appropriation to Pension Fund | 12·00 |
| Payments to Worked Lines | 0·16 |

**Other categories of expenditure in Rs. lakhs :**

Rolling stock (excluding stock provided as part of Electrification Projects) : 127,11 ; Machinery and Plant : 3,86 ; Track Renewals : 45,27 ; Bridge Works : 5,81 ; Traffic Facilities : 73,71 ; Signalling and Interlocking works, etc. : 10,99 ; Workshops (including production units,namely, Diesel Locomotive Works, Chittaranjan Locomotive Works and Integral Coach Factory, but excluding those provided as part of Electrification Prajects), 14,23; Electrification (includes also Electric Rolling Stock for the traffic level with reference to which Electrification is sanctioned) : 24,89 ; Other Electrical Works : 1,61 ; Staff Quarters : 7,65 ; Amenities for staff : 3,26 ; Passenger and other Railway Users' Amenities : 3,38 ; New Lines ; 40,20 ; Restoration of dismantled lines :— ; Other specified works : 4,17 ; Purchase of Railway Lines : 83 ; Investments in Government Industrial Undertakings—Road Services : 3,21 ; Increase or decrease in balances under :—(*a*) Stores, Suspense :—11,45; (*b*) Manufacture Suspense : 2,24 ; (*c*) Miscellaneous Advances :—303 ; Credits or recoveries : (*a*) Credits for released materials :—11,30 ; (*b*) Other credits:—1,14 ; Total : 345,50 ; Probable Savings :—50 ; Net: 345,00.

**Some individual items on the receipts side are given below :**

| | (In crores of rupees) Budget Estimate 1965-66 |
|---|---|
| Passenger Earnings— | |
| Upper | 26·60 |
| Third | 194·90 |
| Other Coaching Earnings | 34·60 |
| Goods Earnings | 441·90 |
| Other Sundry Earnings | 19·00 |
| Total Earnings | 717·00 |
| Suspense | — 1·00 |
| Gross Traffic Receipts | 716·00 |

The programme of new acquisitions (i.e.) items included in the Budget for the first time includes provision for the following units of Rolling Stock : (*a*) Locomotives—(*i*) Steam 220 ; (*ii*) Diesel 182 ; (*iii*) Electric 10 ; (*b*) Boilers 36 ; (*c*) (*i*) Carriages 1,161 ; (*ii*) Rail Cars—; (*iii*) Electric Multiple Units—; (*d*) Wagons (in terms of 4-wheeler) 31,954.

### BUDGET SPEECH

Below we give relevant points from the speech which the Railway Minister Mr. S. K. Patil made while presenting the Railway Budget for 1965-66 on February 18, 1965.

An increase in passenger fares and a selective enhancement of freights on heavy merchandise, accompanied by a reduction in a few high-rated commodities, were proposed in the Railway Budget for 1965-66.

With gross traffic receipts placed at Rs. 716 crores and expenses at Rs. 570·86 crores, the net Railway revenue for next year is estimated to be Rs. 457·84 crores and the net surplus (after making payments to general revenues and to the States in lieu of passenger fare tax) at Rs. 29·24 crores.

The new levies are expected to net in Rs. 21 crores including Rs. 6·90 crores under goods, Rs. 13·50 crores under passenger and Rs. 60 lakhs under "other coaching" earnings.

The increases on freight rates will be between 4 per cent. and 7 per cent. on heavy merchandise like iron and steel, cement, stone, limestone and ores and about 8 per cent. on non-dangerous petroleum products. The increases are limited to commodities which bear low rates at present and move in bulk.

These increases were necessary, the Minister pointed out, to meet at least in part the additional commitments. These had already increased in 1964-65 by Rs. 18 crores over the level postulated in the budget, on various accounts, including the effect of the increase in dearness allowance announced in May, 1964, and again in January, 1965, following the Das Commission recommendations, and the educational concessions introduced from May, 1964.

## WAGE BILL

The wage bill and total expenses would inevitably be at a still higher level in 1965-66 on account of the impact of the Das Commission recommendations for full 12 months instead of only six months in the current year.

### Revised Estimates 1964-65

In presenting the revised estimates for 1964-65, the Railway Minister stated that during the year the railways had provided all the goods transport needed and added substantially to the number of passenger trains. Although the railways had prepared themselves to move 17 million tonnes of more goods traffic in 1964-65 than in the previous year, the extra traffic did not materialise to that extent owing to slackening of demand for transport.

Coal traffic during the first nine months of this year was nearly less than 2½ million tonnes in comparison with the corresponding months of last year. Raw materials traffic to steel plants also dropped slightly during this period while the increase of export ore was hardly one-fourth of the extra one million tonnes anticipated.

The increase in other revenue earning traffic of about 1½ million tonnes up to December was much less than the 5 million additional tonnes envisaged for this year. "There have been signs of revival of traffic in the last few weeks but we may at the best close the year with an increase of about 3 million tonnes over last year," the Railway Minister observed.

Under the circumstances, a shortfall of about Rs. 25 crores was likely on the budget estimates of Rs. 432 crores for goods earnings. This has, however, been compensated to an appreciable extent by a heavy increase in passenger earnings, which were likely to touch the figure of Rs. 200 crores against the estimated Rs. 184 crores. Other coaching earnings and sundry earnings were expected to approximate closely to the budget estimates. In the net, traffic receipts were placed at Rs. 660 crores, which was Rs. 8 crores, or about 1¼ per cent. less than the budget.

## WORKING EXPENSES

Working expenses, on the other hand, have increased by Rs. 18 crores over the budget of Rs. 414·68 crores and are now estimated at Rs. 432·68 crores. This is almost entirely attributable to the increase in the wage bill during the year.

There have been two revisions in the rates of dearness allowance since the budget—the one announced in May, 1964, with effect from February 1, 1964 and the other last month with effect from October 1, 1964. Their impact on the working expenses for the current year is Rs. 6·58 crores and Rs. 8·2 crores respectively.

## STAFF COSTS

Taken together with the post-budget Central Government scheme for reimbursement of school fees, the cost of these measures is Rs. 16 crores even in the current year. In addition, there has been a revision of the rates of running, mileage and over-time allowances at a cost of Rs. 1·44 crores. In all, the element of staff costs in working expenses has gone up by Rs. 19 crores.

There have been four successive additions to the cost of coal during the year and with the sales tax and excise duty on it, this accounts for an increase of Rs. 1·19 crores. There have also been increases in civil engineering works undertaken for the protection of the track, restoration of the Pamban bridge, extra costs on retrospective upward revision of the tariff for elecric power for traction, 'on account' payment of Rs. 1·5 crores for the rental for telegraph and telephone wires and other minor sundry items.

Although these have been partially offset by the reduction due to economy measures and lower expenditure due to the level of traffic being below anticipation, the net effect is an increase in working expenses of Rs. 18 crores for which supplementary demands are being presented. While there was a reduction of Rs. 1·5 crores in the allotment for open line works, and lesser appropriation to the pension fund based on actuarial calculations using recent data about options by staff, the dividend payable to general revenues increased by Rs. 1·3 crores, owing to higher capital expenditure, resulting in shrinkage of the surplus from Rs. 30·87 crores anticipated in the budget to Rs. 12·49 crores only.

## WORKS EXPENDITURE

In the context of the current economic situation, the programme of works and other capital expenditure has been fixed at a level of Rs. 365 crores, which is Rs. 5 crores less than what was provided for in the budget and Rs. 15 crores less than what was further contemplated.

In recent years, substantial improvements in operation and increase in efficiency enabled the railways to absorb a fair proportion of the increase in the cost of staff, capital equipment and stores. Better utilisation of locomotives, for instance, has reduced the number of goods locomotives required for moving one million net-tonne kilometres per day from 25 in 1950-51 to 20 in 1963-64. On the metre gauge the number has come down from 65 to 42.

Wagon utilisation improved by over 36 per cent. resulting in saving in additional capital investment for doubling traffic capacity. The incentive scheme in railway workshops and the rationalisation coupled with mechanisation of traffic accounting and statistics are similar instances of obtaining larger output by keeping down at the same time the number employed.

The financial results for 1963-64 showed an improvement of over Rs. 5 crores in passenger earnings and over Rs. 3½ crores in goods earnings, as well as a reduction of Rs. 1·3 crores in suspense awaiting realisation, bringing the gross traffic receipts to nearly Rs. 10 crores—1·6 per cent. more than the revised estimates.

On the expenditure side, there was a marginal saving of Rs. 1·2 crores or about one-fourth of one per cent. on working expenses and a saving of about a crore of rupees on works charged to revenue, which was virtually offset by an equivalent increase in the dividend payable to general revenues. The year's working thus showed a surplus of Rs. 49·24 crores (which was credited to the development fund) as against the revised estimate of Rs. 37·75 crores.

Turning to the budget estimates for 1965-66, the Minister said that an increase of about 10 million tonnes in originating revenue traffic had been tentatively estimated. It included half a million tonnes of finished steel and pig iron, about 2½ million tonnes more of raw materials for steel plants, including coal, a million tonnes more of export ores and another million tonnes of cement. At the present levels of freight goods earning on this extra traffic would be about Rs. 28 crores and the total of goods earnings would be about Rs. 435 crores.

## PASSENGER EARNINGS

In view of the faster rate of growth of passenger traffic this year, an increase of about four per cent. could be postulated in the budget year. At the present level of fares, this would mean an increase of Rs. 8 crores in passenger earnings. On this basis, gross traffic receipts would be Rs. 696 crores—Rs. 36 crores more than the current year.

From these increased earnings expected in 1964-65 have to be met the additional dividend on the increased capital (Rs. 11½ crores), the additional depreciation provision (Rs. 2 crores) and the additional expenditure on maintaining the increased assets and operating the additional services to earn the estimated Rs. 36 crores (Rs. 18 crores approximately on the assumption of no increase in the principal items of cost such as fuel and per capita staff costs).

In fact, however, provision has to be made in 1965-66 for the full 12 months for the cost of educational concessions introduced on May 1, 1964, and for the increase in dearness allowance following the Das Commission's recommendations which have been in operation only for half of the current year. These alone add Rs. 9 crores to the working expenditure of 1965-66 over and above the level of 1964-65.

These increases add up to over Rs. 40 crores on the current year, so that, on this reckoning, the surplus at the end of the year will be only Rs. 8 crores. This is roughly one-fourth of the annual expenditure of about Rs. 30 crores to be met from the development fund that can be fed only from surpluses. A surplus of Rs. 35 crores has to be earned in order to finance works chargeable to the development fund and to enable the railways to maintain a reasonably satisfactory return on the present enhanced capital.

On the other hand, although a surplus of Rs. 30 crores was budgeted for ultimately no more than Rs. 12·49 crores is now expected this year. It would be even less in the normal course next year. This underlines the need for adopting suitable means for raising the surpluses to a satisfactory figure and explains the proposed increase in freight rates and passenger fares.

The suggested changes in fares and freight, the Minister pointed out, took into account the extra commitments today and had been deliberately devised to be low enough for the railways to absorb part of the shock themselves, passing on to the users substantially less than the additional burden falling on the railways.

There is no cushion left now with the result that if costs rise further beyond the control of the railways and their capacity to absorb them, it may become necessary to make further adjustments to ensure the financial soundness of the railways.

The Minister, however, assured the House that in such an eventuality again only the minimum and unavoidable additional burden would be passed on to the railway users.

### Vigilance Organisation

The Vigilance Organisation of the Railway Board maintained close liaison with the Administrative Vigilance Division of the Ministry of Home Affairs as well as the Central Bureau of Investigation which came into being in the beginning of the year 1963-64, with the erstwhile Delhi Special Police Establishment as a division of the bureau. The Central Investigating Agency of the Vigilance Directorate investigated 514 cases during the year, of which 245 cases were referred to the Railway Administrations for taking departmental actions. At the beginning of the year 2,246 cases were pending with the Railways and 3,923 cases were registered during the year. Out of the total of 6,169 cases 1,841 were dropped as the allegations lacked substance

and too minor. In 1,691 cases actions were finalised, leaving a balance of 2,637 cases to the end of the year.

As a result of departmental actions by the zonal railways the number of officers and staff involved were as follows :—

Dismissal from service 30; Removal from service 95; Compulsory retirement 3; Reduction 89; Stoppage of increments/passes etc. 669; Other punishments 267.

Having indulged in irregular practices during the year 5 contractors have been blacklisted.

## PASSENGER SERVICES

The addition during the year, of over 28,500 more passenger train kilometres a day, is more than twice the average annual increase during the last ten years. 54 new trains and 61 new suburban trains were introduced on the Broad Gauge and the run of 40 trains and 33 suburban trains extended. Among the new trains introduced last October is the Taj Express, a vestibuled train with coaches specially designed for elegance and comfort, which covers the 195 kilometres between Delhi and Agra in three hours. Bookings for sightseeing tours by road, of Agra and Fatehpur Sikri, can be made along with train tickets, enabling tourists to visit these historic cities and return to Delhi comfortably in a day. On the Metre Gauge, 69 new trains including two suburban trains were introduced, and the run of 23 trains, including one suburban train extended. Four new trains were added on the narrow gauge. Proposals have been approved, or are under consideration, for a further large increase in passenger trains in the next timetable. A total of 2,460 fans were fitted in the older Third Class coaches to bring them on a par with the new coaches in which fans are part of the original equipment. At the end of October last, 250 Third Class Sleeper coaches were running on the Broad Gauge and 124 on the Metre Gauge, and it is hoped to raise these numbers to 340 sleeper coaches on the Broad Gauge and 257 on the Metre Gauge by the end of this year. About 120 more Broad Gauge Third Class sleepers are programmed to be added next year.

## MODERNISATION PLANS

The modernisation of signalling systems, the extension of automatic signalling, the replacement of semaphore signals by colour light signals, track circuiting and the installation of route relay interlocking at a number of important stations are improving the factor of safety.

The sales turn-over of departmental catering rose to nearly Rs. 4 crores in 1963-64, and for the first time showed a profit, though small. Modern equipment, like refrigerators, hot boxes, gas or electric cooking ranges, etc. is being provided, and dining car waiters are being given more uniforms of good quality to improve their turnout.

## LABOUR RELATIONS

Relations with organised labour remained generally cordial, and many matters of importance to the staff were discussed and settled at the quarterly meetings of the Permanent Negotiating Machinery with the two Railway Labour Federations. Joint Committees of officers and staff also functioned at various levels for the improvement of operational and administrative efficiency, while Production Committees in which labour is associated with management in selected workshops, proved useful in improving the quality and quantity of production.

## STAFF WELFARE

During 1963-64, the daily average attendance of out-patients at Railway hospitals and health centres increased by over 10 per cent and the annual cost per head of free medical and health services rose from Rs. 71·5 to Rs. 74·9, reflecting *inter alia* the higher cost of medicines and diet charges, and the commissioning of three hospitals and 18 health units and of 675 hospital beds.

14,704 staff quarters were constructed during 1963-64 and it is expected to add 17,500 more staff quarters during 1964-65 and an equal number in 1965-66, raising the total number of staff quarters to nearly 4,76,000. The substantial subsidy on railway quarters is increasing every year with higher initial cost of construction and the rise in the interest rate and in the cost of repairs and maintenance.

During 1963-64, about 3,300 staff used the 16 holiday homes in the country. Twelve new primary schools were opened, one middle school upgraded to high school and a high school raised to higher secondary standard last year. There are 731 railway schools functioning now, including two intermediate colleges. 2,709 Railway scholarships involving an expenditure of Rs. 8·67 lakhs were current during 1963-64. The Central Government scheme for the reimbursement of tuition fees paid by employees for children in middle, high or secondary schools is another amenity added during the year, at an annual cost to the Railway, roughly estimated at about Rs. 1½ crores.

## TRAINING STAFF

### Central Institutions

"In-plant" training facilities exist on the different Zonal Railways and Manufacturing Units. There are in addition a number of central training institutions like the Railway Staff College, Baroda, for gazetted officers, the Training Centre at Jamalpur for apprentice Mechanical Engineers, Advanced Permanent Way Training School, Poona, the Indian Railway School of Signal Engineering and Telecommunications, Secunderabad, Diesel Training Centre, Gaya and the Loco Training School for the Operation and Maintenance of A.C. Electric Locomotives at Asansol. The Railways also continue to take advantage of the offer of training facilities abroad, extended under the various technical aid plans or by foreign Governments and agencies.

Facilities continue to be afforded to the Railway employees for undergoing training in different Workers' Education Centres.

There were 238 railway installations such as major workshops, electrical power houses and sub-stations, printing presses etc. governed by the Factory Act, 1948. The number of staff of different categories including casual labour in these factories was 196,120. 101 canteens were also provided to them.

## REVIEW OF 1963-64

The main items are given in the table at the beginning of this article. Below we give some more points. The comparison whenever made is with figures for 1962-63 :—

The Government Railways carried 13·46 million tonnes more of originating freight traffic and 118 million more passengers than in 1962-63.

The addition in goods traffic, in terms of tonne kilometres is, to the extent of 148 million.

The number of passengers originating as well as passenger kilometres in Government Railways increased from 1,750 to 1,867 million and from 83,991 to 88,527 million respectively.

### Transportation

The traffic as a whole, passenger and goods, increased substantially over the previous year. The passenger traffic increased by 6·74 per cent in terms of passengers originating and 5·40 per cent in terms of passenger kilometres. The additional goods traffic originated during 1963-44 was 13·5 million tonnes and in terms of net tonne kilometre increase was 6·10 per cent.

*Punctuality :* The percentage of passenger and mixed trains not losing time to the total number of trains run on all Govt. Railways during 1963-64, is given below (Figures in brackets are for 1962-63).

*Broad Gauge :* All trains (87·52) 85·2; Mail and important through trains (85·49) 85·02; Mixed trains (90·17) 88·83; Suburban (94·86) 95·91; Other passenger trains (81·67) 81·82. Further improvement in the punctuality of trains has been hampered by rains, floods and pulling of alarm chains.

During 1963-64 there were 84,333 cases of alarm chain pulling against 72,567 cases in the previous year.

The number of wagons loaded on the broad gauge during 1963-64 was 7,570,029, an increase of 510,831 wagons or 7·38 per cent over 1962-63. On the metre gauge the figure was 3,783,702, an increase of 205,747 wagons or 5·74 per cent more than 1962-63.

There was considerable increase in the case of wagons. The number of public service wagons in use by all Indian Railways at the end of 1963-64 in the broad gauge wagon pool was 271,980, that is 18,979 wagons more than that of the previous year, representing 7·50 per cent.

The number of public service wagons in use in the metre gauge wagon pool at the end of the year was 101,392 that is, 4,248 wagons or 4·37 per cent more than that of 1962-63 figures.

### Claims, Compensations and Refunds

The number of new claims received this year, including some reopened, was 523,351 which compares with 524,741 in last year. The number of claims settled was 530,062 as against 536,301 during the previous year and the number outstanding at the close of the year was 28,098 against 34,809 at the end of 1962-63. The net amount paid as compensation was Rs. 4·20 crores for goods lost or damaged as against Rs. 3·56 crores in 1962-63.

During the year 1963-64, 17,905 fresh suits were instituted against 20,643 in 1962-63. At the end of 1962-63 the number of suits pending was 20,693. Of all the suits 9,368 were settled out of court, 4,907 were dismissed and 4,805 were decreed, leaving a balance of 19,518 at the end of the year.

## COMPLAINTS

At the beginning of the year 1,428 complaints were pending disposal and 42,869 complaints were received during the year. Of these 42,639 were disposed of in the course of the year. The average time taken in the disposal of a complaint dropped from 39·2 days to 38·9 days.

### Security Measures

During the year 3,972 criminals were arrested. Fire was opened on 31 occasions against armed and desperate wagon looters, which resulted in the death of 12 criminals and injuries to 7 during the year. In a number of cases the Central Crime Bureau succeeded in apprehending miscreants red-handed by surprise raids they organised. The number of cases of theft of booked consignments dropped from 2,180 in 1962-63 to 2,016 in 1963-64. 3,466 cases of pilferages involving a loss of Rs. 1,30,150 were registered during the year, against 5,981 cases involving a loss of Rs. 4,99,324 in 1962-63. The stolen property amounting to Rs. 3,42,258 was recovered during the year, against Rs. 2,69,216 in the previous year.

In 47 cases the dog squads of the Railway Protection Force were utilised and 74 persons were arrested.

In the year 1963-64 the Fire Service Organisation of the Railway Protection Force dealt with 1,620 cases of fire within railway premises against 1,505 cases during the previous year.

## NEW LINES

New lines totalling 407 km. in length were opened to public traffic on Indian Railways during the year 1963-64. New lines totalling 2,206 km. were either under construction or sanctioned during the same year. Surveys for 1,455·4 km. of new lines were also ordered.

New lines opened to the public during 1963-64.

## EXTERNAL ASSISTANCE

An amount of $67·5 million (Rs. 32·14 crores) sanctioned as a loan by the International Development Association, an affiliate body of the World Bank, was drawn by Sept. 30, 1964.

An amount of $15·8 million (Rs. 7·5 crores), for the purchase of 54 broad gauge diesel locomotives, was sanctioned by the Agency for International Development of the U.S. Govt. in the financial year of 1963-64 and another loan of $19 million (Rs. 9·05 crores) was sanctioned from the Export-Import Bank of Washington for the purchase of plant and machinery for the manufacture of 29 locomotives at the Diesel Locomotive Works, Varanasi. A further loan of $7·2 million (Rs. 3·4 crores) for the purchase of 25 broad gauge diesel locomotives was sought from the United States Agency for International Development and was sanctioned in the financial year 1964-65.

**Passenger Amenities :** An amount of Rs. 2·37 crores was incurred, on provision for amenities on station premises and trains for the convenience of passengers and other railway users, during 1963-64. The facility of sleeping accommodation in third class was extended to five more pairs in 1963-64 and brought up the total to 46 pairs—36 on the broad gauge and 10 on the metre gauge.

*Improved lower class coaches :* All passenger coaches are at present built indigenously to the latest design. 310 broad gauge, 176 metre gauge and 52 narrow gauge lower class coaches were placed in service during the year, apart from 172 broad gauge, 37 metre gauge and 7 narrow upper class composite coaches, as well as 174 broad gauge electric multiple unit coaches containing III class accommodation.

*City Booking Offices, Agencies, Out-agencies, Street Collection, etc. :* For the convenience of the travelling public and trade 12 out-agencies—three on the Central, two on the Northern, one on the N-E Frontier, two on the Southern and four on the Western Railways—were opened during the year. 34 Out-agencies—one on Central, five on the Northern, one on the North Eastern, 20 on the Southern, four on the South Eastern and three on the Western Railways—were closed. One city booking agency on the Southern Railway and two on the South Eastern Railway were opened while one was closed on the South Eastern Railway.

Street collection and delivery services were introduced at Trivandrum and Madurai Cities while street collection and delivery services at Quilon, Bangalore City, Bangalore Cantonment and Bombay Carnac Bridge Goods Depot were discontinued due to lack of traffic.

*Catering arrangements :* Departmental catering obtained at 95 stations and in 23 pairs of passenger trains. At other stations catering arrangements continued to be managed by the contractors, numbering about 5,000. Steps were taken to improve the quality of the food and service.

The sale of fresh, cheap, hygienic food packets was continued at important stations, for the convenience of passengers. Milk bars were opened at stations where good milk was locally available.

*Steps to alleviate overcrowding in trains :* An overall provision of 15 per cent increase in the passenger transport capacity has been made in the Third Plan, and 1,734 broad gauge and 1,762 metre gauge additional passenger carrying coaches have been provided to cater for additional traffic to bring down the intensity of overcrowding in the trains.

The following are the main heads of passenger amenities with expenditure (Rs. in thousands): Water supply at stations, etc. 18,35; Retiring rooms and waiting accommodation etc. 20,84; Refreshment rooms and vendors' stalls of all description 4,42; Provision of latrines 14,86; Extending, raising and widening, surfacing and other improvements 85,51; Over-bridges, subways and extensions 14,20; Bathing facilities at stations 59; Improvement to existing carriages such as fans etc. 20,48; Improved lighting and provision for fans on stations, platforms and

waiting rooms, etc. 16.84 ; Opening of new flag stations or conversion of halts into flag stations 3,29 ; Miscellaneous improvements, namely, provision of seats, hedges, etc. 9,54.

*Electrification :* Good progress was made in the introduction of 25 kv AC electrification traction on various sections of the Eastern & South Eastern Railways during the year. Electrification work was completed on 189 route kilometres (equivalent to 462 track kilometres). The total length of track electrified including the above during the previous and current Plan periods aggregates to 1,417 kilometres (150 route kilometres on DC and 1,267 route kilometres on 25 kv AC) against the total of 2,864 route kilometres programmed for electrification by the end of the Third Plan.

## TOURIST TRAFFIC

For the convenience of tourists retiring rooms were provided at Adra, Agra Cantonment, Balugan, Harpalpur, Hardoi, Hazaribagh Road, Ongole, Puri and Sonepore. Two of the double-bed retiring rooms provided at Agra Cantonment and one double-bed retiring room each at Vijayawada and Madurai junction are air-conditioned.

"Travel as You Like" tickets over the Indian Railway system, on a lump sum rate of Rs. 560 available for 30 days in the airconditioned coach (and in Class I where Aircondition is not available) continued to be issued. Usually a concession of 15 per cent on airconditioned class is allowed for tourists.

**Purchases :** The payment on the account of purchase of equipment and stores by the railways during 1963-64 amounted to Rs. 286·69 crores, against Rs. 266·99 crores in 1962-63.

**Staff Benefits :** The relations between the Railway Administration and labour were generally cordial. The permanent negotiating machinery for settlement of disputes continued to function satisfactorily for the year.

*Permanent negotiating machinery for settlement of disputes :* At the first tier of the machinery, *viz.*, on the zonal railways, 32 meetings were held at the headquarters' level and 819 meetings at the district/divisional/workshop level during the year. In all 16,794 items were discussed in these meetings and over 87 per cent of these items were finalised within one year.

At the second tier of the machinery, at the Railway Board's level 7 periodical meetings were held with the National Federation of Indian Railwaymen and All India Railwaymen's Federation. 156 items were discussed at these meetings and nearly 93 per cent of these items were finalised within the year 1963-64.

Joint Committees of management & staff and offices also continued to function satisfactorily. At the close of 1963-64 over 460 joint committees were functioning on the railways. For promoting better understanding between the administration and staff, Staff councils advisory committees for welfare works are also functioning. 295 such councils held 762 meetings during the year.

The advisory committee for welfare works on each railway, at which representatives of labour are also associated in the formulation of welfare schemes, functioned satisfactorily.

*Compensation :* During the year an amount of Rs. 9,73,464 was paid as compensation in the case of 257 employees who died in accident while at service. Similarly an amount of Rs. 3,93,850 and 3,99,077 were paid to 489 persons who met with permanent disablement and 9,588 persons with temporary disablement respectively as compensation.

*Service Condition :* The age of compulsory retirement of railway servants was raised from 55 years to 58 years from Dec. 1, 1962.

*Staff Quarters :* During the year 1963-64, 14,704 staff quarters were constructed on Indian Railways. The details of the quarters are as follows : Type I : 8,880 ; Type II : 5,165 ; Type III : 411 ; Type IV : 139 and Barracks 154

*Medical Department :* Hospitals 86 ; Health Units 544; Beds (hospitals and health units) 7,566 ; Beds reserved for T.B. patients in Railway hospitals 586; Beds in T.B. sanatoria 1,138 ; Cost of medical services Rs. 626.21,000 ; Cost of health services Rs. 341,39,000 ; Number of doctors 2,023 ; Number of operations performed 203,008.

**Appointments :** During 1963-64, 402 appointments both permanent and temporary were made in the gazetted cadre by direct recruitment, while 86 promotions were made from class II service to class I services.

Out of the 402 appointments 181 were in the Civil Engineering department and 28 were in the Transportation and Commercial department in the Gazetted Railway Services.

The Railway Service Commission recommended 28,097 candidates for appointment, 2,980 for technical side and 25,117 for the non-technical side of the railway.

During the year 390 officers received training in the Railway Staff College at Baroda.

Arrangements were made for the briefing of 71 officers and 78 non-gazetted staff before sending them abroad for training.

The total number of employees belonging to Scheduled Castes and Scheduled Tribes at the end of 1963-64 on the Govt. Railways, including the office of the Railway Board and the staff employed on construction works respectively were as follows (Figures for Sch. Tribes are given in brackets) :—Class I 64 (3) ; Class II 61 (8) ; Class III 40,526 (4,060) ; Class IV 1,58,134 (26,397).

Scheduled Castes and Scheduled Tribes candidates recommended by the Rly Service Commissions for Class III category during the year were 4,189 and 2,174 and for Class IV category were 4,279 and 233 respectively.

**Commercial Advertising :** The income from this source rose from Rs. 31,93,151 in 1962-63 to Rs. 39,11,298 in 1963-64.

## TICKETLESS TRAVEL

Number of passengers detected travelling without ticket 9,006,051 ; Amount of fare and excess charges realised Rs. 2,23,76,056 ; Number of passengers who paid the fare and excess charges on demand 8,646,544 ; Number of passengers prosecuted 241,185 ; Number of cases of unbooked and improperly booked luggage 1,221,331 ; Amount realised against unbooked and improperly booked luggage 33,43,428.

## MISCELLANEOUS

*Interchange with Pakistan :* The Indian Railways made over to the Pakistan Railways 71,772 broad gauge wagons (including 61,979 loaded) and 16,162 metre-gauge wagons (including 10,524 loaded). A total of 72,202 broad-gauge wagons including 23,173 loaded, and 16,055 metre-gauge wagons, including 15,731 loaded, were received. The Pakistan Railways were a creditor to the Indian Railways to the extent of an average of 129 wagons daily in respect of broad-gauge, and a debtor to the extent of 198 wagons daily in respect of the metre-gauge.

During the year, 7,104 railway employees qualified in Hindi, 271 in Hindi type-writing and 66 in Hindi Shorthand. 325 Hindi teaching centres were functioning on the Railways towards the close of the year and 25,034 employees were booked for training in Hindi, 199 in Hindi type-writing and 112 in Hindi shorthand.

## THIRD FIVE YEAR PLAN

The Railway capital programme placed at Rs. 1,477 crores was increased to Rs. 1,581·50 crores during the year and was further revised and raised to Rs. 1,642·56 crores.

*Freight Traffic :* Freight traffic rose from 160·5 million in 1961-62, 178·8 million in 1962-63 to 192·2 million in 1963-64.

*Passenger Traffic :* During the first three years of the Plan suburban traffic has increased by 28·9 per cent (in term of passengers originating) over the level of 1960-61, and non-suburban traffic by 8·39 per cent.

The extension of Rangapara-North Lakhimpur line to Murkongselek and the extension of the broad gauge line from Siliguri to Jogighopa and the new lines required for the export of iron ore *viz.*, the Bailadilla-Kottavalasa and the Hospet-Guntakal broad gauge lines are given high priority in the Plan for the completion of the same at the target dates.

The electrification of lines taken up by the end of the Second Plan and at the beginning of the Third Plan will, by and large be completed.

All other projects and schemes approved till 1963-64 are making satisfactory progress.

*Chittaranjan Locomotive Works :* The Chittaranjan Locomotive. Works produced 117 WG class and 55 WP class broad gauge steam locomotives and 2 DC and 2 AC gauge electric locomotives during 1963-64. The total output of steam locomotives since inception was 1,691 and that of electric locomotives was 23 as at the end of 1963-64. The factory manufactured 186 locomotive boilers during the year. Number of boilers manufactured upto 31st March 1964 was 1,558.

*Diesel Locomotive Works :*

By the end of March 1964 it was to complete the work of 3 locomotives from imported components, as per the schedule ; but actually four were dispatched from the works.

*Level Crossings :* The Govt. Railways had 38,954 level crossings at the end of the year. In replacement of level crossings, 12 over/under bridges were constructed during 1963-64 and 22 were in progress. 275 unmanned level crossings were manned and 135 manned level Crossings were provided with lifting barriers in place of swing gates.

*Bridges :* The Railways had 96,212 bridges at the end of the year 1963-64. Out of this 7,425 were major bridges. During this year more than 1,000 bridges were rebuilt.

Third Plan provision and actual expenditure during 1963-64.

# OVERSEAS COMMUNICATIONS SERVICE

INDIA'S Overseas Telecommunications networks of telegraph, telephone, radio-photo and telex services are managed by the Overseas Communications Service. The administrative Head of the department is the Director-General with headquarters at Bombay.

The Service has 4 gate-way Centres for handling international communications at Bombay, Calcutta, New Delhi and Madras. The network consists of submarine telegraph cable systems from Bombay and Madras and wireless telegraph and radio-telephone systems from all the 4 Centres. The submarine telegraph cables as such are owned and maintained by Cable & Wireless Limited, London.

As on 11th March 1964, the Overseas Telecommunications network of India consists of :—

*Direct Wireless Telegraph Services :*—With Afghanistan, Australia, Britain (4 independent circuits), Burma, China (2 links : Peking & Shanghai), Egypt, France, Federal Republic of Germany, Indonesia, Iran, Iraq, Italy, Japan, Malaysia, Poland, Philippines, Roumania, Switzerland, Thailand, U.S.A. (2 independent circuits), U.S.S.R., Vietnam (North), Vietnam (South) and Yugoslavia.

*Direct Radio-Telephone Services :*—With Aden, Afghanistan, Australia (2 independent circuits), Bahrain, Britain (4 independent circuits), Burma (2 links from Poona & Calcutta), China, East Africa, Egypt, Ethiopia, France, Federal Republic of Germany, Hongkong, Indonesia, Iran, Iraq, Japan (2 independent circuits), Malaysia, Poland, Saudi Arabia, Switzerland, U.S.S.R. and Vietnam (South).

*Direct Radio-photo Services:*—With Britain, China, France, Federal Republic of Germany, Italy, Japan, Poland and U.S.S.R. All these services, with the exception of those with China and Poland, are operated directly from Bombay, Calcutta as well as New Delhi. The services with China and Poland are operated from New Delhi only. Through these direct connections with international trunk routes, telegraph services are available with practically all the countries of the world. Similarly telephone service is available with a large number of countries in the world as given below.

*Switched Radio-Telephone Services :*—Abadan, Algeria, Argentina, Asmara, Austria, Balearic Islands, Barbados, Belgium, Bermuda, Brazil, British Guinia, Bulgaria, Burundi, Canada, Canary Islands, Central Africa Republic, Ceuta, Chad Republic, Chile, Congo, Cuba, Costa Rica, Cyprus, Czechoslovakia, Denmark, Doha, Dubai, Faroe Islands, Federal Republic of Germany, Fiji, Finland, France, French Sahara, Forbisher Bay (Canada), Gabon Republic, German Democratic Republic, Ghana, Gibraltar, Goosbay Labrador (Canada), Greece, Guatemala, Hawaii, Honduras, Hungary, Iceland, Irish Republic (Eire), Israel, Italy, Jamaica, Jordan, Kenya, Kuwait, Lebanon, Leeward Islands, Libya, Luxembourg, Malawi, Mauritius, Mongolian People's Republic, Manila, Mexico, Morocco, Muscat, Netherlands, Newfoundland, New Zealand, Nicaragua, Nigeria, Norway, Panama Philippines, Poland, Qatar, Rhodesia, Roumania, Ruanda, Ryukyu Islands, Sarawak, Sierra Leone, Spain, Spanish North Africa, South Africa, South West Africa, Sudan, Sweden, Switzerland, Tanzania, Tangier, Trinidad, Tunisia, Uganda, U.A.R., United States of America, Vatican City, West Irian, Windward Islands, and Yugoslavia and Ocean Liners which are equipped with the necessary equipment.

Radio-photo service is available with 22 other countries as shown below :

*Switched Radio-photo Services :*—Australia, Belgium, Canada, Czechoslovakia, Cyprus, Denmark, Egypt, Finland, France, Germany, Greece, Ghana, Italy, Kingston Jamaica, Malaysia, Nigeria, Norway, Portugal, Roumania, Sweden, South Africa, Switzerland, Yugoslavia and U.S.A.

*Multi-Address Press Broadcast (Telegraph) Services:*—The Overseas Communications Service provides news transmissions by radio-telegraph on behalf of the Ministry of External Affairs simultaneously to about 39 Indian Consular posts around the world. Similar facilities for broadcasting news transmission to multiple reception-point are also provided to the Press Trust of India from Bombay.

*Programme Transmissions Service :*—Facilities are offered for "programme transmissions" *i.e.* spoken despatches by representatives and Correspondents of foreign Broadcast Organisations for broadcast by their respective principals.

*Leased Telegraph Channels Service :*—Leased teleprinter channels for private customers on rental basis was introduced as a new facility by O.C.S. in the year 1957. This Service has since then expanded rapidly and 23 such channels are in use, as on 15th April 1965, by business concerns and Government agencies. This facility provides means of communication by Teleprinters directly between the parties.

*International Telex Services :*—The international telex service is the most modern form of facility available to the public and, as with other countries in the world, there is a very large and phenomenally growing demand for the provision of such service.

International telex service was introduced for the first time in India in June, 1960 linking the Bombay/Ahmedabad group of subscribers with London, and *via* London with a number of countries in the world.

*Direct Telex Services :*—United Kingdom (3 independent circuits—one each from Bombay, Calcutta and New Delhi) Japan, Federal Republic of Germany and Philippines. Through these direct connections with International network, telex service is available with 53 other countries as shown below.

*Switched Telex Services :*—Aden, Algeria, Argentina, Australia, Austria, Bahrain, Belgium, Bermuda, Brazil, Bulgaria, Canada, Czechoslovakia, Denmark, Ethiopia, Faroe Islands, Fiji, Federal Republic of West Germany, Finland, France, German Democratic Republic, Ghana, Greece, Hongkong, Hungary, Iceland, Irish Republic, Israel, Italy, Jamaica, Kenya-Uganda-Tanzania, Lebanon, Luxemburg, Malaysia, Malta, Mexico, Netherlands, New Zealand, Norway, Peru, Philippines, Poland, Republic of Sudan, Roumania, Spain, Sweden, Switzerland, Uruguay, U.S.A., USSR, Thailand and Yugoslavia.

Plans are under-way for integration of all international telex services with the internal telex system, which the Indian P. & T. has made available to the Indian public in the 4 cities of Calcutta, Bombay, New Delhi and Madras from mid-1963.

---

# INSTITUTIONS FOR THE BLIND IN INDIA

*Andhra Pradesh :* Government School for the Blind, Cuddapah. Lutheran School for the Blind, Rentachintala, Guntur District ; Government School for the Blind, Malakpet, Hyderabad ; Disabled Children's School for the Blind, Amravati Road, Guntur ; School for the Blind, Kottagudan ; Andhra Pradesh Welfare Association for the Blind, Himayath Nagar, Hyderabad ; Andhra's Blind Model School, Rest House Road, Bhimavaram, West Guntur District ; Association for the Welfare of the Blind, Hyderabad.

*Assam :* Blind School attached to the Sreemantha Shankar Mission, P. O. Nowgong, New Gond District.

*Bihar :* Home for the Homeless, Muzaffarpur ; Maharani Adhirani Kameshwari Priya Andh Vidyalaya, Darbhanga ; Netraheen Chhatra Vidyalaya, Mundichak, Bhagalpur ; S.P.G. Mission Blind School, Ranchi ; Patna Blind School, P.O. Kadam Kuan, Patna ; Blind Relief Society, Dhanbad.

*Delhi :* Blind Relief Association, Room No. 37, Theatre Communications Building, Connaught Circus, New Delhi ; Blind Social Welfare Society, 96, Panchkuin Road, New Delhi ; Institution for the Blind, Panchkuin Road, New Delhi ; Rashtriya Virja Nand Andh Kanya Vidyalaya, New Rajinder Nagar, Shankar Road, New Delhi ; National Society for the Prevention of Blindness, 11/B, Gangaram Hospital Marg, New Delhi 5.

*Gujarat :* Andh Kanya Prakash Grih (Light House for Blind Girls), Narayanapura, Ellis Bridge, Ahmedabad ; Andh Mahila Vikash Grih, Gondal Road, Near Swami Narayan Gurukul, Rajkot ; Blindmen's Association Maganbhai Kendra, Kameswari Poll, Ahmedabad ; Krishnakumarsinhji School & Home for the Blind, Bhavnagar, Kathiawar ; School for the Blind, Ellis Bridge, Ahmedabad ; Govt. Blind School, Baroda ; School for the Blind, Visavadar, Saurashtra ; The Tata Agricultural & Rural Training Centre for the Blind, Phansa ; Government School for Deaf, Mutes and Blind, Maliya Bhavan Rajkot ; The Kalpana Nursery School and Home for Deaf, Dumb and Blind Children, C/o. School for Deaf Mutes and the Blind, Navrangpura, Ahmedabad ; Adult Training Centre for the Blind, Navrangpura, Ahmedabad ; A. M. Andhjanshala, Race Course, Athwa Lines, Surat ; The Baroda Association for the Blind, Mahajan Lane Raopura, Baroda ; Dohad Andh Jan.. Vidyalaya, Dohad ; Meghji Pethraj Blind School, Junagadh ; National Association for the Blind (Gujarat State Branch), C/o Adult Training Centre for the Blind, Behind University Professors' Quarters, University Campus, Navrangpura, Ahmedabad 9 ; Shikshan Samiti, Bodeldy, P.O. Kinwat, Nadiad District ; Shri Andh Sarvodaya Mandal, Gondal Road, Near Swaminarayan Gurukul, Rajkot ; Shri Bharatiya Pragna Chakshu Gurukul, Porbunder.

*Jammu-Kashmir :* Residential School for the Blind, Ved Mandir, Jammu ; Shri Abedananda Home for the Blind, Srinagar, Kashmir.

*Kerala :* Kerala Blind Welfare Association, Mankadapallipuram, Malappuram ; School for the Blind, Kunnamkulam, Talapally, Trichur Dt. ; School for the Blind, Deaf & Dumb, Trivandrum ; Rotary School for the Blind, Alwaye ; School for the Blind, Olessa, Kottayam. National Association for the Blind, (Kerala State Branch), C/o Government Ophthalmic Hospital, Trivandrum 1.

*Madhya Pradesh :* Madhya Pradesh Welfare Association for the Blind, 83, Bozanket Market, Pandey's Building, Indore ; Shri Madhav Andh Ashram, Nai Sarak, Laskar, Gwalior ; School for the Blind attached to the Christian Hospital

& Dispensaries, Mungeli, Bilaspur Dt.; Deaf, Dumb & Blind Vidhyalaya, Indore; Government Blind and Deaf School, Bhopal; Child Guidance Clinic & Handicapped Children's Colony, 102, Cherital, Jabalpur.

*Madras:* Blind Relief Association, 17, Gang Shala, Pondicherry; Blind Relief Association, 48, Thennamaram Street, Vellore; Government School for the Blind, Poonamallee; Government School for the Blind, Shivpet, Salem; Madras Christian College (Students Service for the Blind); Tambaram, Chingleput Dt.; School for the Blind & Deaf, Cathedral Post, Madras 6; School for the Blind, Palayamkottai, Tirunelveli 2; School for the Blind, Swedish Mission Hospital, Tirupattur, Ramanathapuram Dt.; School for the Blind, Sir T. Desikachariar Building, Puttur, Tiruchirapalli; TELC Home & School for the Blind, Moses Gnanabaraam Eye Hospital, Coimbatore-1; National Academy of Teacher of the Blind, C/o School for the Blind, Palayamkottai, Tirunelveli 2; National Association for the Blind, (Madras State Branch), 27/1-A, Mount Road, Saidapeth, Madras 15; St. Louis Institute for the Deaf and Blind, Madras 20.

*Maharashtra:* Andh Pragati Mandal, 52, B.D.D. Chawl, Worli, Bombay-18; Blind Boy's Institute, Ajini Ambajari Road, Nagpur; Blind Men's Association, C/o Shri R. M. Alpaiwalla, 177/179, Lamington Cross Road, Bombay-7; Blind Relief Association, Congress Bhuvan Bassein, Thana District; Blind Relief Association, 475-83, Kalbadevi Road, Bombay-2; Dadar School for the Blind, 160, Dadasaheb Phalke Road, Dadar, Bombay-14; Government School for the Blind, Nasik; Haji Allarakha Sonawala Andh & Anath Stree Ashram, 37, Gilbert Hill, Versova Road, Andheri, Bombay-58; Happy Home & School for the Blind, 52, B.D.D. Chawls, Worli, Bombay-18; Industrial Home for Blind Women, 160, Dadasaheb Phalke Road, Dadar, Bombay-14; Kishanlal Jalan Charity Trust, 339-41, Kalbadevi Road, Bombay-2; M. N. Banajee Industrial Home for the Blind, 280, Swami Vivekananda Road, Jogeshwari, Bombay-60; National Christian Council, Nagpur, Maharashtra; N.S.D. Industrial Home for the Blind, 52, B.D.D. Chawl, Worli, Bombay-18; Poona School & Home for the Blind, Koregaon Park, Poona; Poona Blind Men's Association, 82, Rasta Peth, Poona; Rambai Mukti Mission, Kedgaon, Poona District; Victoria Memorial School for the Blind, 73, Tardeo Road, Bombay 7; The Workshop for the Blind, Dr. Annie Besant Road, Worli, Bombay-18; Blind Home, Chembur, Bombay-17, Government School for the Blind, Bhandara; Industrial Institute for the Blind, Deaf & Dumb, Near Tata Parsi Girls' High School, Nagpur. School for the Blind, Deopur, Dhulia; National Association of the Instructors of the Blind, 22, Jal Bungalow, Arab Lane, Corner Grant Road, Bombay 8.

*Mysore:* Blind Relief Association, Bijapur; Government School for the Blind, Hubli, Dharwar District; School for the Blind, Myscre; Vocational Institute for Women at Mysore City with a Section for Blind Girls, Mysore; Divine Light School for the Blind, White Field, Bangalore; Government School for the Blind, Kasargod, South Kanara District.

*Orissa:* Orissa State Council for Child Welfare, Raj Bhavan, Cuttack.

*Punjab:* Bharatiya Andh Hitakarini Sabha, 2212-13, Gurudwara Building, Inside Lohgarh Gate, Amritsar; District Council for the Welfare of the Handicapped, Home for the Blind, Tulsiram Ashram, Ferozepore; Government Institute for the Blind, Panipat; Institute for the Blind, Andh Vidyalaya, Amritsar; S.D. Institute for the Blind, Ambala Cantt.; Soorma Singh Ashram, Amritsar; Training Centre for the Adult Blind, Sonepat.

*Rajasthan:* Government School for the Blind, Adarshnagar, Ajmer; Seth Anandilal Poddar Institute for the Deaf, Dumb & Blind, Jaipur; Education Department, Government of Rajasthan, Bikaner.

*Uttar Pradesh:* Ahmedi School for the Blind, Civil Lines, Aligarh; Central Braille Press, Rajpur Road, Dehra Dun; Kashi Seva Samiti, Varanasi; Model School for Blind Children, Rajpur Road, Dehra Dun; School for the Blind (Andh Vidyalaya), 110/26, Nehru Nagar, Kanpur; School for the Blind attached to the Eye Hospital, Sitapur; Sharp Memorial School for the Blind, Rajpur Road, Dehra Dun; Training Centre for Adult Blind, Rajpur Road, Dehra Dun; Kunwarlal Singh Industrial School for the Blind, Kutcheri Road, Manipuri; Government School for the Blind, Lucknow; Allahabad School & Home for the Blind, P.O. Naini, Allahabad; Madrasa Nabeena, Nageena, Bijnor; Government School, Gorakhpur; Blind Association, 9-C, Civil Lines, Gorakhpur; Blind School, Bhadaini, Varanasi.

*West Bengal:* Blind Persons' Association, 174, Shyam Prasad Mookerjee Road, Calcutta 26; Kalimpong Home for the Blind, Kalimpong, Darjeeling District; Light House for the Blind, 174, Shyam Prasad Mookerjee Road, Calcutta 26; Ramkrishna Mission Ashram, P.O. Narendrapur, Dist. 24 Parganas; Calcutta Blind School, P.O. Behala, Calcutta-23; Association for the Prevention of Blindness, 94, Chittaranjan Avenue, Calcutta.

* Based on actuals for the first 9 months and estimated production for October, November and December.

For the twelve months January—December 1964, the index averaged 174·6 against 163·6 for the previous calendar year, showing a modest rise of 6·7 per cent.

The average adjusted index for the fiscal year 1964-65 worked out at 177·9 and was higher by 6·5 per cent compared with the average index of 1963-64.

This was substantially lower than the annual rate of expansion of 11·1 per cent envisaged during the Third Plan period.

The rate of growth of industrial production during the first four years of the Third Plan is indicated in the table below.

| Fiscal Year | % rise over the previous year |
|---|---|
| 1961-62 | 6·5 |
| 1962-63 | 8·0 |
| 1963-64 | 9·4 |
| 1964-65 | 6·5 |
| Third Plan Target | 11·1 |

# FAMILY PLANNING

**It is now widely accepted that the success of the schemes of economic development of India will be considerably hampered unless due attention is paid to the problem of growing population.**

**It is estimated that India's population was expected to increase from 439 million in 1961 to 560 million in 1971 and 695 million in 1981. And unless the rate of growth was checked by family planning to an extent hitherto unknown in this country it would outstrip supply of food and neutralize the benefits of increased production through the Plans.**

**Family planning as an official programme was launched in the First Five Year Plan, as part of Government of India's policy for population control.**

During the Second Plan period high level Family Planning Boards were formed at the Centre and in the States. A Director of Family Planning was posted in the Union Health Ministry and whole time Family Planning Officers were appointed in the States. Training Centres and centrally financed field units were set up to provide orientation of Family Planning field workers. Research in Demography, on Reproductive Physiology and on the Communication Aspects of Family Planning was firmly established. The National awareness of the Family Planning was further reorganised through mass education media and many lakhs of posters, pamphlets and folders on the subject were distributed. In addition, slides and exhibits were also utilised. Public minded leaders in States and districts were appointed as honorary Family Planning Education Leaders to mobilise local interests and support to village leaders' camps to increase direct local participation in the programme. The aims of the Family Planning Programme as set out by the Planning Commission in the Third Five Year Plan are :—

1. Wide-spread education to create the necessary local background for a large Family Planning Programme; 2. Integration of Family Planning activities with the normal health services; 3. Provision of Family Planning Services including facilities for sterilization through medical and health centres and facilities for distribution of contraceptives; 4. Development of training programmes in medical colleges and other teaching institutions; and 5. Utilisation for the Family Planning campaign of local voluntary leadership to the largest extent possible.

During all these years a four-fold Family Planning Programme has been developed viz., Education, Service, Training and Research.

The allocation for family planning in the Third Plan is Rs. 27 crores.

### Service

Services have been increased considerably throughout the country during the Third Plan period. The expenditure during the first four years is more than the total expenditure incurred during the First and the Second Plan period, as will be evident from the budget figures given below:—

Estimated Expenditure (Rs. in lakhs)

| | First Plan | Second Plan | Third Plan | | | | Budget Provision |
|---|---|---|---|---|---|---|---|
| | | | 1961-62 | 1962-63 | 1963-64 | 1964-65 | 1965-66 |
| Service | 7·99 | 55·54 | 23·28 | 45·86 | 68·58 | 51·78 | 82·07 |
| Training | 0·40 | 15·34 | 5·22 | 7·53 | 7·66 | 21·25 | 27·17 |
| Education | — | — | 4·33 | 9·37 | 20·12 | 31·41 | 45·93 |
| Research | 3·99 | 22·86 | 10·20 | 10·46 | 13·68 | 13·33 | 19·28 |
| Central Organisation | 2·13 | 6·62 | 3·46 | 3·06 | 3·41 | 7·23 | 8·18 |
| Grant to State Governments | — | 115·22 | 68·24 | 164·09 | 186·90 | 300·00 | 457·00 |
| Total | 14·51 | 215·58 | 114·73 | 240·37 | 300·30 | 425·00 | 639·63 |

The number of Family Welfare Planning Centres has been increased from 147 at the end of the First Plan to 15,808 at the end of April 1965 (Rural 13,901 and Urban 1,907).

### Sterilization

High priority is also being given to voluntary sterilization schemes and sterilization facilities have been provided at medical institutions on an appreciable scale. Sterilisation camps are also being held in some States to intensify sterilisation programme. Assistance of private surgeons is being obtained by giving them Rs. 100 per day as honorarium provided they perform a minimum of 10 operations per day. Special casual leave is being given to Government servants for undergoing sterilization operations. Free transport facilities are also provided to persons coming for operations. In some of the States monetary incentives are also being given to the persons undergoing such operations.

The number of sterilization operations have risen from 6,787 in 1956 to 9,05,579 upto the end of April 1965 (males 6,15,701 and females 2,89,878).

**Contraceptives :** Contraceptives are supplied free of cost to all couples without reference to their income in rural areas. In urban areas all contraceptives are distributed free to people with income upto Rs. 300 per month, at half of the cost price to those with incomes between Rs. 301 to Rs. 500 and at cost price to those with incomes above Rs. 500 per month.

The off-take of contraceptives in India since 1956 has increased considerably as detailed below from the reports received from a few principal dealers.

(No. in millions)

| Year | Diaphragm | Jellies | Condoms | Foam Tablets |
|---|---|---|---|---|
| 1956 .. .. | 0·025 | 0·078 | 0·062 | 0·246 |
| 1957 .. .. | 0·089 | 0·078 | 0·143 | 0·082 |
| 1958 .. .. | 0·022 | 0·076 | 0·727 | 4·836 |
| 1959 .. .. | 0·053 | 0·430 | 0·656 | 7·912 |
| 1960 .. .. | 0·143 | 0·307 | 0·346 | 14·980 |
| 1961 .. .. | 0·343 | 0·632 | 6·863 | 15·882 |
| 1962 .. .. | 0·481 | 0·571 | 7·807 | 7·628 |
| 1963 .. .. | 0·091 | 0·611 | 12·879 | 13·500 |
| 1964 .. .. (Jan. to June) | 0·301 | 0·259 | 7·033 | 4·875 |
| Relative increase .. | 3·64 | 7·86 | 207·72 | 54·87 |

This does not give the total consumption.

### Production of Contraceptives

The estimated licensed/permitted production capacity of rubber contraceptives in India is 381·21 million pieces per year. Actual production, however, is very small. The Bombay Latex Dispersions Private Ltd., Bombay, have started production of condom on a small scale. Messrs. London Rubber Industries India (P) Ltd. have also started production of condoms. The Govt. of India has decided to start manufacturing rubber contraceptives in the public sector. The factory will be installed in Kerala State. At present the bulk of rubber contraceptives required in India are being imported. The import figures of rubber contraceptives from 1958 onwards are given below :—

| Year | No. of pieces (in millions) | Cost (in millions of Rs.) |
|---|---|---|
| 1958.. .. | 6·343 | 0·409 |
| 1959.. .. | 6·437 | 0·578 |
| 1960.. .. | 13·016 | 1·432 |
| 1961.. .. | 27·746 | 2·917 |
| 1962.. .. | 24·633 | 2·221 |
| 1963.. .. | 17·437 | 1·579 |
| 1964.. .. (Jan. to May) | 12·385 | 0·993 |

Major part of chemical contraceptives is met by indigenous production. Foam tablets and contraceptive cream manufactured at the Medical Store Depot have been tested and found satisfactory. The Medical Store Depot will go into production soon.

Contraceptives are tested by the Government of India before being allowed to be sold in India for public use. Testing of contraceptives is done at the Indian Cancer Research Centre, Bombay for laboratory and clinical tests of chemical contraceptives. Rubber contraceptives are tested at the Chief Inspectorate of Textiles and Clothings, Kanpur. Toxicity of ingredients used in chemical contraceptives as well as lubricating solutions of condoms are tested at the Central Drug Research Institute, Lucknow. Chemical analysis of the ingredients for determining the stated percentage is tested at the Central Drugs Laboratory, Calcutta.

*Intra-Uterine Contraceptive Device :* The Advisory Committee on Scientific Aspects of Family Planning of the Indian Council of Medical Research in their meeting held at Aurangabad on Jan. 5, 1965 reviewed the progress of work on I.U.C.D. After studying the data presented in this meeting from clinical studies conducted in India as well as the reports of the Second International Conference on Intra-Uterine Contraceptive held in New York in October 1964, the Advisory Committee came to the conclusion that the I.U.C.D. is safe, effective and acceptable and should be made available through all medical and health centres having requisite facilities.

The Union Government has accepted the recommendation of the Indian Council of Medical Research that I.U.C.D. is effective and acceptable and that for the present the loop should be used.

The Union Health Ministry has suggested to the State Governments that efforts should be made to introduce the I.U.C.D. in at least 50 per cent of the cases handled by maternity hospitals, post-natal clinics and other institutions as part of the crash programme of family planning.

The Second Plan started with 21 rural and 125 urban clinics (now these clinics are redesignated as Family Welfare Planning Centres). By the end of April 1965 there were 15,808 Family Welfare Planning Centres functioning in the country.

| | Rural | Urban | Total |
|---|---|---|---|
| Regular Centres .. .. .. .. | 4,520 | 1,263 | 5,783 |
| Contraceptive Distribution Centres .. | 9,381 | 644 | 10,025 |
| Total .. .. .. .. | 13,901 | 1,907 | 15,808 |

### Training

There are three Family Planning Training Centres under the Directorate General of Health Services *viz.* (*i*) Family Planning Training & Research Centre, Bombay, (*ii*) Family Planning Training, Demonstration & Experimental Centre, Ramnagaram, Mysore, (*iii*) Family Planning Institute, New Delhi.

Training in Family Planning is provided at the All India Institute of Hygiene and Public Health, Calcutta. Besides these, there are 16 training centres in different States run and managed by the State Governments with 100 per cent Central assistance. These training centres give regular training to doctors, social workers, and para-medical personnel who are working in Family Planning Programme. They also give short-term Job-Orientation to these people. Besides these centres, 16 Central Family Planning Field Units have been created in each of the 16 States for giving short-term Job-Orientation training as well as orientation to other people not directly engaged in Family Planning work but who indirectly can help the Family Planning movement. The total number of persons trained up to April 1965 is 55,088. Besides, several thousands have been given orientation in family planning. The Govt. of India has decided that in addition to the 16 existing training centres in the various states, there should be 28 more training centres *i.e.* one training centre for about ten million of population in each State.

There are also five Family Welfare Planning Training Centres run by voluntary organisations with 100 per cent assistance from the Government of India. These centres are located one each at Delhi, Nagpur, Hyderabad, Madras and Allahabad. They give nine months' training to women workers for Family Planning work in rural and urban areas, mostly in rural areas. They are being converted into training centres for auxiliary nurse midwives.

Training is also imparted to medical students during their under-graduate course as well as to nurses, lady health visitors, public health nurses and auxiliary nurse midwives. Training is now an integral part of the Training Programme for the above category of personnel. Training in Re-productive Physiology, Communication Research and Demography are also given at various centres in India.

Fellowship programmes have been evolved for higher studies in Communication Research, Demography and Reproductive Physiology abroad. Fellowships are offered by the Ford Foundation and the Population Council.

### Education

The educational activities are mainly based on community educational work which can produce the group support needed for adoption of Family Planning and providing specific information about contraceptives and sterilization. All available educational media are being exploited. Upto December 1964, 23,20,000 posters, 47,90,000 folders and 55,24,500 pamphlets on Family Planning have been prepared in English, Hindi and other regional languages and distributed to the people. Approximately 4,400 Cinema slides on Family Planning have been produced for display in cinemas throughout the country. 1,000 slides on sterilization in males and 1,000 slides of sterilization in females have been produced for training purposes. Seventeen films on Family Planning have been produced so far and have been shown widely. Regular programmes relating to Family Planning are broadcast over the radio from all stations.

Education is also being imparted through orientation camps by the State Governments, voluntary organisations, Honorary Family Planning Education Leaders and Central Family Planning Field Units.

Audio-Visual equipment with projectors and mobile vans are being provided in each district for extensive educational activities.

**Research**

Regular research is being conducted on medical and biological aspects of Family Planning, Demography and Communication. Demographic Research is being conducted at seven centres, *viz.* Demographic Training and Research Centre, Bombay, Demographic Research Centre, Indian Statistical Institute, Calcutta, Demographic Research Centre, Institute of Economic Growth, Delhi, Demographic Research Centre, Dharwar, Demographic Research Centre, Department of Statistics, University of Kerala, Trivandrum, Gokhale Institute of Politics and Economics, Poona and Demographic Research Centre, Indian Institute of Population Studies, Madras. Research on medical and biological aspects or reproduction are being conducted at a number of places including All India Institute of Medical Sciences, New Delhi, Central Drug Research Institute, Lucknow, Indian Cancer Research Centre, Bombay, Zoology Department of Delhi University and in various other universities and medical colleges. Communication Research is being undertaken at the Family Planning Institute, New Delhi, Demographic Research Centre, Bombay, University of Kerala Rural Health Centre, Gandhigram, Indian Statistical Institute, Calcutta, Planning Research and Action Institute, Lucknow, Lady Hardinge Medical College, New Delhi, New Delhi Family Planning Association, New Delhi and All India Institute of Hygiene and Public Health, Calcutta.

The Central Family Planning Institute, New Delhi was established in 1962 mainly for the advancement of knowledge in various aspects of the Family Planning movement in India, *i.e.* educational, social, medical, biological, statistical, demographical, organisation and supply. In order to facilitate expeditious achievements of its objects, the Govt. of India has decided to register the Central Family Planning Institute as autonomous body and the Institute was registered under the Societies Registration Act of 1860 with effect from March 22, 1965. It is to be run by a 33-member General Council under the chairmanship of the Union Health Minister.

Based on the Family Planning Programme Report for 1962-63, the Family Planning Programme has been carefully reviewed by the Central Family Planning Board in April, 1963. The entire programme has been re-organised with effect from October, 1963 with emphasis on extension education and extension approach. The proposed main goal for the programme is now to accelerate the rate of adoption of Family Planning so as to reduce the birth rate in India to 25 births per 1,000 population as early as possible. The operational goal to achieve this objective will be to create for 90 per cent of the married adult population of India the three basic conditions needed in accelerating the adoption of Family Planning by couples *viz.* group acceptance, knowledge about Family Planning and ready availability of services and supply.

Under the Third Plan an allotment of Rs. 26,97,57,000 has been made for Family Planning with the assurance that this amount can be doubled if required. Of this, Rs. 2,000 lakhs are in the Union and Rs. 697·57 lakhs in the State sectors. During 1965-66, the Union Govt. proposes to spend Rs. 1,170·85 lakhs on the programme of population control.

**Evaluation of Family Planning :** The Central Family Planning Board set up an experts Committee to evaluate the work carried out so far and to chalk out a programme for the 4th Five-Year Plan. The committee is composed of technical experts, representatives of the Planning Commission and the Ministries of Health, Education, Community Development, Information and Broadcasting and Commerce and Industry. The Health Minister, Dr. Sushila Nayar is the Chairman of the committee and Lady Rama Rao and Smt. Soundram Ramachandran its two pro-Chairmen. An appraisal committee has been touring the country to assess the progress of the family planning programmes and to plan future operations according to the needs and capacity of each State.

# INDIA'S FOREIGN LIABILITIES AND ASSETS—1961

This article gives a detailed account of the country's foreign liabilities and assets based on the data obtained under the 1961 Survey conducted by the Exchange Control Department of the Reserve Bank of India. The Survey is confined to long-term foreign obligations and official institutions. Annual assessments of foreign investments in India, based on limited information furnished by the foreign controlled companies, have been made from 1956 onwards. Besides determining the relationship between total assets and total liabilities and indicating the international creditor/debtor position, the Survey throws light on the structure of the country's assets and liabilities abroad and the distribution of external debt. Further, the data indicate the extent of the growth in the value of private foreign investments, the earnings of enterprises and developments in investments, by various foreign countries, in the major industries. Information has also been collected in respect of the size of assets, earnings and distribution of profits and pattern of foreign collaboration arrangements. The statistics presented in this article are derived mainly from returns filed by various institutions in the private and public sectors. The Survey was designed to cover all long-term foreign liabilities and assets, defined to include (1) net foreign liabilities of branches of foreign companies operating in India, (*ii*) shares and debentures of Indian and foreign joint-stock companies, (*iii*) securities issued by Governments and semi-official institutions (Indian and foreign), (*iv*) actuarial reserve value (or cash surrender value) of policies and the present value of future payments on annuities, in respect of life assurance, and the value of unexpired risk in respect of non-life insurance payable by Indian insurance companies to persons resident abroad, (*v*) loans and advances including inter-branch and inter-company advances maturing on or after January 1, 1963, as also long-term loans obtained by the private sector from official institutions, (*vi*) deposits maturing on or after January 1, 1963, and (*vii*) immovable property like lands and estates, buildings, factories and mines owned in foreign countries, by official agencies and private institutions in India.

## PRIVATE AND OFFICIAL

Obligations have been classified into private and official. The former covers all foreign assets and liabilities of business enterprises. The official sector covers all the foreign assets and liabilities of the Central Government and its various departments and offices, of State Governments and quasi-Government organisations such as Municipalities and Port Trusts, as well as the Reserve Bank of India.

## DIRECT AND PORTFOLIO INVESTMENTS

Investments of non-residents may be broadly classified into two main groups—'direct' investments and 'portfolio' investments. Direct investment is investment made to create or expand some kind of permanent interest in an enterprise (such an investment is usually in the form of equity ownership); it implies a degree of control over the management of the concern. In the case of portfolio investment, in contrast, the investor has no intention of playing an important role in framing the policies of the enterprise; he is primarily influenced by such considerations as income yield, tax advantages, marketability and general safety of principal.

## TRENDS—MID-1948—END-1961

Overall change in India's Debtor/Creditor Position since 1948 : Since mid-1948, India had in a period of thirteen and a half years not only liquidated foreign assets substantially but, particularly after 1955, incurred considerable foreign liabilities making India increasingly a net debtor on international account. Considered from the angle of obligations owed and owned abroad, the country's investment position had changed by as much as Rs. 3,302 crores between mid-1948 and end-1961.

**India's International Investment Position**

(Official & Non-official Sectors)

(Rs. crores)

## COUNTRY-WISE CHANGES

The aggregate change in total foreign liabilities and total foreign assets was the combined result of substantial changes in India's position *vis-a-vis* a number of countries. The net position with the U.K. worsened by Rs. 1,773 crores, which was very largely due to the sharp decline of Rs. 1,406·6 crores in gross assets, for the rise in gross liabilities was only Rs. 366·5 crores. With regard to the U.S.A. and West Germany, the net liabilities owed by India to the U.S.A. increased by Rs. 855 crores and those to Germany by Rs. 153 crores. Assistance by the U.S.S.R. resulted in India having a net liability of Rs. 68·5 crores by 1961. There was at the end of 1961, a net liability to Japan of Rs. 29 crores and to Canada of Rs. 19·5 crores. The change in the position *vis-a-vis* the international institutions was an increase in net liabilities to the tune of Rs. 311·8 crores as a result partly of drawings on the IBRD loans and partly purchases of currencies from the I.M.F.

## SECTOR-WISE CHANGES

The official sector was responsible for the rise in the net foreign liabilities to the extent of Rs. 2,806·5 crores out of a total of Rs. 3,302 crores. The main items which induced the change on the liability side were: (1) increased loans from official sources and the IBRD (Rs. 978 crores), (2) net drawings on the IMF (Rs. 119 crores), (3) increased short-term deposits (Rs. 354 crores) mainly in favour of the U.S.A. On the assets side, the main item was the decline of Rs. 1,373 crores in holdings of foreign securities both long-term and short-term, arising out of overall balance of payments deficits; and that was only partially offset by increased assets resulting from enlarged subscriptions to international organisations and the loan to Burma.

The non-official sector, on the other hand, was responsible for Rs. 495·5 crores, mainly due to the increase in long-term foreign investments in business enterprises of Rs. 416·4 crores. The remainder was accounted for by the increase in miscellaneous liabilities of business enterprises, namely, inter-company loans and advances, and changes in the short-term liabilities and assets of financial institutions.

## TRENDS IN BUSINESS ENTERPRISES

The United Kingdom continues to hold the lead as the principal investor with the U.S. in second position. Earlier, most of the investments were in branches or wholly-owned subsidiaries, whereas in more recent years joint ventures with Indian companies are on the increase. Another feature is the participation of residents in the shares of companies in which foreign concerns play an important role. A part of the foreign capital in Indian industry in recent years has come in the form of loans from foreign governments and international institutions.

The latest Survey shows that the book value of foreign investments in India increased from Rs. 264·6 crores in mid-1948 to Rs. 681 crores at end-1961. The total net increase in foreign investments in business enterprises during the 13½ years ended 1961 was of the order of Rs. 383·2 crores; of this, investment from private sources amounted to Rs. 284 crores and the balance of Rs. 99 crores represented inflow into the private sector from official sources (vide table below).

**Outstanding Foreign Investments† in Business Enterprises in the Private Sector**

(Rs. crores)

| | Total* | Of which | |
|---|---|---|---|
| | | Private sources abroad | Official sources abroad |
| June 1948 | 264·6 | 264·6 | — |
| December 1953 | 397·1 | 397·1 | — |
| ,, 1955 | 442·4 | 439·7 | 2·7 |
| ,, 1956 | 478·3 | 463·5 | 14·8 |
| ,, 1957 | 532·0 | 484·3 | 47·7 |
| ,, 1958 | 562·5 | 488·6 | 73·9 |
| ,, 1959 | 582·8 | 498·9 | 83·9 |
| ,, 1960 | 634·7 | 552·2 | 82·5 |
| ,, 1961 | 681·0 | 581·7 | 99·3 |

† Exclude foreign investments in insurance companies.
* Includes valuation changes.

Country-wise, the U.K. was the principal investor accounting for nearly two-thirds of the total in 1961. U.S. investments had grown to Rs. 95·9 crores at end-1961 from Rs. 11 crores in mid-1948.

The contribution of non-resident capital to India's industrial development has been particularly significant in certain spheres e.g., well over half the increased foreign investments between mid-1948 and end-1961 has been in the broad area of manufacturing and petroleum. In manufacturing alone, non-resident investments have grown from Rs. 70 crores at the end of June 1948 to well over Rs. 290 crores at end-1961, while petroleum investments have shown a more than six-fold rise over the 13½ years from Rs. 22·3 crores to Rs. 152·5 crores. Within the manufacturing group, a development in recent years has been the influx of foreign capital into the metals and metal products industry and chemicals and allied products. From 1948 to end-1961 the inflow of fresh capital from private sources contributed an estimated Rs. 244 crores to the increase in investments in business enterprises in India while profits which were retained accounted for about Rs. 173 crores or 41 per cent of the gross inflow of private capital of Rs. 417 crores. The net inflow from foreign private sources (after adjusting for valuation changes over 13½ years) aggregated Rs. 284 crores. Gross official lending to business enterprises in India amounted to Rs. 117 crores. Thus the net foreign investment in business enterprises in India from private and official sources abroad during the 13½ years aggregated Rs. 383 crores yielding an average annual net investment of Rs. 28·4 crores.

## OVERALL INTERNATIONAL INVESTMENT POSITION, END-1955—END-1961

India was a net creditor on international account to the extent of Rs. 526·7 crores at end-1955. The position has altered considerably since then and the results obtained under the present Survey indicate that the country was a net debtor on international account to the tune of Rs. 1,797·5 crores at end-1961. Aggregate liabilities of the country rose from Rs. 767·7 crores at the end of 1955 to Rs. 2,504·2 crores at the end of 1961, while foreign assets declined by as much as Rs. 587·7 crores to reach a low of Rs. 706·7 crores in the same period (see table 1).

The main components of this change are (*a*) the liquidation of Rs. 261·6 crores worth of long-term investments, (*b*) the increase in long-term obligations (mostly to the U.S., the U.K., IBRD and Germany) of Rs. 1,302·7 crores, (*c*) the sale of short-term assets of Rs. 326·1 crores and (*d*) an increase in short-term obligations (principally arising out of PL 480 and PL 665 assistance) of Rs. 433·8 crores.

A succession of large current account deficits resulted in the heavy drawals on the country's foreign assets amounting to Rs. 588 crores and the growth in liabilities of Rs. 1,736·5 crores was the result of foreign loans and credits on official account.

## OFFICIAL AND NON-OFFICIAL SECTOR

At the end of 1961, net indebtedness abroad by the non-official sector was Rs. 752·5 crores. In contrast, the official sector, which till 1955 had enjoyed a net creditor position, emerged as a net debtor to the tune of Rs. 1,045 crores at end-1961. (See table I).

India's net international country-wise investment position is given in the table below. Whereas in the case of Pakistan and Burma, India continues to have a net creditor position, she is in a debtor position with the U.S.A., the U.K., Germany, the U.S.S.R., International Institutions and other industrial countries.

**India's International Investment Position—Country-wise Summary**

(Rs. crores)

| | December 31, 1955* | | | December 31, 1961 | | |
|---|---|---|---|---|---|---|
| | Liabilities | Assets | Net Position | Liabilities | Assets | Net Position |
| Burma | 5·7 | 9·9 | + 4·2 | 14·1 | 26·7 | + 12·6 |
| Canada | 3·7 | 2·9 | − 0·8 | 21·1 | 1·6 | − 19·5 |
| Germany (West) | 4·8 | 0·4 | − 4·4 | 172·9 | 18·0 | − 154·9 |
| Japan | 2·9 | 0·2 | − 2·7 | 31·1 | 2·1 | − 29·0 |
| Pakistan | 51·7 | 320·5 | +268·8 | 43·0 | 321·7 | + 278·7 |
| Switzerland | 8·7 | 0·2 | − 8·5 | 14·3 | 0·4 | − 13·9 |
| U. K. | 445·8 | 874·9 | +429·1 | 664·7 | 184·6 | − 480·1 |
| U. S. A. | 137·0 | 39·4 | − 97·6 | 916·9 | 57·1 | − 859·8 |
| U. S. S. R. | — | — | — | 68·5 | — | − 68·5 |
| International Institutions | 29·3 | 19·3 | − 10·0 | 371·6 | 56·6 | − 315·0 |
| Other Countries | 78·1 | 26·7 | − 51·4 | 186·0 | 37·9 | − 148·1 |
| Total | 767·7 | 1294·4 | +526·7 | 2504·2 | 706·7 | −1797·5 |

* Revised.

The country's net debtor position of Rs. 1,797·5 crores was the result mainly of an excess of liabilities over assets in respect of the following items viz., loans and advances (Rs. 1,190 crores), business investments (Rs. 670 crores) and deposits (Rs. 408 crores) partially offset by a 'net' foreign asset under the item, government securities (Rs. 140 crores) and residual items (Rs. 331 crores).

## FOREIGN LIABILITIES AND ASSETS OF BUSINESS ENTERPRISES, END-1955—END-1961

*Liabilities of business enterprises in private ownership :* Foreign business investments in India, excluding investments in State-owned undertakings have risen steadily over the last six years by Rs. 225 crores to reach a total of Rs. 667 crores by end-1961.

### Direct Investments

Between 1955 and 1961, the book value of foreign direct investment increased from Rs. 386·5 crores to Rs. 528·4 crores giving an annual average increase of Rs. 24 crores. Most of the increase in direct investments took place in the foreign-controlled rupee companies; the holdings of the foreign-controlled equity in the rupee companies rising over the six years by Rs. 114 crores to Rs. 257 crores at end-1961. The increase in investments through branches was much smaller, for net assets of branches rose by only Rs. 28 crores to Rs. 271 crores between end-1951 and end-1961. The share of branches in total foreign business investments declined from 55 per cent in 1955 to a little over 40 per cent in 1961. Between 1955 and 1961, it is the foreign controlled rupee companies that attracted a larger volume of foreign capital, the subsidiaries of the foreign parent companies alone being responsible for a rise in investment in this sector of Rs. 87·5 crores out of a total of Rs. 114 crores. (See tables below).

**Relative Shares of Different types of Foreign Business Investments**

(Per cent)

| | End-1955 | End-1961 |
|---|---|---|
| DIRECT INVESTMENTS | 87·4 | 79·2 |
| 1. Net assets of branches | 54·9 | 40·7 |
| 2. Shares held abroad in controlled companies of which: | 32·4 | 38·5 |
| (*a*) Subsidiaries | 27·0 | 31·0 |
| (*b*) Other controlled | 5·4 | 7·5 |
| PORTFOLIO INVESTMENTS | 12·6 | 20·8 |
| 1. Portfolio equity holdings by non-residents in Indian joint-stock companies | 8·8 | 6·5 |
| 2. Creditor capital from private sources abroad invested in Indian joint-stock companies | 3·2 | 1·3 |
| 3. Creditor capital from official sources in Indian joint-stock companies | 0·6 | 13·0 |
| TOTAL | 100·0 | 100·0 |

**Principal Changes in Foreign Business Investments in India**

(Rs. crores)

| | Outstanding End-1955 | Outstanding End-1961 | Net Change |
|---|---|---|---|
| DIRECT INVESTMENTS | 386·5 | 528·4 | +141·9 |
| (*a*) Branches | 243·1 | 271·5 | + 28·4 |
| (*b*) Subsidiaries | 119·4 | 206·9 | + 87·5 |
| (*c*) Other Controlled | 24·0 | 50·0 | + 26·0 |
| PORTFOLIO INVESTMENTS | 55·9 | 138·5 | + 82·6 |
| (*a*) Portfolio equity holdings by non-residents in Indian joint-stock companies | 39·2 | 43·0 | + 3·8 |
| (*b*) Creditor capital from private sources abroad invested in Indian joint-stock companies | 14·0 | 9·0 | — 5·0 |
| (*c*) Creditor capital from official sources in Indian joint-stock companies | 2·7 | 86·5 | + 83·8 |
| TOTAL | 442·4 | 666·9 | +224·5 |

### Total foreign liabilities and assets of business enterprises in India:

Between 1955 and 1961, foreign investors, taking both the business enterprises in private ownership and the State-owned undertakings together, invested a further Rs. 239 crores in India, raising the aggregate book value of business investments in India to Rs. 681 crores at end-1961. Miscellaneous business liabilities amounted to Rs. 74·5 crores, raising the long-term foreign liability of business enterprises in India to Rs. 755 crores. Against this liability, foreign assets of Indian joint stock companies (excluding banks and insurance companies) at end-1961 totalled Rs. 38 crores.

Gross foreign liabilities of joint-stock companies in the private sector at end-1961 amounted to Rs. 484 crores; net of assets, these would be Rs. 446·2 crores. Net liabilities for all business enterprises (including branches and joint stock companies) would amount to Rs. 717 crores.

## INFLOW OF FOREIGN INVESTMENTS INTO BUSINESS ENTERPRISES IN INDIA

Net inflow of foreign capital into the private sector: The total net foreign investment in the private sector for the period 1956-61 is Rs. 234·9 crores or Rs. 39 crores per annum, raising the level of total outstanding foreign investment in the private sector from Rs. 442·4 crores in 1955 to Rs. 681 crores in 1961 (see table below).

**Pattern of Capital Inflow* 1956-61**

(Rs. crores)

| Inflow from | 1956-61 | 1956-61 Annual Average | 1954-55 Annual Average |
|---|---|---|---|
| A. PRIVATE SOURCES (NET INFLOW) | 138·3 | 23·1 | 14·1 |
| 1. GROSS INFLOW | 211·4 | 35·2 | 19·1 |
| (*i*) Retained Earnings | 82·3 | 13·7 | 11·6 |
| (*ii*) Cash Inflow | 27·2 | 4·5 | 1·5 |
| (*iii*) Non-cash Inflow | 101·9 | 17·0 | 6·0 |
| 2. OUTFLOW | 73·1 | 12·2 | 5·0 |
| B. OFFICIAL SOURCES (NET INFLOW) | 96·6 | 16·1 | 1·4 |
| 1. Gross Inflow | 114·3 | 19·0 | 1·4 |
| 2. Outflow | 17·7 | 2·9 | — |
| C. GROSS INFLOW INTO THE PRIVATE SECTOR | 325·7 | 54·3 | 20·5 |
| D. GROSS OUTFLOW | 90·8 | 15·1 | 5·0 |
| E. NET INFLOW INTO THE PRIVATE SECTOR | 234·9 | 39·2 | 15·5 |

*Note :* The inflow has been computed, wherever possible, by ignoring valuation changes; to this extent, the figures in this table will not compare with the figures of outstanding levels of foreign investments. * Includes inflow of capital in Government undertakings.

**Official Capital in the Private Sector:**

During 1956-61, about 59 per cent of the net growth in foreign business investment was from private sources and the remainder about 41 per cent from official sources. (See table below).

**OUTSTANDING FOREIGN OFFICIAL CAPITAL IN THE PRIVATE SECTOR**

(Crores of Rupees)

| | End 1955 (I.B.R.D.) | End 1961 | | | | | |
|---|---|---|---|---|---|---|---|
| | | U.S.A. | Japan | Czecho-slovakia | Rumania | I.B.R.D. | Total |
| PLANTATIONS | — | — | — | — | — | — | — |

| TOTAL | 2·7 | 16·3 | 1·1 | 2·3 | 3·9 | 75·7 | 99·3 |

*Note:* Official capital from the U.S.A. includes loans from D.L.F. and rupee loans out of the P. L. 480 funds under the Cooley Amendment.

**Trends in re-invested profits:**

Nearly one-third of the foreign share of Rs. 238·8 crores of earnings of foreign controlled companies in the 1956-61 period was retained in India for further investment. In 1956, Rs. 19·2 crores out of earnings of Rs. 46·4 crores was retained in India. This resulted from substantial earnings by the petroleum companies. In 1957 and 1958 both earnings and reinvested earnings were down considerably; but in 1959 and 1960 as earnings recovered, the amount retained averaged Rs. 14 crores per year and this was further raised to Rs. 15·8 crores in 1961. (See table below).

**PROFITS OF FOREIGN CONTROLLED COMPANIES, 1956-1961**

*Note:* 1. Figures refer to proportionate profits and exclude profits of insurance companies.
2. Figures in brackets indicate percentages to total.
E denotes Earned. D denotes Distributed. R denotes Retained.

The table above shows that over the six-year period 1956-61, profits retained by foreign-controlled plantations were barely 3·7 per cent of the total earnings of this sector; in fact the proportion of earnings paid as dividends to total earnings in this industry was the highest. Even in the years when profits of tea companies were low, as in 1957 and 1958, the tendency was to distribute amounts higher than those actually earned, viz., to draw on past profits with a view to maintaining the level of dividends. Thus, out of Rs. 40 crores profit earned by the plantation group, as much as Rs. 38·6 crores were remitted, so that the contribution of retained earnings as a source of finance was negligible in this industry.

Profits earned by the petroleum concerns aggregated Rs. 68·9 crores during 1956-61. Profits distributed averaged a little under half the earnings, so that for this industry reinvested profits have accounted for two-fifths of the gross inflow.

Earnings of manufacturing enterprises advanced from Rs. 12·4 crores in 1956 to Rs. 22·2 crores in 1961. For the six-year period, earnings of manufacturing companies amounted to Rs. 92·1 crores or 38·6 per cent of the total reported earnings of the foreign controlled sector. On an average during this period 60 per cent of the earnings in this industry group were distributed and 40 per cent retained. Manufacturing earnings ploughed back in this period totalled Rs. 36·7 crores as against a fresh inflow (including inflow from official sources) into this sector of Rs. 139·4 crores.

## FRESH CAPITAL INFLOW

For the six years 1956 through 1961, the cash inflow amounted to Rs. 27·2 crores, accounting for 12·8 per cent of the gross addition in the value of foreign business investments over the period. Industry-wise, 93 per cent of the capital inflow in the shape of cash investments has been for manufacturing enterprises, chemicals attracting Rs. 5·7 crores, electrical goods Rs. 3·8 crores, metal and metal products and machinery

and machine tools Rs. 2·9 crores and Rs. 2·5 crores respectively. Cash investments in other manufacturing industries amounted to Rs. 9·6 crores. The inflow of net cash investments touched a peak of Rs. 43 crores in 1960. In 1961 it fell back to Rs. 17 crores. (See table below).

* Including investments in Government undertakings. § Includes valuation changes.

## CAPITAL INFLOW BY COUNTRIES

For the period 1956-61, the U.K. and the U.S.A. supplied between them 57 per cent of the net capital inflow while the IBRD contributed about 31 per cent. More recently, other countries like Canada, Germany, Italy and Japan have made some investments but they are yet small. For instance Canadian investments increased from Rs. 2·3 crores in 1955 to Rs. 6·5 crores at the end of 1961, and German-owned long-term private investments expanded by Rs. 8·1 crores to Rs. 10·5 crores.

### Collaboration Arrangements of business enterprises in private ownership

Several of the foreign controlled rupee companies as well as Indian joint stock companies have entered into arrangements whereby facilities are provided by the foreign partner in the shape of technical skills, licensing and franchise, trade marks and patents. Such arrangements are called collaboration arrangements.

Out of a total of 897 Indian joint-stock companies with foreign liabilities or assets that reported, 197 companies reported the existence of 302 collaboration arrangements. 142 companies having only one agreement each, 42 companies having 2-3 agreements each and 13 companies having more than 3 agreements.

**Statewise distribution of Companies with collaboration arrangements**

| | |
|---|---|
| Maharashtra | 97 |
| West Bengal | 37 |

**Foreign Liabilities and Assets of the Banking and Insurance Sector, End-1955—End-1961:**

This chapter deals with the external position of financial institutions, namely, banks and insurance companies, which because of the special nature of their operations, have been distinguished from commercial and industrial undertakings. Movements in the banking system's foreign liabilities and assets are very largely of a short-term nature and for that reason are dealt with separately from business investments.

OVERALL FOREIGN LIABILITIES AND ASSETS OF THE BANKING SYSTEM

*Source :* Survey data for long-term items and Exchange Control records for short-term assets and liabilities.

† Now merged with Aircraft Manufacturing Depot, Kanpur to form Hindustan Aeronautics Ltd.

**Insurance Companies:**

With the setting up of the Life Insurance Corporation of India in 1956, consequent on the nationalisation of life business, only insurance companies engaged in non-life business remained. At end-December 1961, there were 73 Indian insurance companies transacting one or more classes of general insurance business, of which 46 companies reported that they had foreign assets and liabilities totalling Rs. 3·2 crores and Rs. 8·5 crores respectively. The net position of Indian insurance companies showed a net foreign liability of Rs. 5·2 crores.

FOREIGN LIABILITIES AND ASSETS OF INDIAN INSURANCE COMPANIES AS AT END-1961

(Rs. lakhs)

| | Liabilities | Assets | Net Position |
|---|---|---|---|

# POSTS AND TELEGRAPHS

THE Indian Posts and Telegraphs Department comes under the administrative control of the Government of India, in the Department of Communications. The Secretary of the Department holds charge of the office of the Director-General, Posts and Telegraphs as also that of the Chairman of the Posts and Telegraphs Board. The Posts and Telegraphs Board and the Director-General, Posts and Telegraphs between them exercise all the powers of the Department of Posts and Telegraphs in administrative matters. The Department discharges also certain agency functions like the work of Post Office Savings Bank, issuing National Savings Certificates and Postal Life Insurance Policies, collection of Broadcasting Receiver Licence and antipiracy work on behalf of other Departments of the Government.

The six members of the Posts and Telegraphs Board, who are ex-officio Joint Secretaries to the Government of India, are in charge of Posts, Telecommunications Development, Banking and Insurance, Telecommunications operations, Administration and Finance.

For purposes of administration the whole country has been divided into a number of territorial and functional units. The major units are under the charge of officers of senior administrative grade and (the minor units) under officers of junior administrative grade. There are at present 14 territorial units called P. & T. circles *viz.*, Andhra, Assam, Bihar, Bombay, Gujarat, Kerala, Madhya Pradesh, Madras, Mysore, Orissa, Punjab, Rajasthan, U.P. and West Bengal, five functional telephone units at Bombay, Calcutta, Madras, Hyderabad and Bangalore, two Telecommunication Units *viz.* Delhi, Jammu & Kashmir and one postal functional unit at Delhi.

In addition to these, administrative units on an All-India functional basis have also been set up *viz.* Additional Chief Engineer, P. & T., Jabalpur; Director, Training Centre, Jabalpur; General Manager, P. & T. Workshops, Calcutta; General Manager, Electrification Circle, Calcutta; Chief Controller of Telegraph Stores, Calcutta; Deputy Director of Postal Life Insurance, Calcutta; Superintendent of Forms and Seals, Aligarh; Posts & Telegraphs Training Centre, Saharanpur. Besides, there are other regional administrative units *viz.* Regional Directors Telecommunications, Bombay, Madras, Calcutta; Regional Directors, R.M.S./Bombay/Madras/Lucknow, Postal Stores Depot at Calcutta/Nasik and the Postal Training Centre, Baroda.

**Budget Estimates**

The revised estimates for 1964-65: gross receipts: Rs. 126·19 crores; working expenses (net): Rs. 117·54 crores; dividend to general revenues: Rs. 8·65 crores.

1965-66 Budget: gross receipts: Rs. 141·37 crores; working expenses (net): Rs. 131·01 crores; dividend to general revenues: Rs. 10·36 crores.

On 1st April 1964 the total capital outlay of the department stood at Rs. 213·15 crores. At the end of 1964-65 and ensuing years it is expected to be at Rs. 240·28 crores and Rs. 273·96 crores respectively.

*Staff:* 457,888 (including 169,353 extra departmental employees) and 2,309 gazetted officers (as on March 31, 1964).

*Traffic Statistics:* (1964-65 estimates: Figures are in millions): Postal articles 6,015; Registered articles 149·8; Money orders 103·6; Savings Bank transactions 41·8; Telegrams 43·1; Trunk Calls 52·7; Value of money orders issued (in crores of rupees) 452·5; Telephones (in thousands) 761.

The no. of complaints received during 1964 (Jan. to Dec.) was 709,469 and those finally disposed of were 698,662. This works out to 0·0118 per cent of the total traffic (about 6,015 millions) against 0·119 per cent in the previous year.

*Propagation of Hindi:* Measures were stepped up for the greater use of Hindi in the Department. With this end in view the following steps were taken: (*i*) Staff of Administrative and Operative offices were exhorted to learn Hindi by their respective target dates. As on Sept. 30, 1964, 57,981 employees remained to be trained in Hindi Language and 1,320 to be trained in Hindi typewriting and 485 in Hindi stenography; (*ii*) Besides training facilities available with the Ministry of Home Affairs classes, nearly 15 night schools are conducted in the country; (*iii*) As an incentive for the above a scheme for the grant of cash awards to the P. & T. candidates who secure high percentage of marks in Hindi examinations is in operation; (*iv*) Work of propagation of Hindi in Circles has been entrusted to Welfare/Labour Officers; (*v*) Conveyance charges from the office to the place where Hindi classes are conducted are being paid to the Hindi trainees.

It has been decided to put Hindi to actual use by: (*i*) Replying Hindi communication in Hindi; (*ii*) Printing invitation cards etc. in Hindi; (*iii*) Issuing circulars and orders concerning class IV employees in Hindi also; (*iv*) making entry in the service records to the effect of passing Hindi Examinations; (*v*) introducing Hindi noting and drafting in the P. & T offices, located in Hindi speaking areas; (*vi*) Procuring Hindi typewriters; (*vii*) Displaying Office sign-board and officers' name-plates in Hindi also; (*viii*) Utilising Hindi knowing and Hindi trained staff for doing Hindi work; (*ix*) Printing stamps, seals, letter heads, etc., in Hindi.

*Translation:* (*i*) Legal and statutory literature of the Department has been sent to the Ministry of Law for translation into Hindi; (*ii*) Two of the technical P. & T. Manuals have been sent to the Ministry of Education for Hindi translation, (*iii*) About 1,000 terms to be used in P. & T. signboards, name plates etc., have been finalised in Hindi and circulated to the Heads of Circle and Administrative Offices; (*iv*) The work of translating P. & T. Manuals etc., have been taken up.

*Broadcasting Receiving Licences:* With a view to giving facility for renewal of Broadcast Receiver Licences a few important town post offices were also authorised to renew licences other than the Head Post Offices.

Licences for imported radio sets have been introduced through a rationalised procedure by which notices are issued only after allowing a sufficient margin of time in the cases where licences have not been issued.

It is proposed to issue broadcast receivers' licences in the form of an elegant book from the middle of 1965. One licence book will last for a period of 6 years. On introduction of the book form of licences, the renewed fee will be realised in the shape of stamps for which purpose a new series of B.R.L. stamps will be issued. The time taken for the renewal of a licence at the post office counter will be reduced by about 75 per cent after introduction of the book form of the licence.

## POSTS

The opening of post offices in rural areas continued to be governed by the liberalised policy which came into force from 1st March 1959.

Out of the 23,000 post offices proposed to be opened during the Third Five Year Plan, 15,297 offices were opened during the first three years of the Plan period and 1,754 offices during the current financial year up to the end of December 1964, bringing the total number of new Post Offices to 17,051. Of this number 1,259 are in the urban areas and the rest in rural areas. About 2,700 more post offices were expected to be opened by 31st March 1965.

Special attention was also paid to the opening of post offices in 'very backward' areas including border areas. Out of the 200 post offices proposed to be opened in the backward areas an enhanced loss of Rs. 2,500 per annum per post office has been fixed during the Third Five Year Plan period. Against this target, sanction has been issued so far for 186 post offices, out of which 166 post offices have already been opened.

The fulfilment of the target of 23,000 new post offices in the Third Plan depends on the provision of adequate funds in 1965-66, the last year of the Third Plan; because a cut of Rs. 8 lakhs was imposed on the funds allotted for the opening of the post offices during 1964-65.

62 Extra-Departmental offices were upgraded into Departmental Sub-offices during 1964-65 and about 689 more offices were expected to be upgraded by the end of March 1965.

Total no. of letter boxes as on 1st Dec. 1963: 183,074 (rural 137,862; urban 45,212). Total no. as on 1st Dec. 1964: 189,280 (rural 143,394; urban 45,886).

In rural areas 885 runners' lines covering a total distance of 14,165 kilometres were converted during the year ending 31st March 1964 into various speedier modes of conveyance.

Noticeable improvement has been effected in the frequency of delivery service in rural areas. More villages have been provided with a daily delivery service bringing the number of such villages as on Dec. 1, 1964 to 304.754 as against 284,818 at the close of the previous year.

In India a post office covers an average area of 35·48 sq. kilometres.

*Panchayati Postal Scheme:* A new scheme called the Panchayati Postal Scheme has been introduced on an experimental basis. It is being tried in Maharashtra State. The scheme is designed to work with active cooperation of the villagers. The chief advantage of this scheme lies in the provision of these basic facilities at reduced cost.

*Mobile Post Offices:*—The urban mobile post offices at Delhi, Madras, Calcutta, Bombay and Nagpur continued to function during the year on all days including Sundays and Postal holidays. Ahmedabad Mobile Post office started functioning from Feb. 1964, and two more have been sanctioned, one for Bhilai and an additional one for Delhi. A rural mobile P.O. for serving the industrial colliery belt of Hazaribagh District in Bihar State was expected to commence by the end of 1965.

*Postal Life Insurance:* Total number of policies for postal life insurance accepted from April to December 1964 was 9,715 (civil wing 9,406; military wing 309) for Rs. 2,48,41,400 (civil wing Rs. 2,29,61,900; military wing Rs. 18,79,500).

*Commemorative Stamps:* Occasion, date and denomination respectively are as follows:

Pt. Jawaharlal Nehru, 12th June 1964, 0·15 P.; Dr. Asutosh Mookerjee, 29th June 1964, 0·15 P.; Sri Aurobindo, 15th Aug. 1964, 0·15 P.; Raja Rammohan Roy, 27th Sept. 1964, 0·15 P.; International Organisation for Standardization (ISO) 6th General Assembly, 9th Nov. 1964, 0·15 P.; Children's Day (1964), 14th Nov. 1964, 0·15 P.; St. Thomas, 2nd Dec. 1964, 0·15 P.; XXII International Geological Congress, 14th Dec. 1964, 0·15 P.; Jamsetji N. Tata, 7th Jan. 1965, 0·15 P.; Lala Lajpatrai, 28th Jan. 1965, 0·15 P.; XX Congress-International Chamber of Commerce, 8th Feb. 1965, 0·15 P.; 2nd National Maritime Day, 5th April 1965, 0·15 P.; Abraham Lincoln, 15th April 1965, 0·15 P.; Centenary of the International Telecommunication Union, 17th May 1965, 0·15 P.; First Death Anniversary of Jawaharlal Nehru, 27th May 1965, 0·15 P.; International Co-operation Year, 26th June 1965, 0·15 P.

Commemorative Stamps to be issued during the rest of 1965.

Mt. Everest Indian Team's Success,* 15th Aug. 1965; Picking of tea leaves,* 15th Aug. 1965; Pandit Govind Ballabh Pant, 10th Sept. 1965; Sardar Vallabhbhai Patel, 31st Oct. 1965; Deshbandhu Chittaranjan Das, 5th Nov. 1965; Atomic Reactor, Trombay, 14th Nov. 1965; (This stamp will be in the definitive series and will be priced Rs. 10); Vidyapati, celebrated Poet of Mithila, 17th Nov. 1965.

## TELEGRAPHS

Two hundred and sixty-five telegraph offices were opened during the period April to December 1964, thus bringing the total number of offices to 8,077.

More than 4,000 telegraph offices have been opened, some even at a loss to provide telegraph facilities at district, sub-divisional and tehsil headquarters in different parts of the country. Telephone facilities are also provided at district, sub-divisional and tehsil headquarters and towns with population of over 20,000.

Two combined offices were converted into departmental telegraph offices during 1964-65, increasing the total number of DTOs to 187.

Upto 31st Dec. 1964, 73 telegraph circuits were leased to Government, press and industrial concerns, thus the total number of leased circuits were raised to 542. It was expected that this number would increase to 583 by the end of the financial year 1964-65.

*Telex and International Telex :* The most important development in the transmission of printed information was the commissioning of the Teleprinter Exchanges at New Delhi, Calcutta, Bombay and Madras on 24th June 1964. There are 544 Telex subscribers in the above cities at present.

This system was introduced at New Delhi during 1964-65. The service at Bombay was expanded by the addition of 2 channels and opening of additional teleprinter circuits to London.

A total of 570 VFT Channels have been added this year and 400 additioned channels were expected to be commissioned before March 1965.

*Teleprinters :* As on 31st Dec. 1964, the total number of teleprinters in use was 2,632. This includes 72 teleprinters in *Devnagri* keynotes. 200 additional teleprinters were expected to be brought into service during the remaining period of the year 1964-65.

*Phonogram :* Phonogram service was introduced in 35 stations during the year raising the total number of such stations to 957. Over 3·5 million messages were booked and 9·1 lakh messages were conveyed on phone to addresses from April to Dec. 1964.

*Indian Language Telegraph Service in Devnagri Script :* This system has been introduced in 29 more offices during the year by which the total number of such offices has gone up to 2,100.

*Greetings :* Over 1·55 million greeting telegrams in English and 12,000 in Devnagri Script were delivered in pictorial forms and envelopes during the year 1964-65.

*Photo-telegraph Service :*—This was introduced in India with effect from Oct. 30, 1962 on a regular basis between India & Cyprus *via* London.

## TELEPHONES

There has been a steady progress in the implementation of extending telephone facilities to rural and undeveloped areas.

The total number of telephones in the country as in June 1965 was about 7,32,000. By the end of the Third Plan, telephone connections are expected to touch a figure of 8,61,000.

*Expansion of Exchanges :* The equipped capacity of the departmental exchanges has increased from 5,35,815 to 5,81,630 during 1963-64.

The total number of connections given under O.Y.T. scheme upto December 31, 1964 was 77,843 and the revenue accrued from the subscribers under the scheme was Rs. 18,73,53,731.

At present this system is in force at Ahmedabad, Amritsar, Bangalore, Bombay, Calcutta, Delhi, Hyderabad, Kanpur, Madras, Nagpur and Verawal.

*Trunk Exchanges :* A total of 159 trunk positions were installed during the year 1963-64. Another 100 trunk positions are expected to be installed by 31st March 1965.

*International Trunk Telephone Service :* As per an agreement signed by the respective Govts. of India and Nepal on 25th June 1964 the Indo-Nepal Telecommunication Service came into operation with effect from 1st Oct. 1964 with the provision of a direct Radio-Telephone link between Calcutta and Kathmandu and a radio teleprinter link between Delhi and Kathmandu.

Two new radio telephone channels have been provided between Poona and Sydney to cope with the pressure of traffic between India and U.S.A.

During the year trunk telephone service has been extended to Mauritius, Netherlands, Malawi and Libya. The total member of countries /places for which the telephone is available from India is 114.

*Coaxial Cables :* In order to provide a large number of high grade circuits between important cities in the country, the laying of control trunk cable was taken up in 1958. By the end of March 1964 over 1,300 miles cables had been laid out of 2,000 miles required to connect Calcutta, Delhi, and Bombay on a standard 2-tube coaxial cable. During the period April to December 1964 another 400 miles cables were laid. The availability of circuits on this route has made it possible to introduce Subscriber Trunk Dialling on Delhi-Jaipur, Delhi-Kanpur and Agra-Kanpur routes. Patna-Sasaram section will also be completed soon when it will be possible to introduce S.T.D. facility between Delhi and Patna.

The introduction of this system in Madras-Bombay line covering Belgaum, Bangalore, Madras is expected to be completed before the end of the Third Plan. A standard 2-tube coaxial cable has already been laid on the Delhi-Jullundur route covering 300 miles. The other works are in progress.

The work in the Madras-Ernakulam route is also to be completed before the end of the Third Plan.

*Microwave :* Plans have been finalised and equipment ordered for introducing microwave transmission for the first time in the public telephone network in India. Work on Calcutta-Assam and Ambala-Simla route was taken up and going on in full swing in the above sector. The work on the Jullundur-Srinagar line with a narrow band microwave system covering a distance of 300 miles was to be completed by the end of 1965.

A narrow band microwave system connecting Ambala, Simla and Chandigarh taken up during the year was to be completed before the end of 1965.

The Calcutta-Kharagpur wide band microwave system planned to extend upto Bombay is to be taken up in the Fourth Plan.

## WIRELESS

*Radio Telephone Service :*— A radio telephone link between Calcutta and Kathmandu was opened in Oct. 1964 and the one that was existing between Patna-Kathmandu has been closed down.

A single channel VHF link was opened between Malda and Dhulian in West Bengal for providing a direct out-let later, between Calcutta and Malda. An additional VHF radio telephone link was provided betwen Jorhat and North Lakhimpur.

New wireless stations were opened at Amini and Daporijo in NEFA for working Radio Telephone Service with Shillong and Jorhat and at Passishat for radio telephone service.

*Wireless Telegraph :*— The following wireless circuits were provided during the year under review :—

(1) Kargil-Srinagar-Leh ; (2) Four additional wireless stations were provided for National Coal Development Corporation and two for National Mineral Development Corporation.

*Workshops :*—Stores and equipment worth Rs. 330·81 lakhs were produced by the P. & T. Workshops during 1964-65. The target for 1964-65 was Rs. 495 lakhs.

Substantial progress was made towards development of new items and also in the exploration of substitutes for imported and costly raw materials.

## TELEGRAPH AND TRUNK CALL RATES

The rates for inland telegrams and trunk calls were revised, according to a decision taken by the Government. The new rates came into force with effect from May 1, 1963.

The new rates for express and ordinary inland non-press telegrams respectively in brackets are as follows :—For the first ten words (Rs. 2·00 ; Re. 1·00) ; For each additional word after the first ten words (Re. 0·20 ; Re. 0·10).

The above rates are applicable to telegrams destined for Nepal also.

For greeting express and ordinary telegrams respectively, the new rates are as follows: For the first eight words (six for the name of the addressee and the address, one for the greeting and one for the name of the sender) Rs. 1·50, Rs. 0·75 ; For each additional word (over six in the address and over one in the name of the sender) Re. 0·20, Re. 0·10.

The registration fee for abbreviated addresses has been fixed at Rs. 50·00 for a period not exceeding 12 months.

**Trunk Call Rates :** The rates admissible in respect of urgent calls, during the concessional tariff period, will be 75 per cent instead of the existing 50 per cent of the full rate normal tariff. No such reduction in charges will be admissible in the case of higher priority calls, namely 'most immediate', 'operations immediate', 'immediate' and 'important".

## POSTAL RATES

The postal rates for different types of postal articles were revised with effect from May 1963.

The concessional rate of postage for local delivery post cards has been abolished. Post cards will now cost 6 P.*

Postage on inland book, pattern and sample packets is 10 P. for a weight not exceeding 50 grams. For every additional 50 grams or fraction thereof, the charge is 5 P.

It may be noted, however, that there will be no change in the existing rates of postage on (1) Book packets containing only printed books, and (2) book packets containing only periodicals, which are registered with the Press Registrar of India.

**Registration Fee :** In addition to ordinary postage on any postal article, inland or foreign, the registration fee is 55 P. instead of the existing 50 P. The acknowledgement fee for a registered article is 10 P.

**Posting Certificate :** The fee for a certificate of posting for every three articles or for any less number is 5 P.

**Late Fee :** The late fee chargeable for an unregistered letter, letter-card, post card or packet is 10 P., for each registered article the fee is 15 P. The late fee for a foreign postal article is also 15 P.

Certain other rates and fees, such as for insurance, V.P.P., post boxes, post bags etc., have also been revised.

* Denomination 15 P.

**Foreign Mail :** The revised rates of postage for foreign mail came into force from June 30, 1963.

The new rates are applicable to mail intended for all parts of the world served by the foreign post with the exception of Ceylon, Nepal and Pakistan, to which inland rates of postage continue to apply.

According to the new rates, the postage for letters weighing not more than 20 grams is 40 P., and for every additional 20 grams or fraction thereof 25 P. Post cards cost 25 P. for single and 50 P. for reply-paid. Printed papers including newspapers and books are charged at 15 P. upto 50 grams and 10 P. for every additional 50 grams or fraction thereof.

The postage for registered newspapers is 8 P. upto 50 grams weight and 4 P. for every additional 50 grams or fraction thereof. Business papers (legal and commercial documents) are charged 15 P. upto 50 grams and 10 P. for every additional 50 grams or fraction thereof. The minimum charge per packet is 40 P.

For sample packets, the postage is 15 P. upto 50 grams and 10 P. for every additional 50 grams or fraction thereof. Insured packets are charged 26 P. upto 50 grams and 26 P. for every additional 50 grams or fraction thereof. The minimum charge per box is Rs. 1·28.

In the case of bulk bags, the postage is 85 P. per kilogram if the bag contains registered newspapers only. For any other kind of printed matter in the bulk bag, the rate is Rs. 2·05 per kilogram.

The fee chargeable in respect of inward foreign postal articles on which customs duty is leviable is revised with effect from Jan. 1, 1964. The new rates will be 50 P. for letters, packets or insured boxes and Re. 1 for bulk bags of printed matter, when it weighs more than 500 grams. For parcels the rate will be Re. 1.

# SOCIAL WELFARE IN INDIA

THE period under British rule (1800-1947) witnessed a destruction of the old social structure in India. In the new structure that emerged a number of reforms and institutions were introduced by bodies like the Bramho Samaj (associated with the name of Raja Ram Mohan Roy), the Prarthana Samaj, the Deccan Education Society and the All-India Social Reform Association (Justice M. G. Ranade), the Ramkrishna Mission (Swami Vivekananda), the Servants of India Society (G. K. Gokhale) and the Arya Samaj (Dayanand Saraswati). The Arya Samaj and the Ramkrishna Mission sponsored social reforms, established orphanages, widows' homes, free dispensaries and relief centres in periods of emergency. The Servants of India Society is especially notable for its ramifications in the fields of labour, tribal welfare, youth welfare and emergency and relief work. An impetus to women's welfare was given by D. K. Karve's Women's University and G. K. Devadhar's Seva Sadan in Poona.

During this period pioneering work in many neglected fields of service, *e.g.* foundling homes, leper asylums and institutions for the maimed and the handicapped, was undertaken by Christian missionaries in the country.

By 1920 Mahatma Gandhi's contribution began to gain recognition throughout the country. He provided for a number of constructive social welfare programmes through organisations like the Harijan Sewak Sangh, All-India Village Industries Association, Charkha Sangh, the Hindustani Nai Talimi Sangh, Goseva Sangh, and the Kasturba Gandhi National Memorial Trust, etc. His constructive programme also included dignity of manual labour and labour welfare, prohibition of alcohol, drugs and gambling, Tribal welfare and leprosy relief.

The late '30s saw the formation of the first popular Ministries in eleven provinces in India.

During the same period professional social work began to be recognised with the establishment of the Dorabji Tata Graduate School of Social Work in 1936, later Tata Institute of Social Sciences.

At present there are about twenty Schools of Social Work in India, and recently they have formed an Association of Schools of Social Work. The alumni from the schools of social work have now formed a professional association namely the Indian Association of the Alumni of Schools of Social Work.

The new profession generally covers the following fields of social work: Community Welfare Services; Family, Child and Youth Welfare Service; Public Welfare Administration; Social Security Services; Services for the Maladjusted and Handicapped Groups; Social Defence and Correctional Administration; Services for Emergency Relief and Rehabilitation; Social Legislation and Social Action; Social Research; Training in Social Work; Tribal Welfare and Rural Welfare.

The establishment of the Indian Conference of Social Work at a meeting of over 450 social workers assembled in Bombay in November 1947 marks a significant development in the field of social work in India. The Conference undertakes and promotes the study of social problems and endeavours to foster co-operation, collaboration and co-ordination amongst social service agencies in India and abroad. It has held sessions in Bombay (1947), Madras (1948), Delhi (1949), Jamshedpur (1950), Calcutta (1951), Hyderabad (1953), Lucknow (1954), Bangalore (1955), Jaipur (1956) and its Decennial Anniversary Session in Madras (1957).

Later it was decided to hold biennial sessions. The 13th session of the Indian Conference of Social Work was held at Varanasi in 1964, the theme of which was "Changing Trends in Social Welfare. Besides holding conferences, it also organises national seminars. The fourth national seminar on "Public Cooperation for Social Welfare with special reference to Third Five Year Plan" was held in Chandigarh in 1960. In 1964 seminars were held on "The Role of Volunteer in Social Work" in Bombay and Madras in cooperation with the Cleveland International Programme for Youth Leaders and Social Workers, Inc., U.S.A.

The I.C.S.W. held its third national seminar, the subject being urban community development, in December 1959 at Hyderabad. A seminar was also held at Bhopal on "Welfare of Tribes and Denotified Communities.

In 1952, it enabled the International Conference of Social Work to hold its Sixth Session at Madras—the first International Conference on Asian soil.

Research in social welfare is becoming an important activity in the field of social work. Funds for the same are available from the Research Programmes Committee of the Planning Commission, the Dept. of Social Security and the University Grants Commission, as well as other foreign bodies such as the U.S.A.I.D. The Indian Conference of Social Work is carrying out two research projects with the financial assistance of the U.S.A.I.D., which have been approved by the Government of India.

## SOCIAL LEGISLATION

Social legislation on an all-India scale dates back to 1843 when the first law abolishing slavery was passed. The earlier laws sought to reform the evil social practices existing at the time, practices such as *Sati* and infanticide. Later, social legislation began to assume a more positive and constructive role. Laws for better working conditions in factories, laws providing maternity benefits, for the abolition of traffic in women and children, and laws for the protection and care of destitute and delinquent children have all received attention in the first half of this century.

Part IV of the Constitution lays down the "Directive Principles of State Policy", as follows :—

"The State shall strive to promote the welfare of the people by securing and protecting as effectively as it may, a social order in which justice, social, economic, and political, shall inform all the institutions of the national life."

According to the present Constitution, social legislation can be formulated and implemented both by the Central and State Governments. Most social subjects are on the concurrent list, *i.e.* they can be legislated upon by the Central or State Governments. These subjects include : marriage and divorce, social security and social insurance, economic and social planning, welfare of labour, charities and charitable institutions, vagrancy and mental deficiency.

Prison Reform Bills and Borstal Institutions are subjects in the State list. An informative volume entitled "Social Legislation", which contains detailed information regarding the laws pertaining to women, children, handicapped groups and social defence was published in 1956 by the Planning Commission of the Government of India.

A Department of Social Security has been set up in June 1964 under the Union Ministry of Law and Social Security. The new Department is in charge of tribal welfare, welfare of backward classes, social security measures, chiefly relating to industrial labour as well as the implementation of old age pension schemes. It is also in charge of welfare of the handicapped, the weaker section of the Society and social defence.

The States of Assam, Andhra Pradesh, Maharashtra, Gujarat, Madhya Pradesh, Punjab, Rajasthan, Uttar Pradesh and West Bengal have Departments of Social Welfare, whereas Madras possesses a Women's Welfare Department.

A scheme of family and child welfare is being organised in 2,500 blocks in close cooperation with the Community Development Department and the Central Social Welfare Board. It is proposed to set up 50 pilot projects and training centres during 1965-66.

The expenditure allocated to Social Services in the 1st Five-Year Plan period was 532 crores of rupees out of a total outlay of 2,356 crores, which works out to 23 per cent, whereas in the Second Five-Year Plan, out of a total outlay of 4,800 crores of rupees 808 crores were earmarked for Social Services, including Housing, Rehabilitation, etc. in the revised allocations.

To the above amount we could also add the provision of 90 crores in the First Plan period, and 200 crores in the Second Plan period for community development, both of which work out to four per cent of the total provision respectively.

PLAN PROVISION BY MAJOR HEADS OF DEVELOPMENT

| | | Second Plan | Third Plan |
|---|---|---|---|
| | | Total Provision (Rs. crores) | Total Provision (Rs. crores) |
| (a) | Education (general and technical education and cultural programmes) | 277* | 560 |
| (b) | Health (including water supply, sanitation and family planning) .. .. | 225 | 342 |
| (c) | Labour and Labour Welfare, Welfare of Backward Classes and Social Welfare | 125 | 212† |
| (d) | Housing .. | 84 | 142** |
| (e) | Rehabilitation .. | 86*** | 40 |
| | Total .. .. | 797 | 1,296 |

* Includes Rs. 2 crores transferred from the Ministry of Rehabilitation to the Ministry of Education.

** Excludes Rs. 60 crores provided by the L.I.C.

*** Excludes Rs. 4·5 crores for the payment of loans by the Rehabilitation Finance Administration.

† Includes Rs. 3 crores for child welfare under 'Education'.

The Social Defence (Care) Schemes in the Third Five Year Plan involves an outlay of Rs. 3·58 crores. It is aimed at prevention of juvenile delinquency, enforcement of suppression of Immoral Traffic in Women and Girls Act, prevention and treatment of beggary and vagrancy, welfare services in prisons and probation.

## SOME ALL-INDIA ACTS

The Special Marriage Act, 1954; The Hindu Marriage Act, 1955; The Hindu Succession Act, 1956; The Hindu Adoption and Maintenance Act, 1956; The Hindu Minority and Guardianship Act, 1956; The Mines Maternity Benefit Act, 1941; The Apprentices Act, 1850; The Children Pledging of Labour Act, 1933; The Employment of Children Act, 1938; The Reformatory Schools Act, 1897; The Lepers Act, 1898; The Indian Lunacy Act, 1912; The Untouchability Offences Act, 1955; Suppression of Immoral Traffic in Women and Girls Act, 1956; The Women's and Children's Institutions Licensing Act, 1956; The Orphanages and other Charitable Institutions Supervision and Control Act, 1960; The Probation of Offenders Act, 1958; The Union Territories Children's Act, 1960.

### Traffic in Women

The Suppression of Immoral Traffic in Women and Girls Act 1956 was implemented in most States in May 1958. It applies to the whole of India, and from the date of the coming into force of this Act, all other State Acts relating to the suppression of immoral traffic in women and girls or to the prevention of prostitution stand repealed.

Some institutions concerned with this aspect of the problem are:

*Andhra Pradesh:* Association for Moral and Social Hygiene known as Nari Sudhar Society with 4 Dist. Branches. Four After-Care Homes and Four After-care Shelters.

*Maharashtra:* Maharashtra State Women's Council Rescue Home; Bombay Vigilance Association Shelter, League of Mercy Shelter; Salvation Army Industrial Institute for Women; Shraddhanand Anath Mahilashram; and St. Catherine's Home (all in Bombay City) and Association for Moral and Social Hygiene (with 13 District Branches).

Other districts of Maharashtra: Wasudeo Babaji Nowrangay Orphanage (Pandharpur); Anath Mahilashram (Kolhapur); St. Crispin's Home; Mahila Sevagram; Hindu Anath Mahilashram; Ramabai Mukti Mission (Poona Dist.).

*Madras:* The Stree Sadan Rescue and Training Home; Government Vigilance Home; Good Shephard Home; Meenakshi Sadanam (Madurai); Association for Moral and Social Hygiene with 5 Dist. Branches. Five Vigilance Rescue Shelters; one Protective Home; Abhaya Niliyam run by the Madras Vigilance Association.

*Bengal:* The Fendal Home and All Bengal Women's Union Home. One Home and two Dist. Shelters for Women and Girls.

*Delhi:* Nari Niketan; Association for Moral and Social Hygiene. Aftercare Home for Women.

*Bihar:* Bharatiya Bidhwashram, Anathalaya; Shilpashraya, Nari Kalyan Mandir; Association for Moral and Social Hygiene with 11 State Branches and 18 Sub Branches.

*Mysore:* Abhaya Ashram, Good Shephard Home; Association for Moral and Social Hygiene. Three State Homes, two Vigilance Shelters, and five Reception Homes.

*U.P.:* Ashoka Ashram (Dehra Dun); Five Protective Homes, two Aftercare Homes and two Reception Shelters. Association for Moral and Social Hygiene with 7 Dist. Branches.

*Gujarat:* Shri Seth Mansukhlal Chaganlal Hindu Widhawa Ashram; Vikas Griha (Ahmedabad); Vikas Griha (Junagadh); Association for Moral and Social Hygiene with 8 Dist. Branches. Four Reception Homes, one State Home; Jyoti Sangh.

*Kerala:* Eight Rescue Shelters, one Rescue Home; one Aftercare Home for Adolescents (Females). Association for Moral and Social Hygiene with 7 Dist. Branches.

*Orissa:* Association for Moral and Social Hygiene (Cuttack) with 4 Dist. Branches. One Aftercare Home and 4 Dist. Shelters.

*Punjab:* Two Aftercare Homes, Two Aftercare Dist. Shelters. Four Protective Homes. Association for Moral and Social Hygiene with 18 Dist. Branches.

*Rajasthan:* Association for Moral and Social Hygiene (two homes and eight reception centres).

*Madhya Pradesh:* One Rescue Home, one State Aftercare Home, two Reception Centres, 8 Dist. Shelters. Association for Moral and Social Hygiene with two Dist. Branches.

*Assam:* One Rescue Home, Two Aftercare Homes, 3 Aftercare Shelters and one Aftercare Centre.

*Himachal Pradesh:* Two State Homes, one Protective Home.

*Goa:* Association for Moral and Social Hygiene.

From the time the Act was enforced on May 1, 1958 to March 1960 the Central Social Welfare Board set up 68 protective homes in the country.

There were no brothels in Manipur. The Laccadive, Minicoy and Amindivi Islands were also free from traffic in women and children.

Most State Governments have already framed rules and appointed special police officers for enforcing the provisions of the Act.

The Central Social Welfare Board appointed an Advisory Committee under the chairmanship of Mrs. Dhanvanti Rama Rau to study the problem of social and moral hygiene in the country.

Another Committee, with Mrs. Indira Gandhi as Chairman, appointed to lay down procedures for implementing the recommendations of the above Committee recommended the following pattern for setting up different types of Homes and Shelters in each State (their recommendations have been accepted):

At the State level:

(*i*) One home for rescued women needing a fairly long period of adjustment prior to rehabilitation.

(*ii*) Two homes for the aftercare of persons discharged from correctional institutions.

(*iii*) Two short term rehabilitation homes for those discharged from non-correctional institutions.

(*iv*) Strength of each Home not to exceed 100.

At the District level:

(*i*) One shelter temporarily housing persons needing aftercare (maximum period 3 months).

(*ii*) One Reception Centre for temporary stay of women rescued from moral danger.

To meet the expenses of setting up Homes and District Units throughout the country, a total provision of Rs. 1,055 crores was made in the Second Five Year Plan.

The Association for Moral and Social Hygiene in India, which was established in the year 1928, is a Branch of the International Abolitionist Federation, Geneva, which was founded by Mrs. Josephine Butler in 1865 to coordinate on an International level, the efforts made in the different parts of the country to fight prostitution. Keshab Chandra Sen, a well known social reformer, was the pioneer in this task. The Association has got fourteen State Branches with a number of Dist. Branches. It works through its State and Dist. Branches and various Sub-Committees, most important of them being the Legal, Rescue, Rehabilitation, Education, Health, Publicity, Research, Finance and Programme Committees. It holds Annual Conferences, Training Camps and Seminars both at the All India and State levels. A large number of voluntary agencies working for the eradication of prostitution and immoral traffic are affiliated to the Association. It also receives very good cooperation from the police and other Governmental agencies.

The Association receives financial assistance from the Public Cooperation Division of the Planning Commission for the maintenance of the Central Office and Central Orientation Camps. Assistance is also rendered by the Central Social Welfare Board. The Ministry of Health gives a grant to run V. D. Clinics.

The Association runs a Student Counselling Centre in the University of Delhi. Centres for Family Counselling and Marriage Guidance are established in the other parts of the country. It also conducts periodical research.

The Association has its Headquarters at 6-Bhagwan Dass Road, New Delhi. (For names of office-bearers, see under Delhi).

The Maharashtra Branch of the Association conducted "A Study of Prostitutes in Bombay" with reference to their family background and the report has been published under the same title based on the case histories of 350 common prostitutes. This study also gives a detailed analysis of the causes of prostitution showing that 30·50 per cent of it is due to causes of high emotional significance, 14·40 per cent due to economic causes, 28·39 per cent due to social causes, 6·78 per cent due to biological causes and 19·93 per cent due to physical causes.

The National Council for Women in India has its Standing Committee on Moral and Social Hygiene, in Poona.

### Children

Children's Acts in relation to delinquency are in force in the States of Andhra Pradesh, Gujarat, Maharashtra, Madhya Pradesh, Madras, Mysore, Punjab, Kerala, U.P., West Bengal and all Union Territories.

The Borstal Schools Acts, which are slightly different in scope, are in operation in the States of Andhra, Gujarat, Maharashtra, Madras, Mysore, Punjab, U.P., West Bengal and Kerala.

The Reformatory Schools Act of 1897 has also been enforced in all the major States and some Union Territories. But where Children's Acts are in force, the Reformatory Schools Acts are not enforced. In States where Children's Acts exist but are not enforced, the Reformatory Schools Act applies.

The problem of juvenile delinquency is mainly the concern of State Governments.

The Central Bureau of Correctional Services was established in August 1961 with the aim of developing and co-ordinating a uniform policy to standardise the collection of statistics on a national basis. It exchanges information with foreign governments and the United Nations Agencies. It promotes research, training and studies and surveys in the field of prevention and crime. The Central Government have sponsored a care programme under which assistance is given to the States. Under this programme, 40 remand homes, 17 certified schools, 5 borstal schools, 15 boys' clubs and probation hostels have been established. In addition to these, there are private institutions, as well as those existing prior to the operation of the above programme. Given below are details regarding various States :

In Andhra Pradesh there are 7 certified schools, 3 juvenile courts, and a Juvenile Aid Police Bureau of the Police Department; in Assam there is one beggars' home, in Bihar there are 7 remand homes, 2 probation hostels, 1 borstal school; in Gujarat there are 8 remand homes, 8 observation homes, 7 certified schools, 17 fit person basis institutions. There is one remand home, one certified school, one probation hostel in Delhi; one certified school one probation hostel in Himachal Pradesh. 9 remand homes, 1 borstal school, 5 boys' clubs exist in Kerala; two remand homes, 2 certified schools, 3 probation hostels in Madhya Pradesh. In Madras one remand home, 20 State certified schools, a Juvenile Aid Police Court. In Maharashtra there are 33 certified schools, 89 fit person institutions, 24 remand homes and 21 juvenile courts. There is also a juvenile aid police unit and a certified school for mentally deficient children. In Mysore there are 18 remand homes and juvenile courts, 7 certified schools, one probation hostel. In Orissa one remand home; one certified school in Rajasthan and one certified school in Tripura.

Under the Children's Act, more children come under its purview as a result of destitution than delinquency. The following approximate figures give the number of destitutes and delinquents in a few States* :

| State | Year | Destitute | Delinquent |
|---|---|---|---|
| Gujarat .. | 1963 | 510 | 2,109 |
| Maharashtra | 1961–62 | 4,691 | 2,843 |
| Madras .. | 1963 | 130 | 4,412 |
| Mysore .. | 1962 | 1,489 | 399 |

### Beggars

The Criminal Procedure Code treats vagrants and vagabonds alike and provides penalties under Sections 55 (*i*)(*b*) and 109(*b*).

Beggars may be proceeded against under Section 133 as those committing public nuisance.

Beggary within railway premises was prohibited by law as from February 15, 1941.

Special Acts have been passed by most of the States to prohibit begging in public places. In others, the municipal and police Acts provide measures against begging.

To deal effectively with persons who kidnap children for the purpose of exploiting them for begging, the Indian Penal Code (Amendment) Act, 1959, was enacted. The Act makes kidnapping or obtaining custody of a minor and the maiming of minors for the purpose of begging specific offences and provides deterrent punishment, which may extend to life imprisonment where children are maimed.

There are institutions in the States for the custody, care and assistance of beggars in their rehabilitation.

Some 26 Beggar Homes have come into existence during the Second Five Year Plan and these provide for about 25,000 beggars. 33 more homes are expected to be established before the end of the Third Plan.

## SOCIAL SERVICE AGENCIES

The groups of voluntary social work in India largely fall under the following heads : Administrators ; Professional social workers ; Missionaries ; The Gandhian social workers ; and voluntary social workers belonging to the various private agencies.

Of these the religious believe in the traditional form of charity, the Missionaries in institutionalised social work, the Gandhian in the 14-point constructive programme.

The group of professionally trained social workers is small though most compact. This group consists of alumni and teachers of the following Post-graduate schools of social work in India :

The Tata Institute of Social Sciences, Sion, Trombay Road, Chembur, Bombay 71 ; Delhi School of Social Work, 3, University Road, Delhi 6 ; the Faculty of Social Work of the M. S. Univerisity of Baroda, Camp Road, Baroda ; Shri Kashi Vidyapeeth, Banaras, Chavin, Banaras 2 ; Madras School of Social Work, 1, Jarretts Gardens (upper flat), 23-24, Casa Major Road, Egmore, Madras 8 ; The All India Institute of Social Welfare and Business Management, College Square West, Calcutta 7. The J. K. Institute of Sociology and Human Relations, Lucknow University, Lucknow also imparts training in social work, while the Patna University has a department to train social workers for industrial welfare work. The other institutions are : Institute of Social Service, Nirmala Niketan, New Marine Lines Bombay 1 ; P. S. G. School of Social Work, Peelamedu, Coimbatore ; Bombay Labour Institute, (Government of Maharashtra), Dadabhai Chamarbaugwala Road, Parel, Bombay 12; National Institute of Social Sciences, Bangalore ; Udaipur School of Social Work, Udaipur ; Xavier Labour Relations Institute, Jamshedpur ; Department of Economics and Sociology, Andhra University, Waltair ; Institute of Social Sciences, Agra University, Agra ; University School of Social Sciences, Gujarat University, Ahmedabad ; Department of Sociology, Labour and Social Welfare, Bihar University, Bhagalpur ; Vikram University Dept. of Social Work, Indore, M.P. ; Loyola College, Madras ; Institute of Social Work, Bendore, Mangalore ; Stella Maris College, Mylapore, Madras 2 ; Xavier Institute of Social Service, St. Xavier's College, Ranchi.

An association of schools of social work has been formed which is setting up criteria for accredited schools of social work. Over and above the professional schools of Social Work, there are various other training centres run by voluntary bodies for training welfare workers. Training schemes for training workers for particular programmes are also being undertaken by the Govt. in cooperation with voluntary welfare agencies.

Voluntary Social Service Agencies operating on an All-India basis are mentioned below :—

### Child Welfare

Balkan-ji-Bari (Juhu Road, Santa Cruz (West), Bombay 54, AS) ; Society for the Protection of Children in India (2-B, Camac Street, Calcutta) ; Indian Council for Child Welfare, Room 14-15, Block 'A', 'B' Barracks, Queensway, New Delhi ; Indian Council for Child Education (Sumanas, 39, Edward Elliots Road, Madras 4).

### Youth Welfare

Y.M.C.A. (5, Russel Street, Calcutta 16) ; Y.W.C.A. (Parliament Road, New Delhi) ; Bharat Scouts and Guides Association (Regal Building, Parliament Street, New Delhi); Bharat Sevak Samaj (27-A, Theatre Communication Buildings, Connaught Place, New Delhi) ; Y.M.C.A., New Delhi ; Youth Welfare Association (193-E, Devnagar, New Delhi) ; Poor Welfare Association (29/24, Shakti Nagar, Delhi 6) ; 'Gyan Prakash Yuvak Sangh' (653, Chuna Kankar, Mathura, U.P.) ; Youth Hostels Association (2, East Park Road, New Delhi 5) ; Social Service League (Indraprastha College, Alipur Road, Delhi) ; All India Boys Scouts Association (7, Jungpura—B—Mathura Road, New Delhi 14).

### Women's and Family Welfare

All India Women's Conference (C/o Family Planning Association of India, Metropolitan House, Dadabhoy Naoroji Road, Bombay 1) ; Family Planning Association of India (Metropolitan House, Dadabhoy Naoroji Road, Bombay 1) ; National Council of Women in India (Town Hall, Bombay 1) ; Kasturba Gandhi National Memorial Trust (Kasturba Gram, P.O. Indore, Madhya Pradesh).

### Health

Turberculosis Association of India (20, Red Cross Road, New Delhi 2) ; Indian Red Cross Society (20, Red Cross Road, New Delhi 2) ; All India Cancer Prevention Society (Tata Memorial Hospital, Parel, Bombay 12) ; Hind Kusht Niwaran Sangh (Red Cross Road, New Delhi) ; Akhil Bharat Shririk Sikshan Maha-Mandal (Tilak Road, Nagpur, Maharashtra).

Indian Medical Association, Hanging Bridge, Daryaganj, Delhi 7.

### Rehabilitation of the Handicapped

Convention of the Teachers of the Deaf in India (50, Bondel Road, Ballygunj, Calcutta) ; All India Lighthouse for the Blind (89, Elliot Road, Calcutta) ; National Association for the Blind (Jehangir Wadia Building, Mahatma Gandhi Road, Bombay 1) ; All India Blind Relief Society (11-F, Lajpatnagar, New Delhi) ; The Fellowship of the Physically Handicapped, Hornby Vellard, Haji Ali Park, Bombay-34 ; Society for the Education of the Crippled (Child and Adult) (Chunilal Mehta Hut, Mahatma Gandhi Road, Bombay 1) ; The Indian Council for Mental Hygiene (Cumbatta Chambers, Eros Building, 42, Queen's Road, Bombay).

### Rural Welfare

Sarva Sewa Sangh (K33–4 Golghar, Varanasi, U.P.) ; India Village Service (I.V.S. House, Marhera, Dist. Etah, U.P.).

### General Social Welfare

Servants of India Society (Poona 4) ; Ramkrishna Mission (Belur, Dist. Howrah) ; Gandhi Memorial Fund (5, Mansingh Road, New Delhi) ; Salvation Army (Moreland Road, Bombay 8) ; Friends' Service Unit (1, Upperwood Street, Calcutta 16) ; All India Seva Samiti (Seva Samiti Building, Allahabad) ; Indian Co-operative Union Ltd. (Janpath, New Delhi) ; Bharat Sevak Samaj (27A, Theatre Communication Building, Connaught Place, New Delhi).

### Rural Women's Welfare

Kasturba Gandhi National Memorial Trust (Kasturbagram, Indore, Madhya Pradesh) ; Bharatiya Grameen Mahila Sangh (9/104 Jamnabar Hutments, Block II, Mansingh Road, New Delhi-11).

### Relief and Rehabilitation

United Council of Relief and Welfare (Rashtrapati Bhavan, New Delhi).

### Social Education

Indian Adult Education Association (17-B, Indraprastha Marg, New Delhi) ; Jamia Milia (Okhla, Delhi) ; Literacy House (Lucknow) ; All India Mass Education Society (Gonda).

### Welfare of Under-Privileged Groups

Harijan Sewak Sangh (Kingsway, Delhi); Bhartiya Adimjati Sevak Sangh (Kingsway, Delhi 9).

* Delinquents & destitutes respectively in other States with years in brackets : Andhra Pradesh 308 ; 1,065 (1963) ; Kerala 169 ; 70 (1963); Uttar Pradesh 735 ; 1 (1963) ; West Bengal 1,383 ; — (1963).

**Social Defence**

All India Crime Prevention Society (Behari Niwas, Kanpur, U.P.); Association for Moral and Social Hygiene in India (Room No. 211, 'P' Block, Raisina Road, New Delhi).

**Co-ordination**

The national organization for the co-ordination of all welfare services is the Indian Conference of Social Work located at 42, Queen's Barracks, Foreshore Road, Bombay 1.

There is also a South-East Asia and Western Pacific Regional Office of the International Conference of Social Work which has been established in conjunction with the Indian Conference of Social Work in Bombay.

**International Welfare Agencies in India**

The following are some of the International agencies and organisations working in the country: International Conference of Social Work (Regional Office for South-East Asia and Western Pacific, 42, Queen's Barracks, Foreshore Road, Bombay 1); Asia Foundation (Post Box 149, New Delhi); Ford Foundation (32, Ferozshah Road, New Delhi); World Health Organisation (S.E.A. Office, Patiala House, Hardinge Avenue, New Delhi); Rockefeller Foundation (20/39, Diplomatic Enclave, Kautilya Marg, New Delhi); International Labour Organisation, Indian Branch (Mandi House, New Delhi); International Union for Child Welfare (Consultant for Far East Asia, Rooms Nos. 14 & 15, Block A, Barracks B, Queensway, New Delhi): United Nations International Children's Emergency Fund (UNICEF House, 11, Jor Bagh, Delhi); United Nations Educational, Scientific and Cultural Organisation (Old Mill Road, New Delhi); Food and Agricultural Organisation, UNO (21, Curzon Road, New Delhi); Cleveland International Programme for Youth Leaders and Social Workers Inc. (12, Hailey Road, New Delhi).

**Bhoodan Movement***

Special mention must be made of the Bhoodan Movement initiated by Acharya Vinoba Bhave, one of the ablest disciples of Gandhiji. He is effecting a silent but nevertheless remarkable social revolution within the country by the voluntary gift of land (Bhoodan), wealth (Sampattidan), labour (Shramdan) and life (Jeevandan).

## CENTRAL SOCIAL WELFARE BOARD

The Central Social Welfare Board was set up in August 1953. Its functions as defined in the resolution of Government setting up the Board, are to survey the needs and requirements of social welfare organisations, evaluate their programmes and objectives, coordinate the assistance given by various Central Ministries and State Departments; promote the development of voluntary organisations in the areas where no such organisations exist, and render financial assistance to deserving agencies. The Chairman of the Board is Smt. Achamma J. Matthai.

At the State level, there are 24 State Social Welfare Advisory Boards. These State Boards advise and assist the Central Board in the formulation of its programme to voluntary agencies. The Chairman of State Boards are experienced social workers.

### PROGRAMMES

GENERAL - GRANTS - IN - AID PROGRAMME: From its inception upto the end of Dec. 1964, the Board had sanctioned nearly 24,400 grants amounting to about Rs. six crores under its general-grants-in-aid programme. These grants cover services for children, women and old persons.

WELFARE EXTENSION PROJECTS (Rural): At present 274 such projects with 2,340 centres are functioning. In addition 683 Mahila Mandals and local voluntary organisations are running 1,638 centres in these areas.

WELFARE EXTENSION PROJECTS (Urban): The activities undertaken in these projects provide community welfare centres, creches, balwadis, anti-natal and post-natal advisory services, welfare health centres, hobby clubs, vocational guidance, and other services. By the end of Dec. 1964, 65 such projects were functioning in different States for which the Board had provided assistance of Rs. 34·47 lakhs.

SOCIO-ECONOMIC PROGRAMME: Under this scheme, grants are given to voluntary institutions for setting up production units of small industries, units ancillary to large industries, handloom training-cum-production units, handicraft procurement units, training units and production units, coir spinning and weaving units, and silk spinning and reeling units. The Board has so far sanctioned 81 units, out of which 42 have started functioning and are providing work and wage to over 1,200 women and handicapped persons.

CONDENSED COURSES OF EDUCATION FOR ADULT WOMEN: Under this programme adult women are prepared for middle school or matriculation examinations in condensed courses of two years duration. Upto the end of Dec. 1964, the Board sanctioned 722 courses in different parts of the country.

HOLIDAY HOMES: This scheme enables children of low income groups to be taken to holiday camps at hill stations or other summer or sea resorts, outside their home towns, during vacation, free of cost. Nearly 620 camps benefitting over 31,000 children have been organised with assistance totalling Rs. 20·36 lakhs from the Board.

NIGHT SHELTERS: Twenty-six shelters were running at the end of Dec. 1964 and they have been given assistance amounting to Rs. 5·26 lakhs. The implementation of this programme has been entrusted to the Bharat Sevak Samaj, with grants from the Board, according to a schematic budget.

BORDER AREAS PROGRAMME: The Chinese Aggression of 1962, highlighted the need for welfare services in areas bordering China, Tibet and Pakistan. As a first step towards organising welfare services, a State Social Welfare Advisory Board was formed in NEFA. Ten multipurpose centres providing maternity and child welfare services, balwadis, craft classes, social education for women etc. had been sanctioned in 1964 in NEFA, three centres in Ladakh, three centres in Lahaul and five centres in Kannaur (H.P.). These were continued and, in addition, three Welfare Extension Projects in the districts of Chamoli, Uttar Kashi and Uttar Khand in Uttar Pradesh and 20 centres in Kutch and Banaskanta districts of Gujarat were started during 1964-65.

SPECIAL CHILD WELFARE PROGRAMMES: Demonstration projects of integrated child welfare services for meeting the total needs of the children in the age group 0-16 have been set up during the Third Plan. Over 300 balwadis have been set up in 11 projects. The other special child welfare schemes which the Board is developing during the Third Plan include production of pictorial literature for children of the pre-school age; standardisation of educational and recreational equipment and material for pre-schools, starting of integrated pre-school projects in urban areas, organisation of foster care services and training of child welfare workers.

EVALUATION OF PROGRAMMES: The main purpose of the scheme is to obtain up-to-date information about the changing needs in the field of social welfare, to evaluate the effectiveness or otherwise of social welfare programmes being developed in the country and through action-research and pilot projects to initiate new programmes.

PUBLICITY: The Board brings out two monthly journals "Social Welfare" in English and "Samaj Kalyan" in Hindi. Some of the State Boards also bring out bulletins in regional languages. Documentaries, through the Films Division of the Government of India, are also produced by the Board.

ENCYCLOPAEDIA OF SOCIAL WORK IN INDIA: The manuscript of "Encyclopaedia of Social Work in India" a project taken up by the Board at the instance and with the assistance of Planning Commission was expected to go to the press in 1965.

* See main article "Bhoodan" for statistical information.

# ARECANUT INDUSTRY

ARECANUT is one of the most important commercial crops of India. It has an important place in the religious, social and cultural life of our people irrespective of caste, creed or social status. Chewing of arecanut with betel leaves and lime (Thambulam, Pan Supari) has become a habit with some people and a luxury of many in the country.

India ranks first in the world both in the acreage and production of arecanut.

The chief arecanut growing States in the country are Kerala, Mysore and Assam. These States accounted for nearly 95 per cent of the area under cultivation and 93 per cent of the total production of the crop during 1963-64. The other arecanut growing States are Maharashtra, West Bengal and Madras. It is also grown in small areas in Andhra Pradesh, Orissa and other States.

The overall average per capita consumption of betelnut in India is estimated at 0·33 kg. Among the producing States the highest per capita consumption is in Assam with 2·8 kg., In Kerala it is 0·67 kg. and in Mysore 0·66 kg. Among the cities, Delhi and Nagpur are two of the most important consuming markets.

Betelnut (processed arecanut) varieties are numerous in India and can be broadly classified into unboiled, boiled and coloured varieties.

It is estimated that during 1963-64 the country had 119,644 hectares under arecanut cultivation with a production of 99,011 tonnes of cured nuts. Statewise details of area and production during 1963-64 are given below

| State | Area Hectares | Production (Metric tons) |
|---|---|---|
| Kerala .. .. | 56,740 | 46,230 |
| Mysore .. .. | 32,427 | 29,500 |
| Assam .. .. | 24,435 | 16,595 |
| West Bengal .. | 2,198 | 2,460 |
| Maharashtra .. | 2,045 | 2,886 |
| Madras .. .. | 1,609 | 1,240 |
| Andhra Pradesh .. | 139 | 150 |
| Orissa .. .. | 51 | .. |
| Total .. | 119,644 | 99,011 |

The internal production continued to be insufficient to meet the requirements and imports had to be continued. Small quantities of arecanut are also being exported from India for the use of Indian settlers abroad.

IMPORTS OF ARECANUT

| Year | Quantity in thousands of quintals | Value in lakhs of Rupees |
|---|---|---|
| 1958–59 .. | 183·63 | 83·57 |
| 1959–60 .. | 141·75 | 71·86 |
| 1960–61 .. | 111·70 | 64·63 |
| 1961–62 .. | 100·41 | 45·32 |
| 1962–63 .. | 89·78 | 34·61 |
| 1963–64 .. | 28·10 | 13·87 |

EXPORT OF ARECANUT

| Year | Quantity in quintals | Value in Rupees |
|---|---|---|
| 1958–59 .. | 2,005 | 13,39,615 |
| 1959–60 .. | 2,078 | 12,68,615 |
| 1960–61 .. | 1,513 | 9,73,010 |
| 1961–62 .. | 1,229 | 8,60,811 |
| 1962–63 .. | 1,099 | 8,62,405 |
| 1963–64 .. | 957 | 7,24,755 |

(The quantity available for consumption for the year 1963–64 was 10·17 lakh quintals of arecanut.)

**Development:** The Planning Commission in consultation with the State Governments fixed a production target of 105,569 tonnes of arecanut to be achieved by the end of the Third Five Year Plan as against 96,031 metric tonnes at the end of 1960-61. For this purpose various developmental schemes have been included in the State Plans of Kerala, Mysore, Assam, West Bengal, Madras, Maharashtra, Orissa, Andhra Pradesh, Andamans and Tripura with financial assistance from the Government of India. The schemes provide for assistance to the growers in the form of loan for digging wells or erecting pumps sets for irrigating the gardens and for purchase of fertilizers for manuring the gardens and subsidy for sprayers and fungicides for protecting the crop against pests and diseases.

During the Fourth Five Year Plan, it is proposed to raise the production to 110,351 metric tonnes. Unlike during the Third Five Year Plan the programme for the Fourth Plan will be restricted to the major arecanut growing States of Kerala, Mysore and Assam. No increase in area under arecanut is proposed during the Fourth Plan.

**Agricultural Research:** To step up production of arecanut and thereby making the country self-sufficient, the Indian Central Arecanut Committee has established a Central Arecanut Research Station at Vittal, South Kanara, Mysore State, and a series of Regional Research Stations in Kerala, Mysore, Assam and West Bengal. The Regional Arecanut Research Station functioning at Thirthahalli in Mysore State is sponsored by the Committee and the State Government.

Apart from distribution of quality seedlings, the Central and Regional Research Stations undertake fundamental and applied research in Botany, Physiology, Agronomy, pests and diseases of the crop. Researches into the causes and remedial measures of serious diseases like *Mahali* (fruit-rot), *Hidimundigae* disease (which makes the palm barren or imparts constriction at the crown), *Anabe roga*, root, bud and stem rot, and yellow leaf diseases are also undertaken.

**Technological Research:** To find ways and means as to how best arecanut and its by-products could be utilised for industrial and other purposes, researches have been undertaken by the various institutes and Universities in the country. The Committee's Arecanut Technology Unit at the Central Food Technological Research Institute, Mysore, has evolved a new technique by which the fresh ripe fruits can be preserved with standard preservatives for a sufficiently long time. The preserved nuts retain the original colour and the kernel is also seen to retain its freshness. A boiler-cum-drier for drying arecanuts has also been devised.

**Nurseries:** To meet the demand of quality seedlings, a net-work of nurseries (Grant-in-aid nurseries, State nurseries, nurseries attached to Research Stations and certified nurseries has been established in the States of Kerala, Mysore, Assam, West Bengal, Orissa, Madras, Maharashtra, Gujarat, Tripura and Andamans. To demonstrate improved methods of its cultivation to the growers, demonstration plots have also been laid out in suitable centres.

**Marketing:** The Indian Central Arecanut Committee has been bestowing its attention on the development of marketing of arecanuts with special emphasis on co-operative marketing, by encouraging organisation and development of co-operative marketing societies for arecanut growers in all the important arecanut growing states. The Committee gives financial assistance to meet the cost of management of the societies in collaboration with the concerned State Governments. There are twenty-nine arecanut co-operative marketing societies located in the States of Kerala, Mysore, Madras, Maharashtra, West Bengal and Assam, of which eleven societies are receiving financial assistance from this Committee. The Mysore State occupies a predominant position in the co-operative marketing of arecanuts. The co-operative societies in Mysore handled about 40 per cent of the marketable surplus during 1963-64. To co-ordinate the activities of the primary arecanut marketing co-operative societies, a co-operative marketing federation has been organised in Mysore State with its area of operation extended to cover also the neighbouring States of Kerala, Madras and Maharashtra, so as to confer the benefits of inter-State trade to the primary arecanut marketing societies of these States. With a view to preventing adulteration of arecanuts, the Indian Central Arecanut Committee has sponsored a scheme for analysis of arecanuts for prescribing quality grade standards which is being worked at the Central Food Technological Research Institute, Mysore. Another scheme for grading of arecanuts on an experimental basis in selected grading centres through the arecanut co-operative marketing societies, is in operation in the States of Mysore and Madras with financial assistance from the Committee and the concerned State Governments.

The total quantity of arecanuts sold by the co-operative marketing societies during 1963-64 was 1,06,728 quintals valued at Rs. 6·02 crores, which formed about 12½ per cent of the total marketable surplus in the country, against 92,666 quintals valued at Rs. 4·83 crores sold during 1962-63. The total membership and share capital of these societies rose from 26,748 and Rs. 14·94 lakhs during 1962-63 to 28,181 and Rs. 17·22 lakhs respectively during 1963-64.

**Regulated Markets:** With a view to regulating the market practices and preventing exploitation of primary producers, regulated markets have been established in the important assembling centres in Mysore and Kerala States under the Agricultural Produce Markets Act. The regulated markets also collect and disseminate market intelligence for the benefit of growers and traders.

**Publicity:** The Committee continues to publish a quarterly Arecanut Journal in English, Malayalam and Kannada, which contains articles of original researches, techniques for scientific cultivation of arecanut, the control of arecanut pests and diseases, market prices of important trade varieties in forwarding, distributing and consuming markets and other matters of general importance to the farmers. Besides the above, leaflets and posters on different aspects of arecanut cultivation are also released by the committee for the benefit of the arecanut growers, traders and others connected with the industry.

# COFFEE INDUSTRY

COFFEE cultivation is mainly confined to the hilly tracts of south India, from one thousand to six thousand feet above the mean sea level, and is centred in the Malnad area of Mysore, Madras and Kerala. In the lower elevations, which have a higher rainfall, the more delicate but better quality Arabica coffee has given place to the harder but coarser Robusta coffee.

Investments on coffee estates in India have been estimated at 1,500 million rupees. The daily labour employed is about 2,80,000. Ancillary industries like curing and transport employ about 20,000.

The coffee industry's contribution to agricultural income is estimated at 190 million rupees out of a total of 67,780 million rupees or 0·3 per cent.

There are only two types of coffee grown on commercial scale in India, the one most extensively cultivated being Coffee Arabica and the best in quality, with Robusta coming next in importance. About 50 species and sub-species of coffee are being grown in the Coffee Board's research stations. Many of the coffee estates are interplanted with orange, cardamom and pepper. There are about 47,000 coffee estate owners.

The area and production from 1957-58, of the two varieties of coffee are as under:

AREA IN THOUSAND ACRES

| Year | Arabica | Robusta | Total |
|---|---|---|---|
| 1957-58 .. | 164 | 104 | 268 |
| 1958-59 .. | 167 | 105 | 272 |
| 1959-60 .. | 174 | 121 | 295 |
| 1961-62 .. | 179 | 129 | 308 |
| 1962-63 .. | 180 | 132 | 312 |
| 1963-64 .. | 186 | 134 | 320 |

PRODUCTION IN M. TONNES

| Year | Arabica | Robusta | Total |
|---|---|---|---|
| 1957-58 .. | 29,775 | 14,715 | 44,490 |
| 1958-59 .. | 25,580 | 21,335 | 46,915 |
| 1959-60 .. | 32,300 | 17,490 | 49,790 |
| 1960-61 (*E*) | 39,445 | 28,575 | 68,020 |
| 1961-62 (*E*) | 29,300 | 16,750 | 46,050 |
| 1962-63 (*E*) | 34,000 | 22,200 | 56,200 |
| 1963-64 (*E*) | 39,100 | 30,100 | 69,200 |

(*E*) Estimates.

The 1964-65 crop is estimated to be around 58,000 tonnes.

The receipts of the 1964-65 coffee crop into the pool up to 15th March 1965 amounted to 38,828 tonnes, comprising 27,608 tonnes plantation, 6,462 tonnes arabica cherry and 4,758

tonnes robusta. The receipts of the 1963-64 crop up to 15th March 1965 amounted to 68,922 tonnes made up of 28,400 tonnes plantation, 10,470 tonnes arabica cherry and 30,052 tonnes robusta.

Increase in production has been followed by a rise in exports and internal consumption.

The following table gives the trend of exports :

| Year | Exports in Metric Tons* |
|---|---|
| 1957-58 .. .. .. .. | 14,281 |
| 1958-59 .. .. .. .. | 16,400 |
| 1959-60 .. .. .. .. | 18,180 |
| 1960-61 .. .. .. .. | 32,271 |
| 1961-62 .. .. .. .. | 19,829 |
| 1962-63 .. .. .. .. | 22,411 |
| 1963-64 .. .. .. .. | 33,005 |

* Out of the season's crop.

There is no export duty on coffee at the moment.

The annual average prices realised in the pool sales for each type of coffee from the year 1957 (in Rs. per 50 kg. inclusive of Central Excise Duty).

| Year | Plantation 'A' | Arabica cherry Flats/ Arabica cherry AB | Arabica cherry Flats/ Robusta cherry AB |
|---|---|---|---|
| | Rs. nP. | Rs. nP. | Rs. nP. |
| 1957 | 219·18 | 183·03 | 159·55 |
| 1958 | 214·86 | 182·79 | 157·21 |
| 1959 | 236·02 | 186·96 | 155·64 |
| 1960 | 222·46 | 180·72 | 157·54 |
| 1961 | 229·45 | 189·27 | 152·94 |
| 1962 | 247·85 | 200·61 | 153·42 |
| 1963 | 247·19 | 210·73 | 176·78 |
| 1964 | 268·48 | 225·32 | 205·33 |

The possibilities of further expansion of the coffee cultivation in Andhra, Assam and West Bengal States and in the Andamans are being explored at present. Some coffee plantations have already been started in Andhra and the Andamans.

Loans totalling Rs. 50,78,754 were sanctioned to 694 applicants as on 15th March 1965.

AVERAGE INDEX NUMBERS OF WHOLESALE PRICES OF COFFEE
(Base 1952-53 : 100).

| Year | Index |

| 1962 .. .. .. .. | 90·7 |

### COFFEE BOARD

To stimulate internal consumption and to regulate exports a statutory body, now known as the Coffee Board, was set up under the Coffee Market Expansion Board. In December 1952 a Bill was introduced in Parliament to amend the Act of 1942 for the purpose of ensuring better co-ordination between the Board and the Central Government and of providing adequate representation of consumer interests on the Board.

In May 1961, the Government of India introduced another Bill in the Lok Sabha seeking to amend certain provisions of the Coffee Act. One of the principal features of the Bill is replacement of election of Large Growers' representatives by appointment of members by the Central Government. This Bill has been passed by the Parliament.

### Wage Board

The Union Government has accepted the recommendations of the Central Wage Board for increased rates of wages in the Coffee Plantation Industry in so far as the field and workers maistries are concerned and has requested planters to implement them as early as possible. According to a Government resolution published in the gazette on January 21, 1965 the Board's recommendations are to take effect from July 1, 1964 and remain in force for a period of five years. The Board has not yet submitted its final report to the Government as it has still to finalise the new wage structure for the staff employed in the coffee plantation industry.

# COIR INDUSTRY

COIR is the trade name given to the fibre obtained from the husk of the coconut fruit. This golden coloured fibre is also known in Europe as "Cocos Fibre".

India and Ceylon have a virtual monopoly in the production of this by-product of the coconut industry.

India produces about 4,466 million coconuts a year. The area under coconut cultivation is over 7·31 lakh hectares.

In India the coir industry is practically confined to the coastal strip of Kerala State. It accounts for 5·05 lakh hectares of the coconut growing areas out of a total of 7·31 lakh hectares under coconut cultivation in India. The distribution of the area under cultivation and production of coconuts for 1961-62 (latest available) is as follows :—

| States. | Area in hectares. | Production of nuts in thousands. |
|---|---|---|
| Kerala .. .. | 5,04,837 | 32,47,000 |
| Madras .. .. | 54,809 | 4,42,780 |
| Mysore .. .. | 98,729 | 3,95,014 |
| Andhra Pradesh .. | 33,873 | 1,79,310 |
| Maharashtra .. | 7,911* | 25,668* |
| Gujarat .. .. | 5,261 | 27,300 |
| Orissa .. .. | 4,491 | 61,581 |
| West Bengal .. | 6,678* | 22,205* |
| Assam .. .. | 3,148 | 10,232 |
| Andaman and Nicobar Islands .. | 7,487 | 33,273 |
| Laccadive & Amindivi Islands .. | 2,372* | 8,751* |
| Pondicherry .. | 1,279 | 12,538 |
| | 7,30,875 | 44,65,652 |

Source : Indian Central Coconut Committee, Ernakulam.

The coir industry is organised partly on cottage basis and partly in factories. The production of coir fibre, yarn and ropes is essentially a cottage industry, while coir mats, mattings, rugs, carpets, mourzouks, etc. are manufactured in factories.

It is estimated that in the spinning sector the industry provides employment to about five lakhs of people. The spinning sector is spread along the entire coastal region of Kerala State. In the manufacturing sector about 25,000 people are engaged. The manufacturing sector is mainly concentrated in and around Alleppey and Shertallai. The Kerala Government have fixed minimum wages under the Minimum Wages Act in respect of the spinnng sector of the industry.

Quality fibre used for the manufacture of mats, mattings, carpets, rugs, mourzouks, etc. is extracted from soaked retted husk. The bulk of the output consists of fibre extracted from retted husk. The yarn spun by hand is soft and even in twist, while that spun on wheels is of hard twist and not so even as hand spun. Wheel spinning is gradually displacing hand spinning. The spinning is mostly done by women, boys and girls.

Coir yarn has certain well-known trade descriptions. They are : (1) Angengo—Superior and Ordinary ; (2) Mangadan ; (3) Alapat—Real and Imitation (Ashtamudy and Carruva) (4) Vycome or Weaving ; (5) Beach ; (6) Roping ; (7) Quilandy ; (8) Beypore ; and (9) Unsoaked—fine unsoaked and unsoaked.

About 1,52,400 metric tonnes of coir fibre and 1,42,240 metric tonnes of coir yarn are estimated to be produced annually.

The yarn produced in the spinning districts is marketed chiefly in Alleppey where there are a large number of factories for the manufacture of mats, mattings, rugs, carpets, mourzouks, etc. and also exporters of yarn.

On an average, 25,500 metric tons of coir yarn are utilised in the manufacture of coir floor coverings such as mats and mattings ; 55,640 metric tons are exported as coir yarn ; and about 61,100 metric tons are consumed in India itself for various purposes including manufacture of ropes and cordages.

According to the latest information available there were 148 coir factories in Kerala State registered under the Factories Act as on 31st December 1964. These include coir yarn baling and rehanking factories also.

On an average exports of coir and coir products earn about Rs. 12 crores of foreign exchange every year.

The coir industry in India is subject to violent fluctuations in prices and exports, causing often hardship to a large section of the population. This induced the Government of India to set up a Coir Board by special legislation called the Coir Industry Act, 1953.

The Act also provides for the control of the industry by the Union Government for the levy of a customs duty on export of coir fibre, coir yarn and coir products.

At present, the duty levied on coir fibre, coir yarn is at the rate of 98 P. per quintal. The annual revenue on this account comes to more than Rs. 7 lakhs.

The Coir Board was established on July 7, 1954. Its chief function is the improvement of markets at home and abroad, thereby establishing a balance between internal consumption and exports so as to give the industry the required economic stability. The Board discharges its functions in accordance with the rules framed by the Central Government. The Board was reconstituted in 1963-64.

* In the absence of figures for 1961-62, the previous year's figures are repeated.

In view of the importance of the coir industry in its export and the internal consumption aspects the Government of India has allotted a sum of Rs. 313·41 lakhs for the development of the coir industry during the 3rd Five Year Plan, Rs. 75·00 lakhs for Central Schemes to be executed by the Board direct, Rs. 234·40 lakhs for State Schemes and Rs. 4·01 lakhs for the Union Territories' Schemes.

The Third Five Year Plan Schemes of the Coir Board envisage the establishment of Research Institutes, sending out foreign delegations for market survey and study of the uses of yarn in importing countries, opening of show-rooms and sales-depots and propaganda.

A Central Coir Research Institute has been established at Kalavoor, Alleppey District. A mechanised factory for the manufacture of coir mattings on power looms is being set up by the Coir Board at Kalavoor shortly. A Regional Coir Research Station has started functioning at Uluberia, West Bengal.

The Central Scheme consists of two parts, viz. continuation schemes and new schemes.

Continuation schemes include scientific research on chemical, biological and other basic properties of coir fibre and coir yarn, applied research on the various methods of extraction of fibre, studies on motorised spinning machine, work on utilisation of coconut pith and coir waste, studies in the dyeing of coir fibre and yarn, working of the Coir Research Station in West Bengal, statistical and economic research, maintenance of show-rooms, etc.

New schemes include installation of rope making machines in the Central Coir Research Institute, plant for the manufacture of mattings on powerlooms, establishment of design centre and dye house, etc.

Preshipment inspection in regard to the export of coir and coir goods has not yet been made compulsory. However, a system of voluntary preshipment inspection of coir mats has been introduced from 22nd May 1963.

The Cooperative organisation plays a very important role in the development of the coir industry. This sector is being looked after by the State Governments concerned. At the end of the Second Plan, there were 446 coir cooperative societies in all the State together, of which 369 societies were in Kerala State. At the end of the Third Plan it is envisaged that about 700 cooperatives will be organised all over India.

STATEMENT SHOWING THE EXPORT OF COIR AND COIR GOODS FROM THE INDIAN PORTS DURING THE YEARS 1959-60 to 1963-64 (April-March)

| Year (April-March) | Coir fibre | | Coir yarn | | Coir Products (excluding rope) | | Coir cordage and ropes | | Total | |

# JUTE INDUSTRY

As one of the principal earners of foreign exchange, the jute industry plays a vital role in India's economy. Out of the aggregate value of all goods and commodities exported during 1963, the share of jute manufactures was 21·8 per cent. The value of exports of jute yarn and manufactures during 1964 was Rs. 176 crores and Rs. 156·96 crores in 1963. The jute industry also provides direct employment to over 2½ lakhs of workers. The annual value of output during 1962 was about Rs. 220 crores. The Indian jute industry's production of over 13,51,400 tonnes in 1964 was higher than in any single year since the industry's existence. In 1963 nine lakh tons of jute goods were exported. The output of jute goods in the first quarter of 1965 was 3,28,700 tonnes. The total exports during 1964 were of the order of 10·9 lakh tonnes.

There are 59 jute mills with a loomage of 35,435 under Indian managing agency houses and 37 mills with 33,518 looms under non-Indian managing agency houses. It is proposed to complete the modernisation by the end of the Third Plan.

The Corporation has so far granted loans amounting to Rs. 4·6 crores to 22 jute mills for modernising their machinery. Of this, a sum of Rs. 2·64 crores had been drawn by 15 mills by November 1959. The Corporation has also introduced a scheme to provide short-term loans to jute mills to facilitate the purchase of indigenous machinery. Loans up to Rs. 5 lakhs will be granted under this scheme.

The industry was working at maximum production throughout 1962 although at various stages there was a theoretical scaling.

Details of the production trends of raw jute in the Indian Union :—

| Year | Lakh acres | 000 bales |
|---|---|---|
| Average | | |
| 1953–54 .. .. | 11·96 | 3,129 |
| 1954–55 .. .. | 12·43 | 2,928 |
| 1955–56 .. .. | 17·39 | 4,197 |
| 1956–57 .. .. | 19·08 | 4,288 |
| 1957–58 .. .. | 17·42 | 4,052 |
| 1958–59 .. .. | 18·11 | 5,158 |
| 1959–60 .. .. | 16·85 | 4,605 |
| 1960–61 .. .. | 15·12 | 3,982 |
| 1961–62 .. .. | 22·80 | 6,347 |
| 1962–63 .. .. | 21·03 | 5,406 |
| 1963–64 .. .. | 21·30 | 5,910 |

*N.B.*—The jute season is from July to June.

The all-India yield per acre was 1,110 lbs. in 1963-64, as against 1,028 lbs. in 1962-63.

Supply of jute and mesta during 1963-64 was about 110 lakh bales according to trade estimates.

Production of jute and mesta in India in 1963-64 was 77,15,000 bales according to official forecasts.

Supply and distribution of jute and mesta during the seasons 1962-63 and 1963-64 :

| | 1962-63 (lakh bales) | 1963-64 (lakh bales) |
|---|---|---|
| *Supply :* | | |
| Opening stocks with | | |

| 1963-64 | 72·04 |

### JUTE MILLS

In 1964, there were 79 jute mills in India with a total loomage of 74,294. This is about 58 per cent of the total loomage capacity of the world.

Of the 79 mills, 68 were in W. Bengal, four in Andhra, three in Bihar, three in U.P. and one in M.P. The mills in W. Bengal are concentrated in Calcutta. The number of companies managing the mills was 79. There is a 2·6 per cent increase in jute acreage in West Bengal during 1963-64 from the 1962-63 acreage of 10,74,000. The output in 1963-64 was 32,70,000 bales.

The estimated all-India production during 1964 was about 13,51,400 tons. The total estimated value of goods produced during 1962 was about Rs. 220 crores.

According to the annual survey of Industries in 1961, 95 mills had a fixed capital of Rs. 38·76 crores and a working capital of Rs. 32·83 crores. In the same year, 2,25,317 persons were employed in 95 mills. The gross value of output was Rs. 182·52 crores and the gross value of input was Rs. 148 crores.

The progress of the industry during the past few years is summed up in the following table :—

(in thousand tons).

| Year (July–June) | Production* | | | | Exports from India | Stocks* |
|---|---|---|---|---|---|---|
| | Hessian | Sacking | Others | Total | | |
| 1955–56 .. .. .. .. .. .. .. .. .. | 403 | 623 | 69 | 1,095 | 860 | 127 |
| 1956–57 .. .. .. .. .. .. .. .. .. | 428 | 527 | 70 | 1,025 | 864 | 116 |
| 1957–58 .. .. .. .. .. .. .. .. .. | 392 | 596 | 68 | 1,056 | 805 | 134 |
| 1958–59 .. .. .. .. .. .. .. .. .. | 446 | 510 | 85 | 1,041 | 829 | 95 |
| 1959–60 .. .. .. .. .. .. .. .. .. | 449 | 531 | 94 | 1,074 | 865 | 82 |
| 1960–61 .. .. .. .. .. .. .. .. .. | 366 | 524 | 116 | 1,006 | 764 | 76 |
| 1961-62 .. .. .. .. .. .. .. .. .. | 408 | 500 | 144 | 1,052 | 798 | 79 |
| 1962–63 .. .. .. .. .. .. .. .. .. | 507 | 523 | 169 | 1,199 | 880 | 95 |
| 1963-64 .. .. .. .. .. .. .. .. .. | 525 | 488 | 217 | 1,230 | 952 (Provisional) | 124 |

### INDEX NUMBER OF WHOLESALE PRICES

(Base 1952-53 = 100)

| Period | Raw Jute | Manufactured Jute |

*Source :* Jute Situation—Issued by the Directorate of Economics and Statistics, Ministry of Food and Agriculture, Govt. of India.

There is no Government control on production or distribution of jute goods. The Working Time Agreement, in the light of which there was some control exercised by the Indian Jute Mills Association, was annulled on February 1, 1964.

The Government of India have set up a Central Committee for Jute Development which replaces the Central Supervisory Body for Jute.

**Mills have lately been paying greater attention to the need for diversification of their products. Some of the specialities which are manufactured now are cotton bagging (a loose fabric meant for packing of cotton in U.S.A.), wide hessian used as carpet backing in U.S.A., jute tarpaulins, paper-lined hessian, jute carpets and jute webbing.**

**Fourth Five Year Plan:** The Union Government have decided to fix the Fourth Plan target at ten million bales (eight million bales for jute and two million bales for mesta) against the Third Plan's 7·5 million bales (6·2 million bales for jute and 1·3 million bales for mesta).

The additional production of nearly two million bales is sought to be achieved partly through an addition of 200,000 acres by double cropping in canal and tube-well irrigated areas, but mainly through an increase in the unit yield from the present 2·8 bales to 3·3 bales by the intensification of development measures selected jute growing areas.

Jute is grown in India in 73 districts, but instead of diffusing efforts and investments over all the jute growing areas, the objective in the Fourth Plan will be to concentrate attention on only 14 districts, each of which has a fairly high spread of jute cultivation and all of which together account for over 80 per cent of the country's total production. The 14 districts are 24 Parganas, Hooghly, Nadia, Jalpaiguri, Cooch Behar, Murshidabad, Malda and West Dinajpur in West Bengal, Purnea and Saharsa in Bihar, Goalpara, Nowgong and Kamrup in Assam and Tripura.

* Represents I.J.M.A. mills and two non-members.

# LAC INDUSTRY

LAC is a resin which finds extensive application in industries. It is a resinous protective secretion of an insect which lives by sucking the sap of certain trees and shrubs called lac hosts.

There are four crops of sticklac, named after the Hindu months in which the collection of each crop commences. These are 'Baisakhi' and 'Katki' from one strain of the insect (Rangeeni) and 'Jethwi' and 'Aghani' from another strain (Kusumi). The first processed product, after the crushing and washing of sticklac is known as 'seedlac'. From this shellac is manufactured either by melting it (seedlac) manually in cloth bags held near a fire place called 'bhattas' or by the mechanised process of extraction with suitable solvents.

### PRODUCTION

India is the chief source of supply of sticklac and till 1950 accounted for nearly 85 per cent of the world production. But since then production in Thailand has rapidly increased and now accounts for about 30 per cent of the world production. The average production of sticklac in different States based on the annual production during the years 1953–63 is as follows :—

| State | Average Crop (in tonnes*) |
|---|---|
| Bihar .. .. .. .. | 18,690 |
| Madhya Pradesh .. .. .. | 12,716 |
| West Bengal .. .. .. | 5,492 |
| Maharashtra .. .. .. | 1,855 |
| Uttar Pradesh .. .. .. | 937 |
| Orissa .. .. .. .. | 672 |
| Assam .. .. .. .. | 273 |
| Gujarat .. .. .. .. | 292 |
| Other States .. .. .. | 566 |
| Total .. | 41,493 |

The actual production in 1963–64 was 28,720 tonnes as against 41,672 tonnes in 1962–63.

The average annual production of shellac including buttonlac is 15,500 tonnes and that of seedlac 11,000 tonnes.

### MARKETING

There are no regulated markets for trading in sticklac. The manufacture of shellac is a cottage industry and the number of shellac factories varies from season to season. According to the latest information there are about 210 factories in the country; only one of these located in Calcutta is fully mechanised.

Yield from sticklac varies from year to year and locality to locality.

Roughly the yield of seedlac and shellac is 65 per cent and 55 per cent of sticklac respectively.

The cost of manufacturing one maund of shellac from seedlac is about Rs. 16 and of converting sticklac into seedlac is Rs. 3. In 1939 these were roughly Rs. 3-8 and As. 8 respectively.

### PRICES

The falling tendency in prices observed during 1957-58 continued and by April 1958 prices of T.N. Shellac touched the lowest level of Rs. 57 in post-war years. This necessarily caused concern to Government and the trade alike.

* One tonne = 1,000 Kg. = 26·79 maunds.

The general objectives of the Government of India in regard to lac industry therefore were: (*i*) that the country should earn the maximum foreign exchange possible by export of the commodity without impairing the competitive strength of the commodity against the only competitor Thailand and (*ii*) to create conditions so that the cultivator or primary producer gets the maximum possible price on the basis of the export prices. This policy has continued throughout.

**Minimum Export Prices:** In regard to the first when the export prices of the commodity started dwindling rapidly since 1956-57, the Government of India encouraged in 1958 the formation of the Indian Lac Exporters' Association and assisted that Association to operate a system of minimum export prices. This measure ensured a dependable *rate* of foreign exchange earning although the actual value earned still depended upon the quantities exported. Since, however, the demand for Indian lac, as judged from the exports during the past few years, has dropped by about 20 per cent, the earnings have also naturally dropped proportionately.

The minimum export prices were also revised twice downwards once in 1961 and again in 1963 by about 10 per cent on each occasion as a stimulant for export.

**Regulation of Prices:** In order to reduce the gap between the internal price and the minimum export price and thus mop up the excessive profit of the middlemen, an export duty of Rs. 160 per tonne on seedlac or shellac and Rs. 125 per tonne on other lacs was levied from October 1961. This, however, was abolished from January 1964 as it was considered, the situation did not warrant its continuance.

**Buffer Stocks:** In regard to the prices received by the cultivators, these had not been, in recent years, in any way related to the minimum export prices. There was an ever widening gap between the two. For this reason, the Government had to introduce other price stabilization measures. The State Trading Corporation was authorized to set up a Seedlac Buffer Stock. The Indian Lac Exporters' Association also had earlier set up a limited buffer stock at Calcutta. The State Trading Corporation operated in a comparatively bigger way, purchasing seedlac in most of the major lac refining centres. Despite this, the cultivators' condition remained unchanged.

In regard to the buffer stock price, the State Trading Corporation started purchasing seedlac in different centres at different rates based on minimum export price at Calcutta. The price differential for the various centres was worked on the basis of the cost of handling and transport from the respective centres to Calcutta. This was later revised and a single price for the whole country at a reduced level was introduced in 1963. The prices have now been revised upwards from March 1964 by about 5 to 10 per cent because of the general rise in the market prices. Nevertheless no lac is being offered to the State Trading Corporation's buffer stock at the moment.

The State Trading Corporation on the other hand have liquidated their buffer stocks periodically on the basis of 25 per cent of the export requirements of individual shippers on production of relevant export orders.

**Non-Price Measures:** (*a*) The main aim is to increase the off-take of Indian lac by consuming countries. Towards this end, publicity campaigns in the largest consuming country, namely, United States, were partly financed by the Indian Lac Exporters' Association. The Indian Lac Exporters' Association also sponsors research in overseas laboratories for developing new and improved uses of lac.

The Government of India is providing increasing funds for intensifying research at the Indian Lac Research Institute.

(*b*) An official delegation jointly sponsored by the Indian Lac Exporters' Association and the Shellac Export Promotion Council visited Thailand, the only other country producing lac, to arrive at a suitable price and trade policy for mutual advantage.

**Cumulative Effect:** The prices for raw lac received by cultivators declined continuously during the last four years and reached perhaps the lowest levels in the post-war period towards the end of 1963. The result has been that the major portion of Katki crops of 1963 was not harvested and there was no incentive to initiate further cultivation with the result that all the four lac crops of the year failed and were lowest on record. This shortfall in production resulted in pushing up the prices substantially. With prices remaining at reasonably steady levels during 1964, infection was done on a larger scale and crops during 1965, favoured by good climatic conditions are expected to fare better.

## EXPORTS

About 90 per cent of the total quantity of processed goods is exported.

The U.S. is the best customer followed by the U.K. and Germany. Since 1953 the U.S.S.R. and China have also been buying sizable quantities.

Exports of all kinds of lac to foreign countries have averaged seven lakh maunds in the past five years; but there has been a drop in foreign exchange earnings to the tune of over Rs. 3 crores due to lower prices of lac during 1958 and 1959. The average value of exports which stood at Rs. 10 crores till 1956-57 has now declined to about Rs. 5 crores.

The table below gives exports of lac to important countries during 1962-63 and 1963-64.

(The figures are in quintals†)

| | 1962-63 | 1963-64 |
|---|---|---|
| SHELLAC AND BUTTONLAC | | |
| U.K. .. .. | 21,776 | 18,876 |

† One quintal = 100 Kg. = 2·679 maunds.

Lac has made significant contributions to the development of art and industry.

Shellac is consumed chiefly by five industries.

The gramophone industry consumes about 11 to 13 thousand tons.

The varnishes and paint industry absorbs something like 4 to 6 thousand tons.

The total demand from the electrical industry is estimated at 3,000 tons as against 6,000 tons in pre-war years.

Nearly 3,000 tons are used in the hat industry as a stiffening material.

The manufacture of sealing wax requires about 1,500 tons.

For the promotion of the improvement of methods of cultivation and manufacture of lac in India the Indian Lac Association for Research was formed by traders in Calcutta in 1921 and the Government found the funds by levying a cess on all exports of lac other than refuse lac at annas four per maund and for refuse lac annas two per maund. This association set up the Indian Lac Research Institute at Namkum (Ranchi).

At the suggestion of the Royal Commission of Agriculture in 1927 this association was succeeded by the Indian Lac Cess Committee which was established under the Lac Cess Act of 1930 "for the improvement and development of the cultivation, manufacture and marketing of Indian lac" under the control of the Central Ministry of Food and Agriculture. By this Act the cess was raised to annas seven and annas five respectively. With effect from April 1948 this cess was doubled. In order to associate the members of Parliament with the Committee and also to provide adequate representation to all the lac growing States the Indian Lac Cess Act has recently been amended.

An Export Promotion Council for shellac has also been formed under the Central Ministry of Commerce to promote exports of shellac.

At the suggestion of the Bihar Shellac Enquiry Committee and the Indian Lac Cess Committee the Government of India banned future trading in shellac and seedlac.

## RESEARCH AND DEVELOPMENT

Nucleus Broodlac Farms which had been set up continued to supply broodlac which, along with that purchased was used for supply to various State Governments and other agencies for extension of lac cultivation. In pursuance of the decision of the working group on the Fourth Five Year Plan, emphasis is being shifted to extend cultivation of lac of the improved variety, namely, of the Kusumi and Meghania varieties.

Service trials of the shellac *etch primer* in the railways and road transports have been completed and reports of satisfactory performance received from the Chief Mechanical Engineer, S.E. Rly and Works Manager, Maharashtra State Road Transport Corporation, Poona. The commercial manufacturers are continuing its production and supply on a large scale.

In the meanwhile a heat and water proof French polish has been developed by combining shellac and synthetic resins. A water composition of baking type has also been developed which holds particular promise for use in tin plate lacquers.

As a price support policy, a Processing Unit has been set up at the Indian Lac Research Institute to process sticklac into seedlac purchased by the co-operative organizations for sale to the State Trading Corporation.

# SUGAR INDUSTRY

THE growth of the Indian Sugar Industry is attributable to the Tariff protection given to it by the Government in 1932. The industry showed itself markedly responsive to economic stimuli and in between the period 1931-32 to 1936-37 over 100 new mills were established bringing the total number of factories in operation to 137. In 1936-37 the mills produced over 11 lakh tonnes. Only a small quantity of sugar was imported, about 24,000 tonnes compared with as much as 9,40,000 tonnes earlier (1929). India was virtually self-sufficient in sugar and has remained so ever since. By virtue of its rapid development, the sugar industry is today ranked as the second largest industry in the country next only to textiles. It provides employment to 2,00,000 skilled and unskilled workers and about 3,600 university educated men, and caters to the sugar needs of the vast populace about 439·2 million. The total earnings of workers and benefits are about Rs. 24 crores. Besides, the industry supports another 20 million cultivators and their families who derive about Rs. 140 crores as payment for cane. The industry's contribution to the national exchequer in levies was about Rs. 66 crores in 1963-64.

The increase in sugar production during the First and Second Five Year Plans, 1951-52 to 1960-61, was very remarkable. The initial target of 15 lakh tonnes fixed for the First Five Year Plan was achieved in the very first year of the Plan and even the revised target of 18 lakh tonnes was exceeded in 1955-56 being 18·62 lakh tonnes. The success achieved during the Second Plan was even more marked. Against a production target of 22·5 lakh tonnes the output achieved in 1960-61 *i.e.* the last year of the Plan was the all time record of 30·28 lakh tonnes. In consideration of this achievement of the industry the Third Plan target initially fixed at 30 lakh tonnes was revised to 35 lakh tonnes.

Thus at the beginning of the Third Five Year Plan, the above-mentioned record output instead of leading to complacency created unprecedented storage and financial problems for the mills because the off-take for internal consumption stagnated around 21·26 lakh tons resulting in the carry forward stocks of 11·50 lakh tonnes. The Government conscious of its responsibilities imposed a general 10 per cent cut on production by factories in 1961-62, and alongside took steps to stimulate internal consumption by doing away with the stifling controls on movement and price of released sugar. The Government were successful in bridging the wide gap between supply and demand to some extent. As a corollary to Government's policy, while production was pegged down to 27·30 lakh tonnes, off-take for internal consumption showed an encouraging upward trend. Within the course of one year consumption rose by about 4·5 lakh tonnes, *i.e.* from about 21·26 lakh tonnes in 1960-61 to 25·84. lakh tonnes in 1961-62.

The overall reduction in the carry forward stocks was only marginal in so far as about 10 lakh tonnes were brought forward in the 1962-63 season. However, the consumption and export trends revealed the shape of things to come. It became apparent that the Industry could safely look forward to a total off-take (internal consumption plus exports) of about 31 lakh tonnes. There was therefore the urgent need to increase production and in realisation of this need the Government lifted the 10 per cent cut imposed on production by factories. The Industry was therefore once again free to crush to its capacity.

However, belying all expectations sugar production instead of registering an increase in 1962-63 recorded a precipitous fall and amounted to only 21·60 lakh tonnes. This shortfall has been brought about by unforeseen and uncontrollable circumstances like large-scale floods in some areas and droughts in others which severely damaged the cane crop. The crop failure in the 1962-63 season brought in its wake large-scale diversion of available cane to alternative user namely gur and khandsari. Consequently factories were starved of cane supplies, with obvious results. This decline was notwithstanding the fact that the total number of factories working in 1962-63 was 185 against 179 in 1961-62.

As early as March 1963 the trends revealed that production would fall since 124 mills out of a total of 185 had stopped crushing operations. The industry apprehending that prices might rise due to the shortfall in output as also due to the flux in the national economy created by the Chinese aggression, came forward with voluntary measures to ensure equitable distribution of available sugar supplies amongst consumers. Voluntary ceilings were imposed on the ex-factory prices. The Indian Sugar Mills Association, a representative body of sugar mills in India had also devised a scheme for distribution of sugar through fair price shops. Or in other words there was the need to impose some sort of regulations in so far as against supply of about 31·8 lakh tonnes available, the off-take for internal consumption & exports was placed at 32·0 lakh tonnes. The Government instead of allowing the voluntary regulation scheme of the industry to work, imposed controls on sugar. Exercising the powers conferred by the Defence of India Rules the Government promulgated the Sugar (Control) Order 1963 on the 17th of April, 1963.

The season 1963-64 started with a carry over stock of only 1·50 lakh tonnes. The controls imposed during the 1962-63 season were continued during the season. Realising the need to increase production, the Government announced rebate in excise duty, for the earlier part of the season, so as to enable them to start crushing earlier than usual. The Government fixed a sugar production target of 33 lakh tonnes for the season. However, the production amounted to only 25·26 lakh tonnes. The internal consumption was pegged down to about 22·98 lakh tonnes through a mechanism of restricted releases. In fact, the Government had to cut the State's quota by about five per cent, so as to bring down the total internal consumption. The following figures give the production and consumption trends from 1954-55 to 1963-64 (Figures in lakh tonnes for production and consumption respectively within brackets): 1954-55 (16·06; 17·50); 1955-56 (18·92; 19·71); 1956-57 (20·57; 20·14); 1957-58 (20·09; 20·74); 1958-59 (19·49; 21·13); 1959-60 (24·60; 20·52;); 1960-61 (30·28; 21·26); 1961-62 (27·30; 25·84); 1962-63 (21·60; 26·50); 1963-64 (25·62; 22·98).

Under the sugar (Control) Order 1963, the ex-factory prices were notified for the different regions and sub-regions. The ex-factory prices initially fixed for 1963-64 season were revised in the latter part of the season during May 1964. For the new season 1964-65, the ex-factory prices were announced in November, 1964. The ex-factory prices of 1963-64 season, as announced on 22nd May 1964 and those fixed for 1964-65 season in November 1964 are given below :—

| *Region* | Price per quintal as announced in May 1964 | New ex-factory price per quintal as announced in November 1964 |
|---|---|---|
| | Rs. | Rs. |
| East U.P. | 120·25 | 118·75 |
| West U.P. | | |
| Part A. | 131·00 | 129·25 |
| Part B. | 123·00 | 121·25 |
| Part C. | 120·50 | 118·75 |
| Part D. | 113·25 | 116·00 |
| North Bihar | 120·00 | 118·75 |
| South Bihar | 134·00 | 129·25 |
| Andhra Pradesh | 118·00 | 118·75 |
| Punjab | 132·50 | 129·25 |
| West Bengal | 119·00 | 118·75 |
| Assam | 127·00 | 126·00 |
| Orissa | 114·00 | 123·00 |
| Rajasthan | 138·00 | 129·25 |
| Madhya Pradeah | 124·00 | 123·00 |
| Maharashtra | 116·00 | 116·00 |
| Gujarat | 116·00 | 118·75 |
| Madras | | |
| Part A | 116·00 | 123·00 |
| Part B | 119·50 | |
| Mysore | 116·00 | 116·00 |
| Kerala | 116·00 | 123·00 |
| Pondicherry | 116·00 | 123·00 |

## 1964-65 SEASON

There was a marginal increase of carryover stocks in the 1964-65 season, the quantity being about 1·57 lakh tonnes, against about 1·50 lakh tonnes in the preceding season. This carry over stock was insufficient for all intents and purposes and there was the urgent need to maximise production. Internal consumption, restricted as it is, by the statutory controls in force, can be estimated at about 25 lakh tonnes. Commitments made for export total to about 2·50 lakh tonnes. India has succeeded in becoming a member of the Commonwealth Sugar Agreement and has obtained a negotiated price quota of 25,000 long tons, the price being £46-11-6 per long ton. Other commitments made included export of 50,000 tonnes to U.K., 50,000 tonnes to Canada, 1,00,164 short tons to U.S.A. and 20,000 tonnes to Malaya. The offtake for both internal consumption and export can therefore be placed at about 27·50 lakh tonnes. Providing for a carryover of about 4 lakh tonnes, the requirements total to about 31·50 lakh tonnes. Production in the 1964-65 season has therefore to be stepped up to about 30 lakh tonnes. In order to maximise sugar production, the Government of India have announced 50% rebate in basic excise duty for excess production achieved by the mills during the period October-November 1964 as compared to their production achieved during the corresponding period in 1962, so as to enable them to start crushing early, when the recovery of sugar is usually low. Further, for the excess production achieved by the mills during the period January to June 1965, as compared to their production during the corresponding period in 1964 excise duty rebate at varying rates have been granted. The mills are granted 20 per cent rebate in the basic excise on the first 10

per cent of such excess production, 40 per cent rebate on the next 100 per cent of such excess production and 50 per cent rebate on the balance of such excess production.

The cane crop during the season 1964-65 was good and adequate cane supplies were generally forthcoming to the mills, excepting in western Uttar Pradesh, where the problem of cane diversion to power crushers was acutely felt during the season. Due to the high price of gur and khandsari, the cane growers were fascinated to supply cane to these alternate users of cane, as a result of which the sugar factories in the region were starved of cane. In some of the factory areas in western Uttar Pradesh, the cane growers, demanding higher prices for their produce, refused to supply cane to the sugar mills and went on strike. In fact some of the sugar factories would have to close down for the season very much earlier than usual. The cane price for the season for All India was fixed at Rs. 2 per maund linked to a recovery of 10·4 per cent with a provision for an increase in its prices by 1·5 paise per every 0·1 per cent increase in recovery.

In spite of heavy diversion of cane to gur and khandsari in Western Uttar Pradesh, the sugar production in 1964-65 season reached a record level. As on July 1965, production stood at 31·35 lakh tonnes.

The total production of sugar during the first six months of the 1964-55 season was 29,65,000 tonnes against 24,48,000 tonnes during the corresponding period last season, according to the Indian Sugar Mills' Association.

Total despatches during the first six months in 1964-65 were 12,89,000 tonnes (including 1,45,000 tonnes despatched for exports) against 12,97,000 tonnes (including 1,38,000 tonnes despatched for exports) in the same period last season.

The total closing stock with factories on April 30 was 18,32,000 tonnes against 13,06,000 tonnes on the same date last season.

### Cane Production

The principal raw material is sugarcane. The total cane crushed in 1963-64 was about 25·63 million tonnes for a production of about 25·62 lakh tonnes of sugar. Approximately, 30 per cent of cane is consumed by sugar factories. Balance goes to production of gur and khandsari and for chewing and other purposes.

The following table gives the area under cane and the sugarcane production for the last few years :

| | Acre under sugarcane (000 acres) | Total output of sugarcane (000 tonnes) |
|---|---|---|
| 1958-59 .. .. | 4,836 | 72,050 |
| 1959-60 .. .. | 5,220 | 76,404 |
| 1960-61 .. .. | 5,789 | 1,04,122 |
| 1961-62 .. .. | 5,988 | 98,276 |
| 1962-63 .. .. | 5,635 | 92,978 |
| 1963-64 .. .. | 5,471 | 1,00,001 |

The first estimate of acreage for 1964-65 is 55.92,000.

### Sugarcane Price

From 1962-63 season the cane price has been linked with recovery of sugar obtained therefrom, replacing the irrigational and outmoded method of paying cane price by weight irrespective of its sugar content. This system of linking the cane price was continued in 1963-64 season and was adopted in the 1964-65 season also.

The ultimate objective of this scheme is to pay cane price to indidvidual growers on the basis of the quality of their cane but because of the large number of growers supplying cane to any individual factory as also due to certain other inherent practical difficulties, this objective could be achieved only in a phased manner. Cane price presently paid on collective basis will be extended to village and group levels, the ultimate objective being to extend it to individual growers. In fact some factories in the South successfully paid cane price to individual growers on the basis of the quality of cane supplied by them.

### Sugar Exports

A welcome feature in the export front was the production of raw sugar for exports. Having exported 1·47 lakh tonnes in 1957, 83,058 tonnes during 1958-60, 2·68 lakh tonnes in 1961 and 3·73 lakh tonnes in 1962, earning in the process Rs. 11·89 crores in 1957, Rs. 4·06 crores in 1958-60, Rs. 13 crores in 1961 and Rs. 18 crores in 1962 and finding that market for white sugar was shrinking for the first time in the history of the sugar industry, raw sugar was produced. The maiden attempt proved very successful and 2·63 lakh tonnes of raw sugar was produced in 1962-63. In the next season 1963-64, the total raw sugar produced amounted to 2·42 lakh tonnes. The State-wise break-up of raw sugar production in 1963-64 in metric tons is as follows:

Andhra Pradesh 42,640; Bihar 1,102; Uttar Pradesh 91,513 and Maharashtra 1,06,881.

In 1963 and 1964 India exported 4·78 lakh tonnes and 2·32 lakh tonnes of sugar respectively. The respective foreign exchange earnings were Rs. 32·25 crores and Rs. 19·07 crores.

### Fourth Plan

The Development Council for Sugar Industry has recommended for a production target of 45 lakh tonnes (40 lakh tonnes for internal consumption and 5 lakh tonnes for exports) by the end of the Fourth Five Year Plan. For this purpose, on the one hand, additional capacity will have to be licensed and on the other, adequate cane supplies would have to be ensured to the sugar mills.

The licensed capacity of the sugar industry has risen from 16·4 lakh tonnes per annum at the beginning of the First Plan to 33·6 lakh tonnes per annum in 1962-63. As against this, the effective capacity at the end of the 1964-65 season is estimated around 32 lakh tonnes. Recently the Government have issued letters of intents to about 62 factories, for expansion of their capacities by 3·77 lakh tonnes per annum, out of the 108 applications pending with the Government. The Screening Committee appointed by the Government are considering the remaining applications for expansion of existing units and another 121 applications for setting up new factories.

Another Committee appointed to make on the spot enquiries regarding uneconomic units, under the chairmanship of Shri S. N. Gundu Rao is expected to submit its report shortly to the Government.

The Development Council for sugar industry and also the productivity team which visited a number of foreign countries to study the productivity in sugar factories in those countries, have recommended that the optimum crushing capacity of a sugar mill should be 2,000 tonnes of cane per day. As against this, the average capacity of the sugar mills in India is only about 1,150 tonnes. Hence, in order to bring them to optimum level, these mills should be allowed to expand freely upto 2,000 tonnes of cane per day, depending upon the cane potential of the area. If this policy is adhered to, the entire additional capacity required to fill the gap between the existing capacity and the capacity required to attain the Fourth Plan target can be more than met through substantial expansion. The cost of bringing into operation the additional capacity in the existing units by expansion is only about 50 per cent, as compared to the cost of bringing into existence the additional capacity by way of erecting new units. Further, the time required to bring into operation such additional capacity will also be very much less.

Expansion of existing units is also in the interest of cane growers. The intensive cane development schemes initiated in the State of Uttar Pradesh a couple of years ago, on the recommendations of the High Power Committee, has started yielding results. The cane yield per acre in the intensive development blocks has increased to 473 maunds from 425 maunds. Almost all the sugar factories have joined the scheme of intensive cane development, under which the expenses are to be borne by the Central Government, State Government, the sugar factories and the cane growers in the ratio of ¼ : ¼ : ¼ : ¼. The development scheme, initially started to cover 4,000 acres, is gradually extented to more and more acres. A number of sugar factories and cane growers have expressed their willingness to bring a second block of another 4,000 acres under the intensive development scheme. Similar schemes are also envisaged in the States of Bihar and the Punjab. In order to crush the increasing quantities of cane that will be available in their respective areas, the factories concerned should have additional capacity, as otherwise the cane growers will be confronted with the acute problem of marketing their produce.

Today our sugar finds its way to the four corners of the world. Country-wise break up of exports for some years is given below :—

| Destination | 1962 | 1963 |
|---|---|---|
| Malaya .. .. | 48,510 | 65,071 |
| Singapore .. .. | 8,256 | 11,393 |
| Burma .. .. | .. | .. |
| Ceylon .. .. | .. | 13,000 |
| Vietnam .. .. | .. | 24,764 |
| Cambodia .. .. | .. | .. |
| China (Mainland) | .. | .. |
| Aden .. .. | 6,082 | 4,097 |
| Iraq .. .. | 4,401 | .. |
| Sudan .. .. | .. | .. |
| Saudi Arabia .. | .. | .. |
| Qatar .. .. | 950 | 100 |
| Yemen .. .. | .. | .. |
| Oman .. .. | 1,601 | 683 |

### SUGAR MACHINERY

Two consortia of manufacturers, the first consisting of Messrs. Walchandnagar Industries, TEXMACO and Indian Sugar and General Engineering Corporation, and the second consisting of K.C.P. Ltd., Binny & Co., and New India Development Corporation, have been formed to manufacture complete plants in India.

The Third Plan has envisaged a target of 14 complete plants valuing Rs. 10 crores. 85 per cent of the plants will have indigeneous content.

The production of sugar machinery in the country has been gradually increasing and the value of such machinery was as follows : 1955 : Rs. 19 lakhs, 1956 : Rs 32 lakhs, 1957 : Rs. 162 lakhs, 1958 : Rs. 200 lakhs, 1959 : Rs. 320 lakhs, 1960 : Rs. 350 lakhs (est.).

By the time the existing manufacturers are expected to achieve full production, the industry will be in a position to supply every year 12 complete sugar plants of the capacity of 1,000 to 1,250 tonnes and the equivalent of about nine complete plants by way of expansion and replacement requirements of the sugar industry. This will meet the needs of the country except in regard to turbo-alternators and mill engines.

## CO-OPERATIVE SECTOR

The position of production of sugar of the co-operative sugar factories is compared in the following table with the total production and the production of the private sector :

(From November 1 to April 15) (in lakh metric tons)

| | 1964-65 | 1963-64 | Increase | |
|---|---|---|---|---|
| | | | Quantity | Per cent |
| Co-operative Sector .. .. | 6·78 | 5·46 | 1·32 | 24·01 |
| Private Sector .. .. .. | 21·45 | 18·82 | 2·63 | 14·00 |
| TOTAL .. | 28·25 | 24·28 | 3·95 | 16·02 |

The following table shows the position of Co-operative Sugar Factories as on 31st Dec. 1964:

(Rs. in lakhs)

| Factory | No. of Members | Total Amount of share capital | State Govt. contribution to share capital | I.F.C. loan sanctioned |
|---|---|---|---|---|
| *Andhra Pradesh (Total) :* .. .. | 40,314 | 265·93 | 125·00 | 435·00 |

| Grand Total .. .. .. .. | 2,39,501 | 2,385·99 | 913·99 | 3,699·50 |

The total quantity of sugar produced by co-operative sugar factories during 1963-64 was 6·00 lakh metric tons. Total cane crushed during the 1963-64 season was 51·21 lakh metric tons.

The co-operative sugar factories in the country produced 7·45* lakh metric tonnes of sugar till June 30, 1965, as against 5·70† lakh metric tonnes produced by them during the corresponding period last year.

Out of the 57 co-operative sugar factories licensed so far, 50 factories started their crushing operations during 1964-65, as against 48 factories in 1963-64.

The co-operative sugar factories are manufacturing raw sugar this season also. Nearly 1·34 lakh metric tons of raw sugar has been manufactured upto 31st March 1965 as against 1·07 lakh metric tons last year upto the same date.

It would be seen that the production of co-operative sugar factories this year upto 15th April 1965 shows an increase of about 24·1 per cent over that of last year for the same period, while the corresponding increase in the private sector is about 14·00 per cent and for the industry as a whole is 16·2 per cent.

In a co-operative unit the shareholders are the sugarcane growers whose production of cane is expected to be marketed by the cooperative after processing it into sugar. The only exceptions to this rule are the shares issued to co-operative societies within the area of operation of a sugar co-operative, and the shares issued to the State Government in question. The State Government's share capital contribution is in the nature of an initial assistance to make up the funds required for setting up the plant and particularly to enable the co-operative to borrow long-term loans for the same purpose from institutions like the Industrial Finance Corporation of India. The participation of the co-operative societies in the area of operation is in the nature of a sympathetic gesture. The shares issued to the State Government are redeemable over a period of time. Thus, essentially, the shareholders of a sugar co-operative are the producers of cane themselves.

To a private sector factory, sugarcane is a raw material which it has to purchase. In a sugar co-operative there is no purchase of sugarcane from members. The co-operative processes the cane of members. What is left over from the total realisations from its production after meeting all the costs, is the amount available for distribution among the growers. From the same amount, other items such as contributions to reserves, dividend on share capital and bonus to staff have to be accommodated.

During the 1963-64 season 48 cooperative sugar-factories were in production. They crushed about 54·12 lakh metric tons of sugarcane. Nearly 90 per cent of the total crush was supplied by the members and only about 10 per cent of sugarcane was drawn from non-members. The value of cane crushed amounted to Rs. 34·34 crores.

The co-operatives are run by boards of directors. The day to day affairs are conducted by a Managing Director General Manager/ Business Manager who is a full-time employee either directly employed or an officer of the Government on deputation and who carries on the business of the society in accordance with the society's bye-laws which lay down the matters in which the Managing Director is competent to act under his own powers and the matters in which he has to take the prior sanction of the board of directors or the executive committee or the other subcommittees, as the case may be.

A National Federation of Cooperative Sugar Factories was set up in December 1960 with a view to coordinating and facilitating the working of cooperative sugar factories, State and Zonal Federations and assisting in the promotion of organisation of new cooperative sugar

* Excluding 0·23 lakh metric tonnes produced prior to Nov. 1, 1964. † Excluding 0·24 lakh metric tonnes produced prior to Nov. 1, 1963.

factories. In pursuance of its objects, the federation provides (1) technical advice and other assistance in the selection, purchase, installation and maintenance of plant, machinery and other equipment, (*ii*) advises and assists in the selection of technical personnel, (*iii*) suggests measures for increasing the operational efficiency of co-operative sugar factories, (*iv*) assists in standardising the accounting and costing methods and practices, securing necessary financial accommodation from the State and Central Government Industrial Finance Corporation, State Bank of India, State and Central Cooperative Banks, etc. The Federation advises on (*i*) Sale of sugar produced by cooperative sugar factories, (*ii*) purchase of chemicals, gunnies, spare parts, fertilisers, fuel, iron and steel and other requirements, (*iii*) sale or utilisation of bye-products of cooperative sugar factories. The federation also supplies information relating to market position and sugar industry. It also arranges for holding periodical seminars and regional conferences of the cooperative sugar factories.

Total sugarcane crushed and sugar produced respectively in metric tons during the 1963-64 season in the States: *Andhra Pradesh :* Amadalavalsa 1,59,867·8 ; 14202·80 ; Anakapallee 71,520·38 ; 6,895·1 ; Chittoor 1,26,007·38; 13,306·0 ; Chodavaram 1,17,959·07 ; 10,589·1 ; Etikoppaka 1,27,114·5 ; 11,652·2 ; Palakol 18,530·43 ; 1,466·6 ; Tuni 41,320·48 ; 3,522·85 ; *Assam :* Barubamungaon 47,732·66 ; 4,361·2 ; *Gujarat :* Bardoli 1,42,087·4 ; 15,163·7 ; Gandevi 32,794·86 ; 3,177·2 ; Kodinar 2,07,882·16 ; 23,422·6 ; *Kerala :* Mannam 3,313·85 ; 151·4 ; *Madras :* Amaravathi 17,848·14 ; 1,277·6 ; Ambur 1,32,310·84 ; 13,119·5 ; Madurantakam 1,05,535·66 ; 9,410·9 ; Salem 20,421·13 ; 1,412·4 ; *Mysore :* Kampli 1,52,005·95 ; 15,546·6 ; Pandavapura 1,04,680·01; 12,664·9; Sankeshwar 1,27,570·68 ; 16,181·8; *Maharashtra:* Ashoknagar 1,89,028·0 ; 22,963·0 ; Bhogawati 1,69,173·41 ; 19,499·8 ; Dudhganga 1,11,829·97 ; 13,437·0 ; Ganeshnagar 1,54,522·09 ; 18,644·0 ; Girna 96,923·76 ; 11,761·0; Karad 1,76,861·26 ; 23,606·9 ; Kumbhi-Kasari 56,253·06 ; 6,258·8 ; Kopargaon 1,73,667·3 ; 20,645·8 ; Malegaon 1,72,503·43 ; 21,622·9 ; Niphad 3,441·31 ; 223·01 ; Panchganga 1,94,196·63 ; 23,470·2 ; Pravaranagar 1,97,129·66 ; 23,406·0 ; Rahuri 1,82,207·01 ; 22,129·1 ; Sangli 1,60,996·86 ; 20,033·1 ; Sanjivani 72,381·91 ; 8,659·0 ; Sansar 1,18,344·36 ; 13,924·0 ; Shriram (Phaltan) 1,61,732·91 ; 19,591·8 ; Someshwar 78,635·40 ; 9,862·4 ; Warananagar 1,61,516·75 ; 21,643·6 ; Yeshwant 1,51,682·95 ; 17,597·5 ; *Orissa :* Aska 28,503·79 ; 2,111·9 ; *Punjab :* Bhogpur 68,177·04 ; 5,596·8 ; Batala 25.641·83 ; 1,983·8 ; Morinda 40,970·12 ; 3,554·6 ; Panipat 1,33,791·45 ; 11,385·7 ; Rohtak 1,23,341·04 ; 10,662·4 ; *Uttar Pradesh :* Bagpat 1,51,638·73 ; 12,839·5 ; Bazpur 1,97,857·54 ; 18,881·6 ; Sarsawa 1,02,977·64 ; 9,174·2 ; *All India Total :* 54,11,830·64 ; 5,92,670·15.

Besides processing of sugarcane, the cooperative sugar factories have all along been exploring the possibilities of reducing the cost of manufacture of sugar. In this, the idea of utilising effectively the bye-products of the industry *i.e.* Bagasse, Molasses and Press Mud etc. has been mooted out. A group of cooperative sugar factories have joined together forming a society for establishing paper plant for utilising Begassee. Three such societies have been formed and has already been issued for establishing a newsprint Plant in Sangli, Maharashtra State. Factories have combined together for establishing distilleries for utilising Molasses.

# TOBACCO INDUSTRY

INDIA is the third major producer of tobacco in the world, the other two being U.S.A. and China. Tobacco is also an important item in India's export trade.

The area under tobacco in 1963-64 was 396,600 hectares and the production was 336·3 million kilograms. There has been a decline of nearly 29·5 million lb. in the 1964 tobacco crop compared to the 1963 crop.

The more important tobacco growing States in India are Andhra Pradesh, Mysore, Madras, W. Bengal, U.P., Bihar, Gujarat and Maharashtra. Andhra Pradesh produced 152·4 mln. kgs. of tobacco, Gujarat 70·1 mln. kgs., Madras 27·4 mln. kgs. and Mysore 22·3 mln. kgs.

The tobacco plants are mainly of two varieties —*nicotiana rustica* and *nicotiana tabacum*. The first has a higher nicotine content than the second. By far the largest area is under *nicotiana tabacum* which is grown all over the country. Specific varieties in *nicotiana tabacum* species have been developed for cigarette, cigar and cheroot, bidi, hookah, chewing and snuff tobacco. The varieties developed in *nicotiana rustica* species are used for hookah, chewing and snuff only.

There are six main tobacco producing areas in India—the Guntur area in Andhra Pradesh, the Charotar area in Gujarat, the Nipani area in Mysore and Maharashtra, the southern Madras area, north Bihar and Bengal area and Uttar Pradesh and Punjab area.

The Guntur area comprises the districts of Guntur, Krishna, East and West Godavari, and the adjoining portions of Telangana. The variety grown is *nicotiana tabacum*.

The Charotar area in Gujarat covers Anand, Borsad, Petlad and Nadiad talukas of the Kaira District. Here also the chief variety is *nicotiana tabacum*.

The Nipani area is made up chiefly of the District of Belgaum in Mysore State and certain areas in Satara and Sangli and Kolhapur districts in Maharashtra State. Here both the species are grown though *nicotiana tabacum* predominates.

In Madras State the chief tobacco growing districts are Coimbatore and Madurai.

The north Bihar area covers the districts of Purnea, Muzzafarpur and Darbhanga, and the north Bengal area the districts of Cooch Behar, Jalpaiguri, Malda, Berhampore and Dinajpur. Here both the species are grown.

The Uttar Pradesh area comprises the districts of Farukhabad, Etah and Sitapur and the Punjab area comprises the districts of Jullundur and Ferozepore. Both the species are grown in these areas.

The development of tobacco cultivation, marketing and research is looked after by the Indian Central Tobacco Committee with headquarters in Madras. The Committee has a Tobacco Research Institute at Rajahmundry (Andhra Pradesh), a Cigar and Cheroot Tobacco Research Station at Vedasandur (via) Dindigul (Madras), a Hookah and Chewing Tobacco Research Station at Pusa (Bihar), a Wrapper and Hookah Tobacco Research Station at Dinhata (West Bengal) and a Cigarette Tobacco Research Sub-station at Guntur (Andhra Pradesh).

Another station for cigarette tobacco was started in February 1957 at Hunsur in Mysore State where soil and climate are different from those of the Guntur area where production of flue cured Virginia cigarette tobacco is mainly concentrated.

The Institute and the Research Stations have made some valuable recommendations on improvement in quality based on the research conducted and these have been freely and widely distributed in the form of leaflets in regional languages among tobacco cultivators for adoption. The tobacco growers, traders, etc. are kept informed of tobacco production, processing, marketing, trade notes, etc. through other publications of the Committee, viz. *Indian Tobacco* and *Tobacco Bulletin* in English, *Pogaku* in Telugu, *Tambaku* in Hindi and *Tamaku* in Gujarati.

The research activities undertaken under the Second Five Year Plan have been intensified and extended to the Third Plan. The Committee undertook detailed studies of the soil and climatic conditions of different areas in the different tobacco growing States in order to explore the possibilities of producing exportable types of tobacco in new areas with a view to stepping up their production for meeting the increased export demands. Exploratory trials conducted during the years 1962-63 and 1963-64 have indicated the Hosur area of Madras State and Thasara and Jabugam areas in Gujarat State to be suitable for growing f.c.v. tobacco.

There are 13 cigarette manufacturers.

Export of tobacco is allowed freely without any restrictions. There is no export duty on tobacco meant for export, but an agricultural produce cess of half per cent *ad valorem* is collected on all tobacco exported outside India. The excise duty collected on tobacco is refunded if the tobacco is exported to foreign countries.

Tobacco brings to the cultivators an annual income of Rs. 53 crores and contributed about Rs. 86·8 crores during 1963-64 by way of excise duty to the national exchequer. It earns a foreign exchange of Rs. 22·5 crores also.

### PRODUCTION OF TOBACCO (IN INDIA)

(Thousand Kilograms).

| State | 1961-62 | 1962-63 | 1963-64 |
|---|---|---|---|
| Andhra Pradesh .. | 131,070 | 150,576 | 152,407 |
| Gujarat .. | 84,332 | 96,525 | 70,107 |
| Madras .. | 29,465 | 28,449 | 27,483 |
| Mysore .. | 23,369 | 23,369 | 22,353 |

# MINES AND MINERALS

By courtesy of Mineral Economics Division (Intelligence Section), Indian Bureau of Mines, Government of India.

THE development programmes for Industries and Minerals envisaged under the Third Plan will entail about Rs. 2,993 crores of investment, out of which new investments under mineral development (public and private sectors) will amount to Rs. 538 crores.

*Third Plan targets:* Coal 98·6 million tonnes and iron ore 30·48 million tonnes. The likely achievements are 89·88 million tonnes of coal and 25·40 million tonnes of iron ore.

India produced minerals worth Rs. 2,056 million during 1964, according to the Indian Bureau of Mines.

Coal was the leading commodity valued at Rs. 1,546 million which constitutes about 75 per cent of the all-India value of mineral production during 1964. Production of iron ore during 1964 was 14·88 million metric tons. The value of metallic minerals produced during the year was Rs. 267 million or 13 per cent of the total value of mineral production. The ferrous group of minerals contributed 9 per cent and the non-ferrous group 4 per cent.

Non-metallic minerals accounted for Rs. 243 million or 12 per cent of the value of mineral production during 1964.

The quantity index of mineral production (Base 1960=100) stood at 119·5 during 1964. This shows a decrease of 3·7 points in relation to the index of 123·2 during 1963.

Coal and non-metallic group of minerals were responsible for the fall in the index. Index for coal and non-metallic group of minerals declined by 5·6 and 5·1 points respectively.

State-wise analysis (excluding Goa):

Bihar continued to be the leading State and produced minerals valued at Rs. 792 million which was about 38·5 per cent of the total value of mineral production in India during 1964.

West Bengal and Madhya Pradesh followed with their shares at 22·2 per cent and 11·8 per cent respectively.

Next in the order of value were Andhra Pradesh (5·9 per cent), Orissa (5·6 per cent), Mysore (3·9 per cent), Maharashtra and Madras (3·2 per cent), Gujarat (2·7 per cent) and Rajasthan (1·5 per cent).

After coal, next in order of value were iron ore Rs. 109 million, limestone Rs. 93 million, salt Rs. 86 million, manganese ore Rs. 65 million, copper ore Rs. 24 million, gold Rs. 52 million and mica Rs. 21 million.

There are at present 26 collieries and one coke plant owned and managed by the Govt. of India. The production of coal in the public sector was 12·75 million tonnes in 1963 as against 10·96 million tonnes in the previous year. During Dec. 1964, 833 collieries were working with an average daily employment of 4,11,843 workers.

The mineral wealth of India, as at present known, though by no means inexhaustible, comprises an adequate range of useful products necessary for industrial development.

The reserves are ample in respect of minerals essential for basic industries—coal and iron—but the country is deficient in a fairly long list of vital minerals like ores of copper, tin, lead, zinc, nickel, cobalt and in sulphur and petroleum. Adequate reserves of an alternative source (pyrite deposits) of sulphur have been proved at Amjor, Bihar.

Coal, iron ore, manganese ore, ilmenite, kyanite and mica are produced in quantities of real importance to industry and other sections of economy.

Of these mica, manganese ore, kyanite and ilmenite are wholly or largely exported.

The position with regard to aluminium ore, refractories, abrasives, limestone, etc., may be considered as fairly adequate while in respect of titanium and thorium ores and of mica, the country has considerable reserves.

The value of mineral production during the first quarter ending March, 1965 was Rs. 56 crores compared to Rs. 53·3 crores in the corresponding period last year.

The total foreign exchange spent on the imports of metals and alloys into India increased from Rs. 919 million in January-August, 1963 to Rs. 1,065 million in January-August, 1964 due to the increase in the imports of both ferrous and non-ferrous metals.

India earned Rs. 701 million in foreign exchange during the first eleven months of 1964 through ores and mineral exports. This includes export from Goa also.

## POLICY

As part of the national policy to ensure efficient working of known mineral deposits, the Mines and Minerals (Regulation and Development) Act, 1948 was passed which is now superseded by the Mines and Minerals (Regulations and Development) Act, 1957, which came into force from June 1, 1958 and which deals exclusively with minerals other than petroleum and natural gas. The Act of 1948 deals only with petroleum and natural gas.

Under the 1957 Act, two rules have been framed namely the Minerals Conservation and Development Rules, 1958 (Section 18 of the Act) and the Mineral Concessions Rules, 1960 (Section 13 of the Act), which came into force from June 1, 1958 and November 26, 1960 respectively. These two rules repealed the entire rules framed under the 1948 Act namely the Minerals Conservation and Development Rules, 1955 and Mineral Concession Rules, 1949.

Provisions have also been made in the Mineral Concession Rules for training facilities for students of mining engineering and geology.

The Mining Leases (Modification of Terms) Rules, 1956, formed under Section 7 of the 1948 Act has been further amended in exercise of the power conferred by Sub-section (2) of Section 10 of the Mines and Minerals (R & D) Act, 1957.

In exercise of the powers conferred by Section 18 of the Mines and Minerals (Regulation and Development) Act, 1957 and in supersession of the Minerals Conservation and Development Rules, 1955, the Central Government made the Mineral Conservation and Development Rules, 1958, under which submissions of quarterly returns have been discontinued and mine owners are now required to submit monthly and annual returns.

In Oct. 1957 the Government of India decided that private parties were in future not to be granted mining leases without the approval of the Central Govt. for minerals listed in Schedule A of the Industrial Policy Resolution of 1956, which is normally reserved for the public sector.

The minerals included in the Schedule 'A' of the Resolution are coal and lignite, mineral oils, iron ore, manganese ore, chrome ore, gypsum, sulphur, gold, diamond, copper, lead, zinc, tin, molybdenum and wolfram.

Government of India has also framed rules for atomic energy minerals and other minerals used for the production or use of atomic energy or for research. This Act is known as The Atomic Energy Act, 1948.

The Metalliferrous Mines Regulation of 1926 has been repealed by the new regulation the Metalliferrous Mines Regulation, 1961 which came into force from March 11, 1961. The new regulation provides for better safety in mines and shall be made applicable to every mine of whatever description other than a coal or an oil mine.

The Government departments concerned are the National Mineral Development Corporation Ltd., which is responsible for the exploitation of minerals other than coal in the public sector, the Geological Survey of India conducts geological survey, the Indian Bureau of Mines which advises Government on policy, undertakes detailed proving works, research and inspection of mines and collects statistical data, and the Department of Atomic Energy which conducts research and sees to the development of atomic minerals and substances. There is a separate Govt. of India undertaking known as the National Coal Development Corporation for exploiting coal deposits under the public sector.

The Oil and Natural Gas Commission undertakes exploratory operations for oil throughout the country. Oil India Ltd. a joint company with Govt. of India and Assam Oil Company Ltd. was formed on 31st May 1961 to work, exploit and prove in the areas Nahorkatiya, Moran and Hoogrijan previously held by Assam Oil Co. and supply oil to the two refineries located at Nunmati in Assam and Barauni in Bihar.

The Indian Oil Corporation Ltd., a Govt. of India undertaking has been formed for the marketing and distribution of oil.

The Central Government have declared the following substances and all their respective components as prescribed substances under the Atomic Energy Act, 1948 :—Uranium minerals, thorium minerals, beryllium minerals, vanadium minerals, lithium minerals, radium, zirconium, graphite, deuterium, plutonium, neptunium and minerals containing the above metals and accessories, ingredients, such as uraniferous allanite, triplite, columbite and tantalite.

The Coal Board under the Ministry of Mines and Fuel looks after the development of collieries in the public sector and the distribution of coal to various consumers.

For the import and export of important minerals like iron ore, manganese, etc., there is now a Minerals and Metals Trading Corporation of India Ltd.

## PRODUCTION, EXPORTS, IMPORTS

The total value of the mineral production in India in 1964 was Rs. 2,056 million as against Rs. 2,119 million in 1963. These values of mineral production are excluding the value of petroleum and minerals specified as prescribed substances under the Atomic Energy Act, 1948.

The total exports of minerals from India including Goa during 1964 fetched foreign exchange worth Rs. 775 million as compared with Rs. 602 million in 1963.

The exports of metals in 1964 were valued at Rs. 170 million as against Rs. 86 million in 1963.

The value of the imports of minerals during 1964 was Rs. 165 million as against Rs. 158 million during 1963.

The increase in the value of imports was mainly due to the larger imports of apatite, rock-phosphate and industrial diamonds.

The total value of metals and alloys imported during 1964 was Rs. 1,618 million as against Rs. 1,407 million in 1963.

The total value of import (minerals, metals and alloys) in 1964 amounted to Rs. 1,783 million as against Rs. 1,566 million in 1963.

### Department of Mines

The Department of Mines was formed in 1902 to administer the Mines Act, to hold enquiries into mine accidents and into cases of explosions, inundations, fires, collapses, breakdowns etc. in mines of all types.

The Department publishes a monthly Coal Bulletin, an annual Indian Coal Statistics and an Annual Report about the working of all mines in India.

### Employment

The actual break-up of the persons employed in mines is given below :—

| | 1962 | 1963 |
|---|---|---|
| Coal .. .. .. | 432,909 | 433,437 |
| Manganese Ore .. .. | 30,141 | 36,467 |
| Iron Ore .. .. | 60,124 | 44,457 |
| Mica .. .. .. | 26,092 | 28,248 |
| Gold .. .. .. | 16,397 | 15,439 |
| Others .. .. .. | 118,563 | 123,974 |
| Total employment in mines .. .. .. | 684,226 | 682,022 |

This is exclusive of people employed in connected industries, of which figure is estimated around two lakhs.

## COAL

The most important coal fields are Raniganj in West Bengal and Jharia and Bokaro in Bihar. The West Bengal and Bihar fields contribute major share of the total output. The best coking coal comes from Giridih, Jharia and Raniganj. Other States in which coal is found are Madhya Pradesh, Orissa, Andhra Pradesh, Madras, Maharashtra, Assam, Rajasthan and Kashmir.

During 1963 there were 806 coal mines working in India of which 26 were in the public sector, the remaining being in the private sector.

Indian coal falls mainly into two classes namely, high grade steam and low grade steam.

The Metallurgical Coal Conservation Committee placed the reserves of coking coal at 329.6 million tons in respect of selected grade, 395.7 million tons of grade I quality and 49.1 million tons of grade II quality. With stowing, washing and blending the Committee thought that a reserve of 2,000 million tons of good quality coking coal could be obtained. The Geological Survey of India has estimated the total reserve of coal in India as 31,888 million tonnes down to 300 metres depth.

The following table gives the details of output :—

| Year | Production (million metric tons) |
|---|---|
| 1960 .. .. .. | 52·59 |
| 1961 .. .. .. | 56·07 |
| 1962 .. .. .. | 61·37 |
| 1963 .. .. .. | 65·96 |
| 1964 .. .. .. | 69·44 |

Value of production of coal during 1964 was Rs. 151 crores.

The coal production is expected to reach about 90 million tonnes by the end of the Third Plan, as against the original plan target of 98·6 million tonnes.

The original Third Plan target of production of 37·10 million tonnes by public sector has been revised to 28·14 million tonnes, as a result of mid-plan appraisal.

Under the Mines and Minerals (Regulation & Development) Act, 1958, the period of lease to coal mines has been extended to 30 years with the option of one renewal for the same period.

Large-scale mechanisation in the industry is being taken up.

To achieve the Third Plan target, technical collaboration from U.K., Poland, West Germany, France, U.S.S.R. and U.S.A. has been sought by the National Coal Development Corporation for opening up new mines, establishment of washeries and workshops. One 15 cu. yard dragline has been installed in Kurasia Colliery (M.P.) and another 39 cu. yard dragline supposed to be the biggest in the world will be used to open up a new strip of mine at Bishrampur, M.P. Besides, the National Coal Development Corporation have added big shovels, dumpers, drills and heavy earthmoving machineries.

The existing State collieries except Singareni collieries are administered by the National Coal Development Corporation Ltd. located in Ranchi.

Production from the Singareni group of collieries during 1963 was 33,51,990 tonnes, as against 31,18,658 tonnes in the previous year.

The control of coal, exercised under the colliery control order regarding distribution, price, etc., and the general control over private industry has been entrusted to a separate authority, the Coal Controller.

Despatches to some of the principal industries in 1963 in wagons: Railways 7,82,618; steel works 4,83,840; public utility (power) 2,72,802 and cement 1,25,494.

There are already four washeries in the private sector—Jamadoba, West Bokaro and Lodna collieries which supply washed coal to the Tata Iron and Steel Company and the Indian Iron and Steel Company. Associated Cement Company has a washery at Nowrazabad. Public sector washery at Kargali, belonging to the National Coal Development Corporation, supply washed coal to the Rourkela and Bhilai steel plants. The other three washeries viz. Dugda, Bhojoidih in Bihar and Patherdih in W. Bengal, having 600, 500 and 360 tonnes rated capacity per hour respectively, are also functioning. Dugda has already gone into production. Besides, two new washeries each at Kathara and Karanpura and a washery in Central Jharia will be established to meet the requirements of the country.

The present production of these washeries is not adequate to meet their expanded needs. It is tentatively estimated that during the Third Plan an additional washing capacity of 12·9 mln. tonnes in terms of raw coal is required by the steel industry.

The deep shaft coal mining project at Monidih in Jharia region is fast taking shape promising production in early Fourth Plan.

The Monidih block has a reserve of 211·8 million tonnes of which 134·5 million tonnes have been found to be minable.

The average ash content of raw coal in the different coal seams, including dirt bands, ranges from 14·9 per cent to 31·6 per cent.

Because of the paucity of coal deposits in south India, high priority has been given to the development of the multi-purpose 'South Arcot Lignite Project' at Neyveli. This plant is planned to increase the mine output to 5·5 million tonnes per annum. During 1963, 9,87,174 tonnes of lignite was mined in Neyveli.

*Note :* The export figures of iron ore in 1963 includes from Goa also.

## IRON ORE

On account of the high ash of Indian metallurgical coke, it is usual in estimating the Indian iron ore reserves to accept only ores with an iron content of 60 per cent and above. Ores below this iron content are used only in very small quantities in Indian blast furnaces.

With the merger of Goa in the Indian Union rich iron ore deposits very near the coast have been added to India's iron ore resources.

India possesses about one-fourth of the total world reserves of iron ore and is the biggest single country possessing such a large quantity of iron ore deposits as 21,000 million tons, though her output constitutes only 2·5 per cent of the total world production, compared to U.S.A. 14·1 per cent and U.S.S.R. 2·6 per cent.

The production of iron ore in 1964 was 14·88 mln. metric tons, about 0·8 per cent lower than 14·99 mln. tons in 1963. The production during Jan. to May 1965 was 1,869,000 tonnes.

During 1963 despatches of iron ore for consumption in the iron and steel plants totalled 11·66 mln. metric tons against 10·4 mln. metric tons in 1962.

The quantity of iron exported in 1963 was 9·38 mln. tons valued at Rs. 360·5 million as compared with 3·39 million tons valued at Rs. 178·2 million in 1962.

The whole export of the iron ore has been canalised through the State Trading Corporation (now Minerals and Metals Trading Corporation) from 1st July, 1957.

The foreign exchange earned through the export of iron ore during 1962 and 1963 was Rs. 178·2 million and Rs. 360·5 million respectively.

The principal buyers of the Indian iron ore are Japan, Czechoslovakia, West Germany, Rumania Italy, Yugoslavia, Poland, Belgium and Hungary in the order of importance.

Japan continued to be the largest importer and received a total of 61,16,042 tonnes of ore during 1963 compared to 45,41,714 tonnes during 1962.

An agreement was signed between India and Japan—March 8, 1960—whereby four million tons of iron ore will be supplied every year from Bailadila iron ore project in the Bastar District of M.P. from 1966 onwards. The agreement will be valid for fifteen years.

### DISTRIBUTION

The region-wise reserves proved and indicated in the country are shown below in million tons:

HAEMATITE ORES (in million tons)

*Bihar and Orissa :* Singhbhum 1,047 ; Keonjhar 988 ; Bonai 648 ; Mayurbhanj 60 ; total 2,743. *Madhya Pradesh :* Dhalli-Rajhara 114 ; Bailadila 610 ; Rowghat 740 ; Jabalpur 100 ; total 1,564. *Maharashtra :* Ratnagiri 5 ; Goa 15 ; Chanda 22 ; total 42. *Andhra :* 41 ; *Kashmir :* 5 ; *Mysore :* 904 ; *Rajasthan :* 5 ; *Punjab :* 2 ; *U.P.:* 10.

*Total (Haematite ores)* .. 5,316 million tons.

The total possible reserves of hæmatite ores are 17,630 million tons.

MAGNETITE ORES (in million tons)

The reserves proved and indicated in million tons are : *Madras :* Salem-Tiruchirapalli 305 ; *Mysore :* 215 ; *Bihar and Orissa :* 5 ; *Himachal Pradesh :* 60 ; *Andhra :* 20.

*Total (Magnetite ores)*.. 605 million tons.

The total possible reserves of magnetite ores are 1,610 million tons.

LIMONITIC AND SPATHIC ORES (in million tons)

The reserves proved and indicated of limonitic and spathic ores are : *Bengal :* 500 million tons; and the possible reserves 2,000 million tons.

A coal bearing region 13 sq. miles in Bankura Dist. (W. Bengal) has been discovered with reserves of 11 million tons.

The grand total of all ores proved and indicated is 6,421 million tons and the possible reserves 21,140 million tons.

Large deposits of high grade ores are limited to a few areas of which the following fields require special mention :—

(i) *Bihar and Orissa :* In what is known as the Singhbhum Iron Belt, consisting of the Singhbhum District, in which the Tata Iron & Steel Company's Steel Works are situated, and the neighbouring areas, there exist some of the richest iron ore deposits in the world. The iron content of the ore considered usable varies from 60 per cent to 65 per cent.

The Durgapur steel plant meets all its requirement from the iron ores occurring in the neighbouring regions. The Bonai ore range which is the extension of the main iron ore range will feed the Rourkela steel plant. The Indian Bureau of Mines has worked in this area for proving iron ore deposits for the Rourkela steel plant. Reserves of 173 mln. tons have been proved in Kiriburu area by I.B.M.

Two mines namely Barsua and Kiriburu have been developed, the former for meeting the iron ore requirements of Rourkela steel plant and the latter for export of nearly 2 million tons per annum to Japan. Another area adjacent to Kiriburu, known as Sasangda Block has been proved by the Indian Bureau of Mines, where reserves of 133 mln. tonnes have been estimated. The block will supply iron ore to the proposed Bokaro steel plant.

(ii) *Mysore :* There are big deposits of haematite and quartz—magnetite ore in Mysore but the latter are of low-grade and would require concentration before using them. The ores used in the Mysore Iron & Steel Ltd., Bhadravati are from the Bababudan Hills and can be compared to Singhbhum ores containing about 60 per cent iron.

Limonite deposits are also known to exist but they have not been properly explored owing to transport difficulties.

(iii) *Madras :* Very large deposits, mainly magnetite, occur in Salem. They have been estimated at 305 million tons. They will, however, require concentration before use, and there may be considerable losses in the process.

(iv) *Madhya Pradesh :* Large deposits of haematite are found in the Bastar, Durg and Jabalpur districts of this State. Dhalli Rajhara, Rowghat and Bailadila ranges in the Durg and Bastar districts are the major deposits in Madhya Pradesh. These three ranges are the main sources of iron ore for the Bhilai steel plant. Bailadila iron ore deposits of Bastar district are being proved by the I.B.M. for supply of iron ore to the tune of four to six million tonnes annually to Japan beginning from 1966. Bailadila iron ore range consists of 14 rich iron ore deposits.

The exploratory work for blocking the iron ore deposits at Jharandalli in Rajhara Pahar, from where the Bhilai steel plant draws its supplies was done by the Indian Bureau of Mines. In addition to iron ore, the Indian Bureau of Mines has also done operations in respect of limestone at Bhanpuri, dolomite at Batapara and manganese ore at Balaghat area, in Madhya Pradesh for the requirements of the Bhilai steel plant.

The Indian Bureau of Mines, at present are carrying out detailed exploration for flux grade limestone in Niwar, Akaltara and Bankuivan in M.P.

The only source of high-phosphorus ore is in Bengal. It is poor in iron content being 35 per cent to 45 per cent and the more easily available ore in this locality has been exploited.

The deposits in the Ceded Districts in Andhra Pradesh are estimated to be not less than 300 million tons.

During 1963, Orissa, Bihar, Mysore and Madhya Pradesh accounted for 40%, 23%, 17%, and 16%, while Andhra Pradesh, Maharashtra, Rajasthan and Punjab jointly accounted for the remaining 6% of the all India output.

### Production

The following is the trend of production:

| Year | Qty. in '000 metric tonnes. | Value Rs. '000. |
|---|---|---|
| 1960 .. .. | 10,683 | 90,285 |
| 1961 .. .. | 12,309 | 89,211 |
| 1962 .. .. | 13,509 | 1,02,129 |
| 1963 .. .. | 14,995 | 1,13,789 |
| 1964 ... .. | 14,880 | 1,09,434 |

The production of iron ore in Goa during 1963 and 1964 was 5·51 and 5·66 million tonnes respectively.

The export trade of iron ore during 1960 to 1964 is indicated below :

| Year | Qty.in '000 metric tons. | Value in Rs. '000. |
|---|---|---|
| 1960 .. .. | 3,428 | 1,72,863 |
| 1961 .. .. | 3,466 | 1,79,379 |
| 1962 .. .. | 3,390 | 1,78,233 |
| 1963* .. .. | 9,379 | 3,60,510 |
| 1964* .. .. | 10,482 | 3,71,574 |

The present yearly production of iron ore is more than ten million tons and the target for the Third Five-Year Plan is 30 million tons. Of these, 20 mln. tons are expected to be consumed in the country, and the rest would be available for export.

## MANGANESE ORE

India is rich in manganese ore. Extensive deposits occur in Madhya Pradesh, Orissa, Andhra Pradesh, Maharashtra, Mysore, Bihar, and Rajasthan.

The total reserves of manganese ore in the country according to the latest estimate, are now placed at over 180 million tons of which 45 million tons are of high grade. It is estimated that the deposits in the main belt of Nagpur and Bhandara in Maharashtra and Balaghat and Chhindwara in Madhya Pradesh alone contain reserves of the order of 80 million tons upto a depth of 500 ft. A major part of the output is exported at present.

The following is the trend of output and exports in '000 metric tons (including Goa) :

| Year | Production | Exports |
|---|---|---|
| 1960 .. .. | 1,199 | 1,318 |
| 1961 .. .. | 1,230 | 1,123 |
| 1962 .. .. | 1,225 | 903 |
| 963 .. .. | 1,100 | 946 |
| 1964 .. .. | 1,262 | 1,598 |

The production of manganese ore in 1964 in Goa was 97,000 tonnes of which 63,000 tonnes were of ferruginous grade.

The export of manganese ore has been decontrolled from Oct. 1962. The export of manganese dioxide peroxide has also been decontrolled since April 23, 1964.

To conserve high grade ore Government is encouraging the setting up of beneficiation plant to improve low grade manganese ore and promote export. A heavy media separation plant for beneficiating low grade ore was set up by the then Central Province Manganese Ore Co. Ltd. at Dongri Buzurg in Bhandara District in 1964.

* 1963 and 1964 figures include export from Goa also.

There is only one ferro-manganese plant under public sector at Bhadravati in Mysore.

In the private sector six ferro-manganese plants located respectively at Joda and Rayagada in Orissa, Garividi in Andhra, Dandeli in Mysore and Tumsar and Kanhan in Maharashtra have gone into production.

The Government is also encouraging the setting up of new units for the manufacture of ferro-manganese for which a production target of 2,03,200 tonnes by 1965-66 has been proposed.

Out of this, 1,01,600 tonnes will be required for internal consumption and the rest will be available for export by the end of the Third Plan.

The former Central Provinces Manganese Ore Co. Ltd. (Sterling Co.) has been reformed into a rupee company called the Manganese Ore India Ltd. on 15th July 1962. The Central Govt., the Govt. of Maharashtra, the Govt. of M.P. and the C.P.M.O. represent their interests in the new company. The C.P.M.O. will have 49 per cent of the equity capital and the three governments will share the remaining equity capital.

## MICA

Mica has been treated as a strategic mineral and India accounts for a big slice of the world trade in it.

The principal mica deposits are concentrated in Bihar, Rajasthan and Andhra Pradesh.

During 1963 Bihar, Rajasthan and Andhra Pradesh accounted for 45%, 28% and 27% of the total mica production in India. Most of the production from Rajasthan is sent to Bihar to be split and marketed.

The mica belt in the Nellore district in Andhra is about 96·56 kilometers long and 24·14 to 32·18 kilometers wide. The greater portion of the Andhra output is of "green" variety.

The export of mica on consignment basis has been banned since Feb. 1964. The export of mica scrap and waste is allowed subject to floor price of Rs. 200 per metric ton.

The statistics of mica production were not reliable till 1955. It was only after the promulgation of the Mineral Conservation and Development Rules that the Bureau of Mines was able to get correct figures.

The production and export figures of Mica are given below :—

| Year | Production (metric tons) | Export (metric tons) |
|---|---|---|
| 1960 .. .. | 29,226 | 29,840 |
| 1961 .. .. | 28,347 | 26,493 |
| 1962 .. .. | 28,481 | 31,188 |
| 1963 .. .. | 25,322 | 34,075 |
| 1964 .. .. | 21,698 | 29,891 |
| 1964-65 .. .. | | 31·8† |

## CHROMITE

Chromite is an important strategic mineral of which India has moderate supplies.

The chief deposits are in the Singhbhum district of Bihar, Mysore and Hassan districts of Mysore State, Ratnagiri and Bhandara districts of Maharashtra, the Krishna district of Andhra Pradesh, the Salem district of Madras, and Cuttack and Keonjhar districts of Orissa.

The estimated reserves of some deposits of chromite ore are as follows (tons):

Bihar 20,500; Maharashtra 551,000; Madras 220,000; Mysore: over 1,000,000; Orissa: 2,755,300; total 4,781,930.

The following table gives details regarding production and export of chromite ore :—

'000 metric tons

| Year | Output | Exports |
|---|---|---|
| 1960 .. .. | 106 | 41 |
| 1961 .. .. | 48 | 41 |
| 1962 .. .. | 66 | 16 |
| 1963 .. | 65 | 10 |
| 1964 .. .. | 33 | 31 |

The export policy for chromite in 1963 was same as in 1962 which is as follows :

Chrome ore fulfilling all the following specifications was allowed on merits, $Cr_2O_3$ content is not less than 38%, F E O content is not more than 22%, $S_1O_3$ content is not more than 10%, $Al_2O_3$ plus $Cr_2O_3$ content together is not more than 54% and in physical condition, the ore is not friable. The other chrome ores and concentrates of all grades, except mentioned above were licensed freely.

## MAGNESITE

Large deposits of magnesite used in the manufacture of magnesium salts, metallic magnesium and refractory bricks are known to occur in Salem (Madras), Hassan, Coorg and Mysore (Mysore), Almora (U.P.), Dungarpur (Rajasthan) and Singhbhum (Bihar).

Of these, the chief producing centres are Salem, and Mysore districts.

Large deposits of magnesite have been discovered near Almora in U.P. The Indian Bureau of Mines has conducted exploratory work on magnesite deposits at Almora. Reserves of more than 12 million tons of magnesite have been estimated by the department. The Department of Geology and Mining of U.P. has estimated 12·19 million tonnes and 2·54 million tonnes of magnesite in Pungar and Lahore villages respectively.

Major part of the output is used in the manufacture of refractory bricks for steel works and a considerable quantity is exported.

The output and export of magnesite from 1960 to 1964 are given below :—

| Year | Output (Metric tons) | Exports (Metric tons) |
|---|---|---|
| 1960 .. .. | 156,331 | 27,620 |
| 1961 .. .. | 209,744 | 31,932 |
| 1962 .. .. | 2,12,888 | 32,062 |
| 1963 .. | 2,34,566 | 33,349 |
| 1964 .. .. | 2,07,732 | 36,151 |

## GYPSUM

Gypsum deposits are known to exist in several parts of India. The better known gypsum bearing regions are in Rajasthan (Jodhpur, Bikaner, Nagaur and Jaisalmer) and in Madras (Tiruchirapalli and Coimbatore districts).

The total reserves are estimated at 998·45 million tonnes. Rajasthan accounts for more than 90 per cent of the Indian reserves.

Smaller deposits also occur in Tehri-Garhwal, Himachal Pradesh, parts of western India and Jammu and Kashmir and is worked at present except in Himachal Pradesh.

The annual production from Indian deposits from 1960 to 1964 is given below :—

| Year | Output ('000 Metric Tons) |
|---|---|
| 1960 .. .. .. | 997 |
| 1961 .. .. .. | 866 |
| 1962 .. .. .. | 1,122 |
| 1963 .. .. .. | 1,190 |
| 1964 .. .. .. | 880 |

The entire output is consumed in the country for the manufacture of fertilisers, cement and plaster of Paris. The cement industry consumes 0·04 to 0·05 tonne of gypsum per tonne of cement produced. The consumption of the Sindri fertiliser factory in 1963 was about 670,000 tonnes of gypsum.

Recently the Sindri Unit of Fertilisers Corporation Ltd. has carried out assessments of gypsum deposits in Rajasthan. According to them about 120 million tons of gypsum of all grades upto 30 ft. are available in Rajasthan, out of which it is indicated 25 million tons are of fertiliser grade containing 85 per cent or above $CaSO_4.2H_2O$.

## LEAD-ZINC ORE

In India 1,53,122 metric tons of lead-zinc ores were produced during 1963 as against 1,59,113 metric tons during 1962.

The recovery of lead and zinc concentrates was 5,920 metric tons and 10,627 metric tons respectively during 1963 as compared to 6,384 and 9,837 metric tons in the year 1962.

The entire production was reported from the Zawar mines in Udaipur district of Rajasthan State.

The production of refined lead during 1964 was 3,624 metric tons as against 3,537 metric tons in 1963.

Zinc will be smelted in India for the first time after the zinc smelter at present being erected at Debari near Udaipur of a capacity of 18,288 tonnes of zinc per annum goes into production shortly (July 1965). The lead smelter at Tundoo in Bihar will also be expanded to produce 10,160 tonnes of lead annually from its present annual capacity of 6,096 tonnes. Sulphur, also for the first time, will be recovered in the form of super-phosphate fertiliser (76,200 to 81,280 tonnes per annum) along with cadmium (71 to 76 tonnes per year). About 11,220 Kg silver per annum will be recovered.

## SULPHUR

Native sulphur in deposits of large size is unknown in India though some occurrences have come to light in the hill ranges in northern India.

There are occurrences in Puga in Kashmir but they are situated in a difficult terrain.

The mineral pyrites is another source of sulphur. It is found in Amjor (Bihar), Ingaldhal, Kaiga, Karwar (Mysore), Taradevi (Simla), Lashtial (Kashmir) and Polur (Madras) of which Amjor and Ingaldhal deposits are of economic importance.

The Indian Bureau of Mines have estimated 391 million metric tons of pyrites in area covering 48 sq. miles at Amjor assaying 40 per cent sulphur. The Pyrites and Chemical Development Company Ltd., has been set up under the aegis of NIDC to exploit pyrites for production of sulphuric acid and other related products.

It is reported that Orkla process is not suitable to extract sulphur from Amjor pyrites. Efforts are being made at present by Outokumpu process for extraction of elemental sulphur from Amjor pyrites. The P.C. D.C. has initiated action on setting up a sulphuric acid plant at Sindri with a capacity of 400 tonnes per day based on Amjor pyrites.

As there is no production of sulphur in India, the country's requirements are met from imports, for which the recent figures are given below :—

| Year | Quantity (tonnes) |
|---|---|
| 1960 .. .. .. | 178,904 |
| 1961 .. .. .. | 191,433 |
| 1962 .. .. .. | 248,031 |
| 1963 .. .. .. | 261,018 |
| 1964 .. .. .. | 241,161 |

Pyrites to the tune of 2·03 million tons assaying 20 to 30 per cent sulphur have been estimated to be available at Ingaldhal, Mysore State.

Substantial quantities of pyrites are associated with the gold deposits of Wynad in the Nilgiris District of Madras.

Copper pyrites deposits are also a source of sulphur. Some of the Indian coal *e.g.* Assam coal and Rewa coal are high in sulphur.

## COPPER

India has only a small supply of copper. The country produces on an average 9,000 tonnes of fire refined copper per year, which is mostly utilised in the manufacture of brass for utensils and coins. The country's entire requirement of electrolytic copper is imported.

The production of refined copper was 9,475 metric tons in 1964 and 9,582 metric tons in 1963.

The entire production of copper ore was from Bihar and during 1964 the production was 472,963 tonnes as against 474,345 tonnes in 1963.

† Figures in million kg.

*Note :* Major part of magnesite exported is of calcined variety.

The recent figures of import of the copper metal are given below :—

| Year | Quantity (Tonnes) | Value in Rs. '000 |
|---|---|---|
| 1960 .. .. | 63,339 | 2,16,893 |
| 1961 .. .. | 62,316 | 195,753 |
| 1962 .. .. | 71,790 | 238,028 |
| 1963 .. .. | 74,008 | 253,867 |
| 1964 .. .. | 67,471 | 241,342 |

The only area for copper ore in India is being worked by the Indian Copper Corporation at Ghatsila, Bihar, whose smelting plant is six miles away from this place. The Indian Copper Coporation Ltd., are setting up electrolytic copper refinery at Moubhandar with 8,500 tonnes annual capacity. The refinery was scheduled to commence production by the end of 1965.

There are other areas in the country where the ore might be worked. The more important of these are the Singhbhum copper belt of Bihar, Sikkim, Jalpaiguri and Darjeeling districts (W. Bengal), Khetri, Daribo (Rajasthan) and Tehri Garhwal (U.P.). Exploration work by the Bureau of Mines has been completed in Dariba and work is still in progress in khetri.

Reserves of 36·27 million metric tons of one per cent copper have been proved in the Madhan-Kudhan section of Khetri area. Exploratory operations have been extended to Kolihan section in the Khetri area and Bhagani. The Government of India is contemplating to set up a 21,000 tonnes electrolytic copper plant on the basis of results so far achieved by the Bureau of Mines.

Based on the project report submitted in 1962 by consultants of N.M.D.C., the Government of India decided to establish a mine and a plant to produce 21,336 tonnes with a capital cost of Rs. 244·4 million with a foreign exchange component of Rs. 90 million.

India's per capita consumption in 1960–61 was 0·4 lb. It is expected to be raised to 0·8 lb. by the end of the Third Plan. Total consumption by the end of the Third Plan is estimated at 172,700 tons.

## SALT

Before 1947, undivided India consumed about 2·24 million metric tons of salt annually out of which about 1·68 million metric tons were produced in the country and the rest imported from abroad. After Independence the reorganised Salt Department launched an extensive production drive with spectacular results. While in 1947 the production of salt was about 1·93 million metric tons, it rose to 2·78 million metric tons in 1951, thus making the country self-sufficient in salt after a long period of 125 years. In addition to our usual exports to Nepal, substantial exports (2·5 lakh metric tons) to Japan were started from 1952. Export to Japan is being handled by the State Trading Corporation. Action has been taken to enforce quality control on salt meant for export by sea and its preshipment inspection to ensure that only high quality salt is exported.

The salt-producing areas are:

Maharashtra, Gujarat, Kerala, Madras, Andhra, Orissa and West Bengal for salt from sea-brine ;

Rajasthan for salt from inland lake brine as well as subterranean brine ;

Kharaghoda, Kuda, etc. in the Little Rann of Kutch all in Gujarat for manufacture from subterranean brine ;

Mandi, for rock salt, in Himachal Pradesh.

The first Five-Year Plan envisaged a production of 837 lakh maunds (3·1 million metric tons) in 1955-56. This target was surpassed in 1953 when 861 lakh maunds (3·2 million metric tons) of salt were produced.

The production during the years 1962, 1963 and 1964 was 38·9, 45·4 and 46·5 lakh metric tons respectively.

The Second Plan target was 37 lakh tonnes and for 3rd Plan 54·6 lakh m. tonnes.

The statistics of production of salt are given below (in lakh metric tons):

| Year | Quantity | Year | Quantity |
|---|---|---|---|
| 1951 | 27·8 | 1958 | 41·9 |
| 1952 | 28·7 | 1959 | 31·8 |
| 1953 | 32·1 | 1960 | 34·3 |
| 1954 | 27·6 | 1961 | 34·8 |
| 1955 | 30·3 | 1962 | 38·9 |
| 1956 | 33·2 | 1963 | 45·4 |
| 1957 | 36·7 | 1964 | 46·5 |

The average number of labourers employed per day in the salt industry in 1964 was 36,204 as against 33,695 in 1963.

There are both licensed and unlicensed manufacturers. The latter are engaged in work on areas of 10 acres and less.

The statistics of exports from the year 1959 to 1964 are as follows (in lakh metric tons):

| | | | |
|---|---|---|---|
| 1959 | 3·45 | 1962 | 1·65 |
| 1960 | 4·49 | 1963 | 2·68 |
| 1961 | 1·58 | 1964 | 3·58 |

Salt is subject to the levy of a cess under the Salt Cess Act of 1953. To encourage the small-scale part of this industry Government exempts manufacture in areas upto 10 acres from the payment of cess. All manufacturers with holdings over 10 acres to 100 acres were required to pay a cess at half the rate of those with larger holdings. In order to promote co-operative societies, they are exempt from the payment of cess. The present rates of cess as revised from 29th of August 1961 are fourteen and seven paise per 40 kilograms for larger and smaller holdings respectively.

A Central Advisory Board and six Regional Advisory Boards for salt were reconstituted by the Govt. of India in April, 1963 to advise the Government on proper utilisation of the proceeds of cess and the development of the salt industry.

The Salt Commissioner in consultation with the Railway Board prepares every year a programme of distribution to every State based on per capita consumption. The supply from the source to the consuming areas is regulated under the zonal scheme for the distribution of salt.

The Salt Department is under the Ministry of Industry and Supply. The head of the Department is designated Salt Commissioner with headquarters at Jaipur. He is assisted by three Regional Officers, one each at Bombay, Madras and Calcutta.

A company entitled Hindustan Salt Ltd. set up by the Government of India is working the erstwhile Government salt works at Kharaghoda in Gujarat and Mandi in Himachal Pradesh. The Sambhar Lake salt sources have since been taken over by Messrs. Sambhar Salts Limited set up with effect from Oct. 1, 1964. The erstwhile Central Govt. Salt Works at Pachbadra and Didwana in Rajasthan are being worked by the Govt. of Rajasthan.

The standard of edible salt which was raised from 94 per cent to 95 per cent sodium chloride content with effect from 1st January, 1957 will be raised further to 96 per cent from the beginning of manufacturing season in 1966.

The annual capacity of the Iodisation Plant of two lines installed at Sambhar is about 36,000 tonnes on 2 shift basis and 52,000 tonnes on 3 shift basis. Two more lines are expected to be added by the end of 1965. The present plant is already serving partly the goitre affected population of Punjab, H.P., U.P. and Bihar.

An Iodisation Plant of one line capacity has been installed at the Salkia Salt Golahs, Howrah. This plant will process nearly 20,000 tonnes of iodised salt per year. Three more lines are proposed to be added by the end of 1965.

It is proposed to install an Iodisation Plant of four lines capacity at Kharaghoda by the end of 1965.

The target for salt production and capacity towards the end of the Third Plan (1965-66) have been fixed at 54·6 and 62·5 lakh tonnes respectively. This increase has been necessitated due to the anticipated rise in demand for industrial salt by the salt based Alkali & Heavy Chemical Industries planned to be developed on a large scale during this period. The present annual consumption level of 7 lakh tonnes of industrial salt is expected to increase to 15·00 lakh tonnes by the end of the Third Plan.

The target for all production during the Fourth Plan has been tentatively fixed at 80 lakh tonnes, the target for installed capacity being 100 lakh tonnes.

The Govt. of Rajasthan have installed a plant for the recovery of Sodium Sulphate from subsoil brine available at Didwana. Its present capacity is to produce 20 tonnes of Sodium Sulphate and 60 tonnes of salt per day.

Gypsum is being collected in appreciable quantities in many maritime salt works on the West Coast.

The following quantities of important by-products were recovered during 1963 and 1964.

(Figures in Tonnes)

| Year | Gypsum | Magnesium Sulphate | Magnesium Chloride | Sodium Sulphate |
|---|---|---|---|---|
| 1963 .. .. | 35,062 | 40 | 7,955 | 1,312 |
| 1964 .. .. | 35,102 | 28 | 6,717 | 1,299 |

## DIAMOND

The National Mineral Development Corporation has prepared two project reports for the exploitation of diamond deposits of Ramkheria and Majhgawan areas in Panna district of Madhya Pradesh.

A provision of Rs. 15 million has been made towards the project work and target production of 90,000 carats per year by the end of the Third Plan period.

The project reports of mining at Ramkheria and Majhgawan are being reappraised.

At Panna 2,260 carats of diamond valued at Rs. 12,18,000 were produced in 1964 whereas in the year 1963 the production was 1,432 carats valued at Rs. 5,18,000.

## RARE METALS*

What is believed to be probably the world's biggest deposits of radioactive minerals was located "somewhere in North-East India"

* For more upto-date information see under "Research".

by the Indian Atomic Energy Department early in 1957.

Investigations carried out showed that the deposit had over 3·3 million tons of ore containing 300,000 tons of thorium of concentration of about 10 per cent and 10,000 tons of uranium of concentration of 0·3 to 0·4 per cent.

The deposits also contain about 80 million tons of ilmenite. The production of ilmenite during the half year ending June 1959 was 143,000 metric tons according to the Indian Bureau of Mines. Ilmenite is recovered from the beach sands of Kerala State contributing nearly 93 per cent of the total production and the Manavalakuruchi area in Madras State. It is mainly exported to U.S.A. and U.K.

The deposit is, therefore, considered more important than the famous beach deposits of Kerala, hitherto regarded as one of the world's richest deposits.

India's total reserves of uranium are reckoned at 30,000 tons and of thorium at 500,000 tons.

Uranium mines are being developed in Bihar and Rajasthan. It is hoped enough would be found to feed the first power station which would need 100 to 150 tons of fuel a year.

## IMPORT OF METALS AND ALLOYS INTO INDIA†

(Value in Rs. '000)

| Metals | Unit of Quantity | 1963 | | 1964 | |

* Includes imports into Goa. † Excluding asphalt (others) eg. manufactures. (*a*) Excluding pearls and synthetic stones.

# A TOURIST'S GUIDE*

*For all information and assistance, visitors are advised to contact the Government of India tourist offices in India. The representatives of the Tourist Department are stationed on duty at the airport and in the case of Bombay a representative of the Tourist Office always meets all important passenger liners.*

In the second half of the article we give a list of places which have come into prominence through post-independence development activity —mostly connected with the Five Year Plans.

THE following hints meant for foreign tourists may be useful :

1. Every foreign tourist entering India should be in possession of a valid passport issued by his Government.

He should also obtain before leaving his country a tourist visa from the Indian representative abroad (or the British representative in countries where there are no Indian representatives). Commonwealth citizens (except those of Pakistan and Ceylon) are exempt from the visa requirement, provided their passports are valid for travel to India. Persons of non-Indian origin domiciled in South Africa are, however, required to obtain visas for India.

Transit visas are not required for through air/ship passengers in direct transit by the same flight or by the next regularly scheduled flight irrespective of whether the flight is of the same or a different Airline, provided the period does not exceed 72 hours and they leave from the same place. One can however leave the airport or ship by obtaining a landing permit for 72 hours on depositing his passport.

The normal period of stay cannot be stated. It depends upon the stay period granted by the visa issuing authority.

Normal period of stay on transit visa is 15 days.

No hard and fast rule can be laid down as regards the extension of visas. It will depend on the merits of each case. However, genuine tourists can stay for a maximum period of six months.

For short visits not exceeding 2 weeks to Pakistan, Nepal, Bhutan, Ceylon and Burma tourists may obtain return visas from the Deputy Commissioner of Police, Special Branch II, C.I.D., Head Police Office, Annexe-2, Crawford Market, Bombay or from State Governments. For visits exceeding 2 weeks, they may apply for 'no objection' to return to India endorsements to the Deputy Commissioner of Police, Special Branch II, C.I.D., Bombay or State Government. However in such cases they will have to obtain visas from the Indian authorities abroad before entering India.

2. No registration is required for foreigners staying in India for 30 days or less provided they have come on visas for less than 3 months. If they land in India with visas for more than 3 months' stay, then they must report for registration within 7 days to the Registration Officer of their destination and present the "B" Form (temporary registration certificate) issued to them at the place of entry.

Those coming on visas for less than 3 months' stay must get themselves registered with the Police within 30 days of their arrival provided their stay exceeds 30 days irrespective of the place where they land. However, on request being made, registration can be done even before the expiry of 30 days. Commonwealth citizens are exempt from registration formalities.

Return visa or double/triple entry visa holders would be required to get themselves registered after 30 days of their actual stay in India and not after 30 days of their first entry into India.

*Departures :* Tourists, if they are registered, are exempted from reporting their movements and also from taking departure endorsements from the Registration Officer with whom they are registered.

It should be brought to the notice of tourists to surrender their registration papers at the time of their departure, as it is found that tourists or others who get themselves registered before the expiry of 30 days and leave India also before completion of 30 days, carry registration papers with them.

*For holders of Entry Visas :* Visitors holding registration certificates have to obtain before departure exit endorsements from the Registration Offices of the District in which they are initially registered.

3. The Government of India have placed no health restrictions on persons entering India by sea or air, except in regard to yellow fever.

However, all persons are advised, in their own interest, to be protected against small-pox and cholera according to international requirements.

Citizens of the U.K., Australia, Canada, New Zealand, Federation of Rhodesia and Nyasaland, Singapore, Malaya, Ghana and Ireland (Eire), excluding missionaries, and nationals of Nepal, wishing to proceed to India from a place other than Nepal, are required to possess valid passports without visas.

Nepalese and Bhutanese when proceeding from their respective countries by the inland route, require no passport or visa. Inhabitants of the border districts of Tibet Region of China require passports and visas.

Nationals of Commonwealth countries (except Pakistan and Ceylon) and of the Republic of Ireland wishing to proceed to India for missionary work require special endorsements.

Nationals of all other countries require valid passports with visas. No visa is required for visitors in direct transit by air or sea within 72 hours from the same port.

Individuals without nationality or of undetermined nationality (Stateless persons, IRO refugees, persons receiving legal and political protection, holders of Nansen passports, etc.) should have valid identity documents or sworn affidavits with visas.

Diplomats when travelling as tourists receive the same facilities as their countrymen.

Collective passports and family passports issued by other Governments are recognised by the Government of India. However, if any person other than parents is an adult *e.g.* if he has attained the age of 16, a separate visa is necessary in addition to the one for the rest.

Tourist visas are generally valid for a single journey only, but visitors who wish to proceed on short trips to other countries and return to India within the period of validity of the Indian visa, should apply for double or triple entry visas or entry-cum-transit/transit-cum-entry visas. If a visitor coming on short term visas wishes to extend his stay in India, he can, after arrival in India, apply for further extension of stay.

Foreigners who come on visits not exceeding three months for recreational or sightseeing purposes or for attending meetings convened by the Government of India or international bodies should, in their own interest, apply for tourist visas and not entry visas. Holders of tourist visas are entitled to the grant of Tourist Introduction Cards and All-India liquor permits, reservation of accommodation in Government-owned Rest Houses and Retiring Rooms at railway stations, etc.

Foreigners who wish to break journey in India for short periods while in transit, should apply for transit visas which are issued for a maximum period of 15 days and entitle the holder to travel from the port of entry to the port of departure by a prescribed route which is not necessarily the shortest one.

Visitors holding tourist visas are advised to obtain from the visa issuing authority a printed Tourist Introduction Card. In case a bona fide tourist has not already obtained a Tourist Introduction Card from the visa issuing authority, he can obtain one from one of the Government of India Tourist Offices in India or overseas.

This card introduces the tourist to various Governmental authorities in India and will enable him to receive all possible assistance from them in matters concerning immigration, customs, clearance, air and rail reservations, liquor permits and reservation of accommodation in rest houses, dak bungalows and retiring rooms in railway stations.

4. All baggage is subject to customs examination. Articles of high value *e.g.* radios, cameras, binoculars, type-writers, transistors, etc. are exempted from duty provided they are entered in the re-export declaration form and re-exported within 6 months.

Certain personal effects are allowed to enter free. Also alcoholic liquor up to one quart of spirits or wine, provided the tourist can procure a permit on arrival by producing his Tourist Introduction Card. Liquor permits are issued to tourists at the Santa Cruz Airport, Bombay and at Ballard Pier, on application, immediately on landing. Failing this, the permit may be obtained from the Foreign Liquor Permit Office, Old Customs House, Mint Road, Fort or from the excise official at the following hotels : Taj Mahal, Greens, Ambassador, Grand, West End, Ritz, Airlines, Nataraj, Shalimar and Sun-n-Sand.

5. Tourists are allowed to bring into India foreign currency notes or coins subject to declaration :

There is no limit on the amount of Travellers' Cheques. Import and export of Indian currency are banned.

The official rates of exchange are as follows : £1 equal to Rs. 13·33 ; U.S. $1 equal to Rs. 4·75. The actual buying and selling rates, however, differ slightly from these rates.

Foreign currency can be exchanged at any authorized dealer or money changer.

6. If the tourist expects any baggage to follow or his baggage has already arrived, he should obtain a "LANDING CERTIFICATE" from the Customs official on arrival, failing which all his un-accompanied baggage would be liable to import duty.

*Additional concessions for tourists :*

*Liquor Permits :*—Bona fide tourists having tourist visas/Tourist Introduction Cards can obtain All-India liquor permits valid for three months from Indian Missions abroad or from the Tourist Offices of the Government of India at Delhi, Bombay, Madras and Calcutta if they have not already an All-India Liquor Permit from Indian Missions abroad. The Government of India Tourist Office at Bombay is at 123, Queen's Road, Churchgate, Bombay-1.

*Sporting Fire-arms :*—Not more than three sporting fire-arms brought in by a tourist are allowed free of duty. These must, however, be re-exported within a period of six months.

*Cartridges :*—100 cartridges are allowed duty-free under the normal rules. Each tourist is allowed to bring in 300 cartridges, on payment of customs duty, but without an Import Trade Control Licence.

* NOTE : When the population of a town is not given it may be generally assumed that it is less than 20,000.

*Film :*—Besides the 25 rolls of film for still cameras and 8 reels of substandard movie films which are allowed duty-free under the normal rules, each tourist can import 25 rolls of film for still cameras and 12 reels of movie film on payment of duty but without an Import Licence.

On production of a certificate from an authorised officer of the Tourist Department of the Government of India, foreign tourists are allowed a concession of 15 per cent on the basic air-conditioned first class fares and 'Travel As You Like' ticket on the Indian Railways, available for 30 days in an air-conditioned class of accommodation and in first class where air-conditioned accommodation was not available at a lump sum rate of Rs. 560.

## TRAVEL AGENCIES

*List of Travel Agencies Approved by the Government of India with their telegraphic addresses within inverted comas :*

**Ahmedabad :** Lee & Muirhead (India) Pvt. Ltd., Kothari Mansion, Relief Road, Ahmedabad. (Branch): "LEMUIR".

**Bangalore :** Bharat Travel Service (P) Ltd., D-9, 5th Main Road, Gandhinagar, Bangalore-9. (Branch): "EXCURSION"; Ram Mohan & Co., Chamber of Commerce Building, Kempe Gowda Road, Bangalore-9. (Branch): "GACANPAC"; Thos. Cook & Son Ltd., 200, Mahatma Gandhi Road, Bangalore. (Branch): "COUPON"; Trade-Wings (P) Ltd., 15, St. Mark's Road, Bangalore. (Branch): "TRAVEL".

**Bombay :** American Express Co., Inc., Oriental Building, 364, Dr. Dadabhai Naoroji Road, P.B. No. 507, Bombay-1. (Head Qrts.): "AMEXCO"; Asiatic Travel Service, Post Box No. 1568, 12, Murzban Road, Fort, Bombay-16. (Head Qrts.): "AIRASIA"; Balmer Lawrie & Co. Ltd., 5, Graham Road, Ballard Estate, Bombay-1. (Branch): "BALMER"; Cox & Kings (Agents) Ltd., Lloyds Bank Building, Dadabhai Naoroji Road, P.B. No. 398, Bombay-1. (Head Qrts.): "COXSHIP"; Everett Travel Service, 221, Dadabhai Naoroji Road, Post Box No. 523, Bombay-1. (Branch): "TRAVERETT"; Hind Musafir Agency (P) Ltd., Khorshed Building, Sir P. M. Road, Bombay-1. (Head Qrts.): "PRAVASI"; Indtravels (Travel Division of Airfreight (P) Ltd., Neville House, Nicol Road, Ballard Estate, Bombay. (Head Qrts.): "AIRFREIGHT"; Jeena & Company, Post Box No. 849, 10, Veer Nariman Road, Fort, Bombay-1. "JUSTITIA"; Lee & Muirhead (India) Pvt. Ltd., 12, Rampart Row, Fort, Bombay-1. (Head Qrts.): "LEMUIR"; Mercury Travels (India) Pvt. Ltd., 70, Forbes Street, Fort, Bombay-1. (Branch): "MERCTRAVEL"; N. Jamnadas & Co., Travel Agents, 16, Bank Street, Fort, Bombay. (Head Qrts.): "ENJAYTOURS"; Orient Express Co. (Private) Ltd., Petit Building, 359, Dadabhai Naoroji Road, Bombay-1. (Branch): "OREXPRESCO"; Thos. Cook & Son (Continental & Overseas) Ltd., P.B. No. 46, Cooks Building, Dadabhai Naoroji Road, Bombay-1. (Head Qrts.): "COUPON"; Trade Wings (Private) Ltd., 30/32, Rampart Row, Fort, Bombay-1. (Head Qrts.): "TRAVEL"; Travel Corporation (India) Pvt. Ltd., Queen's Hotel, Apollo Bunder, Bombay-1. (Head Qrts.): "TURING"; Vensimal Bassarmal & Bros., 521, Kalbadevi Road, P.B. No. 2112, Bombay-2. (Head Qrts.): "VENSIMAL"; Freight Carriers (P) Ltd., 43, Tamarind Lane, Fort, Bombay-1 (BR). (Head Qrts.): "QUICKFREIT"; Sita World Travel India Private Ltd., Airlines Hotel, Bombay-1.

**Calcutta :** American Express Co., Inc., P.B. No. 2311, 21, Old Court House Street, Calcutta. (Branch): "AMEXCO"; Balmer Lawrie & Co. Ltd., 21, Netaji Subhash Road, P.B. No. 4, Calcutta-1. (Head Qrts.): "BALMER"; Everett Travel Service, 1, Old Court House Street, Calcutta-1. (Head Qrts.): "TRAVERETT"; Indian Air Travels Ltd., 28, Chittaranjan Avenue, Calcutta. ## SHIKAR OUTFITTERS

The following is a list of recognised shikar outfitters: Indian Shikar & Tours (P) Ltd., Jumna Bhawan, 3/14A, Asaf Ali Road, New Delhi; Allwyn Cooper (P) Ltd., Wardha Road, Nagpur; Asaf Ali of Porla, Porla, Distt. Chanda, Maharashtra; Jungleways, Prop. : Lt.-Col. S. A. H. Granville, Pachmarhi, M.P.; Tiger Camps (P) Ltd., Dumri, P.O. Sardarnagar, Distt. Gorakhpur, U.P.; Tiger Shikars, Dr. Franklyn Woods, 49, Danning Road, Jabalpur, M.P.; Big & Small Game Hunting, Prop. : Thakur Dharamchandra, Kesaragarh Castle, Jaipur, Rajasthan; Safaris India, Prop. : P. M. Dinshaw, 102, Simrole Road, Mhow; Shikarees, Prop. : Nawabzada M. F. Khan, Bashirbagh Palace, Hyderabad; P. C. Dhir Birbar, Prop. : Shikar India, Talcher, Dhenkanal, Orissa; Hunters & Hunters, 212, Olympus Apartments, Altamount Road, Bombay-26; Rao Naidu Shikars, Tara Villa, Bezonbagh, Nagpur 4; Rajput Hunters, Kishangarh, Rajasthan; Tiger Sports, Bhadri House, 5, Shahnajal Road, Lucknow; A. Imam, "The Grove", P.O. Hazaribagh, Bihar; Kumaon & Hunters Pvt. Ltd., Tajpur Estate Farms, P.O. Afzalgarh, Dist. Bijnor, U.P.

## TOURIST OFFICES

The following is a list of Government of India tourist offices in India and abroad :

Director, Govt. of India Tourist Office, 123, Queen's Road, Bombay-1.

Director, Govt. of India Tourist Office, 88, Janpath, New Delhi.

Director, Govt. of India Tourist Office, 13, Old Court House Street, Calcutta.

Director, Govt. of India Tourist Office, 35, Mount Road, Madras.

Manager, Govt. of India Tourist Office, Krishna Vilas, Station Road, Aurangabad.

Manager, Govt. of India Tourist Office, The Mall, Agra.

Manager, Govt. of India Tourist Office, 15-B, The Mall, Banaras.

Manager, Govt. of India Tourist Office, Willingdon Island, Cochin-3.

Manager, Govt. of India Tourist Office, Rajasthan State Hotel, Jaipur.

Director, Govt. of India Tourist Office, 19 East 49th Street, New York 17, N.Y.

Director, Govt. of India Tourist Office, 685, Market Street, San Francisco 5, California.

Director, Govt. of India Tourist Office, Indisches Verkehrsburo, Baseler Stress, 46, Baseler Houchhous, Frankfurt/Main, W. Germany.

Director, Govt. of India Tourist Office, Leonard House, 46, Elizabeth Street, Melbourne (Australia).

Director, Govt. of India Tourist Office, 8, Boulevard, Madeleine, Paris-9.

Information Assistant, Govt. of India Tourist Office, Railway Station, Jalgaon.

Director, Govt. of India Tourist Office, 177-79, King Street (West), at University, Toronto, Canada.

Govt. of India Tourist Office, No. 1, Ginza, 7 Chome, Chuo-Ku, Tokyo (Japan).

Govt. of India Tourist Office, Palmer House, Room Nos. 684-685, Chicago (U.S.A.).

*Note :* Most of the State Governments have Tourist Offices at the important centres.

## TOURIST CENTRES

**Mount Abu** (hill station): Pop. 8,076 (1961) in Rajasthan, about 4,000 feet above sea-level. There are two seasons in the year, the first from the middle of March to the beginning of June, and the second from the middle of September to the end of October. *Places worth a visit:* 1. the Dilwara Jain temples (11th-13th century, A.D.) containing the finest marble carvings in India, 2. Achalgarh temples (15th-16th century, A.D.) and Mandakini Kund, 3. Ruins of an ancient town called Chandravati, 4. Nakki Talao (lake), 5. Arbuda Devi, a shrine cut in rock, 6. Guru Shikhar (5,646 ft.), highest point in Abu, 7. Sunset point, 8. Palanpur point, 9. Gaumukh Temple and Agni Kund, 10. the Municipal Park. Mount Abu is electrified and has waterworks with public utility taps. Permission is required to use the dak bungalows and Inspection Houses. Mount Abu is reached by railway and road. The nearest railway station is Abu Road on the metre-gauge section of the Western Railway from Ahmedabad to Delhi. From the station Abu Road is about 17½ miles by road, and there is regular motor service between the town and the station.

**Agra:** Pop. 5,08,680 (1961), a city in U.P., stands on the banks of the Jamuna. It was the capital of the Moghul Empire. *Places worth a visit:* 1. the Taj Mahal, regarded by many as the most beautiful building in the world. 2. the Fort, 3. the Juma Masjid, 4. Moti Masjid, 5. the tomb of Itmad-ud-Daula, 6. Akbar's tomb at Sikandra about five miles from Agra, 7. Dayal Bagh, 8. Twenty-three miles from Agra is the deserted city of Fatehpur Sikri founded by Akbar.

**Ahmedabad:** in Gujarat is the second largest textile centre in India. It contains numerous monuments of the fifteenth and sixteenth centuries. Pop. 11,49,918 (1961).

It is also a seat of Jaina art and culture. Founded in ancient times as Karnavati on the banks of the Sabarmati, it took a new look and a new name—City of Ahmed in the early 15th century. Many remains of buildings and architecture bear testimony to the synthesis of Indo-Islamic culture. Places worth visiting are: 1. Jumma Musjid (1423); 2. Shah Alum's Mausoleum (1475); 3. Rani Sipri's Mosque (1540); 4. Mosque of Sidi Sayyad (1572) for traceried windows with palm and parasite design; 5. Shaking Minarets; 6. Shahi Baug where Gurudeo Tagore stayed during his youth and which supplied him with material for his *Hungry Stones* (story); 7. Teen Darwaza (three Gates); 8. Mahatma Gandhi's Sabarmati Ashram; 9. Kankaria Tank; 10. Gujarat University & Gujarat Vidyapitha; 11. ATIRA, Textile Research Institute.

**Aiholi:** near Bagalkot in Mysore State contains about fifty temples important in the development of Hindu architecture and sculpture.

Badami, on which there is a separate note, is near Aiholi.

**Ajanta Caves:** are 66 miles north of Aurangabad in Maharashtra. The rock-cut caves are 29 in number (5 chaityas or shrines and 24 viharas or monasteries, all Buddhist) and present a record of a unique combination of painting, sculpture and architecture of a period extending over nine centuries from about the 2nd Century B.C. to about 7th Century A.D. The caves can be reached from Aurangabad where there is a good hotel conducted by the Central Railway.

**Ajmer:** city of considerable antiquity in Rajasthan, Hindu and Muslim religious centre, contains Western Railway workshop. Pop. 2,31,240 (1961). *Places worth a visit:* 1. the Durgah of Khwaja Sahib (tomb of Muslim saint), 2. the Magazine (Akbar's old palace now museum), 3. Ana Sagar Lake (the marble pavilions round the lake were built by Shah Jehan), 4. Adhai-din-ka-jhopra (Hut of two and a half days), 5. Taragarh (Fortress built by Akbar), 6. Mayo College, 7. Pushkar, a most sacred lake in India, is about seven miles away.

**Allahabad:** (also called Prayag); city in U.P. situated at the confluence of the Ganga and the Jamuna. It has an old fort and an Asoka pillar. Sixty-five miles from Allahabad is Kosambi, where the ruins of an ancient capital are being excavated. Pop. 4,11,955 (1961).

The confluence of the Ganga and Jamuna at Prayag is the holiest bathing place for Hindus in India. Every 12 years, Kumbha Mela (religious fair) is held attracting over 40 lakhs of pilgrims during the four weeks; a smaller fair occurs every six years—Adha Kumbhi. For the devout Hindu, Allahabad along with Banaras, and Gaya are the places he must visit, at least once during his lifetime.

The old Mughal Fort contains an underground temple where well carved images are seen and the pilgrims worship at a small tree taking it to be the Eternal Banyan Tree (Akshaya Vata.)

Allahabad has a large University and many educational institutions. It is the home town of the Nehrus, and their gift to the nation, Swaraj Bhavan which was their home is visited by many people throughout the year.

**Almora:** headquarters of the district of the same name, in U.P. 83 miles from Kathgodam Railway Station, it is the main town in Kumaon Hills (q.v.). Perched at an elevation of 5,600 ft., it is about two miles in length, like a saddle, and is said to have been founded four hundred years ago by Raja Kalyan Chand. Of all the hill stations in the area, Almora is the one which has the most attractive features: moderate rain-fall, temperate climate, the temperature seldom rising above 88°F., even during the summer days, and comparative freedom from fog. Within easy distance of Almora are many Himalayan peaks—Seehee Debi, Bandnee Debi and Binsar being the chief ones. Binsar Hill also known as Jhandi Dhar is only 13 miles from Almora and the bridle path leading to it, passes through enchanting jungle scenery. With its thick vegetation, dense Alpine forests, hundreds of unnamed wild flowers and many varieties of ferns, Jhandi Dhar is of peerless beauty.

Pindari Glacier can be reached from Almora at a distance of 75 miles, in eight stages, attaining an altitude of 13 to 14,000 ft. The most suitable time for this trip is either May-June or September-October.

Two other places in the Kumaon Hills are: Ranikhet and Naini Tal.

Cultural Institutions in Almora: Mayavati Ashram of the Ramakrishna Math; Shri Anand Mayee Ashram and Udaya Shankar's Dancing Institute. Pop. 16,004 (1961).

(See also 'Kumaon Hills', 'Naini Tal' and 'Ranikhet'.)

**Alwar, Bikaner, Jodhpur, Kotah:** famous for Rajput historical monuments.

**Amritsar:** city in the Punjab, sacred to the Sikhs. Pop. 3,76,295 (1961). Amritsar is the very centre of the Sikh religion and has a big trade in grain and textiles. *Places worth a visit:* 1. the Golden Temple, 2. Baba Atal Tower, 3. Akal Takht, 4. Ram Bagh Gardens, 5. Fort Govind Garh, and 6. Jalianwalla Bagh Memorial.

**Aurangabad:** in Maharashtra is noteworthy because of its proximity to Ellora and Ajanta caves and Daulatabad fort. *Places worth a visit are:* 1. Bibi-ka-Muqbara—the tomb of Aurangzeb's wife which is a replica of the famous Taj, 2. Panchakki (old water-mill), 3. The shrine of Shah Musafir lies nearby, 4. Eight Buddhist caves near the town. Pop. 87,579 (1961).

Daulatabad, on which there is a separate note, is near Aurangabad.

**Badami:** in Mysore State, is famous for sculptured caves of the 6th century and for a group of Hindu temples. Fifteen miles from Badami is Pattadakal with another group of early Hindu temples (7th or 8th century), examples of pure Dravidian architecture.

Aiholi, on which there is a separate note is near Badami.

**Bangalore:** Largest city in Mysore and a health resort, is about 3,000 feet above sea-level. It is well laid-out and up-to-date with every urban facility. *Places worth a visit:* 1. Cubbon Park, 2. Lal Bagh, 3. Band-stand, 4. Race Course, 5. Maharaja's Palace, 6. Tippu's Palace, 7. Venkataramanaswamy Temple, 8. Vidhan Soudha (new Secretariat). Pop. 9,05,134 (1961).

Lately a large number of industries have been established both by Government and private interests:

Bharat Electronics, Hindustan Aeronautics, Hindustan Machine Tools, Indian Telephone Industries.

The Indian Institute of Science is a leading teaching and research body in India.

From Bangalore trips can be made to other places of interest—Belur, Halebid, Bhadravati (for the iron works) and Kolar Gold Fields.

**Baroda:** Capital of the former Baroda State, now part of Gujarat State, is about 250 miles to the north of Bombay, pop. 2,95,144 (1961). *Places worth a visit:* 1. Laxmi Vilas Palace (the residence of the Maharaja, one of the most beautiful palaces in India), 2. Old Nazar Bagh Palace, 3. Museum and Public Park, 4. Jubilee Garden, 5. L. F. Battery, 6. Kirti Mandir, 7. Baroda University, and 8. Kala Bhavan (Technical School).

**Belur:** in Mysore State, noted for its elaborately sculptured temples of the Hoysala period.

Halebid, on which there is a separate note, is near Belur.

**Banaras*:** town in U.P. on the banks of the Ganges, very sacred to the Hindus and Buddhist alike. It is in fact the religious capital of Hindu India and contains about 1,500 comparatively large temples besides countless minor shrines. It is also reputed to be the oldest city in the country. Pop. 4,71,258 (1961). *Places worth a visit:* 1. Vishwanath Temple, 2. Bharat Mata Temple, 3. Manmandir, with Jaisingh's Observatory, 4. Aurangzeb's Mosque, 5. Gyan Wapi, 6. Nandeswar Kothi, 7. Ramnagar Fort, 8. Banaras Hindu University, and 9. Sarnath, a great Buddhist centre with many architectural remains, is about six miles from Banaras. The Buddha preached his first sermon here.

There are also about 30 dharmasalas for Hindu pilgrims. Banaras is on the branch line from Moghul Sarai to Saharanpur.

**Bharatpur:** town in Rajasthan is famous for its historic fort. Pop. 49,776 (1961).

**Bhubaneshwar:** Orissa's new capital; city of temples once said to number 7 000. Pop. 38,211. *Places worth a visit:* 1. Lingaraj Temple, 2. Mukteshwar Temple, 3. Parasurameswar Temple, 4. Raj Rani Temple. Nearby are the Jain and Buddhist rock-cut caves of Khandagiri and Udayagiri and Asoka's Rock Edict at Dhauli. Bhubaneshwar is on the main S. E. R. line between Waltair and Howrah, about 20 miles from Cuttack and 38 miles from Puri.

**Bijapur:** town in Mysore State, capital of the old Adilshahi Sultans of Bijapur is rich with the remains of palaces, mosques and tombs. *Places worth a visit:* 1. Jami Masjid (the greatest mosque in South India), 2. Gol Gumbaz (the tomb of Mahammad Adil Shah and the second largest dome in the world), also called the Whispering Gallery, 3. Mehtar Mahal, 4. Ashar Mahal, 5. Gagan Mahal, 6. Chini Mahal, 7. Mecca Masjid, 8. Tas-Bavry (water-tank), 9. Malik-I-Maidan (Great Gun), 10. Landi-Kasab Gun, 11. Haidar Burj (tower), 12. Ibrahim Roza (the tomb and mosque of Ibrahim II), 13. Jala Mandir (reservoir), 14. Chand Bavri (old tank), 15. Granary, 16. Jod Gombaz (double tombs), 17. Bara Kaman Masjid, and 18. Begum Tank. Bijapur is a railway station on the Gadag-Sholapur section of the Southern Railway. There are a dharmasala and a travellers' bungalow about one and a half miles from the station. Pop. 78,854 (1961).

* The official name is Varanasi.

**Bombay:** second city and port in India called the Gateway to India. Pop.*: 4,152,056. Area (Greater Bombay) 174 sq. miles. It is the principal centre of the textile industry, and the second biggest financial centre. The foreign trade of Bombay is about 46 per cent of the total trade of India. The city returns 30 per cent of the country's total income-tax, and 20 per cent of the corporation tax. It is an important communications centre, served by several air-lines and two big railways of both of which it is a terminus. May and October are the hottest months, but from November to March it is pleasant. *Places worth a visit:* 1. the Gateway of India, 2. Apollo Bunder, 3. Prince of Wales Museum, 4. the Town Hall, and Central Library, 5. Rajabai Tower and University Building, 6. Victoria Terminus of the Central Railway, 7. the General Post Office, 8. Crawford Market, 9. Brabourne Stadium, 10. Chowpatty sands, 11. Malabar Hill, Hanging Gardens and Kamala Nehru Park, 12. Central Station, Terminus of the Western Railway, 13. Race Course, 14. Bhandarwada Reservoir and Gardens, 15. Victoria Gardens and Albert Museum. Places near Bombay worth a visit: 1. Juhu (sea-side resort), 2. Versova (sea-side resort), 3. Vihar Lake (from which the city gets part of its water-supply), 4. Kanheri Caves (rock-cut caves of Buddhist origin), 5. Jogeshwari Caves, 6. Vajreshwari (temple and hot springs of medicinal property), 7. Mandapeshwar (cave temple), 8. Nirmal (temple and lake), 9. Ambarnath (temple), 10. Pawai Lake and the Technical Institute, 11. Pali (hot springs and small game shooting), 12. Elephanta Caves, 13. Vaitarna (water supply scheme), 14. Aarey Milk Colony, 15. The oil refineries at Trombay, 16. The Atomic Energy Establishment at Trombay. The chief means of conveyance in Bombay are buses, electric railway, taxis and gharis.

**Brindavan:** See under Mathura.

**Budh Gaya:** near Gaya, in Bihar, a Buddhist centre of pilgrimage. It contains the famous mediaeval Buddhist temple near the Bodhi Tree under which Gautam did penance and attained Enlightenment. Pop. 6,299 (1961). See also Gaya.

**Bundi:** in Rajasthan is well-known for its buildings. Jungles nearby provide plenty of tiger shooting. Pop. 26,478 (1961).

**Calcutta:** until March, 1912, the headquarters of the Indian Government, and now, as then, the commercial capital of India. It is the terminus of three great railways, and the port of an immense river traffic. Though it lies 84 miles from the Bay of Bengal on the River Hooghly, it has a larger foreign trade than any other Indian port, and its enterprising Port Trust has the largest revenue among Indian port authorities. It is the centre of five great industries—jute, tea, hides and skins, coal and lac. Its exports include besides these, rice and linseed. Population of (1961), West Bengal is 34.93 millions and of Calcutta City (Corporation) 2,927,289. *Places worth a visit:* 1. Victoria Memorial (contains a picture-gallery and museum), 2. the Indian Museum, 3. the Zoological Gardens, 4. the Jain Temple, 5. the Kalighat Temple, 6. Belvedere House (where the British Viceroys stayed when on visit to Calcutta), now the National Library, 7. Raj Bhavan (residence of the Governor of West Bengal), 8. Marble Palace (containing art treasures property of the Mullik family), 9. Fort William, 10. the Eden Gardens, 11. the Town Hall, 12. Haig Market, 13. Dalhousie Square, 14. the Race Course, 15. Dhakuria Lake, 16. the Hindu bathing ghats, 17. Dakshineshwar Temple. Places near about Calcutta which are worth a visit are: 1. Bally (holy place), 2 Belur (home of the Ramakrishna Mission), 3. the Botanical Gardens (contains the biggest banyan tree in existence), 4. Diamond Harbour (fort and customs house), 5. Dum Dum (airport of Calcutta).

**Cape Comorin:** also called Kanya Kumari in Madras State, is the southern-most tip of India.

It is the place where the Arabian Sea and the Bay of Bengal meet the Indian Ocean. Tourists go to have a view of sun-rise and sun-set.

It is easily reached from Trivandrum by public transport buses or private conveyance.

The spot is sacred to the Hindus and a place of pilgrimage as the reputed abode of Kanya Kumari the virgin goddess to whom the temple there is dedicated.

**Chandigarh†:** capital of Punjab is the youngest of Indian Capital cities. It was planned by the French architect Le Corbusier. Some of its public buildings are unique and therefore attract a lot of attention from students of town-planning. Chandigarh is situated near Kalka railway station of the Northern Railway.

**Conjeevaram (Kanchipuram):** the city of temples, the Banaras of the South, is about 45 miles to the south-west of Madras. It is one of the seven holy cities of India and the only one in the South. The place is divided into three parts, Shiva Conjeevaram, Vishnu Conjeevaram and Pillayar Paliyam, a testimony to the part played by all the main Hindu religious sects in the history of the city. There are over a thousand temples in all. *Places worth a visit:* 1. Kailasnath Temple (over 1,000 years old), 2. Vaikunth Perumal Temple (over 1,000 years old), 3. Ekambareswar Temple (400 years old), 4. Vedaraja Perumal Temple. Pop. 92,714 (1961).

Conjeevaram is on the Renigunta-Chingleput section of the Southern Railway and is easily accessible from Madras *via* Chingleput.

**Cooch-Behar:** in West Bengal, is known for the facilities and opportunities which it offers to shikaris in search of big game hunting. Pop. 41,922 (1961).

**Coonoor:** hill station on the Nilgiri Hills in Madras State, is about 6,000 feet above sea-level. The climate is mild and genial neither too hot in the summer nor too cold in the winter. The mean day temperature is 64 degrees. The north-east monsoon breaks in October and lasts about two months. The town has good water-supply and natural drainage facilities and is reputed to be one of the cleanest towns in South India. *Places worth a visit:* 1. Sim's Park (contains collection of plants), 2. Low's Waterfall, 3. Tiger Rock (hill fort). There are innumerable places for excursion and picnic purposes, *e.g.* the Droog, the Dolfin Nose, the Lamb's Rock, Laz Falls, Lady Canning Seat, the Ralliah Dam and Catherine Falls. The chief means of conveyance are cars which can be hired.

Coonoor lies on the narrow-gauge Mettupalayam-Ootacamund line of the Southern Railway. It is also connected by road with Ootacamund, and Kotagiri, another hill station. Pop. 30,690 (1961).

**Darjeeling:** hill station in West Bengal, lies on the lower slopes of the Himalayas about 370 miles to the north of Calcutta. It is 7,110 feet above sea-level. The maximum temperature in the summer is about 70 degrees and the minimum in the winter is about 35. The town commands picturesque views including that of Mount Kanchenjunga and on a clear day of Mount Everest. Various sports are available during the season such as fishing, shooting and horse-riding. Darjeeling has also a first-class sanatorium known as Eden Sanatorium. *Places worth a visit:* 1. Government House, 2. Town Hall, 3. Museum, 4. Observatory Hill (from where a magnificent view of Kanchenjunga can be obtained), 5. the Mall, 6. Natural History Botanical Gardens, 7. Birch Hill Park, 8. Senchal Lakes, 9. Ghoom Monastery, 10. Tiger Hill (from where the sunrise over Everest is generally viewed on clear October mornings).

Darjeeling is the terminus of the meter-gauge Darjeeling-Himalayan section of the N.E. Railway and is about 27 hours' journey from Calcutta. From Siliguri where the visitor has to change, Darjeeling can also be reached by car. Pop. 40,651 (1961).

**Daulatabad:** in Maharashtra near Aurangabad, contains the famous rock-hewn 12th century fortress at one time so prosperous that it led Muhammed Tuglak to shift his capital to it from Delhi (1308). Close by is the tomb of the Moghul Emperor Aurangzeb.

**Delhi (New):** the capital of India and the seat of the Union Government. It was planned in accordance with modern ideas by the architects Sir Edwin Lutyens and Sir Herbert Baker and was formally opened in 1931. New Delhi houses the President's House (now called Rashtrapati Bhavan), the Parliament, and the Secretariat. All the buildings in New Delhi are white except the ones mentioned above. These latter are built of red sandstone. Pop. 2,61,545 (1961).

**Delhi (Old):** also called Shahjahanabad, the ancient capital of India stands on the Jamuna and is enclosed by a stone wall with seven gates. It has a history going back to 3,000 years and within an area of 50 square miles eight Delhis rose and fell. The seven predecessors of present-day Delhi are Kutub, Siri, Tuglakabad, Jahanabad, Firozabad, Purana Quila and Shahjahanabad. No city in India contains as many historical remains as Old Delhi. One can trace here the growth and decay of almost every dynasty which held sway over the ancient land of Hindustan. There are a number of factories, jewellery, gold and silver embroidery and ivory carvings works for which Delhi is well-known. Pop. 9,14,790 (1951). Delhi is a great distributing centre for cotton, wool and silk. Industries include hardware, utensils and stoneware. Delhi is also a large market for grain. Lately tourist traffic has grown into a regular new trade. *Places worth a visit:* Red Fort, Jama Masjid, Rajghat (Mahatma Gandhi's Samadhi), Ashoka Pillars, Feroze Shah Kotla, Purana Quila, Humayun's Tomb, Isa Khan's Tomb, Lodi Park and Lodi Tombs, Safdar Jang's Tomb, Kutab Minar, Tughlaqabad, India Gate or War Memorial Arch, Shanti Ghat (Jawaharlal Nehru's Samadhi), Rashtrapati Bhavan, Parliament House, National Museum, Shri Lakshmi Narayan Temple, Jantar Mantar or the Observatory.

Delhi is directly connected by rail and air with Bombay, Calcutta and Madras. The Central and Western Railways connect it with Bombay, the Northern and Eastern Railways with Calcutta, and the Southern and Central Railways together with Madras.

Delhi also lies on the direct East-West trans-world air routes linking India with all the major cities of the world.

**Elephanta Caves:** on an island of the same name, about 6 miles from Bombay harbour, are mainly dedicated to Shiva and the sculpture shows that God in His many forms. These belong to the 7-8th century and though there have been mutilations of the figures, the caves are well preserved considering they are very old. The main cave, almost 125 ft × 125 ft, is the only impressive structure, and the rest of the island is used more as a picnic spot by holiday makers. There is a launch service as well as a ferry steamer. An official of the Archaeological Department is available on the spot.

The main figure of three-heads, Mahesh Murti, is considered among the world's most impressive sculptures, for its size, beauty and execution.

**Ellora Caves:** are situated about 15 miles to the north-west of Aurangabad in Maharashtra. The caves which are excavated in the face of a hill are 34 in number and run north to south for a distance of a mile and a quarter. The hill has the shape of a crescent the southern, the centre, and the northern being occupied respectively by Buddhist, Hindu and Jain temples. There are 12 Buddhist caves, 17 Hindu caves and 5 Jain caves. The Hindu caves are more lavishly decorated than others and Kailash temple which is the most impressive is also the biggest cave temple in India. It stands in a court averaging 154 feet wide, 276 feet long with a scrap 107 feet high at the back. Among other notable caves are caves X, XII, XIV, XV, XXIX, XXXIII, XXXIV. It is believed that the Ellora Caves are about a thousand years old. They are reached from Aurangabad by bus or car. Thrishneshwar temple near the caves is an important place.

* Greater Bombay. † Population 89,321 (1961).

**Ernakulam :** in Kerala State, is famous for its backwaters. Pop. 1,17,253 (1961).

**Fatehpur Sikri :** City founded by Akbar in 1569 but abandoned soon after, is situated 23 miles from Agra. Akbar wished to make it his capital but it had to be abandoned because of lack of water. Here Akbar's son Salim (Emperor Jehangir) was born. The place contains a number of palaces, shrines, mosques built of marble and red sandstone. *The more notable among the monuments are :* 1. Buland Darwaja, the Gateway of Victory, built to commemorate the conquest of Khandesh. It is 176 feet high and is the highest gateway in India. It forms the southern gateway to the most imposing structure in Fatehpur Sikri. 2. the Jami Masjid, said to be a copy of the mosque at Mecca or Medina, 3. Panch Mahal, 4. Diwan-i-Khas (Hall of Private Audience), 5. Mariam's House, 6. Palace of Jodh Bai, 7. House of Birbal, 8. Elephant Tower and 9. Khas Mahal. Fatehpur Sikri has a railway station, and the city can be easily reached by car.

**Gaya* :** big town in Bihar, on the Phalgu river, sacred to Hindus and Buddhists alike. The Vishnupada, a temple, built over the foot-print of Vishnu is the centre of the pilgrimage and the Akshaya Vata, the Eternal Banyan tree, is an object of veneration. See also Budha Gaya.

**Gersoppa Falls : See Jog Falls.**

**Golconda :** 5 miles from Hyderabad is an ancient spectacular fort (Andhra).

**Gopalpur-on-Sea :** in Orissa is a sea-side resort for a quiet holiday.

**Gulmarg :** an ideal hill station in Kashmir, about twenty-nine miles from Srinagar, is a little less than 9,000 feet above sea-level. The place boasts of all modern facilities and is particularly noted as a winter playground affording scope for skiing, ski-ing, tobogganing, and golf. Round about are ideal places for walks, rides and excursions.

**Gwalior :** in Madhya Pradesh, best known for its fort (which is reputed to be the most interesting and remarkable example of a Hindu palace of an early age) lies about 200 miles to the south of Delhi. *Places worth visiting :* 1. Gwalior fort includes Man Singh's Palace and a number of temples and shrines), 2. Tansen's Tomb, 3. Rani (of Jhansi) Laxmi Bai's Chhatri, 4. the Chhatris of other Mahratta rulers, 5. Tomb of Mahomed Ghaus, 6. Jami Masjid, 7. State Museum, 8. King George Park and Zoo, 9. Motimahal Palace. Seventy-two miles from Gwalior is Shivpuri or Sipri famous for its lake and scenery. Survaya which is twelve miles again from Shivpuri contains the remains of a fortress of the early mediaeval period. Gwalior is on the main Central Railway line between Bombay and Delhi. Pop.† 3,00,587 (1961).

**Halebid :** in Mysore State is well known for its elaborately sculptured temples of the Hoysala period.

Belur, on which there is a separate note, is near Halebid.

**Hampi :** in Mysore State, is the ruined capital of the Vijayanagar Empire. It is 8 miles from the Hospet Railway Station on the Southern Railway. The ruins are about 600 years old and are described as "virtually a vast open air museum of Hindu monuments in the Dravidian style of architecture".

**Hardwar :** in U.P. on the Inner Himalayas, on the Ganga banks is a great Hindu pilgrim centre. It is situated at the foot of the Siwalik hills on the right bank of the Ganga where the river enters the plains. The object of attraction is the bathing ghat called Hari Ki Payri (step of Hari). Every twelfth year the Kumbh Mela is held, which has a special sanctity. Devout pilgrims proceed from here further up to Rishikesh, and to Badrinath. Pop. 58,513 (1961).

**Hyderabad-Secunderabad :** the twin city linked together by the Hussain-Sagar (lake), is the capital of Andhra Pradesh and is centrally situated for all-India communications. It is a railway junction as well as an important air-port, and stands on the banks of the river Musi. Hyderabad was known as Bhaga Nagar when it was founded 400 years ago. It has many attractions. 1. Char Minar (four Minarets) dominates the City with 80 ft. high-minarets, built in 1591 ; 2. Osmania University with its impressive building and Ajanta Pavilion ; 3. Town Hall ; 4. State Museum and Art Gallery ; 5. Salarjung Museum —one of the richest and most varied collections in Asia ; 6. Health Museum and Public gardens. Golconda Fort forms one of the suburbs of Hyderabad. Many new industries are coming up in the city. Pop. 12,51,119 (1961).

**Imphal :** north-east frontier town and capital of Manipur. It is celebrated for its Manipuri dance and handloom products. Pop. 67,717 (1961).

**Jabalpur :** in Madhya Pradesh ; fourteen miles from Jabalpur are Marble Rocks and Dhunva Dhar (water-falls) on the Narmada. Pop.: 3,67,014 (1961).

**Jaipur :** capital of Rajasthan State, is a well laid-out modern city. It is famous all over India for the beauty of its art and the skill of its artisans. Jaipur pottery, brass ware, sculpture, ivory and sandal-wood work and jewellery have enjoyed a great reputation from ancient times. Pop. 4,06,444 (1961). *Places worth a visit :* 1. Maharaja's Palace, 2. Jai Singh's Observatory, 3. Amber (ancient capital), 4. Hawa Mahal, 5. Palace Armoury, 6. Cenotaphs of the Queens, 7. Galta (place of pilgrimage) and Ghat, 8. School of Arts, 9. Public Library, 10. Transport Gardens, 11. Museum.

Jaipur is on the metre-gauge line of the Western Railway between Ahmedabad and Delhi

**Jamshedpur :** in Bihar, famous as India's 'steel town'. Pop. 3,28,044 (1961).

It had its beginnings 60 years ago when the Tata Iron & Steel Co. built their plant. Today besides the two-million ton steel plant there are many subsidiary units. Tata Locomotive Engineering Co. Ltd. manufactures metre gauge locomotives and boilers and Mercedes-Benz trucks and buses. The National Metallurgical Laboratory is also situated here. The town is well-laid out with modern amenities and welfare schemes.

**Jog Falls :** also known as Gersoppa Falls in Mysore State, are one of the highest waterfalls in the world. The river Sharavati takes a big leap down a steep rock from a height of 830 feet. The breadth of the stream here is 230 feet and in four separate cascades known as the Raja, Roarer, Rocket and La Dame Blanche, it takes a magnificent leap. The best time to see them is early December.

**Junagadh :** in Gujarat, is situated below the celebrated Girnar Hill and is one of the most ancient cities in India. The temples on the hill are noted for their architecture and delicate painting. On the way to Girnar is a rock with an Asoka edict. Pop. 74,298 (1961).

**In Junagadh is the famous Gir Forest—the only place in Asia where lions are found.**

**Kangra Valley :** famous for its picturesque landscapes and historic temples, lies in the Punjab. Semi-urban hill stations are Kangra and Dharamsala. *Places worth a visit in Dharamsala are* : 1. Bhagsunath Water Springs, 2. State Quarries, 3. Himalayan Snow View. The usual means of conveyance are cars and buses. There is also a dak bungalow at Dharamsala where visitors can stay. To get to the Kangra Valley a visitor has to change at Pathankot into the narrow-gauge railway which runs to Nagrota. Dharamsala can also be reached from Pathankot by car.

**Kanheri : near Bombay, is famous for its** Buddhist caves dating back to the 1st century A. D. It is about twenty miles from Bombay.

**Kashmir :** unsurpassed for the beauty of its mountains, lakes and valleys is a part of the State of Jammu and Kashmir, situated in the far north of India. Its capital Srinagar on the Jhelum is 5,000 ft. above sea-level and famous for its shawls and carpets and the exquisite beauty of its wood-work, rich embroidery and papier mache articles. Its fruits and vegetables are equally well-known. Well-furnished, luxurious house-boats moored along the winding Jehelum or in the Dal Lake provide all necessary comforts amidst gorgeous natural surroundings. The normal recreations include boating rides on the lakes and canals, mountain-climbing, big and small game hunting, golf, fishing and swimming. Gulmarg, Sonamarg and Pahalgam are favourite holiday resorts in the mountains and can be reached by motorable road. The way to Srinagar is via Pathankot, which is a railway terminus. From Pathankot one goes to Srinagar by road passing Jammu on the way. There is a regular air service from Delhi to Srinagar. *Places worth a visit :* 1. The Mogul Gardens, like *a.* Shalimar, *b.* Chashmashahi, *c.* Acchabal, *d.* Nishat. 2. The lakes like *a.* Dal Lake, *b.* Wular Lake, *c.* Anchar Lake, *d.* Mansabal Lake and so on. 3. Places of historical and religious interest like *a.* Martand temple, *b.* Pandrenthan temple, *c.* Bhumiyar caves, *d.* Avanti Pura, *e.* Pari Mahal and *f.* Sankaracharya Hill.

**Khajuraho :** in Chhattarpur in Madhya Pradesh, is famous for its group of highly ornate mediaeval Hindu temples. From the nearest railway station Harpalpur on the Jhansi-Manikpur line, it is about 90 miles by motorable road. It has dak bungalows and circuit house people.

**Kodaikanal :** famous hill station on the Palni Hills in Madras State. It is about 7,000 feet above sea-level and has a temperate climate. The average annual rainfall is 65 inches, the major part of the rain falling in September, November and December. The months of April, May and June constitute the 'season'. The town enjoys excellent water-supply and is also well-equipped with all the ordinary amenities of life. The place affords plenty of scope for such recreations as walking, hiking, boating, fishing, hill climbing and golf. Going on an excursion or picnic is yet another way of diverting oneself. For the more adventurous there is big game hunting. Kodaikanal is the delight of the gardener and flowers are in bloom all the year round. *Places worth a visit :* 1. the lake skirted by a three-mile road, 2. the water falls like *a.* Fairy Falls, *b.* Silver Cascades, *c.* Bear Shola Falls, *d.* Glen Falls, *e.* Pamber Falls ; 3. There are view points like *a.* Coaker's Walk, *b.* Pillar Rocks, *c.* Prospect Point, *d.* Vembadi Shola Peak, *e.* Dolphin's Nose ; 4. the Solar Observatory.

There are a number of boarding houses, and fully furnished flats can also be rented. Kodaikanal is reached from Kodaikanal Road railway junction on the Southern Railway via Tiruchirapalli. Kodaikanal town is 50 miles from the railway station and the journey can be done by car, taxi or bus on a very good motoring road. Pop. 12,860 (1961).

**Kolar Gold Fields :** in Mysore State. At present three mines are worked ; the Mysore (Oorgum), the Champion Reef and the Nundydroog Mines which are near one another. The entire mining and residential area is known as KGF (Kolar Gold Fields) and is a modern and self-contained unit with water supply, electricity and hospital facilities. The city comprises an area of over 30 sq. miles, and houses nearly 150,000 people. It is about 90 miles by road from Bangalore. The mines have reached a depth of about 12,000 ft. Pop. 2,46,511 (1961).

The gold fields are nationalized and worked by the Central Government.

**Konarak or Konark :** in Orissa, is a huge Temple of the Sun (also called the Black Pagoda). It is remarked by many as an example of ancient Indian architecture and sculpture and of engineering skill. A part of the temple is preserved but in the ruined state is huge figures and sculptures and life-sized pictures of horses and elephants and the friezes carved wheels at the basement. The Image of Aruna, the charioteer of the sun on a monolith on the road of the Puri Temple was removed from Konarak by the Marathas. Konarak is about 50 miles from Puri, an easy drive from Bhubaneshwar. The road is open from November to May.

* Population 1,51,105 (1961). † Including Meerut Cantt. ‡ Including Cantt. and Khamaria.

**Kotagiri :** A hill station on the Nilgiris higher than Coonoor, but lower than Ootacamund, is smaller and quieter than either. It is about 6,000 feet above sea-level and has a mean day temperature of 62°F. The town has electricity, a number of shops and boarding houses, a town board hospital and golf course. Kotagiri is reached from Coonoor or Ootacamund by car or bus. The roads are excellent and there is a regular bus service. Between Kotagiri and Ootacamund the road goes over Dodda-betta the highest peak (8,760 ft.) in the Nilgiri Hills (Madras State). Pop. 15,509 (1961).

**Kulu Valley :** well-known for the variety of its scenery, fruit orchards and places of historical interest is situated in the Punjab north of Simla. It is ideal for hiking and trout fishing. The important part of the valley from the tourist's point of view is the road which runs from Pathankot or Nagrota the rail-heads into the valley. A few miles beyond Pathankot the road passes through the rich cultivation of the Kangra Valley and the extensive tea gardens surrounding Palampur and Baijnath. The traveller has a view of the majestic snow-capped mountains of the Dhaula Dhar range standing out in bold relief against the sky-line. He also comes across the ancient temples of Baijnath. Beyond Aut after Mandi the valley opens out and the final stretch through the lovely Kulu Valley mainly along the left bank of the river Beas offers an entirely different type of scenic effect. The Kulu Valley is also called the 'Valley of the Gods' as in addition to several important deities like Raghunathji at Sultanpur and Jamlu of Malana every village has its own parmeshwar God. The best season is from March to May and September to November. The summer is never uncomfortably hot. The main centres of the Kulu Valley are : 1. Kulu or Sultanpur, the principal town, about 4,000 feet above sea-level. It is the main shopping centre and has a dak bungalow, and a number of rest-houses. 2. Ranson, 8 miles from Sultanpur and 4,700 feet above sea-level. The available sports are golf tennis and swimming. Mayflower and the Sharma are two hotels. 3. Katrain, is in the widest part of the Valley, 12 miles from Sultanpur and 4,800 feet above sea-level. 4. Naggar, summer headquarters, is 5,800 feet above sea-level. There is a departmental rest-house and a serai. 5. Manali, the head of the valley and terminus of the motor road, is 23 miles from Sultanpur and is situated amid typical Alpine scenery. Accommodation for visitors is available at Sunshine Orchards, Departmental rest houses and Mission Hospital. Except Manali, the road to which may be occasionally closed owing to snowfall the rest of the valley is open throughout the year. Pathankot is the rail-head for Kulu. From Pathankot Kulu is reached by bus or car or from Pathankot to Nagrota by metre-gauge railway and from there by bus to Kulu.

**Kumaon Hills :** in U.P. form part of the Himalayas and are known as the sportsman's paradise. Three important summer resorts are Almora, Nainital and Ranikhet. Most mountaineering parties establish their base at Ranikhet for ascent to the Pindari Glacier.

Tiger shooting is available in the Terai and Bhabhar Forests in the Kumaon region.

(See also 'Almora', 'Nainital', 'Ranikhet').

**Lansdowne :** in U.P. in Garhwal about half way between Mussoorie and Nainital. Pop. 6,381 (1961).

**Lonavla-Khandala :** in Maharashtra, lies in the heart of the Western Ghats. Hill forts associated with Maratha rule are in the vicinity. The Karla, Bhedsa and Bhaja caves, 10 miles from Lonavla, are an added attraction (see also under Poona District).

**Lucknow :** the city of gardens is the capital of U.P. It is full of places of historical interest and of architectural beauty and is generally regarded as the cultural capital of North India. It is well-known for its pottery, copper and brass-ware, wood and ivory carvings and gold and silver embroidery on cloth, and rich perfumes. Legend connects the founding of the city with Laxmana, the brother of Rama, the mythical hero of the Ramayana, and is sometimes called Laxmanpur. Pop. 595,440 (1961). *Places worth a visit :* 1. Great Imambara, 2. Small Imambara, 3. Tombs of Wajid Ali Shah and his Begum, 4. Kaiser Bagh Palace, 5. Chattar Manzil, 6. Dilkhusha Palace, 7. Moti Mahal, 8. Machi Bhavan Palace, 9. Jumma Masjid, 10. Charbagh, 11. Alambagh, 12. Sikander Bagh, 13. Musa Bagh, 14. Wingfield Park, 15. Residency, 16. Havelock's Tomb, 17. Clock Tower, 18 Museum, 19. Observatory, 20. Iron Bridge. Lucknow is a big junction on the Northern Railway.

**Madras :** the third largest city in the sub-continent and the capital of Madras State. It is the place where the English first settled to trade. Pop. 17,29,141 (1961 census). *Places worth a visit :* 1. Fort St. George (contains the oldest Protestant church in the country where Clive was married), 2. High Court, 3. Light House, from the top of which one can get a panoramic view of the city, 4. Marina. The Marina is one of the most beautiful promenades in the world ; sea-bathing is possible at certain points, 5. The Museum, 6. Connemara Library, 7. the Zoo, 8. the Observatory, 9. Moore Market, 10. Parthasarathy Temple, 11. Mylapore Tank and Kapaleshwar Temple, 12. St. George's Cathedral. 13. St. Thomas Mount, 14. Race Course, 15. The Integral Coach Factory at Perambur, where passenger coaches are made, 16. Adyar, where the headquarters of the Theosophical Society are located. There are two places round about Madras which are also worth a visit: 1. the ruins of the Gingee Fort famous in the days of the Vijayanagar Empire are about 95 miles from Madras and can be reached by rail and road. 2. the seven Pagodas of Mahabalipuram are 35 miles by road from Madras and can also be reached by road from Chingleput Railway Junction. Kalakshetra is a well-known institution for music, dance and drama at Adyar.

**Madurai :** the second biggest city in Madras State, is a great religious centre, containing as it does a number of famous temples. In the old days it was the capital of the Pandya kingdom and has always been a seat of Tamil literature and Hindu temple art. The silk-weaving and textile industries of Madurai are also noteworthy. *Places worth a visit :* 1. The Great Temples, actually made up of two temples one of Meenakshi and the other of Shiva. 2. Tirumala Nayak's Palace. 3. Gandhi Museum and Gandhigram. Pop. 4,24,810 (1961).

**Mahabaleshwar :** a hill station in Maharashtra, the season being April, May and October. It is 4,500 feet above sea-level and is noted for its bracing climate. It is also well-known for its fruit and vegetables, orchids and lilies which bloom in April and May. The chief recreations are hiking and driving in a car. Among the sports which are available are tennis, golf and polo. *Places worth a visit :* 1. The two Government Houses old and new. 2. Rose Garden and 3. The two temples of the river Krishna and Mahabaleshwar. Then there are a number of points from which magnificent views can be obtained, like Arthur Seat Point, Baghdad Point, Castle Rock, Carnac Point, Connaught Point, Falkland Point, Elphinstone Point, Margney and Lardwick Point and Bombay Point. Then there are the waterfalls like Chinaman's Waterfall, Dhobi Waterfall, Lingmala Waterfall and a lake called Venna Lake. The forts of historical interest, all connected with the name of the Maratha leader Shivaji are, Kamalgarh, Makrandgarh, Pandavgarh, Pratapgarh and Rairgarh. Near Pratapgarh are the Bhavani Temple and the tomb of Afzulkhan. All these places are accessible by road from Mahabaleshwar. Holiday camps have been started by the Maharashtra Government.

**Mahabaleshwar can be reached from Poona by road.**

**Murud :** Maharashtra's first sea-side holiday camp, set up by the State Dept. of Tourism, can be reached by sea in four hours from Bombay. By road it is 150 miles away.

**Mandu :** in Madhya Pradesh is one of the greatest mediaeval city sites in India with extensive remains including fortifications and palaces. Seventy-eight miles west of Mandu by road *vis* Dhar are Bagh caves adorned with fine old frescoes.

**Matheran :** the nearest hill station to Bombay is 2,650 feet above sea-level, and is famous for the magnificent views which it yields. The town looks on to the sea, and the coastal plain rises imperceptibly until it reaches the steep ascent of the Ghats. In a walk round the eighteen-mile circumference of the hill the visitor can reach no fewer than thirty-three points of which the following deserve mention : 1. Garbut Point, 2. Panorama Point, 3 Porcupine Point, 4. Louisa Point, 5. Chowk Point, 6. Alexandra Point, 7. Belvedere Point, 8. Echo Point. 9. Monkey Point. At every one of these points the visitor will find comfortable seats, shady trees and fine views. Among other places which are worth a visit are : 1. Charlotte Lake, 2. Paymaster Park, 3. Band-stand. 4. Castle Hill Tower, 5. Race Course. The chief recreations are walking and riding. Rickshaws, munchils and horses are the chief means of conveyance.

**Matheran is reached from Neral Station on the main railway line between Bombay and Poona. From Neral there is a light railway to Matheran which is about one-and-a-half-hour's journey. Alternatively one can do the journey by rickshaw or pony by previous engagement at Matheran.**

**Mathura-Brindavan :** in U.P. is an important place of pilgrimage for Hindus, because of its associations with Shri Krishna. Near the railway station is an archaeological museum which houses unique relics of Kushan art. Six miles from Mathura is Brindavan.

Brindavan is a holy place of Hindus. It is sacred because of its association with the birth and early life of Shri Krishna. *Places worth a visit :* 1. Govind Dev Temple, 2. Gopinath Temple, 3. Ranganath Mandir.

There are travellers' bungalows. Brindavan is accessible by railway or road from Mathura. Pop. 125,258 (1961).

**Mussoorie:** A hill station in U.P. lies 18 miles to the north of Dehra Dun. It is 6,590 feet above sea-level. The town has excellent water-supply, electric lighting system, hospitals, nursing homes and some of the best schools in India both for boys and girls. There are also plenty of sports and amusements. And like every Himalayan hill station one can obtain magnificent views of mountain tops and green river valleys. Hiking and going on excursion or picnic are among the main recreations. *Places worth a visit:* 1. The falls like *a.* Bhatta Falls, *b.* Kamptee Falls, *c.* Hearsay Falls, *d.* Mossy Falls, 2. Wimper's Tank, 3. Bandstand. Mussoorie is reached from Dehra Dun by car or bus and is about two hours' journey. Pop. 9,849 (1961).

**Mysore (State) :** commemorates the destruction of Mahishasur, the demon by Chamundi who is the tutelary goddess of the royal family of Mysore. Mysore is a picturesque land of forest and mountain presenting the most diversified and beautiful scenery. In the southern forests are found wild elephants for the capture of which khedda operations are undertaken from time to time. Tigers, leopards, bears and bisons are also numerous. *Places worth a visit in Mysore State :* 1. The Chenna Kesava Temple at Belur, 24 miles from Hassan. 2. Sivasamudram Falls on the Cavery River, 3. Hoysaleswara Temple at Halebid, 4. Gersoppa Falls also called the Jog Falls on the Sharavati River, the most famous beauty spot in Mysore. The falls are higher than Niagara, 5. Kolar Gold Fields, the biggest in India worked by electric power, 6. Nandidurg, a hill station near Bangalore, and the summer residence of Tippu Sultan, 7. Srirangapatnam of historical and religious interest as the capital of Tippu and as the city of many temples, 8. Shravanabelgola, the great Jain religious centre with the huge monolith Gomateshwara and of course the city of Bangalore and the town of Mysore.

**Mysore (City) :** second city in the State, is built in accordance with modern standards, and contains a number of beautiful public buildings. It attracts great crowds twice a year when the city wears a gala appearance. These two occasions are the Maharaja's birthday and the Dasarrah. *Places worth a visit :* 1. The palaces like the Maharaja's Palace, Jaganmohan Palace and so on, 2. Chamundi Hill, with the Bull and the Temple, 3. Zoological Gardens, 4. Silk Factory, 5. Sandalwood Factory, 6. Krishnarajasagar Dam and the Brindavan Gardens, among the most beautiful in the world, about 12 miles from Mysore. Mysore is one of the terminii of the Southern Railway. Pop. 2,53,865 (1961).

**Naini Tal:** hill station is about 6,350 feet above sea-level. Among the principal recreations are hiking, boating and yachting on the lake around which the town stands, and fishing and riding. One can also enjoy the Himalayan mountain scenery. *Places worth a visit :* 1. Cheena Peak, 2. Land's End, 3. Lariya Kanta Peak, 4. Sher-ka-Danda Peak, 5. Tiffin Top or Dorothy Seat, 6. Camel's Peak or Deopatta Peak. Naini Tal is 22 miles from Kathgodam railway station which is connected with Bareilly and Mathura. From Kathgodam one goes by bus or car to Naini Tal which is 22 miles away.

(See also 'Kumaon Hills' and 'Almora' and 'Ranikhet'). Pop. 14,995 (1961).

**Nalanda :** in Bihar, approachable from Patna by rail or motor, contains a group of ruined Buddhist temples and monasteries and a small local museum. It was the seat of an ancient Buddhist university.

**Nasik :** in Maharashtra and 117 miles from Bombay on the N.E. line of the Central Railway, is a place of pilgrimage for Hindus and is famous for Buddhist rock-cut temples of the first century B.C. and later. Pop. 1,31,103 (1961).

The golf links at near-by Deolali are an added attraction

**Ootacamund :** hill station in Madras State stands 7,500 feet above sea-level on the Nilgiris. It is sometimes called 'the queen of the hill stations.' One of the main features which distinguishes it from other hill stations is the number and length of motorable roads which go winding in and out of spacious parks or long stretches of turf studded with ornamental trees. The mean temperature for the year is 57°F ; during the winter the thermometer touches freezing point. Ootacamund is called the sportsman's paradise : plenty of fishing and big game shooting being available. There is also golf and tennis and during the season races and tournaments are held. *Places worth a visit :* 1. Botanical Gardens, 2. Race Course, 3. Assembly Room, 4. Dodda Betta, the highest peak in the Nilgiris, 5. Pykara Hydro-Electric Dam which is about 18 miles from Ootacamund. Ootacamund is the terminus of the Nilgiri mountain railway and 6. Kundah Hydro-electric Scheme which includes many lakes, dams and power houses. Pop. 50,140 (1961).

**Pachmarhi :** hill station, was summer capital of Madhya Pradesh, lies on the Mahadeo hills of the Satpura Range and is about 3,500 feet above sea-level. There are about 20 golf links in the town and plenty of game is also available in the Pipariya forest. *Places worth a visit :* 1. Bee Dam, 2. Mahadeo Caves, 3. Dhupgarh, highest point in the Satpuras, 4. Dorothy Deep Falls, 5. Duchess Falls, 6. Lansdowne Hill, 7. Nilphur springs, 8. Waters Meet, 9. Big Falls, 10. Pansy Pool, 11. Twipram Pool, 12. Saunder's Pool, 13. Pandava Caves. Pachmarhi is reached from Pipariya Station on the main Central Railway line from Bombay to Jabalpur. From Pipariya, Pachmarhi is 32 miles.

There are facilities for swimming, trekking and riding. Pop. 653 (1961).

**Padmanabhapuram :** in Kerala, is the ancient capital of the former Travancore State. *Places worth a visit :* Palace.

**Pahalgam* :** in Kashmir in the lap of the Lidder Valley is situated 60 miles from Srinagar and is famous for its camping sites, and as a base for the Amarnath Cave and Kolahoi glacier.

**Palitana :** in Saurashtra, is famous for its holy hill Shatrunjaya (see separate note) and its Jain temples. Pop. 24,581 (1961).

**Pandharpur :** town in Sholapur District in Maharashtra. It stands on the Bhima river and is one of the most frequented places of pilgrimage in Maharashtra. The centre of devotion is the temple dedicated to Vithoba, an incarnation of Vishnu. Fairs are held annually in honour of the God. Pop. 45,421 (1961).

**Patna :** capital of Bihar, stands on the site of the ancient city of Pataliputra. Pop. 3.63,700 (1961).

**Poona :** in Maharashtra and 120 miles from Bombay, has many historical buildings and one of the best race courses in India. *Places worth a visit are :* Shanwar Wada, the National Chemical Laboratory, the Defence Academy and the Central Water and Power Research Station at Khadakvasla. Pop. 7,21,896† (1961).

Other show-places near Poona are : Sinhagad and Purandar. The factory which manufactures antibiotics at Pimpri is worth a visit. See also Poona District.

**Porbandar :** in Gujarat, is the birthplace of Mahatma Gandhi and an attractive summer resort. Pop. 75,081 (1961).

**Prabhas Patan :** in Gujarat, is the site of the famous Somnath Temple, which was destroyed and rebuilt several times. Its last construction was begun in 1951.

**Puri :** (*Jagannath Puri*) *:* famous for the Jagannath Temple, is a coastal town in Orissa. The car festival when an image of Jagannath is taken in procession in a huge chariot drawn by ardent devotees (the proverbial Juggernaut) is an event of India-wide importance. The temple has a monolith pillar brought from Konarak Temple, in front and a 24-feet high stone wall all round. There are four entrances. The presiding deities are Krishna, Balaram and their sister Subhadra. Besides the Jagannath Temple other places worth a visit are the monastic establishments (maths). Fifty miles from Puri is Konarak, the Sun Temple. Pop. 60,815 (1961).

**Rameshwaram : This holy town in Madras State is built on an island in the Palk Straits. It contains one of India's most venerated temples, perhaps the finest example of South Indian architecture. It is in the form of a quadrangular enclosure 650 ft. by 1,000 ft. The temple is renowned for its vast pillared corridors nearly 4,000 ft. long.** Pop. 6,801 (1961).

It is near the tip of the Indian peninsula.

**Ranchi :** hill station and summer resort of Bihar, noted for its picturesque scenery and fine roads. Pop.‡ 1,40,253 (1961).

It is the site of heavy machine building plants.

**Ranikhet : is a hill station in U.P. on the Kumaon Hills. Most mountaineering parties establish their bases at Ranikhet.**

(See also 'Kumaon Hills', 'Almora' and 'Naini Tal').

**Sanchi :** small village near Bhopal in Madhya Pradesh, famous for the Budhhist stupa which is the largest and the best preserved in India. The stupa is built with sand stone and is about 103 feet in diameter and 42 feet high. The sculpture is remarkable in that there is no anthropomorphic figure of Buddha. The most striking features of the stupa are the four gates which are profusely carved with scenes from the Jataka stories. Sanchi is on the main Central Rly. near Bhopal. The museum maintained by the Archaeological department is worth a visit. There are a Travellers' Bungalow and Tourist Centre.

**Santiniketan :** in West Bengal, is the home of the famous Visva Bharati, the international university founded by Tagore. *Places worth a visit are :* Rabindra Bhavan (the poet's residence) where his personal belongings, manuscripts, etc. are on display and the poet's mud hut where he wrote many of his famous books. The place is 91 miles from Calcutta on the Eastern Railway and 2 miles from Bolpur Station.

**Sasaram :** in Bihar is known for the magnificent tomb of Sher Shah, Emperor of Delhi. Pop. 37,782 (1961).

**Seringapatam :** or Srirangapattana in Mysore State, 9 miles by road from Mysore city was the ancient capital of Tippu Sultan. It is situated on an island on the Kaveri. It has the Sultan's fort, mosque and palaces. There are also many old temples. Pop. 11,423 (1961).

**Sevagram :** near Wardha in Maharashtra is the village where Mahatma Gandhi founded his ashram. It has been the home of many Gandhian institutions.

**Shatrunjaya Hills.**—Shatrunjaya, near Palitana in Saurashtra, is also known to the Jains as Siddhagiri or Siddhachala or the Hill of the Perfected Ones. It is the most sacred place (*tirtha*) of Shvetambara Jains. There are a great number of temples in groups on *tonks* or summits. The most important one is the *tonk* of Adishvara Bhagavan. The ancient image, consecrated by the prophet's son, Ratubal, has been replaced. This is perhaps the most holy site within the most sacred precincts of the Shatrunjaya Hills. At this place a large number of saints are said to have attained *Nirvana*. A number of inscriptions have been found here, which have been utilised towards writing the history of Western India and the history of the different schools of Jainism.

**Shillong :** is the capital of the Assam Government. Thirty-six miles from here is Cherrapunji, the wettest place in the world. Pop. 72,438 (1961).

**Shivpuri :** also known as Sipri is in Madhya Pradesh, 72 miles from Gwalior. It is an interesting tourist resort with good hunting and boating possibilities. Pop. 28,681 (1961).

**Simla :** the former summer capital of the Government of India and the Government of the Punjab, it is situated on a spur of the Himalayas at a height of 7,200 feet. Among the recreations of the place are hiking, riding and shooting. The roads are excellent. *Places worth a visit :* 1. President's House, 2. Race Course, 3. Jakko Hill, 4. Observatory Hill, 5. Prospect Hill, and 6. Mashobra-Mahasu, seven miles away. There is a very good road into the interior and hikers to Narkanda, Kotgarh, Rampur and Bushahr can lodge in rest-houses that line the road. There is also a bus service on this road and holiday-makers who leave in the morning can be back in Simla by evening. The trek route to Kulu commences at Narkanda. Simla is also well provided with a number of excellent schools and hotels.

Simla is now the capital of Himachal Pradesh.

Simla is reached from Delhi via Kalka on the Delhi-Ambala line. From Kalka there is a narrow gauge railway upto Simla. At Kalka motor cars are available. Buses also run between Kalka and Simla. All through the scenery is superb, with mountain peaks or luxuriant foliage. Pop. 42,597 (1961).

**Somnath :** see under Prabhas Patan.

**Sravanabelgola :** in Mysore State, is noted for its Jain temples and the colossal statue of Gomatesvara which is 65 ft. high, the tallest monolithic in the world. It was erected in 983 A.D.

**Srirangam :** an island on the cauvery, two miles north of Tiruchirapalli (Trichinopoly), contains one of the largest temples in South India. The temple is consecrated to Ranganath (Vishnu) and contains a hall of 1,000 columns. Changes were made from the 9th to the 16th centuries and inscriptions of Chola, Pandya, Hoysasala and Vijayanagar kings are all found on it. The north gopuram is 152 feet high. Pop. 41,949 (1961).

**Tanjore :** in the delta of the Cauvery river in Madras State is noted for its temples and palaces. It was the capital of the Cholas under whom it grew in name and fame as a great

* Pop. 1,920 (1961).

† Including Poona Cantt. & Kirkee Cantt.

‡ Including Dorenda.

centre of art and culture. It remained so under the Maratha rulers who followed. *Places worth a visit :* 1. the temple of Brihadishvara built by Raja-Raja the great, 2. Naik's Court, 3. Maratha Court (the two together are often called the Palace in Tanjore).

Saraswati Mahal has a unique collection of manuscripts, Sanskrit, Marathi, Tamil, Telugu and Kannada. There are also paintings and books printed in English.

There are also good dak bungalows. Tanjore is reached from Madras by the Southern Railway. Pop. 1,11.099 (1961).

**Tiruchirapalli (Trichinopoly) :** the third largest city in Madras State is situated on the Cauvery. It is a very ancient city and was the strategic capital of the Chola and Naik kings. It is now a great educational centre. *Places worth a visit :* 1. the Rock temple 2. the two huge masses of granite known as the Golden Rock and Fakir Rock, 3. the Jambukeshwar Temple, two miles north of Trichinopoly dedicated to Appulinga or Siva. Pop. 2,49,862 (1961). See also Srirangam.

**Travancore :** (now constituent part of Kerala State) : the most beautiful and fertile region in all southern India, has many charms to offer the traveller within its domains. It has scenery ranging from a countryside of lakes, creeks and canals, to low hills, undulating land, rice fields and forests of cocoanut and areca palms, with a heavy undergrowth of pepper vines and tapioca.

It has also a wonderful highland zone with mountains touching heights of from 5,000 feet to over 8,000 feet, and hills covered with the densest of virgin forest, the home of great herds of wild elephants and bison, tiger, bear, black panther and wild boar, and where lies the lovely Periyar Lake over which one may cruise in comfort and see wild life in its natural habitat.

**Trivandrum :** the capital of Kerala, is accessible by well-kept roads and railway, and is also now connected by air with Bombay, Madras and Colombo.

*Places worth a visit :* 1. the Palaces, 2. Museum, 3. Picture Gallery, 4. Zoo, 5. Aquarium and 6. Padmanabha Temple.

North of Trivandrum is the ancient town of Quilon and to the north of this again, a pleasant trip by boat along delightful backwaters or by car along a good motor road, is the busy seaport of Alleppey.

About seven miles south of Trivandrum is Kovalam, a pleasant seaside resort with good facilities for bathing.

On the way to Cape Comorin from Trivandrum is Shuchindra Temple which should also be seen. Pop. 239,815 (1961).

**Udaipur :** in Rajasthan, is a city of lakes with island palaces. Seventy miles from Udaipur is Chittorgarh, the abandoned capital of Mewar, famous for its Tower of Victory. Pop. 1,11,139 (1961).

**Ujjain :** on the Sipra in Madhya Pradesh, is one of the seven cities sacred to the Hindus. Also known as Avanti. The Oriental Museum has many valuable manuscripts and pieces of sculpture. Is supposed to be the seat of King Vikrama. Mahakaleshwar temple is an attraction of pilgrimage. Pop. 1,44,161 (1961).

## NEW INDIA

The new India has its own show places, where much of the country's industrial life is centred. Most of them are connected with the Five Year Plan programme and are in the main a post-independence development. Some of these we give in the notes on the older towns above. Some other typical centres we give below :

**Anand :** town half way between Baroda and Ahmedabad, where the headquarters of the cooperative society producing milk, butter, cheese and baby food are located—Amul. The co-operative dairy, without keeping any cattle of its own is an up-to-date and modern unit with 40,000 farmers spread over an area of 1,300 square miles around it as members.

**Bailadia :** in Madhya Pradesh, is a rich iron ore deposit mine (public sector), capable of producing four million tons of ore (Fe. 60 per cent and more) per year. It is being developed with Japanese help for exporting ore to Japan. (App. cost Rs. 16 crores).

**Barauni :** Oil refinery in Bihar for processing crude oil into gasoline, turbine fuel, kerosene, diesel oil, furnace oil etc., being developed with USSR assistance. Full capacity in three stages, first two stages being complete already (capacity 2 million tonnes, App. cost Rs. 39 crores.) Also a Thermal Power Station.

**Batanagar :** an industrial town near Calcutta. The Bata Shoe Factory is located here.

**Bhadravati :** in Mysore State. The Mysore Government's iron and steel plant is located here. (See under 'Government Industrial Undertakings'.)

**Bhakra-Nangal :** twin-towns, which have grown recently round the huge Rs. 170 crore hydro-electric and irrigation project the biggest in the country, in which the waters of the Sutlej are controlled by dams, and diverted for irrigation and the generation of electric power. (See under 'Irrigation' for a longer note). A modern fertilizer factory was built and commissioned on Feb. 22, 1961 at Naya Nangal.

**Bhilai :** in Drug district of M.P., 176 miles from Nagpur on the Howrah line is the site of an integrated iron and steel plant, set up in the public sector with Russian help. (See 'Government Industrial Undertakings'.)

**Bokaro :** in Bihar, site of the Bokaro Steel (public sector) plant, (distinct from Bokaro thermal power station of the D.V.C.) being built with Soviet help. Bokaro Steel Ltd., as a new Co., was established in 1964.

**Burnpur and Kulti :** twin towns in which the Indian Iron and Steel Co. Ltd. has its works. Situated near Asansol on the border of West Bengal and Bihar, on the Grand Trunk Road, these works present an impressive view to the railway passengers by day or by night.

**Cambay :** a city of antiquity and an old international port in Gujarat. Today it has acquired importance again as the place—at Lunej—where oil and natural gas have been discovered. Drilling with foreign (Russian) technical help is in progress. (See article on 'Petroleum').

**Chandigarh :** Capital of Punjab was planned and built by Mons. Corbusier.

**Chandrapura :** Thermal power station of the D.V.C. (near Gomoh) 320 Km West of Calcutta, within easy reach of Dugda Coal Washery. Bokaro Steel Plant would be within 6–7 Km across the Damodar river. Three units of 125 MV, each to be set up, two already functioning.

**Chittaranjan :** near Asansol, on the border of Bihar and W. Bengal. The industrial colony came into being with the establishment of the broad gauge locomotive and boiler factory. (See also under 'Government Industrial Undertakings'.)

**Dalmianagar :** is situated on the west bank of the river Sone, 350 miles by rail from Calcutta. The Rohtas Industries Limited and Ashoka Cement Limited, manufacturers of cement paper, sugar, vanaspati, asbestos, cement sheets, etc., are located here providing employment direct and indirect to 60,000 persons.

**Durgapur :** in West Bengal, 100 miles from Calcutta, near Asansol is the site of an integrated iron and steel plant in the public sector, set up with British help. The Durgapur Coke Ovens plant run by the Government of West Bengal, the Durgapur Barrage, the canal system and thermal power house (of the D.V.C.) are also located in the vicinity. An optical glass unit is to be started nearby. Coal Mining Machinery Plant of Heavy Engineering Corpn. Ltd. ; a Technical Institution and Alloy Steel Plant are fast coming up.

**Dhuvaran :** In Gujarat, a thermal power station, using gas from Cambay region, with four turbo-alternators with 62·5 MW capacity each (App. cost Rs. 25 crores).

**Dugda :** Coal Washery (Hindusthan Steel Ltd.,) near Chandrapura Thermal power station (Bihar), capacity 1·8 million tonnes of washed coal, being expanded to 3·6 million tonnes.

**D. V. C. :** The Damodar Valley Corporation, looks after the big Rs. 182 crore multi-purpose project on the Damodar River in Bihar-Bengal. Tilaiya, Konar, Maithon and Panchet Hill are the sites of the four dams ; with hydel generating stations attached except at Konar and thermal stations at Bokaro, Chandrapura and Durgapur. There is an extensive canal system for irrigation attached to the storage lakes. (See also under 'Irrigation'.)

The D.V.C. area, roughly from Hazaribagh to Durgapur in east Bihar, contains the highest concentration of high-grade mineral wealth in the country—coal, iron ore, copper and mica. A host of industries have sprung up or are under construction : Sindri, Hindustan Cables, Chittaranjan, Durgapur Steel Plant, Coke Ovens project, the heavy machine building group of industries, the Kargali and Dugda coal washeries.

**Gandhigram :** about 25 miles from Madurai (South India) is a new colony formed to put Gandhian principles into actual practice in day-to-day life. The guiding principles are service and love. The accent is on hand-made products and the uplift of villages. Intensive training is imparted in many institutions here. A pilot health survey project covering over 70 villages in the neighbourhood has been undertaken with American aid.

**Gandhigram (Visakhapatnam) :** near Waltair in Andhra, is one of the major ports and the site of a ship-building yard. It can build four vessels per annum upto 15,000 tons each. (See under 'Government Industrial Undertakings'.) Also, the Caltex Oil Refinery.

**Gomia :** In Hazaribagh district, site of a high explosive factory, in private sector.

**Harike :** In Punjab, site of a barrage across the Sutlej, for two canal systems (*i*) Rajasthan Feeder (134 miles) and (*ii*) Rajasthan Canal, (291 miles). App. cost Rs. 66 crores.

**Hirakud :** the site of the Rs. 30-crore multi-purpose project across the River Mahanadi in Orissa to provide irrigation facilities and electric power. Power is being supplied to industries round about and to the Rourkela Iron and Steel Plant. (See also under 'Irrigation'.)

**Jetsar :** Near Suratgarh, in Rajasthan, site of another mechanised farm about 30,000 acres.

**Jwalamukhi :** in the Kangra Hills where gas has been discovered. Drilling is in progress with foreign (Rumanian) technical help. (See article on 'Petroleum'.)

**Kiriburu :** Iron ore mines, in the Bonai range of Keonjhar and Singhbhum districts (Orissa & Bihar), being developed with USA's ADF and Japanese help for exporting two million tonnes of ore annually.

**Kirloskarvadi :** In Sangli District, Maharashtra, is an industrial colony established over 50 years ago, where agricultural implements and a variety of engineering goods have been manufactured.

**K. G. F. :** The Kolar Gold Fields are a group of mining colonies in Mysore State managed by the Union Government.

**Korba:** in Madhya Pradesh is the site of a new coal mine and a thermal station for the M.P. Grid, from which the Bhilai Steel Project gets most of its power supply. Coal from Korba will also be used in Bhilai.

**Kosi :** The Rs. 45-crore multi-purpose project in Bihar for flood protection, irrigation and electric power. The barrage on the river is about 30 miles below Chatra in Nepal. (See under 'Irrigation'.)

**Koynanagar :** in Satara district, Maharashtra, is approachable by road (30 miles) from Karad station on the Southern Railway. Here the turbulent waters of the Koyna are controlled and diverted through an underground tunnel (project cost, first stage, Rs. 40 crores) on the other side of the hill for generating electricity in an underground power house. The whole area on the dam side with the staff colony, schools, hospitals and shopping centres, is known as Koynanagar.

**Mallapuram (Tungabhadra) :** in Bellary District in Mysore State is the site of the Rs. 60-crore Tungabhadra Dam, one of the greatest multi-purpose projects in the country. (See under 'Irrigation'.)

**Modinagar :** in Meerut District, near Delhi, is an industrial colony where vanaspati, textiles, sugar and many other articles are manufactured.

**Motipur :** one of a large number of villages in the U.P. terai in the districts of Bijnor, Pilibhit, Naini Tal and Rampur. These villages form the largest concentration of mechanized farms in the country, the best known of which is the State Government's Terai State Farm.

**Nagarjunasagar :** See under VIJAYAPURI.

**Naya Nangal :** see Bhakra Nangal.

**Nepanagar :** in M.P. on the Central Railway is the site of the only newsprint factory in India. (See also 'Government Industrial Undertakings'.)

**Neyveli :** in South Arcot District, in Madras State, about 150 miles from Madras, the site of lignite mines and centre of industrial development. The project produces electric power, fertilizer, raw lignite briquettes. (See under 'Government Industrial Undertakings'.)

**Pathratu :** In Hazaribagh district, a thermal power station, with 400 MV capacity, for industries round about Ranchi. (App. cost Rs. 40 crores.)

**Perambur :** a suburb of Madras where an integral railway coach factory is situated. (See under 'Government Industrial Undertakings'.)

**Pimpri :** near Poona, is the place where the Hindustan Antibiotics factory is located. It manufactures penicillin. (See also under 'Government Industrial Undertakings'.)

**Pipri :** in Mirzapur District in U.P. is the site of the Rs. 46-crore Rihand dam across the Rihand, whose waters are used for the generation of power. One of the biggest aluminium plants in the country is being built here. (See under 'Irrigation'.)

**Ramchandrapuram :** Near Hyderabad in Andhra Pradesh is the township for the Heavy Power Equipment Plant (under Bharat Heavy Electricals) being built with Czech help for manufacturing steam turbines and turbo-alternators. (App. cost Rs. 33 crores.)

**Ranipur :** Another unit of Bharat Heavy Electricals, near Hardwar (U.P.) developed with Soviet help for manufacturing steam turbines and generators.) (App. cost Rs. 68 crores).

**Renukoot :** In Mirzapur district (U.P.) township of the Hindusthan Aluminium Plant near Rihand dam.

**Rourkela:** in Orissa State, about 250 miles from Calcutta on the main line to Nagpur, is the site of an Iron and Steel Plant in the public sector set up with German help. In addition, a special fertilizer plant is also being erected here.

(See under 'Government Industrial Undertakings'.)

**Rupnarayanpur :** near Chittaranjan, is a small township for telephone cable manufacturing concern—the Hindusthan Cables Ltd. (See under 'Government Industrial Undertakings').

**Sindri :** the site of the big fertilizer plant in Bihar. (See under 'Government Industrial Undertakings'.)

**Suratgarh :** in Rajasthan is the largest single mechanised agricultural farm (30,000 acres) utilising complete set of machinery and equipment presented by U.S.S.R. It is administered by the Ministry of Food and Agriculture

**Tiruverumbur :** Near Trichy (Tiruchirapalli) high pressure boiler manufacturing Plant and township, under Bharat Heavy Electricals, developed with Czech help. (App. cost Rs. 25 crores)

**Vijayapuri (East & West) :** on either side of the Nagarjunasagar dam across the River Krishna in Andhra Pradesh (project cost Rs. 93 crores). 90 miles from Hyderabad are two new towns. Although planned mainly for irrigation, there will be a small hydel generating station. The canal system on the right and left banks is extensive and ingeniously constructed. (See under 'Irrigation'.)

On the site of Vijayapuri once stood the capital of the Ikshvaku Kings. The great Buddhist sage and philosopher Nagarjunacharya lived and taught here. It was a great centre of learning and the University was known as Nagarjunkonda. Extensive excavations have brought to light important pieces of sculpture, housed in a big museum nearby.

**Walchandnagar :** in Poona district, Maharashtra, can be reached either from Poona or from Bhigvan (Central Railway) railway station. It is an industrial colony, with extensive cane cultivation on mechanised scale, sugar and alcohol production, huge workshop for manufacturing sugar making machinery, plastic buttons and dairy products.

## HOTELS

Here is a list of Western style hotels and rest houses.

AGRA CANTT.
LAURIE'S HOTEL : Mahatma Gandhi Road.
CLARKS SHIRAZ ; IMPERIAL ; GRAND.

AHMEDABAD
CAMA HOTEL : Khanpur Road.
RITZ HOTEL : Lal Darwaza.

ALLAHABAD
BARNETT'S HOTEL : 14, Canning Road ; ROYAL HOTEL : 24, South Road, Civil Lines.

ALWAR
CIRCUIT HOUSE : SILISERH TOURISTS HOME.

ALWAYE
TOURIST BUNGALOW.

AMBALA CANTT.
CECIL HOTEL : 127, Staff Road ; PARRY'S HOTEL : 126, Staff Road.

AMRITSAR
No. 10, GUEST HOUSE : 10, Cantonment ; RITZ HOTEL : 45, The Mall ; HOTEL AIRLINES : Cooper Road.

AURANGABAD
AURANGABAD HOTEL : Aurangabad.

BANGALORE
TOURIST HOTEL : Race Course Road ; HOTEL BROADWAY : 12, Kempegowda Road ; LOBO'S HOTEL : Cubbon Road, Bangalore 1 ; MADRAS WOODLANDS HOTEL : 5, Sampangi Tank Road, Bangalore 1 ; SHILTON HOTEL : St. Mark's Road, Bangalore 1 ; WEST END HOTEL : High Grounds.

BELGAUM
HOTEL GREEN : 164, Camp.

BHOPAL
IMPERIAL SABRE ; PAGODA HOTEL.

BHUBANESHWAR
TOURIST BUNGALOW ; STATE GUEST HOUSE ; CIRCUIT HOUSE.

BIKANER
CIRCUIT HOUSE : Bikaner.

BODHGAYA
TOURIST BUNGALOW : Bodhgaya.

BOMBAY
AIR LINES HOTEL : Churchgate Reclamation ; AMBASSADOR HOTEL Churchgate Extension ; GRAND HOTEL : Ballard Estate ; GREEN'S HOTEL : Apollo Pier ; SEA GREEN HOTEL : Marine Drive ; TAJ MAHAL HOTEL : Apollo Pier ; RITZ HOTEL : Churchgate Reclamation, Fort ; SHALIMAR, Cumballa Hill ; SUN-N-SAND, Juhu ; WEST END HOTEL : 45, Marine Lines ; HOTEL WALDORF : 16, Arthur Bunder Road ; MIRABELLE HOTEL : 33A, Marine Lines ; HOTEL NATARAJ : Marine Drive ; HOTEL PARKWAY : 926, Ranade Road.

BUNDI
CIRCUIT HOUSE.

CALCUTTA
GREAT EASTERN HOTEL : 1-3, Old Court House Street ; HOTEL MINERVA : 11, Ganesh Chandra Avenue, Calcutta 13 ; OBEROI GRAND HOTEL : 15, Chowringhee, Calcutta 13 ; RUSSELL HOTEL : 12-B, Russell Street, Calcutta 16 ; SPENCES HOTEL : 4, Wellesley Place ; LYTTON HOTEL : 14, Sudder Street ; MAJESTIC HOTEL : 46, Maeter Street.

CALICUT
ALAKAPURI GUEST HOUSE : Calicut 2 ; BEACH HOTEL : Beach Road.
TOURIST BUNGALOW.

CANNANORE
TOURIST BUNGALOW.

CAPE COMORIN
CAPE HOUSE ; KERALA HOUSE TOURIST BUNGALOW.

CHANDIGARH
OBEROI MOUNT VIEW : Sector 10.

CHHATARPUR
CIRCUIT HOUSE, (M.P.).

COCHIN
MALABAR HOTEL : Willingdon Island, Cochin 3 ; SEA LORD HOTEL : Ernakulam ; GRAND HOTEL : Ernakulam ; INTERNATIONAL TOURIST HOME : Mahatma Gandhi Road ; TOURIST BUNGALOW : Bolghatty, Ernakulam.

COONOOR (Nilgiri Hills).
HAMPTON HOTEL ; RITZ HOTEL.

DARJEELING
BELLEVUE HOTEL ; OBEROI MOUNT EVEREST : Gandhi Road ; WINDAMERE HOTEL : Observatory Hill ; CENTRAL HOTEL : Robertson Road.

DEHRA DUN
HOTEL WHITE HOUSE : 15-A, Lytton Road.

DELHI
AIRLINES HOTEL : Opp. New Delhi Railway Station : ASHOKA HOTELS : Diplomatic Enclave, New Delhi ; CLARIDGE'S HOTEL : 12, Aurangzeb Road, New Delhi ; FLORA HOTEL : Dayanand Road, Daryaganj, New Delhi ; HOTEL AMBASSADOR : Sujan Singh Park, New Delhi ; HOTEL BROADWAY : Asaf Ali Road, New Delhi HOTEL IMPERIAL : Janpath, New Delhi ; HOTEL JANPATH : Janpath, New Delhi ; HOTEL MARINA : Connaught Circus, New Delhi ; NIRULA'S HOTEL : L-Block, Connaught Circus, New Delh ; OBEROI MAIDENS ; 7, Alipur Road, Delh 6 ; OBEROI SWISS : 2, Alipur Road, Delhi 6

DEOLALI
RUGBY HOTEL : 83, Rest Camp Road.

FARIDABAD (DELHI)
HOLIDAY INN.

GOPALPUR-ON-SEA
OBEROI PALM BEACH HOTEL : Gopalpur-on-Sea, Dist. Ganjam, Orissa.

GULMARG (Kashmir).
GOLF VIEW HOTEL ; NEDOU'S HOTEL.

GWALIOR
CIRCUIT HOUSE.

HYDERABAD
RITZ HOTEL : Hill Fort Palace ; ROCK CASTLE HOTEL : Jubilee Hills.

INDORE
INDORE HOTEL : G. P. O. Indore ; LANTERN HOTEL : North Tukoganj.

JABALPUR
JACKSON'S HOTEL : Civil Lines.

JAIPUR
JAI MAHAL PALACE HOTEL : Civil Lines ; KAISER-I-HIND : Near Railway Station ; KHETRI HOUSE ; RAJASTHAN STATE HOTEL ; RAMBAG PALACE.

KALIMPONG
HIMALAYAN HOTEL.

KANPUR
BERKELEY HOUSE : Civil Lines.

KHANDALA
KHANDALA HOTEL.

KHAJURAHO
CIRCUIT HOUSE, (M. P.) ; TOURIST BUNGALOW.

KODAIKANAL
CARLTON HOTEL : Lake Road; HOLIDAY HOME : Golf Links Road.

KONARAK
TOURIST BUNGALOW.

KOTAH
CIRCUIT HOUSE.

KOTTAYAM
HOTEL AMBASSADOR : K. K. Road ; TOURIST BUNGALOW.

KUSHINAGAR
TOURIST BUNGALOW.

LUCKNOW
CAPOORS HOTEL : 52, The Mall; CARLTON HOTEL, LTD., Shahnajaf Road.

MADRAS
AIRLINES HOTELS : 177-179, Mount Road; CONNEMARA HOTEL : Mount Road ; HOTEL DASAPRAKASH : 50, Poonamallee High Road; HOTEL OCEANIC : 29, San Thome High Road; WOODLANDS HOTEL : 1/23, Edward Elliots Road, Mylapore ; ASHOKA HOTEL ; SAVOY HOTEL : 39, Mount Road.

MAHABALESHWAR
FREDERICK HOTEL ; RACE VIEW HOTEL.

MANALI (Kulu-Punjab)
SUNSHINE ORCHARDS GUEST HOUSE ; TOURIST BUNGALOW.

MANDU
TOURIST BUNGALOW ; ARCHAEOLOGICAL REST HOUSE.

MATHERAN
LORD'S CENTRAL HOTEL.

MOUNT ABU
MOUNT HOTEL : Dilwara Road; PALACE HOTEL.

MUNNAR
TOURIST BUNGALOW.

MUSSOORIE
HAKMAN'S GRAND HOTEL ; SAVOY HOTEL; HOTEL ROAN OKE ; LIBRARY CLUB HOTEL.

MYSORE
HOTEL KRISHNARAJASAGAR ; HOTEL METROPOLE : Viceroy Road ; HOTEL RITZ : Bangalore-Nilgiri Road.

NAGPUR
CIRCUIT HOUSE.

NAINI TAL
GRAND HOTEL : The Mall ; HOTEL METROPOLE ROYAL HOTEL : The Mall ; WALDORF HOTEL; BELVEDERE HOTEL ; SWISS HOTEL.

OOTACAMUND
HOTEL CECIL ; SAVOY HOTEL.

PACHMARHI
HOTEL BLOCK (PACHMARHI HOTEL); NEW PACHMARHI HOTEL.

PAHALGAM (Kashmir).
PINE VIEW HOTEL.

PANJIM (GOA)
HOTEL MANDOVI

PATNA
PALACE HOTEL : Gandhi Maidan ; HOTEL REPUBLIC ; Lawly's Building, Exhibition Road.

PEERMADE (Kerala).
HOTEL INTERNATIONAL ; TOURIST BUNGALOW.

POONA
NAPIER HOTEL : 10, Moledina Road ; POONA HOTEL ; WELLESLEY HOTEL : 12-A, Connaught Road.

PURI
SOUTH EASTERN RAILWAY HOTEL, TOURIST BUNGALOW.

QUILON
TOURIST BUNGALOW.

RANCHI
SOUTH EASTERN RAILWAY HOTEL.

SANCHI
TOURIST BUNGALOW.

SECUNDERABAD
PERCY'S HOTEL : Sardar Patel Road.

SHILLONG
PINEWOOD HOTEL.

SIMLA
OBEROI CECIL : The Mall.
OBEROI CLARKE'S : The Mall.

SRINAGAR
NEDOU'S HOTEL ; OBEROI PALACE HOTEL.

THEKADY (Kerala)
ARANYA NIVAS, THEKADY ; TOURIST BUNGALOW : Edapalayam.

TRICHUR
TOURIST BUNGALOW.

TRIVANDRUM
MASCOT HOTEL ; HOTEL MAGNET.

UDAIPUR
ANAND BHAWAN, CIRCUIT HOUSE ; LAXMI VILAS PALACE HOTEL ; LAKE PALACE HOTEL.

VARANASI (BANARAS).
CLARK'S HOTEL : The Mall ; HOTEL DE PARIS : 5, The Mall.

## TOURIST TRAFFIC

There was an average increase of 11·3 per cent over the 1963 figures in the arrival of foreign tourists to India during 1964.

The number of tourists was 156,673.

This excludes 293,530 Pakistanis who visited the country on short visits.

Of the total number, 68·9 per cent came from the Americas, Europe and Australia and belonged to the high-spending category of tourists. From neighbouring regions of Africa, West Asia and East Asia came 48,695 tourists.

Of the tourists, 62·3 per cent (97,587) were males and 33·8 per cent (52,927) females.

More than 40 per cent of the tourists were in the age group of 30 to 50 and 27·8 per cent were above 50. Children formed more than eight per cent.

On an average, 428 tourists arrived every day.

The foreign exchange earned during 1964 was Rs. 26 crores.

### DEVELOPMENT OF TOURISM— THIRD PLAN

The Third Plan for development of tourism includes an allocation of Rs. 8 crores—Rs. 3·5 crores in the Central Sector and Rs. 4·5 crores in the State Sector. Out of the Rs. 3·50 crores in the Central Sector, Rs. 2·92 crores are earmarked for provision of facilities for foreign tourists and the remaining Rs. 0·58 crores for grant of subsidies to the State Governments for provision of facilities for home tourists. The Rs. 4·5 crores in the State Sector are for provision of facilities by the State Governments for home tourists.

The setting up of one or more undertakings in the public sector to handle activities of a commercial character connected with the promotion of tourism, which was one of the recommendations of the Jha Committee, has been accepted by the Government of India (March 1964).

The report of the Committee contained over a hundred recommendations for ensuring better facilities for tourists by way of hotels, transportation, publicity material, entertainment, speedy confirmation of air reservations, opening more tourist offices overseas and a policy of concentration of resources to develop selected tourist centres on an integrated basis.

The Government of India has set up two corporations in the public sector for promoting tourism and providing facilities for tourist traffic in the country. For more details about the corporations see article on "All India Corporations".

**Fourth Plan :** A sum of Rs. 25 crores has been tentatively allocated for the development of tourism in the Fourth Plan. Of this Rs. 5 crores have been set apart for the recently set up India Tourism Hotel Corporation and the India Tourism Corporation. It is proposed to concentrate on area development which is now a recognised feature of tourism planning in countries like Spain, Italy, Greece and Yugoslavia.

### INDIA'S REGIONAL BALANCE OF PAYMENTS ON CURRENT ACCOUNT

**Item : Travel** (Crores of Rupees).

| Region | 1961–62 (Final) | | | 1962–63 (Revised) | | | 1963-64 (Preliminary) | | | April-Sept. 1964 (Preliminary) | | |

*Note :* Data for receipts for the quarter January–March 1963 and thereafter are incomplete.

* Hitherto known as O.E.E.C. Countries.

# U. N. AID TO INDIA

INDIA participates in the development programmes of the United Nations family both as a contributor and recipient of aid. UN aid is provided to Governments on request, under programmes of technical co-operation which fall into three main categories:

(1) The Expanded Programme of Technical Assistance (EPTA);

(2) The UN Special Fund;

(3) Assistance under the regular programmes of activities of the UN and the individual specialized agencies.

India has received aid under each of these categories. EPTA and Special Fund programmes are financed by voluntary contributions from member governments. In 1964, India contributed $850,000 to EPTA and $2,150,000 to the Special Fund. The regular programmes are financed by the regular budgets of each agency to which all member governments contribute under assessments fixed by the assemblies of these bodies.

## THE EXPANDED PROGRAMME

The Expanded Programme of Technical Assistance (EPTA) combines the assistance activities of the UN itself and nine participating agencies: International Atomic Energy Agency (IAEA), International Labour Organization (ILO), Food and Agriculture Organization (FAO), United Nations Educational, Scientific and Cultural Organization (UNESCO), International Civil Aviation Organization (ICAO), World Health Organization (WHO), International Telecommunication Union (ITU), World Meteorological Organization (WMO), and Universal Postal Union (UPU).

Aid furnished to India in 1964 under the Expanded Programme was to a total value of $2,909,008. It covered the provision of 151 international experts in various fields, 109 fellowships for Indian nationals to study and train abroad, and more than $1 million worth of equipment.

Illustrating the two-way nature of the UN technical co-operation programme is the fact that, also in 1964, Indian nationals numbering 166 served as EPTA experts in other countries, and India was host to 118 UN fellowship holders from outside.

Assistance projects under EPTA are being carried out in India in the following fields:

**United Nations (Technical Assistance Operations)**

Fertiliser manufacture; D.D.T. and penicillin manufacture; raw materials substitution to save foreign exchange; training in water resources development; petroleum geology; port development and lighthouse engineering; statistics, town planning and techno-economic surveys.

**IAEA (International Atomic Energy Agency)**

Training programme in prospecting, mining and processing of nuclear raw materials.

**ILO (International Labour Organization)**

Labour conditions; social security; employment information and safety in mines; productivity and management.

**FAO (Food and Agriculture Organization)**

Dairy production, dairy engineering, dairy plant management, dairy technology, dairy economics and dairy training; poulty development; pork technology; manufacture of egg powder and egg pulp; improved animal husbandry methods, animal climatology, animal vaccine production and disease control, grassland management, hides and skins; fish harbour development, fish processing, power fishing, mechanization and design of fishing craft, reservoir fishing; physical oceanography; river pollution; land use and water management, forestry development, plywood research; improvement of plant protection measures, mushroom cultivation, plant nematodes, pesticide analysis and residue limits in food; nutrition; establishment of a catering college and home economics education programme; crop insurance; horticulture.

**UNESCO (United Nations Educational, Scientific and Cultural Organization)**

Development of advanced centres of university studies in physics, botany, chemistry and geophysics, and post-graduate studies in engineering. Assistance to the Indian Institute of Technology, Bombay (in thermo-dynamics, liquid fuel technology, physical metallurgy, wood and cellulose chemistry, machine building, etc.); assistance to Madras University (Chemical engineering, fluid mechanics, etc.). Other fields of UNESCO assistance include: Scientific documentation, research on desert problems, development of science teaching and apparatus, and assistance to the Education Commission's survey of educational objectives.

**ICAO (International Civil Aviation Organization)**

Pilot training; radar control; air traffic control and airport costing.

**WHO (World Health Organization)**

Control of communicable diseases, particularly malaria, tuberculosis, smallpox, trachoma and leprosy; education and training of public health personnel, planning and strengthening of health services, especially in rural areas; maternal and child health; environmental sanitation and water supply.

**ITU (International Telecommunication Union)**

Inter-city dialling, and V.M.F./V.H.F. techniques.

**WMO (World Meteorological Organization)**

Training programme in Meteorology.

## THE SPECIAL FUND

In 1964, the UN Special Fund was assisting 27 development projects in India involving an overall expenditure of some $99 million over a period of five years. Of this amount, the Government of India was to provide $73 million and the Special Fund $26 million. The 27 projects receiving Special Fund assistance were: Industrial Instructor Training Institute, Calcutta, Regional Labour Institutes at Calcutta, Madras and Kanpur, Central Mechanical Engineering Research Institute, Durgapur, Central Public Health Engineering Research Institute, Nagpur, Power Engineering Research Organization, Bhopal and Bangalore, Fisheries Training Institute, Bombay, Central Mining Research Station, Dhanbad, Survey of Potential Hydropower Sites, Survey of Water Supply Resources of Greater Calcutta, Central Scientific Instruments Organization, New Delhi, Cavitation Research Centre, Poona, National Aeronautical Laboratory, Bangalore, Vocational Training Scheme for Industrial Trades including a Central Instructors Training Institute in Kanpur, Central Instructor Training Institute, Madras, Institute for Petroleum Exploration, Dehra Dun, National Institute for Training in Industrial Engineering, Bombay, Central Instructor Training Institute, Hyderabad, Central Sheep and Wool Institute, Rajasthan, Central Instructor Training Institute, Ludhiana, Institute of Tropical Meteorology, Poona and International Meteorological Centre, Bombay, Pre-Investment Study of Forest Resources, Teacher Training for Engineering Colleges, Warangal, Assistance to Six Regional Engineering Colleges, Assistance to the Survey of India for Pre-Investment Surveying and Mapping, Establishment of Four Logging Training Centres, Centre for Research and Training on the use of Satellite Communications, Ahmedabad, Refining and Petrochemical Division, Indian Institute of Petroleum, Dehra Dun.

## AID UNDER REGULAR PROGRAMMES

**United Nations:**

Under its Regular Programme of Technical Assistance (financed under the regular United Nations budget) the United Nations has given India advisory services and help on the social and economic aspects of housing, transport economics, evaluation of community development and the rehabilitation of the handicapped.

### ILO

The ILO has two projects in its regular programme of technical assistance. The first of these is for vocational training of the blind and the second concerns the utilization of rural man power much of which is currently under-employed.

### FAO

FAO has carried out regular programmes of technical assistance in the field of agricultural production, marketing and conservation, including plant and animal disease control, agricultural research and nutrition. The FAO and UNICEF are taking part in the development of India's $25 million applied Nutrition Programme and also in the $82 million milk conservation programme. UNICEF is contributing $17 million toward these schemes, a large part of which consists of funds from FAO's Freedom From Hunger Campaign.

FAO also organizes seminars, exchanges information and advises and helps in spheres such as land reform and agricultural legislation.

### UNESCO

UNESCO gives assistance to educational and research centres such as the Regional Centre for Educational Planners in New Delhi, Indian Ocean Biological Centre, and the UNESCO Research Centre on Social and Economic Development in Southern Asia. The East-West and the Reading Materials projects are designed to promote better understanding between nations through the exchange and provision of fellowships and literature. In addition, UNESCO organizes seminars, symposia and short training courses on subjects such as soil biology, adult education and literacy, arid zone, oceanography, hydraulic engineering and geology.

### WHO

The World Health Organization has an extensive programme of assistance under its regular budget. This includes: communicable disease control (malaria, tuberculosis, small-pox, trachoma, leprosy etc.); education and training of public health personnel; maternal and child health services; strengthening of rural health services as part of community development; environmental sanitation; community water supply, assistance to the Indian Council of Medical Research; medical rehabilitation; industrial and occupational health; health education.

### UNICEF

Basic health including community development; disease control; school and pre-school feeding; nutrition education, milk conservation; pediatrics training; relief and emergency supplies. The total value of approved UNICEF assistance from May 1949 to June 1964 was $42,800,700.

**The World Food Programme**

Projects for increase in milk production in Anand, Gujarat State; intensive egg and poultry production and marketing schemes in Uttar Pradesh; construction and renovation of bunds and tanks in Uttar Pradesh.

Value of total approved WFP assistance upto June 1964: $1,514,200.

**International Bank for Reconstruction and Development**

The total value of loans provided to India by the World Bank was $876·11 million at the end of June 1964, consisting of 13 loans to the railways, five for power projects, five to ICICI for promoting industry, four to steel mills, two for coal mining and one each for agriculture and multi-purpose projects.

**International Development Association**

A loan of $432 million was provided to India by IDA between 1961 and June 1964 for 13 development projects. During 1963 and up to July 1964 the following eight projects received sanction:

Purna Project; Koyna Project; Port of Bombay; Indian Posts and Telegraphs Department; Indian Railways; Kothaguden Project; Industrial Imports and Telecommunications in India.

**International Finance Corporation**

Assistance was rendered by the IFC to the following nine projects up to the end of June 1964 for operational investments and standby and underwriting commitments by IFC:

Republic Forge Company Ltd.; KSB Pumps Ltd.; Kirloskar Oil Engines Ltd.; Assam Sillimanite Ltd.; Precision Bearing of India Ltd.; Port Glester Industries; Mahindra Ugine Steel Co. Ltd.; Lakshmi Machine Works Ltd.

Operational investments in all these totalled $11,524,000.

**India's Support for UN Aid Programmes**

With contributions to Global Operating Costs:

| | (Figures given in US Dollars) |
|---|---|
| Pledges made to: | |
| Expanded Programme (1964) .. | 850,000 |
| Special Fund (1964) .. .. | 2,150,000 |
| World Food Programme (1963-65) | 500,000 |
| Subscriptions to World Bank and its affiliates: | |
| World Bank (IBRD) .. .. | 800,000 |
| International Development Association (IDA) .. .. | 40,350,000 |
| International Finance Corporation (IFC) .. .. .. | 4,431,000 |

*Note:* The major part of contributions is in Rupees.

# COLOMBO PLAN

(See also under Foreign Aid)

COLOMBO Plan Bureau, P.O. Box No. 596, Colombo.

*Director:* J. L. Allen (Australia); *Information Officer:* F. D. Douglas (Pakistan); *Adviser on Inter-Regional Training:* B. R. Rao (India); *Assistant Information Officer:* L. P. Goonetilleke (Ceylon).

Plan period: 1951-71.

The Colombo Plan (for Co-operative Economic Development in South and South-East Asia) was conceived at a meeting of the Foreign Ministers of the Commonwealth held in Colombo in January 1950.

Over the years, the membership of the Colombo Plan has grown to 22; 16 countries within South and South-East Asia and six countries outside it.

The 16 countries within the area are Afghanistan, Bhutan, Burma, Cambodia, Ceylon, India, Indonesia, South Korea, Laos, Malaysia, Maldive Islands, Nepal, Pakistan, the Phillippines, Thailand and Viet-Nam.

The six countries outside the area are Australia, Britain, Canada, Japan, New Zealand and the United States.

Nearly one-fourth of mankind lives in the area covered by the activities of the Plan. The total population of the countries of the area is estimated to have increased from 624 million in 1950 to nearly 820 million in 1963.

*The Colombo Plan* is an international programme which is bi-lateral in operation even though it is multi-lateral in approach. It is bilateral in operation even though it is multi-lateral in approach because negotiations for assistance are made, not through any international agency, but direct between the donor and the receiving country. This procedure allows complete flexibility of action without interference from a third party and in actual practice it has resulted in considerable smoothness in operation.

The multi-lateral approach of the Colombo Plan is ensured through the deliberations of the Colombo Plan Consultative Committee and the Colombo Plan Council for Technical Cooperation in South and South-East Asia, which constitute the Colombo Plan Organization.

The Consultative Committee which is the highest deliberative body of the Colombo Plan and which meets once a year in one of the member countries takes note of the progress of the Plan and the role which external assistance plays in the development of the area and makes recommendations on the problems that arise in the implementation of development programmes. The Colombo Plan Council, located at Colombo, supervises the operation of the Colombo Plan Technical Co-operation Scheme and the dissemination of information on the Colombo Plan. The Executive arm of the Council in carrying out these purposes is the Colombo Plan Bureau, situated in Colombo.

Assistance has been given primarily in three forms—financial assistance and equipment for development projects; food and other commodity assistance as contribution towards economic stability and growth; and technical assistance to increase the number and range of skills and strengthen the economic and social institutions. The major part of the assistance under the Colombo Plan has come from member countries from outside the area. Internally, in the area, mutual assistance has progressively increased in recent years.

## EXTERNAL ASSISTANCE

The total of aid provided by donor countries under the Colombo Plan since its inception has been almost $14,864 million, including technical assistance, loans and grants, provision of agricultural commodities and supply of equipment. The value of such aid contributed in 1963–64 was about $2,165 million.

By far the greater part of the assistance under Colombo Plan comes from the six member countries outside the area — Australia, Britain, Canada, Japan, New Zealand and the United States. Brief details of some of the major items of capital aid and technical assistance given by these countries upto 1963–64 as recorded in the Thirteenth Annual Report of the Colombo Plan Consultative Committee are as follows:—

**AUSTRALIA:** During the year 1963–64, Australia's expenditure on capital aid and technical assistance under the Colombo Plan amounted to £A 4,982,280 bringing the total Australian contribution since the beginning of the Colombo Plan to £A 53,425,067. The arrival of another 573 Colombo Plan students in Australia during 1963–64 brought the total number of Australian training awards to 5,197.

In 1963–64, 576 awards were granted under the correspondence scholarship scheme, inaugurated by Australia in 1955, which brought the total number of awards to 3,799. The cost of the training programme to 30 June, 1964, was £A 8,399,000, including about £A 1,159,000 last year.

On 30 June, 1964, 61 Australian experts were in the field, bringing the total of Australian experts and advisers since the beginning of the Colombo Plan to 831.

Australian expenditure on technical equipment during the year was £A 697,497 which brought the total since the inception of the Colombo Plan to £A 3,091,497 and the number of projects implemented, or in the process of being met, to some 361 in 14 countries.

Expenditure of £A 2,686,000 on capital aid during 1963–64 brought Australia's contribution in this field to £A 38,477,000 spread over 135 projects in 14 countries. In addition to the above, Australia has contributed aid to the Colombo Plan area through the Indus Basin Development Fund (£A 3,000,000), Commonwealth Co-operation in Education and the Australian International Award Scheme. Australia has also given technical assistance to the Mekong Committee to the extent of £235,000.

**BRITAIN:** During the year 1963–64, the British Government spent £47·22 million on capital aid and technical assistance for development in South and South-East Asia, bringing the total of such expenditure since the beginning of the Colombo Plan in 1951 to £294·4 million. Additional commitments of the Government at 30 June, 1964, amounted to £150 million, including Britain's £12 million contribution to the Indus Basin Development Fund, which will be paid over the period up to 1971–72.

During the year ended 30 June, 1964, the British Government spent £44·97 million on capital aid, bringing the total of such expenditure since 1951 to £281·98 million. Additional capital aid commitments at 30 June, 1964 amounted to £148 million. British companies and private investors continued to be active within the Colombo Plan area. The total of British private investment in the area in 1963 is estimated to have been £33 million.

During the year ended 30 June, 1964, the British Government expenditure on technical assistance totalled £1·881 million, bringing the total of such expenditure since 1951 to £12·388 million. Commitments at 30 June 1964 totalled £2·77 million; on 30 June 1964, there were 713 Asian students in Britain undergoing training, bringing the number who have received instruction in Britain under the Colombo Plan since 1951 to 5,659; during the year ended 30 June, 1964, 86 experts were provided compared with 59 in the previous year, bringing the total provided since 1951 to 617. Equipment for

training and research was provided during 1964 to the value of £285,396 bringing the amount spent since 1951 to a total of £3,057,755.

Out of the total of £130,000 of aid promised by Britain for the Mekong project, £69,000 had been spent by the end of June, 1963. During 1963–64 the British Government spent £·97 million from the grant of £20·8 million which it has agreed to subscribe to the Indus Basin Development Fund over the period from 1960 to 1972.

In addition, Britain has provided education assistance to the region through the Commonwealth Scholarship and Fellowship Plan and the Commonwealth Teacher Training Bursary Scheme. An important contribution to Britain's technical co-operation in South and South-East Asia is made by the British Council, a non-Government agency, which does educational work, the cost of which is not included in the figures of aid expenditure given above.

**CANADA :** To the end of the fiscal year 1963–64 Canada has made available a total of $464·7 million for capital and technical assistance to member countries of the Colombo Plan, all in the form of grants, requiring no repayment of principal or interest. The amount made available during 1964 was $41·5 million.

Of the $464·7 million, approximately 48 per cent has been allocated for capital assistance, mainly in the form of construction projects (chiefly power stations, transmission lines, ground and aerial surveys, roads, bridges and harbours). Non-project items such as locomotives, transport vehicles and industrial and agricultural equipment as well as surveys and feasibility studies requiring little or no equipment are likewise included under capital assistance.

Commodity assistance accounted for about the same proportion of Colombo Plan allocation as capital assistance—*i.e.* about 48 per cent. Canadian commodity assistance has been concentrated in the larger countries of the area, mainly India and Pakistan.

Although technical assistance accounts for only slightly under 4 per cent of Canadian Colombo Plan aid, it is a very important aspect of the Canadian programme. Canadian technical assistance expenditure to 31 March 1964 was $17·2 million. A total of 2,547 trainees have been brought to Canada from Colombo Plan countries to the end of the last fiscal year and a total of 301 advisers and teachers have been sent to the region.

In addition to its Colombo Plan contribution as such, Canada has provided since 1951, to certain member countries loans and grants totalling $115 million for purchase of wheat and flour. Since 1961–62 Canada has also pledged under World Bank consortium arrangements, special long-term credits for use by India and Pakistan. To the end of 1963–64 long-term credits totalling $37·5 million had been pledged for India and $22·5 million for Pakistan. Canada has also financed studies in Canada for students from Commonwealth countries under the Commonwealth Scholarship Plan. An aerial survey of the Lower Mekong river, costing $1·3 million was completed in 1962–63.

**JAPAN :** Since her participation in the Colombo Plan in 1954, Japan's contributions to the Colombo Plan countries have steadily increased year by year. During the period between fiscal years 1954–55 and 1964 inclusive, budgetary appropriations for technical assistance to the Colombo Plan region have totalled 3,835 million yen.

During this period Japan sent 704 experts (including 92 for technical co-operation centres) to Colombo Plan countries and received 1,525 trainees for training in Japan. In addition, 1,397 participants from Colombo Plan countries came to Japan under the Japan-United States Third Country Training Programme. On June 30, 1964, the actual disbursements since 1956 under Japan's economic assistance to Colombo Plan countries amounted to 81,445 million yen and the outstanding balance of commitments to 126,060 million yen, including grants under the Agreements for Economic and Technical Co-operation with Cambodia and Laos and loans and lines of credit supplied to India, Indonesia, Pakistan, the Philippines and Viet-Nam under inter-governmental agreements.

During the period from 1 July 1963 to 30 June 1964, Japan provided the services of 109 experts. Japan's total expenditure on the Mekong River Development project amounted to 360 million yen.

Expenditure on experts and trainees during 1963–64 amounted to 721 million yen. In addition, Japan contributed assistance to the region through the Japanese Government scholarship programme (85 million yen for 1964), private technical co-operation by semi-governmental agencies and through private organisations mainly in the form of training awards.

**Private Investment :** The outstanding balance of Japanese private investment in the area as of 30 June 1964, amounted to 30,810 million yen, while payments made under reparations agreements for development in the Colombo Plan area amounted to 173,465 million yen, in Burma, Philippines, Indonesia and Viet Nam.

**NEW ZEALAND :** New Zealand has made available, up to 31 March 1964, a total amount of £13,146,142 for capital and technical assistance under the Colombo Plan. A further £1,000,000 has been appropriated for 1964-65.

During the year ended 30 June 1964, New Zealand's expenditure on capital aid and technical assistance amounted to £1,044,015 which brought the total expenditure on Colombo Plan activity since 1951 to £10,957,025.

The expenditure of £334,617 during 1963–64 brought the total of New Zealand's contribution in the form of capital equipment and cash grants to £7,511,434. This amount includes New Zealand's contribution to the Mekong River Survey and to the Indus Basin Development Fund. Most of New Zealand's capital aid has taken the form of direct transfers of overseas funds.

New Zealand's technical assistance expenditure during the year amounted to £709,398 bringing the total expenditure since 1951 to £3,445,591.

The arrival in New Zealand during 1963–64 of another 200 students brought the total number of New Zealand training awards to 1,488. At the end of June 1964 there were 460 Colombo Plan fellows and students studying in New Zealand.

During 1963–64, 16 New Zealand experts were assigned to countries of the region, bringing the total number of experts since the inception of the Plan to 220.

New Zealand's expenditure on aspects of the Mekong River Survey to 30 June 1963 amounted to £61,400. A further contribution of £50,000 was transferred during 1963–64, bringing New Zealand's total to the Indus Basin Development Fund to £350,000 to date.

**UNITED STATES:** United States Government obligations and commitments for economic and technical assistance to members of the Colombo Plan totalled $2 billion in 1964. Under the Foreign Assistance Programme, $955 million were provided through the Agency for International Development in the form of loans, grants and technical assistance. Under the Agricultural Trade Development and Assistance Act, $934·5 million equivalent was provided in local currency derived from the sale of agricultural commodities and additional assistance provided for emergencies and voluntary relief agencies. The Export-Import Bank provided $76·4 million in long-term credits. Since July 1, 1951, the United States Government has provided approximately $13·5 billion to member countries to assist in their economic development.

As of 30 June 1964, 1,385 Peace Corps members were sent to Colombo Plan countries and an additional 331 volunteers were in training.

A total of 3,137 persons from Colombo Plan countries were trained under U.S. Government auspices during 1964. Of these 2,164 came to the U.S. and 973 were sent to other countries for training. The third-country training programme is a co-operative training programme in which other countries share in the training and its costs for U.S. sponsored participants.

The U.S. investment guarantee programme is designed to stimulate the flow of private capital to these areas. During fiscal year 1964, new dollar investments in the Colombo Plan region totalling $1·4 million were guaranteed against inconvertibility, expropriation and war damage. This represents a large increase over prior years.

**The International Bank For Reconstruction And Development**

Up to 30 June 1964 the International Bank for Reconstruction and Development made available over U.S. $1,702 million to member countries in the area of which about U.S. $124 million was provided in 1963–64.

The International Development Association which came into existence in September 1960 as an affiliate of the I.B.R.D., starting operations a few months later, had committed U.S. $482 million by the end of June 1964 (compared with U.S. $346·5 million at the end of June 1963). The International Finance Corporation has invested U.S. $23 million in enterprises in the area.

Since its inception in 1959 the United Nations Special Fund has approved an expenditure of U.S. $92·3 million on projects within the Colombo Plan region.

The United Nations and its specialised agencies had provided under the Expanded Programme for 1963 $10·5 million for countries in the Colombo Plan area.

## TECHNICAL CO-OPERATION*

Technical co-operation—the provision of mutual assistance in expert manpower, equipment and training opportunities—remains an important and necessary element in the economic development in the area.

The total expenditure on technical assistance under the Colombo Plan in 1963–64 amounted to £36·4 million, which represents an increase of about 37 per cent over the average expenditure for the last five years. This brings the cumulative total expenditure for the 14 years of the life of the Colombo Plan to £181 million.

During the year 1963–64, expenditure on the provision of experts amounted to £14 million. This enabled a total of 948 experts to be provided, mainly in education (technical and general), engineering, food, agriculture and forestry and transport and communications. The cumulative total number of experts provided for the 14 year period now stands at 5,981.

Over half the 948 experts provided this year have been from the United States (562). India (106) is the second largest supplier of experts with Britain (86) coming next.

The largest recipient of experts is India (157) which is closely followed by Viet Nam (137), Nepal (123) and Pakistan (120). The majority of experts to Nepal have been provided by India and they have been assigned to capital aid projects such as the Trisuli Hydel Project as well as in technical assistance fields as surveyors, road engineers, construction engineers, university lecturers etc. The majority of experts to Pakistan and Viet Nam have been provided by the United States.

Expenditure on equipment amounted in 1963–64 to £16·1 million compared with £21·1 million in the previous year, bringing the cumulative total to over £70 million. A good part of the equipment was provided for training and research institutions in the region.

New training places provided under the Colombo Plan during the year numbered 4,551 compared with 4,433 in 1962-63. The largest number of awards were in the field of General Education—1,314. Technical education awards

* See table on Expenditure on Technical Co-operation on next page.

**Expenditure on Technical Co-operation**
(£ Sterling)

The following table gives the expenditure by supplying and receiving country, 1 July 1950 to 30 June 1964.

| Receiving Country \ Supplying Country | Australia | Britain* | Burma | Canada | Ceylon | India | Japan | Malaysia | New Zealand | Pakistan | Philippines | United States | Total |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Afghanistan | 702 | 1,217 | — | — | — | 120 | 33,856 | — | — | — | — | — | 35,895 |
| Australia | — | — | — | — | — | 2,170 | — | — | — | 1,216 | — | — | 3,391 |

* Figures do not include aid given by Britain under the Colonial Development and Welfare Acts and for Educational Co-operation in the Commonwealth.

continued to increase from 341 in 1962-63 to 357 in 1963-64. Other major fields of training include Administration (721), Food, Agriculture and Forestry (533) and Medical and Health (464). At any one time during the past year some 6,000 men and women from South and South-East Asia were undergoing training in various parts of the world under Colombo Plan technical co-operation arrangements, some of them in countries within that area.

The United States has provided 2,164 *i.e.* 48 per cent of the training places and ranks as the major donor. Australia (573) and Britain (454) have exchanged last year's position as second and third largest donors respectively, while Canada (404) retains fourth position followed by Japan (372) and India (284).

Indonesia (750) was the major recipient of training awards; she is followed closely this year by India (693) which occupied first position last year. Thailand (556) is the third largest recipient of training awards. Afghanistan which joined the Plan in November 1963 appears as a recipient for the first time; six training places have been provided by Australia, 5 by Britain, one by Japan and some by the United States. A significant feature is that an increasing proportion of training awards are being taken up by the newer members of the Plan.

## MUTUAL AID

From the inception of the Colombo Plan in 1950 to June 1964, the countries of the region have taken in 3,058 trainees from neighbouring countries, representing 9 per cent of the total number of training places (33,046) provided during the same period.

In the context of intra-regional training, India occupies a key position. New institutions are being established in accordance with the provisions made in the Third Five-Year Plan and in addition, the capacity of the existing institutions is being increased, wherever possible. During 1963–64, admission capacity to technical institutions in India increased to 21,040 for the first degree courses and 39,712 for technician courses.

India ranks as the major donor of training places within the region, having provided 2,440 over half being to Nepal and 901 to other countries of the region. The other countries have provided 618 training places; Malaysia (295) and Pakistan (164) are second and third largest donors respectively. Other participants in providing intra-regional training are Ceylon (77), Philippines (29), Burma (25), Indonesia (18) and Thailand (10).

During the year 1963–64, 367 training places have been provided within the region as compared with 383 provided last year. The drop is accounted for partly by the merger of the four Malaysian territories. India, the major donor, has provided 284 places during the year which falls short of the peak figure of 369 reached in 1962–63. Pakistan reached a peak in 1956–57 with 29 places but thereafter there has been a gradual falling off in the number provided and in 1962–63 only six places had been provided. This year the position was restored with 27 trainees from the region. Indonesia and Burma started off with 10 places each in 1956–57 and 1957–58 respectively but the numbers have declined considerably in later years. Thailand provided 10 places during the period 1956–58. Since 1962 she has made available a sum of one million baht each year to meet the expenses of trainees from other member countries. It should therefore be expected that Thailand will be able to have a more active role as a donor country in the future. Singapore and the Federation of Malaya started off in 1956-57 with the relatively high figures of 34 and 27 places respectively. For the ensuing years the contributions of these two countries have been insignificant, until in 1961–62 there was a sudden rise to 38 and 24 places respectively. It is encouraging to note that this trend had been maintained in

1962–63 and 81 places have been provided by Singapore and 33 by the Federation of Malaya. In the last year the figure for Malaysia is 45. The apparent reductions are largely due to the elimination of count of inter-Malaysian trainees.

Increasing attention has been paid in recent years to the training within the region of "middle level" technicians. A Working Party was set up by the Council for Technical Co-operation in South and South-East Asia in April 1963 to consider proposals which the Australian Government and others had put forward for the expansion of technician training in the region. The Working Party recognized the importance of establishing and expanding training facilities for technicians in South and South-East Asia, noted the desire on the part of the governments of the region to establish adequate regional facilities, and welcomed the readiness of other governments, subject to the availability of finance, to contribute towards the expansion and improvement of technician training facilities within the region. Since then an Adviser on Intra-Regional Training has been appointed, to strengthen the efforts of the Colombo Plan Bureau to assist the governments of the region to make fuller use of regional training facilities. At the same time, each government of the region has appointed as a matter of urgency an Intra-Regional Training Liaison Officer, since the effectiveness of the Working Party's proposals rests on the closest possible co-operation between local liaison officers and the Adviser on Intra-Regional Training.

## ECONOMIC DEVELOPMENT

As in earlier years there were wide disparities over the past year in the rate of growth of real gross national product among the developing countries in the Colombo Plan area. In India the volume of national output expanded by nearly 4½ per cent and in Pakistan the rise was about 7 per cent. Thailand recorded an increase of 8 per cent, Korea some 6 per cent and Philippines almost 5 per cent. Some other countries, however, fared much less well. As a consequence of rapid population increase the per capita gain in real national income was only about half that in total national income. Technical co-operation between countries in the Colombo Plan area and those outside has in the last year shown a slight drop in the expenditure involved though the number of new training places and new extra assignments have actually increased. Moreover, last year's represents an increase of about 36 per cent on the average expenditure of the last five years. Training facilities within the region continue to be strengthened. Measures for training technicians, particularly at the middle level continued to be taken by all countries in the Colombo Plan area.

Most of the countries have maintained food production at last year's level. Increase in food production continues to be behind increase in population. Diversification in agricultural production through introduction of new crops, particularly cash crops has continued. New opportunities arose for the expansion of exports of primary products and with a few expansions such as tea, rubber, jute and cotton, commodity prices rose giving primary producers increased export earnings. The industrial sector in marked contrast to agriculture has shown considerable dynamism and continued to grow at a rate of about 8 per cent per annum. The development of infrastructure and the vigorous policies of the Governments contributed to the success in developing industries. In many countries the share of industries in national output has increased by as much as 15 per cent. Big increases in the output of coal, natural gas, iron ores and electricity were recorded. The shortage in some cases of raw materials and the almost universal shortage of spare parts was a brake on industrial expansion.

Governmental expenditure on development plans though large in absolute amounts remains low per capita.

**Government Expenditure for Development, 1963-64***

| | Total | Per Capita |
|---|---|---|
| | U.S. $ millions | U.S. $ |
| Afghanistan .. .. | 140 | 9·4 |

| Thailand .. .. | 252 | 8·8 |
| Viet-Nam .. .. | 83 | 5·4 |

*N.B.* The figures above are only broadly comparable since the classification of Government spending on development varies between countries.

* *i.e.*, fiscal year, which varies between countries. However, figures for Ceylon are a projection of 1964–65 ; those for Afghanistan are the average of 1962–67 Plan outlays ; those for Korea, Malaysia and Viet-Nam are for the calendar year 1963.

† Figure in dollars not available : development spending in 1963–64 totalled rupiahs 66·7 billion.

*Source :* Country Chapters.

The 1960-61 censuses carried out by some of the Colombo Plan countries showed that population was increasing at more than 2·5 per cent per annum in several countries. Widespread improvements in health services have resulted in a decline in death rates while the birth rates continued to remain high. Family Planning Programmes have been undertaken in some countries.

## INTERNAL FINANCIAL STABILITY

During 1963 there was a substantial increase in development expenditures in many countries of the region ; other expenditures also rose, particularly on account of increased defence spending. Despite the efforts made by some of the countries to mobilise resources, there was resort to deficit financing, which in turn led to an increase in money supply and in the domestic price level. While there was relatively little increase in money supply in Thailand, in Burma the efforts of deficit financing were countered by other policies which restrained the rise in the price level. Prices rose only slightly in Pakistan. In India, supply shortages occurred following adverse weather conditions and despite efforts to curtail non-essential Government expenditures, prices rose considerably during most of 1963 and the first half of 1964. In Ceylon, unexpected increases in import prices, particularly of essential foodstuffs, were responsible for pushing up the price level. The price rise in the Philippines can partly be ascribed to shortages of foodstuffs and also to an increase in budget expenditure, despite government efforts to restrain it.

In both Laos and Indonesia prices increased considerably, due mainly to heavy military expenditures. In Laos the inflationary impact of the budget deficit undermined the stability of the currency and convertibility of the kip was suspended. Latterly the kip was devalued to a third of its old value of 80 to U.S. $ 1. A Foreign Exchange Operations Fund to which C—Plan donors are contributors serves to stabilise the free market rate for the kip. Indonesia imposed particularly severe import restrictions to protect its foreign exchange reserves.

## EXTERNAL TRADE AND RESERVES

The value of exports from the area rose by 10 per cent between 1962 and 1963. This compared with a fall in value of about 5 per cent between 1960 and 1961. All countries in the area for which figures are available, with the exception of Burma, Ceylon and Laos, increased their export earnings in 1963–64. Exports of most countries for which information is available have risen sharply in early 1964. After a fall in 1963 the prices of most of the major export commodities important to the region rose in the latter half of the year. Jute and rubber prices, however, fell throughout 1963. So far in 1964, jute prices have continued to fall, tin has recovered, and the price of sugar has again fallen. Export promotion policies have assisted in the rise of exports in some countries, while the recent rise in prices of some important export commodities has also helped some countries to increase their export receipts.

Imports into the area as a whole were 4 per cent higher in value in 1963 than in 1962. However, in 1963, imports were lower than in 1962 in Ceylon and Indonesia.

In 1963, exports of the countries of the region grew faster than their imports, and their combined trade deficits decreased by about 27 per cent.

Foreign exchange reserves have gone up to $105 million reversing the trend of the last few years. Some exceptions are Afghanistan, Cambodia, Ceylon, Pakistan and Viet-Nam.

## AID FROM INDIA

During 1963–64 India provided 284 training places to the following countries : Australia (1), Burma (6), Cambodia (2), Ceylon (29), Indonesia (2), Korea (8), Laos (1), Malaysia (24), Nepal (149), Philippines (21), Thailand (38) and Viet-Nam (3). Since the inception of the Colombo Plan 2,589 training places have been provided by India as follows : Australia (3), Burma (67), Ceylon (258), Cambodia (2), Indonesia (61), Japan (10), Laos (12), Malaysia (113), Nepal (1,673), New Zealand (2), Pakistan (39), Philippines (147), Thailand (150) and Viet-Nam (27). Training facilities were provided in general education ; civil, mechanical and electrical engineering ; statistics ; forestry ; fisheries ; community development and co-operation; social services ; water resources development ; agriculture ; medicine and allied subjects ; sanitation sericulture ; economic planning ; power and fuel development ; transport and communications ; parliamentary affairs ; insurance ; banking, chartered accountancy ; budgetary procedures ; taxation ; atomic energy and handloom production and tourism. The cost of these services has been over Rs. 16 million.

India also provided training facilities for trainees from Colombo Plan countries in the fields of accounting and auditing of public co-operations, agriculture, meteorology, demography, community development and statistics, under the United Nations Technical Assistance Programme, and for 51 trainees from Colombo Plan countries in the fields of jeep maintenance, literacy education, irrigation practices, community development, agricultural planning and malaria eradication, under the United States Third Country Programme.

India has so far provided 64 experts, including 4 during the year, to Burma (2), Ceylon (40), Cambodia (8), Malaysia (9), Maldive Islands (1) and Viet-Nam (1).

These experts covered various fields such as irrigation, sericulture, iron and steel (works and training), organisation of urban milk supply, railways, electrical engineering, taxation, broadcasting, organization and methods, banking and insurance, timber research, small savings, sugar technology, tractor engineering, forestry, road research, leather technology, use and maintenance of HT2 aircraft, cultivation of potatoes and cashewnuts, statistics, doll-making and small scale industries, agriculture, transport and aeronautical ground engineering. The cost of the 4 experts sent during the year is Rs. 60,000.

**Mekong River Project**

India's assistance for the Tonle Sap Sector of the Mekong River Project was stepped up. An Indian team went to Cambodia to prepare designs and cost estimates. A silt and concrete laboratory has been set up in Cambodia. Also investigational work is going on in Poona on proposed barrages on the Mekong system.

**Assistance to Nepal**

During 1963-64 the financial and technical aid given by India was around Rs. 37 million. About 200 Indian experts and technical personnel were working with their Nepalese counterparts in several fields like road, airport and building construction, irrigation, agriculture, education, and health. In the Chatra Canal Project under the Colombo Plan, excavation works totalling 990 million cubic feet are completed. With the ending of the tripartite agreement for road construction, work on the Kathmandu-Trisuli Road, was continued under bilateral agreement. Work on the Tripureshwar-Thankot Road linking the capital with Tribhuvan Rajpath has been completed; considerable progress has been made on the Kathmandu-Daksinkali Road. Considerable progress was also made in the construction of airports, including ancillary buildings at Pokhara, Bhairawa, Janakpur and Simra and also in the completion of preliminaries at Biratnagar.

In the field of irrigation and water supply, progress was marked by the commencement of the laying of pipes required for the Rs. 8 million Kathmandu water supply scheme.

Work on the Trisuli Hydel Project continued to make progress, as also excavation, concreting and masonry work on the barrage, power channel, aqueducts, balancing reservoir, intake structure and power house. All the generating equipment etc. have been received. The dam, power channel and earth-work for power house foundations for Pokhra Hydel Scheme have been completed and necessary equipment and material received at Bhairawa for air-lifting to site.

In the fields of horticulture valuable research and field experiments were carried out at the research stations and trial orchards and the results were made available to progressive farmers.

Six more veterinary-cum-cattle breeding centres were established during the year. The construction of the Biological Products Laboratory is nearing completion and equipment etc. are being procured. The Rinderpest Eradication campaign has been restarted and another six million cattle were vaccinated. The programme of training Stock Supervisors was completed and the last batch of stockmen was receiving training at the end of the year.

The first phase of the Industrial Estate at Patan was inaugurated and different industries were functioning in the various workshops. The construction of the second phase has been taken up. The main building of the institute for the training of rangers and foresters together with a hostel building is being constructed and all the necessary ancillary buildings have been completed for shifting the institute at Hathauda.

The construction of the Science Block building at the new campus of the Tribhuvan University is nearing completion and work on their buildings has begun. The Science extension for the Trichandra College has been completed and equipped. Preliminary work on provision of buildings for the second phase of the Tribhuvan Adarsh Vidyalaya has been started. Under the National Archives Scheme, the construction of the Stack portion of the buildings and preparation of catalogues, micro-filming of selected manuscripts etc. continued with the help of the Indian Experts.

Indian assistance was also continued in other fields such as Archaeology, running of engineering schools, construction of nurses' quarters and kitchen block for the Maternity Home Child Welfare Centre and for the geological surveys and mineral investigations and topographical survey in Nepal.

## AID TO INDIA

**AUSTRALIA:** Australian capital aid valued at £ A 492,000 was provided to India during 1963–64 and included diesel locomotives and 2,000 units of rolling stock for the Railways; Radio and electrical equipment and heavy earthmoving equipment and commodity aid earmarked for the Tungabhadra Dam Project. This brought the total value of capital aid provided by Australia to £A 13,208,800. Australia has continued her programme of paper supplies for school texts and equipment for the Bombay Milk Scheme.

Since the inception of the Plan, 604 training awards have been provided for India. 59 Australian experts and advisers have visited India, 3 in 1963–64. Technical equipment provided by Australia included a cobalt 60 beam source, workshop equipment for the Government Precision Instruments Factory, Lucknow, equipment for the Central Road Research Institute and equipment for the Arid Zone Research Institute at Jodhpur.

**CANADA:** To the end of the fiscal year 1963-64 Canada has allocated $ 238,956,000 million for capital assistance to India.

A summary of the Canadian 1963–64 capital and commodity assistance programme is as follows:

| | | $ |
|---|---|---|
| Umtru Power Project .. .. | | 650,000 |
| Idikki Power Project .. .. | | 3,000,000 |
| Gamma Cell Units .. .. .. | | 60,000 |
| Cobalt Therapy Units .. .. | | 200,000 |
| Power Transmission Equipment .. | | 2,800,000 |
| *Commodities:* | $ | |
| Wheat .. .. | 1,500,000 | |
| Copper .. .. | 3,000,000 | |
| Aluminium .. | 3,000,000 | |
| Zinc .. .. | 2,150,000 | |
| Asbestos .. .. | 2,000,000 | |
| Nickel .. .. | 500,000 | 12,150,000 |
| | | $18,860,000 |

Under Canadian technical assistance arrangements, 712 Indian students have received training in Canada and 38 Canadian advisers or teachers have served in India.

In 1963–64 Canada has pledged Rs. 130 million for the Rajasthan Atomic Power Station. Canadian allocations for the Indus Basin Fund now stand at $13·1 million.

**JAPAN:** Forty-two Indian trainees went to Japan for training. Of these 7 were in agriculture, engineering (24), power and fuel (2), medical and health (1), transport and communications (4) and administration (3). Japan provided six experts: agriculture (5) and transport and communications (1). At the tenth Consortium Meeting in May 1964, Japan expressed her readiness to extend additional credits of 21,600 million yen during the Fourth year of the Five Year Plan, bringing the total commitments by Japan to 82,800 million yen.

**NEW ZEALAND:** The total capital aid contribution by new Zealand to India since 1951 stands at £2,738,949 the highest to any one country. Of this £2,581,932 has taken the form of capital assistance, roughly half for the All-India Institute of Medical Sciences and half for dairy development in various parts of the country. In the latter field grants totalling £170,000 were approved in 1963–1964 for projects at Bombay and Dehra Dun, and negotiations are under way for further substantial assistance. Another adviser in dairying was assigned to India during the year, bringing the total sent since 1951 to 18, and eight new training awards were granted making a total of 98. Most of the training provided has been in the field of agriculture, and the experts have been mainly in this field and that of health. New Zealand's expenditure on technical assistance to India since 1951 amounts to £157,411.

**UNITED KINGDOM:** United Kingdom loan aid to India's Second Five-Year Plan (1956-61) amounted to £ 80·5 million. The aid which has been pledged so far to the Third Five-Year Plan (1961-66) amounts to £ 155 million, against which loan agreements totalling £ 125 million had been agreed up to 30 June 1964. New agreements concluded between 1 July 1963—30 June 1964 amounted to £ 26·5 million. Disbursements of United Kingdom aid in this period amounted to £ 29·9 million. 107 new training places were provided including engineering (25), medical and health (13) and transport and communications (38).

New appointments of experts included 8 in technical education subjects, and 3 in medical and health (a team visit to several centres in India to demonstrate a special application of neuro-surgery). A Plant Pathologist was provided for six months to study a potato virus disease at Ootacamund in Madras State. During the year British equipment was supplied to the Indian Institute of Technology, Delhi, in continuation of a programme of assistance under which eight professors have been provided for the Institute by the United Kingdom Government since 1960, and seven more are to be provided over the next two to three years, as well as other experts. Up to June 1964, nearly £140,000 worth of equipment was supplied by the United Kingdom Government, and a further £77,000 worth was provided by British Industry. This is part of the programme under which £650,000 worth of equipment is altogether being provided for the Institute by the Government and British industry over a period of years. Other United Kingdom Government gifts of equipment included £2,500 worth to the Tractor Testing and Training Station, Budni, and £5,700 worth to the Indian School of Mines, Dhanbad, in continuation of earlier aid.

During 1963–64 the United Kingdom Government paid £967,000 into the Indus Basin Development Fund, bringing up to £8·734 million the sums disbursed by 30th June 1964, from the original United Kingdom grant contribution of £20·86 million for the Indus Basin Development Plan. The United Kingdom Government has agreed, subject to Parliamentary approval to commit a further sum of £13·9 million under the Supplemental Agreement signed in April 1964.

**UNITED STATES:** United States assistance to India continued in 1964 with the following categories of aid: (1) development grants for technical assistance ($ 6·9 million); (2) development loans for commodity and capital goods imports ($ 337·2 million); (3) agricultural commodities under PL 480 ($ 501·1 million) and (4) Export-Import Bank loans ($ 57·2 million).

During fiscal year 1963, 200 resident American technicians were in India to work on joint projects or project support. Training programmes were planned for 379 participants. "Training of trainers" projects have been increasingly emphasized. Prominent among the projects are those contributing to the founding of new educational training institutions.

Development loans are extended by the United States to India to finance the purchase and importation of capital goods, commodities, and related services, for development projects and programmes. Credits have been extended mainly for public power development, railroad improvement and expansion, steel imports, fertilizer, and for capital goods imports required by the private and public sectors for industrial expansion. The Export-Import credits assist in the implementation of India's Third Five Year Plan and will find factories to produce fertilisers, cellulose and plastics.

The $ 501·1 million in United States agricultural commodities supplied to India under sales agreements and grants have constituted a major factor in India's ability to feed and clothe her people and to carry out her economic development programme. The $ 24·5 million donated under Title III consisted of milk, cornmeal and other commodities distributed by CARE, UNICEF and three other voluntary agencies.

The Peace Corps has been active in India since December 1961. As of 30 June 1964, 153 volunteers were active in agriculture, health, nursing and teaching activities.

### WORLD BANK, I.D.A. AND I.F.C.

Thirty-one of the 80 loans made by the I.B.R.D. (World Bank) have been to India, whose total borrowings of $ 847 million make it easily the Bank's largest single customer.

I.D.A. extended a credit of $90 million to enable companies in three major industries — commercial vehicles, industrial machinery and construction equipment — to import components and materials on a larger scale than has been possible up to now, and thus to make fuller use of existing capacity and to produce more capital goods.

I.D.A. extended two other credits — one of $33 million for the development of telecommunications and another of $62 million to help finance the railway development programme.

I.F.C. undertook the following commitments: to invest $1·2 million in loan and share capital to help complete the financing of an $8·4 million programme to enlarge and diversify the electric cable production of a company in Calcutta, to provide loan and share capital amounting to $3·4 million to a new company which will build and operate a cotton textile machinery plant.

A study of the problems of coal transport has been completed at a cost to the Bank of some $855,000. Field work on a study looking toward a new crossing on the Hooghly River was completed. The Bank has allocated $116,000 to cover part of the cost.

The Bank continued to station a Resident Representative in New Delhi.

# DEFENCE SERVICES

*Chief of the Army Staff*, General J. N. Chaudhuri.

*Chief of the Naval Staff*, Vice-Admiral B. S. Soman.

*Chief of the Air Staff*, Air Marshal Arjan Singh, D.F.C.

THE supreme command of all the Armed Forces of the Indian Republic is vested in the President. Since the attainment of Independence, the Ministry of Defence has become the central agency for formulating and obtaining policy decisions of the Government of India on defence matters and for transmitting them to, and seeing to their implementation by the three Defence Services Headquarters.

The partition of India in 1947 was an important landmark in the history of the Armed Forces of India. They were divided between the two countries on a communal-cum-optional basis, which worked out to an approximate proportion of one-third to Pakistan and two-thirds to the Union of India. British forces, including the Royal Air Force, were completely withdrawn from India early in 1948.

In order to deal with the emergency created by the full-fledged Chinese aggression in October-November 1962, a National Defence Council has been set up with the Prime Minister as Chairman. The Council was reconstituted on Jan. 2, 1965 with 28 members. The Prime Minister is the Chairman. This Council advises the Central Government in such matters as directly or indirectly affect the defence of the country.

The functions of the Council are to (*i*) take stock of the situation and arrangements for national defence, from time to time, and advise Government on matters relating to defence, (*ii*) assist in building up and suitably guiding the national will to fight the aggressor, (*iii*) suggest to the Central Citizens' Committee such measures as may be considered necessary for the utilisation of public participation in national defence, and (*iv*) advise Government generally on such other matters as may be helpful in prosecuting the fight against the aggressor.

The Council has formed a Military Affairs Committee with the Defence Minister as Chairman and the Service Chiefs of Staff, Lt.-Gen. Sant Singh, Lt.-Gen. S. P. P. Thorat, Dr. D. S. Kothari and the Defence Secretary as members.

The total defence outlay on revenue and capital account for 1965-66 is estimated at Rs. 879 crores as against the revised estimates of Rs. 835 crores during 1964-65.

The following is the break-up of the net Defence Services expenditure (in crores of rupees) since 1958-59:

| Year | Effective | | | Non-Effective | Defence Capital Outlay | Total |
|---|---|---|---|---|---|---|
| | Army | Navy | Air Force | | | |
| 1958-59 (Actuals) .. | 146 | 16 | 75 | 14 | 28 | 279 |
| 1959-60 (Actuals) .. | 143 | 14 | 59 | 15 | 36 | 267 |
| 1960-61 (Actuals) .. | 164 | 17 | 52 | 15 | 33 | 281 |
| 1961-62 (Actuals) .. | 198 | 20 | 53 | 19 | 23 | 313 |
| 1962-63 (Actuals) | 314 | 19 | 74 | 18 | 49 | 474 |
| 1963-64 (Actuals) | 532 | 21 | 134 | 17 | 112 | 816 |
| 1964-65 (Revised Estimates) .. .. | 549 | 22 | 126 | 20 | 118 | 835 |
| 1965-66 (Budget Estimates) .. | 551 | 24 | 153 | 21 | 130 | 879 |

(See also under Public Finance).

### DEFENCE ORGANISATION

Since August 15, 1947, each Service has been placed under a separate and independent head, their present designations being Chief of the Army Staff, Chief of the Naval Staff and Chief of the Air Staff.

With the appointment of three Service Chiefs independent of each other, the task of co-ordination of the activities of the three Services has devolved on the Defence Ministry. In order to ensure expeditious handling of work, a network of committees has been established at different levels.

At the top is the Defence Committee of the Cabinet which is, for all practical purposes, the Government so far as the Services are concerned. All important policy questions relating to defence are decided by this Committee, which is presided over by the Prime Minister.

The Defence Minister is responsible to Parliament for all matters relating to the Defence Services, including appropriation and allotment of funds, correlation of all civil and ministerial activities for purposes of defence and control and direction of research policy.

There are a number of inter-Services organisations, directly administered by the Defence Ministry, dealing with matters of common concern to the three Services. Some of them are the Production Organisation, the Research and Development Organisation, Border Roads Development Board, the National Cadet Corps, the National Defence College, the Defence Services Staff College, the National Defence Academy, the School of Foreign Languages, the Directorate-General of Armed Forces Medical Services, the Resettlement Directorate, the Indian Soldiers', Sailors' and Airmen's Board, the Combined Inter-Services Historical Section, the Directorate of Military Lands and Cantonments, the Joint Cipher Bureau and the Armed Forces Information Office.

Among the major steps which the Government of India took after the Chinese attack was to set up in November 1962 a separate Department of Defence Production in the Defence Ministry to direct, co-ordinate and strengthen the production base for building a sound defence system.

In view of large-scale expansion in defence science activity in the country, a Research and Development Council was constituted in the middle of 1962, with the Defence Minister as Chairman, to formulate defence science programmes. It, however, does not work in isolation, and is closely associated with civilian organisations engaged in the effective application of scientific knowledge. Apart from the Defence Minister, the other members of the Council are the Minister of Defence Production (Vice-Chairman), the Defence Secretary, the Secretary for Defence Production, the Scientific Adviser to the Defence Minister, the Director-General of C.S.I.R., the Chiefs of Staff of the Army, Navy and Air Force, the Director-General of Armed Forces Medical Services, the Financial Adviser (Defence), the Chief Controller of Research and Development and the Director-General of Inspection. The Council has under it the Defence Research and Development Organisation, headed by the Scientific Adviser, who is assisted by the Chief Controller and the Chief Scientist.

The Defence Minister's Production Committee forms part of the higher defence control evolving a co-ordinated policy in regard to the manufacture of military stores and equipment. It has under it the Defence Production Organisation for the overall production effort for meeting the requirements of the Services by the maximum utilisation of the existing capacity and creating additional capacity in the Ordnance Factories. The Directorate-General of Inspection is responsible for the inspection of all stores for which orders are placed with the Ordnance Factories, other defence and public undertakings and private trade.

### RESEARCH & DEVELOPMENT

The Research and Development Organisation was brought into being in January 1958 by the amalgamation of the Technical Development Establishments of the three Services and the Defence Science Organisation to ensure that scientific research played an effective role in production. This re-organisation was intended to

bring to the three Services the backing of the country's scientific activity and to secure the maximum utilisation of the available researches.

The R. and D. Organisation, which is closely associated with the Production Organisation, includes technical establishments dealing with weapons, ammunition, military explosives, metallurgy, electronics and optical instruments. Whereas research is carried on in the laboratories, development work is concentrated at the various technical establishments scattered all over the country.

As a supporting organisation of the Armed Forces, the R. and D. Organisation has to (*a*) render scientific advice to Service Headquarters, (*b*) carry out applied research to solve the problems of the Services, (*c*) design and develop weapons and equipment based on the operational requirements defined by the Services, (*d*) evaluate and carry out technical trials of new weapons and equipment or those developed in the country, and (*e*) render technical guidance to civil trade for the development of new equipment. It today undertakes basic, applied and operational research and development of products and processes related to fabrication of instruments, weapons, ammunition, engineering stores and tele-communication equipment.

It was in order to meet the urgent need of training technical staff officers for the Armed Forces that the Government established the Institute of Armament Studies some years ago as a constituent of the Defence Science Organisation. Apart from training Service officers, the Institute provides facilities for a comprehensive scientific study and research in the performance of weapons and equipment.

There are at present about 30 establishments, major and minor, under the R. and D. Organisation, catering to the needs of the Armed Forces. Among the new research units are the Institute of Nuclear Medicine, the Institute of Physiology, the Food Research Laboratory, the Solid State Physics Laboratory, the Electronics Research Laboratory and the Institute of Work Study.

With a view to early realising the aim of self-sufficiency in defence material, the tempo of research and development is being progressively stepped up. A chain of laboratories is being established to cover new fields of activity and to evaluate the stringent conditions in different terrains of the country's frontiers. As simulation of these conditions cannot be carried out fully in the existing laboratories, field research stations have been set up.

A Psychological Research Directorate of the Science Organisation was formed in 1949 under a Chief Psychologist, the main function of which is to conduct research in the assessment of human personality so that the right type of officers may be selected for the Armed Forces.

During 1964-65 the R.D. Organization was engaged in the development of a mountain-gun and anti-tank mine, and completed projects for the development of gun and mortar sights and the telescopes for the Sniper.

There are two major electronic Development Establishments in the country dealing with communication equipment, tele-communication line equipment and radars. A beginning has been made on a third establishment for the development of missiles.

A Defence Science Service has been instituted to include all civilian scientists engaged in research, development, inspection or teaching in any of the three Services or in the Ministry of Defence.

As, with the growing tempo of defence research and production, technical activity has considerably increased in the Armed Forces in recent years, the Defence Ministry have, in collaboration with the Ministry of Scientific Research and Cultural Affairs,* evolved a scheme of technical education. Theoretical training for the engineering profession to those already receiving practical training, consisting of lectures and tutorial classes, is now being given at defence installations in practically all parts of the country to prepare students for the Associate Membership examinations of the Institution of Engineers (India), the Institution of Tele-Communication Engineers and the Aeronautical Society of India, a pass in which is regarded as equivalent to an engineering degree. There are more than 4,800 students at present receiving this instructional training.

The Defence Production Board has been set up to examine and recommend to Government plans for defence production, production of new items and stock-piling of raw materials.

## ORDNANCE FACTORIES

The Production Organisation, which has under it 24 odd Ordnance Factories, is so designed as to achieve self-sufficiency in respect of stores required by the three Services and has made continuous efforts to establish production of items hitherto imported. The organisation represents one of the biggest State-owned integrated enterprises.

The Ordnance Factories have, since independence, been considerably enlarged and modernised to raise indigenous manufacture in an effort to make the country self-sufficient in vital supplies. At the time of the Chinese invasion towards the end of 1962, there were 20 Ordnance Factories in existence and four others at various stages of being established. Of the latter, the Ordnance Cable Factory for the manufacture of field cables for the Army started functioning in September 1963 and the second—the New Explosives Factory—in December 1964. The other two—the Jobbing Factory and the Heavy Vehicles (Tank) Factory—are also in an advanced stage of construction. In order to meet the accelerated demand of the Services, following the emergency, six more Ordnance Factories have been sanctioned to step up the manufacture of small arms and ammunition. One of them, the Small Arms Ammunition Factory, went into production in Oct. 1964, with U.S. aid, much ahead of schedule.

Efforts have continuously been made to harness the resources of the civil industry for the production of armament components, fabrication of clothing and manufacture of general engineering stores. Rigid adherence to high standards of precision and quality is insisted on and ensured through a system of strict control and inspection.

Apart from substantially augmenting the manufacture of established armaments and equipment, the Ordnance Factories took up the production of several new items during 1963–64. Significant amongst these are a 7·62 m.m. semi-automatic Ishapore rifle and its ammunition, a new heavy mortar with a longer range and its ammunition, new types of tank ammunition, new anti-tank ammunition, an anti-aircraft gun and its ammunition, improved carbines to replace sten-guns, and modified light machine-guns and bolt-action rifles to take the new rimless 7·62 ammunition.

Concerted efforts are also being made to develop, design and produce other types of weapons. A light mountain gun, with a higher range, has been successfully developed and its production started. A new plant has been set up at the Cordite Factory for the manufacture of semi-solvent propellants for rockets and commissioned, and so also a plant at another ordnance factory for a new type of ammunition for the Air Force.

To ease the transport problems of the Army, about 4,300 three-ton Shaktiman trucks, with an indigenous content of about 61 per cent had been manufactured in the Ordnance Factories by the end of March 1964. In addition, 5,200 one-ton Nissan carriers and 2,100 Nissan jeeps, with an indigenous content of 35 and 28 per cent respectively, rolled out of the assembly lines.

The production of conventional arms, snow and ski equipment, winter and cotton clothing, supply-dropping parachutes, line-gear and saddlery items has also been greatly stepped up.

Over the years, the value of production in the Ordnance Factories has jumped from about Rs. 5 crores in 1947–48 to Rs. 19·65 crores in 1958–59, Rs. 25·37 crores in 1959–60, Rs. 33·35 crores in 1960–61, Rs. 41·88 crores in 1961–62, Rs. 64 crores in 1962-63 and Rs. 111·34 crores in 1963-64. During 1964-65 it was expected to be more than that in 1963-64.

## HINDUSTAN AERONAUTICS LIMITED

(*See under article "Government Industrial Undertakings"*).

## A.M.D. AND A.I.L.

The Aircraft Manufacturing Depot, set up at Kanpur in 1960 under the Air Force for the manufacture of the Avro-748—a medium twin-engined, turbo-prop, pressurised and air-conditioned transport aircraft, capable of short take-offs and landings, with ability to operate from unprepared surfaces—was in 1963 made a departmental undertaking under the direct control of the Department of Defence Production. It has been decided to convert it into a limited company in the public sector.

The A.M.D. has so far produced three Avro-748s, Series I, and two Avro-748, Series II, in collaboration with the Hawker-Siddeley Aviation, Ltd., of the U.K. It has already handed over two aircraft of Series I to the Air Force, while the first of Series II has been taken over by the Indian Airlines Corporation for trials. Facilities were recently established at the Depot for the manufacture of 130 single and 170 two-seater Rohini gliders for the Air Wing of the National Cadet Corps. Forty such gliders have already been completed.

The Aeronautics (India), Ltd., was registered in Delhi in August 1963 to undertake the manufacture, under a licence agreement with the Government of the U.S.S.R., of a modified, single-engined MiG-21 supersonic fighter aircraft, complete in all respects.

With the help of Soviet specialists, Indian engineers have prepared project reports in respect of the three units for the manufacture of air-frames, aero-engines and electronic and allied equipment. While these are being studied, work is, meanwhile, going ahead for setting up these factories at Nasik (Maharashtra), Koraput (Orissa) and Hyderabad (Andhra Pradesh).

To streamline aircraft manufacturing industry in the country, all the existing units have been brought under the unified control of the Aeronautics (India) Ltd. The (AMD), Kanpur merged with the Aeronautics (India) Ltd. in June 1964 and the Hindustan Aircraft Ltd. in Oct. 1964 when it was redesignated as the Hindustan Aeronautics Limited.

## BHARAT ELECTRONICS LTD.

The Bharat Electronics Ltd. was registered at Bangalore in 1954 as a company in the public sector. The factory went into production in January 1956, marking an advance on the road to self-sufficiey in the wide range of wireless and electronic equipment mostly required by the Armed Forces. (For more details see under article on "Government Industrial Undertakings.")

## SHIP-BUILDING AND REPAIRS

The Production Organisation has also under it the Mazagon Dock, Ltd., Bombay,† and the Garden Reach Workshop, Ltd., Calcutta.† The Mazagon Docks were acquired from the Peninsular and Oriental Co. and the British India Steam Navigation Co. and the Garden Reach Workshops from the British India Steam Navigation Co. and the River Steam Navigation Co. respectively. While these shipyards continue to carry out refits and repairs of commercial ships, they also do so for naval ships. Their acquisition has greatly facilitated naval ship-building.

A programme, costing about Rs. 3·5 crores, has been approved for expanding the existing facilities at the Mazagon Docks, including the construction of a new building slipway. They have also been entrusted with the building of frigates for the Navy. This is the first step towards the building of modern warships for which they are suitably equipped.

* Now merged with the Ministry of Education.

† See under "Govt. Industrial Undertaking" for more details.

A small repair yard in Goa has been handed over to the Mazagon Docks for re-activation and its permanent acquisition is under consideration.

## NATIONAL CADET CORPS

The National Cadet Corps came into being in 1948. The aim of the Corps is (1) to develop character, comradeship, ideal of service and capacity for leadership in young men and women, (2) to stimulate interest among youth in the defence of the country, and (3) to build up a reserve of manpower to enable the Armed Forces to expand rapidly in a national emergency. The organisation is, thus, mainly of an educational and nation-building character. Officers and cadets have no liability for active military service.

A certain percentage of the total intake of candidates for commissioned ranks in the Army, Navy and Air Force, on the basis of direct entry to the Armed Forces training institutions, has been reserved for N.C.C. cadets of the three Services.

The N.C.C. consists of three divisions: (1) Junior, (2) Senior and (3) Girls'.

The strength of the Corps as on December 31, 1964, was as follows :—

| Senior Division | | | | | | Junior Division | | | | | | Girls' Division | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Army Wing | | Naval Wing | | Air Wing | | Army Wing | | Naval Wing | | Air Wing | | Senior Wing | | Junior Wing | |
| Officers | Cadets | Officers | Cadets | Officers | Cadets | Officers | Cadets | Officers | Cadets | Officers | Cadets | Officers | Cadets | Officers | Cadets |
| 5,611 | 9,45,600 | 204 | 10,200 | 108 | 10,800 | 4,019 | 2,00,950 | 434 | 21,700 | 513 | 25,650 | 487 | 79,400 | 711 | 35,550 |

**Grand Total—Senior Division—9,72,523, Junior Division—2,53,266, Girls' Division—1,16,098.**

The strength of the Corps a year earlier was : Senior Division 1,45,889, Junior Division 2,45,004 and Girls' Division 48,705.

The Senior Division provides Service training to young students and recruitment to it is from amongst students of universities and colleges. It is composed of three wings, *viz.* Army, Navy and Air. Recruitment to the Junior Division is from amongst students of secondary schools. It is also composed of Army, Navy and Air Wings.

The object of the Girls' Division is to develop all-round personality among girls. This Division has two wings. Senior and Junior, units of the Senior Wing being raised in colleges and universities and those of the Junior Wing in schools.

In order to better fit cadets of the N.C.C. for the officer ranks of the Armed Forces and to increase the cadet intake into the Services, Government decided in 1959 to raise Officer Training Units (O.T.U.) in the Corps all over the country. The overall strength of these training units has been fixed, for the present, at 750, the period of training being spread over three years. Eighty of the vacancies at the Indian Military Academy, Dehra Dun, have been allotted for these cadets for pre-commission training of Army officers.

Soon after the declaration of the present emergency, it was decided to make participation in N.C.C. activities compulsory for all able-bodied boys in universities and colleges. This scheme was introduced from the academic session beginning from July 1963 by making N.C.C. training a compulsory subject in the university curriculum.

The N.C.C. Rifles which were raised in response to the demand in the country for more and more military training for students were merged with the Senior Division, N.C.C., in 1964 and a uniform course of military training of three years was introduced for all able-bodied male college students.

The N.C.C. Organisation is headed by a Director-General in the rank of a Maj.-Gen. who has his office in New Delhi. There are 16 Directors in various States in the rank of Brigadier or Colonel. The units in each Directorate are organised into groups of seven each under the command of a Lt.-Col. The expenditure on the N.C.C. is shared between the Centre and the State Governments.

To cope with the demand for military training for boys and girls reading in schools who could not be admitted into the N.C.C., an Auxiliary Cadet Corps was started in 1953. It laid emphasis on physical education, recreation, discipline and character building. Following the report of a Committee appointed by Government under the chairmanship of Dr. H. N. Kunzru which recommended that there should be one integrated programme in the field of physical education in schools, it was decided to discontinue the Auxiliary Cadet Corps from April 1, 1965 and replace it by the National Fitness Corps Scheme. It was later decided to continue A.C.C. for one more year in such schools where the new National Fitness Corps Scheme was not being immediately introduced.

The Director-General of N.C.C. is Maj.-Gen. Virendra Singh.

## TRAINING INSTITUTIONS

The important training institutions common to the three Services are given below:

**National Defence College:** The National Defence College was started in 1960 in New Delhi for the training of senior officers of the three Services on the pattern of the Imperial Defence College in the U.K. Its main purpose is to enable students to study the military, scientific, industrial, social, economic and political factors involved in war as also the higher direction and strategy of warfare. Concurrently with this study, it offers a unique opportunity to senior Service officers and highly-placed civil servants of getting together and exchanging ideas so as to give them both a clearer and better understanding of each other's problems in peace and in war. The training lasts about a year and officers selected for attending the course are ordinarily of the rank of Brigadier in the Army and equivalent ranks and status in the Navy, the Air Force and the civil services, including scientists. Only those in the age-group of 38–45 years who are considered to be potential leaders in their professions are selected for the course.

*Commandant*, Vice-Admiral A. K. Chatterji.

**Defence Services Staff College:** The Defence Services Staff College is located in Wellington in the Nilgiri Hills in South India. One hundred officers drawn from all the three Services, including six officers from the U.S.A. and Commonwealth countries are trained every year. The aim of the course is to prepare officers to hold second-grade or equivalent staff appointments or higher staff or command appointments.

*Commandant*, Maj.-Gen. D. Som Dutt.

**National Defence Academy:** The National Defence Academy at Khadakvasla, near Poona, started functioning in its present location in January 1955. Previously, it had been set up at Dehra Dun in January 1949 as an experimental measure, with a Joint Services Wing and a Military Wing. On its move to Khadakvasla, the J.S.W. came to be known as N.D.A. At this Academy, Army, Navy and Air Force cadets receive three years' combined basic training. The first two years are devoted to common preliminary training and the third to specialised training in the respective Services. Thereafter, Army cadets join the Indian Military Academy at Dehra Dun for a further one-year course, while Naval and Air Force cadets proceed to their respective Service establishments for advanced training.

*Commandant*, Maj.-Gen. Rambir Bakshi.

**Rashtriya Indian Military College:** Run on the lines of public schools, the Rashtriya Indian Military College, located in Dehra Dun, brings up future officers of the three Services by imparting preliminary pre-cadet training to such pupils as desire subsequently to choose a military career. It thus serves as a feeder to the National Defence Academy, which provides combined basic training to cadets of all the three Services. Called until recently as Sainik School and previously as Prince of Wales Royal Indian Military College, it was started in 1962 with the primary object of catching would-be officers of the Armed Forces at an impressionable age to be able easily to mould their character. By a carefully-framed compulsory system of P.T., drill, parades and games, students are groomed to attain certain physical standards to fit them for a Service career. Special attention is paid to fostering in them discipline, self-reliance and an aptitude for soldiering. Social training forms an important extra-curricular activity.

*Principal*, S. P. Sharma.

**School of Foreign Languages:** Located in New Delhi, the School of Foreign Languages was started in 1949 to meet the growing demand for qualified linguists. It also conducts examinations in various Indian languages for service personnel.

*Director*, P. N. Banerjea.

**Armed Forces Medical College:** The Armed Forces Medical College is an inter-services post-graduate institution designed to meet the requirements of the integrated medical services of the Army, Navy and Air Force, and is located in Poona. The College has departments of medicine, surgery, pathology, hygiene, radiology, blood transfusion and dentistry. It also now holds an M.B.B.S. course and is affiliated to Poona University.

*Commandant*, Maj.-Gen. P. N. Ramjhan.

**King George's Schools:** Located at Ranghtan, Ajmer, Chail, Bangalore and Lucknow, King George's Schools provide public school education for the children of serving personnel.

**Sainik Schools:** There are at present 14 Sainik Schools located in the States of Andhra Pradesh, Assam, Bihar, Gujarat, Kerala, Madhya Pradesh, Madras, Maharashtra, Mysore, Orissa, Punjab, Rajasthan and West Bengal, imparting middle and secondary school public education with a military bias.

## ARMED FORCES MEDICAL SERVICES

The Directorate-General of Armed Forces Medical Services was created in 1949 with a view to integrating the medical services of the Armed Forces.

An officer of the rank of Lieut.-General is the head of this inter-Services organization, who maintains close contact with the three Directors of Medical Services (Army, Navy and Air Force). He is responsible to the Ministry for the over-all medical policy relating to the Armed Forces. The entire organisation relating to medical equipment and stores is directly under him. The Directorate has under it the Armed Forces Medical College and the Artificial Limb Centre.

The Artificial Limb Centre was set up by the Central Government at Poona soon after World War II. In 1948, with the arrival of new equipment and machinery from the U.K., it was firmly established and now claims to be the fourth largest institution of its kind in the world.

The Centre, which functions under the control of the Director-General of Armed Forces Medical Services, also produces various types of orthopaedic boots and shoes, belts, trusses and spinal braces.

### RESETTLEMENT DIRECTORATE

The Directorate-General of Resettlement in the Defence Ministry deals with matters relating to the rehabilitation of ex-Servicemen in civil life.

In collaboration with other Ministries of the Central Government, the State Governments, the Post-War Reconstruction Fund Trust Committees and other organisations, the Defence Ministry has formulated schemes for resettling ex-Servicemen in Government and private service, land colonies, vocational and technical trades and motor transport services.

In the matter of employment, the Government have accorded preference to ex-Servicemen in filling up appointments in police, excise, watch and ward and other departments for which military training is a qualification.

Through the efforts of the Defence Services Liaison Organization, set-up in May 1956, 661 retired Armed Forces officers were selected for appointment in civil posts under the Central or State Governments and 87 in the private sector up to the end of March 1965.

### SOLDIERS', SAILORS' AND AIRMEN'S BOARD

The Indian Soldiers', Sailors' and Airmen's Board is the most important official institution connected with the welfare of serving personnel of the Armed Forces and ex-Servicemen and their families.

The Board has its seat at New Delhi and co-ordinates the activities of State boards which exist in each State. Under the control of these State boards, there exists throughout the country a network of district boards, reinforced in some cases by tehsil or taluka committees and other kindred bodies. These boards are established in all districts from which recruits have been obtained in sufficient numbers. The President of the District Board is the Collector or the Deputy Commissioner.

The Indian Soldiers', Sailors' and Airmen's Board Fund is now used primarily for payment of special pensions to blinded ex-Servicemen and to meet the expenditure on miscellaneous items, such as bank charges and audit fees in connection with the administration of the fund.

The other Central funds which are not under the control of the Indian Soldiers', Sailors' and Airmen's Board are :

Armed Forces Benevolent Fund, Flag Day Fund, Armed Forces Reconstruction Fund, Army Central Welfare Fund, Navy Benevolent Association Fund, Navy Amenities Fund, Air Force Benevolent Association Fund, Air Force Central Welfare Fund, Indian Gorkha Ex-Servicemen's Welfare Fund and St. Dunstan's India Fund.

A sum of Rs. 17,18,268 was collected on the 1963 Flag Day.

### HISTORICAL SECTION

The Combined Inter-Services Historical Section (India and Pakistan) has been engaged in an ambitious scheme of writing a comprehensive history of World War II, with particular reference to the operations in which the Armed Forces of undivided India took part. The scheme envisages a series of 24 volumes.

Apart from the C.I.S. Historical Section, which is a joint venture of India and Pakistan, there is a small unit called the Historical Section (India), which is a permanent organisation. It carries out research and acts as a custodian of the records of the Defence Ministry and the three Services. Its functions include the writing of historical accounts of recent operations and the giving of information and advice on military history to the Service.

### GALLANTRY AWARDS

Three new gallantry awards were instituted by the President after Independence for gallantry in combat with the enemy. They are designated the Param Vir Chakra, the Maha Vir Chakra and the Vir Chakra. They came into force with effect from August 15, 1947.

The Param Vir Chakra is awarded for most conspicuous bravery, or some daring or pre-eminent act of valour or self-sacrifice whether on land, at sea or in the air. It ranks first among all awards.

The Maha Vir Chakra is awarded for conspicuous acts of gallantry whether on land, at sea or in the air.

The Vir Chakra is awarded for acts of gallantry whether on land, at sea or in the air.

A fourth gallantry decoration, named the Ashoka Chakra, in three grades, *viz.* Class I, Class II and Class III, was instituted for acts of gallantry other than in the face of the enemy. This also came into force with effect from August 15, 1947.

Class I of the Chakra is awarded for most conspicuous bravery, or some daring or pre-eminent act of valour or self-sacrifice. Class II of the Chakra is awarded for conspicuous gallantry and Class III for gallantry.

If a recipient of any of these Chakras again performs such an act of bravery as would have made him or her eligible to receive the same decoration, such further act of bravery is recognised by the award of a Bar attached to the riband by which the Chakra is suspended, and for every such additional act of bravery, an additional Bar is added, and any such Bar or Bars is/are also awarded posthumously. For every Bar awarded a replica in miniature of the Chakra concerned, and in the case of the Param Vir Chakra of the "Indra's Vajra", is added to the riband when worn alone.

Every recipient of any of these decorations who is junior in rank to a 2nd Lieutenant in the Army, a Sub-Lieutenant in the Navy, or a Pilot Officer in the Air Force, is entitled, from the date of the act by which the decoration has been gained, to a special pension, and each additional Bar conferred carries with it an additional pension for life.

A system of Mention-in-Despatches was also instituted. A 'lotus leaf' emblem is worn by the awardees on the ribbon of the campaign/war medal concerned.

The rates of monetary allowance admissible are as follows :—

(*a*) (*i*) Param Vir Chakra.—Rs. 50 p.m. (Rs. 70 p.m. in the case of J.C.Os. who have previously been given an award of the second order of gallantry, such as the I.O.M.).

(*ii*) Each Bar to PVC.—Rs. 20 p.m.

(*b*) (*i*) Maha Vir Chakra.—Rs. 30 p.m. (Rs. 50 p.m. in the case of J.C.Os. who have been previously given a gallantry award of the third order, such as the M.C.).

(*ii*) Each Bar to M.V.C.—Rs. 10 p.m.

(*c*) (*i*) Vir Chakra.—Rs. 20 p.m.

(*ii*) Each Bar to Vr.C.—Rs. 8 p.m.

The recipients of the Param Vir Chakra are Maj.Som Nath Sharma, Maj. Dhan Singh Thapa, Maj. Shaitan Singh, Capt. R. R. Rane, Capt. G. S. Salaria, Sub. Joginder Singh, Company Hav.-Maj. Piru Singh, Naik Jadunath Singh and L/Nk. Karam Singh, while those of the Ashoka Chakra, Class I, are Lt.-Col. J. R. Chitnis, Flight-Lieut. Subhas Biswas, Capt. D. K. Jatar, Capt. Man Bahadur Rai, Capt. E. J. Tucker, Lieut. P. M. Raman, Sub-Major Kharka Bahadur Limbu, Hav. Bachitar Singh, Hav. Joginder Singh, Naik Nar Bahadur Thapa, L/Nk Sundar Singh, Tej Singh, Lajjaram and Purshottam.

### NEW SERVICE MEDALS

Six new awards for the Armed Forces—Vishisht Seva (Distinguished Service) Medal, Sainya Seva (Services) Medal, Videsh Seva (Overseas) Medal, Sena (Army) Medal, Nao Sena (Navy) Medal and Vayu Sena (Air Force) Medal—were instituted by Government on the occasion of 1960 Republic Day.

The Vishisht Seva Medal is awarded to personnel of all the three Services in Classes I, II and III in recognition of distinguished service of the "most exceptional", an "exceptional" and a "high" order respectively, Sainya Seva Medal to all Service personnel in recognition of non-operational duties under conditions of hardship and severe climate, and the Videsh Seva Medal to all ranks of the Armed Forces for duties outside India. The Army, Navy and Air Force medals are awarded in recognition of such individual acts of exceptional devotion to duty or courage as have special significance for the Service concerned.

The recipients of Vishisht Seva Medal, Class I, so far are Lt.-Gen. B. M. Kaul, Lt.-Gen. Daulet Singh, Lt.-Gen. Bikram Singh, Lt.-Gen. P. S. Gyani, Lt.-Gen. T. B. Henderson-Brooks, Maj.-Gen. M. S. Pathania, Maj.-Gen. K. N. Dubey, Maj.-Gen. R. S. Garewal, Maj.-Gen. K. P. Candeth, Maj.-Gen. Dewan Prem Chand, Rear-Admiral D. Shankar, Air Vice-Marshal Harjinder Singh, Air Vice-Marshal Kunwar Jaswant Singh, Air Vice-Marshal E. W. Pinto, Air Vice-Marshal M. M. Engineer, Brig. Kalyan Singh, Brig. K. A. S. Raja, Brig. R. S. Noronha, Brig. S. N. Antia, Brig. S. B. Raza and Brig. B. N. Upadhyay.

## INDIAN ARMY

*Army HQ*. The Head of the organisation located in New Delhi, he is the Chief of the Army Staff. He is assisted by the Vice-Chief of the Army Staff and four other Principal Staff Officers (the Deputy Chief of the Army Staff, the Adjutant General, the Quartermaster General, the Master General of the Ordnance) and two Heads of Branches (the Military Secretary and the Engineer-in-Chief). The functions of the Branches are indicated below :—

(*i*) The General Staff Branch—(*i*) organisation and employment of the Army, Military operations, intelligence, training combat-development, military survey including maintenance and supply of maps and plans and engineer staff matters which are dealt with by VCOAS and (*ii*) staff duties, selection and scale of weapons and equipment, co-ordination of policy regarding equipment including provisioning, Armoured Corps, Artillery, Signals, Infantry, Territorial Army and Defence Security Corps which are dealt with by DCOAS.

(*ii*) The Adjutant General's Branch deals with manpower, recruitment, leave, pay and allowances and pensions and other conditions of service, and discipline. It also deals with welfare and health of personnel and military law.

(*iii*) The Quartermaster General's Branch deals with movement of personnel, Stores and equipment; provision, storage, inspection and issue of fuel, food-stuffs and forage; military farms, remount and veterinary services, Army Postal, pioneer and canteen services, works policy; fire fighting services and technical examination of MES works bills.

(*iv*) The Master General of the Ordnance Branch deals with all aspects of procurement policy, provision, storage, recovery, repair, maintenance and issue of all stores and equipment of Ordnance Supply including M.T. vehicles, weapons and ammunition, signal equipment, general stores and clothing as well as supply of common-user items to the Navy and the Air Force.

(*v*) The Military Secretary's Branch deals with the issue of commissions in the Army, postings, transfers, promotions, releases, retirement, resignation, invalidment and transfer to the Reserve of all non-medical officers of the Army; maintenance of confidential reports and personal records of all non-medical officers of the Army; providing the secretariat for Selection Boards which recommend officers for promotion to the rank of Lt.-Colonel and above; recommendations for grant of honours and awards to Army officers and Honorary Commissions in the Army to civilians.

(*vi*) The Engineer-in-Chief's Branch deals with all matters relating to Engineering units and Engineer stores; administration of personnel of the Corps of Engineers and the MES; design, construction and maintenace of all accommodation and works for the Defence Services.

Under the Army H.Q., the Indian Army is organised into four Commands—Eastern, Western, Southern and Central, each being under a General Officer Commanding-in-Chief of the rank of Lieutenant-General. The Commands are divided into Areas, each under the command of a G.O.C. of the rank of Major-General. The Areas, in their turn, are sub-divided into Sub-Areas each under the command of a Brigadier.

## EXPANSION PROGRAMME

The Chinese aggression brought out several shortcomings and underlined the need of strengthening the Army in many ways. It involved expansion of the Army, calling for quick adjustment in the policy of recruitment and the mode and method of selection. The training programmes had to be modified both in respect of their content and duration and the Army, as a whole, given an orientation. This involved the training of troops in mountain warfare and at high altitudes.

It also became necessary to achieve qualitative improvements in weapons and other military equipment. The weapons of World War II had to be replaced by weapons of improved fire-power and new light and semi-automatic weapons developed and produced.

Certain organisational changes had also to be carried out at all levels to make the Army more mobile and effective. This included the setting up of a Directorate of Combat Development in the General Staff Branch to formulate tactical concepts. The Weapons and Equipment Directorate under the Master-General of the Ordnance was taken over as a direct responsibility of the General Staff Branch, while the Directorate of Military Intelligence was strengthened. A Recruiting Directorate was established in the Adjutant-General's Branch. A new organisation was also formed under the Master-General of the Ordnance for the procurement of equipment and stores from foreign countries.

Soon after the beginning of the emergency, six new divisions were sanctioned, and of these four are being raised as mountain divisions and the remaining two as standard infantry divisions. One of the existing infantry divisions is being reorganised as a mountain division, thus bringing the number of mountain divisions to five. Two scout battalions are also being raised, one for the Punjab-Himachal Pradesh and the other for Uttar Pradesh borders with Tibet. These battalions, drawn from the hill tribes of these areas, will perform a role similar to that assigned to the Assam Rifles in N.E.F.A.

The Army consists of a number of arms and services. They are Infantry, Armoured Corps, Regiment of Artillery, Corps of Engineers, Corps of Signals, Army Service Corps, Army Ordnance Corps, Army Medical Corps, Army Dental Corps, Corps of Electrical and Mechanical Engineers, Army Education Corps, Remounts, Veterinary and Farms Corps, Corps of Military Police and Defence Security Corps.

## TERRITORIAL ARMY

As no country can afford to maintain a large standing fighting force in peace-time without straining its resources in men and material, a Territorial Army was formed in India in 1949 to serve as a second line of defence.

The Territorial Army Act, 1948, was passed by Parliament in September 1948 and the T. A. started functioning in October 1949 when recruitment was thrown open.

The Territorial Army consists of various arms and services, *i.e.*, the Regiment of Artillery, including anti-aircraft and coastal defence units, the Corps of Engineers, including port and railway units, the Corps of Signals, including P. and T. units, Infantry, the Medical Corps and the Corps of Electrical and Mechanical Engineers. The units raised are of two types, *i.e.* provincial units recruited from rural areas which undergo annual training of two to three months' duration at a stretch, and urban units recruited from large towns where Territorial Army units have been raised. They undergo training on the weekly drill system, *i.e.* in the evenings, Sundays and holidays with a short camp of not less than four consecutive days.

All able-bodied persons, from unskilled labourers to highly qualified technicians, provided they are citizens of India, are eligible for recruitment. The age-limits are 18 and 35 years, relaxable in the case of ex-Service (Army, Navy and Air Force) personnel and civilians possessing technical qualifications. Government servants and employees of private concerns are also eligible to join the Territorial Army.

The role of the Territorial Army is to

(*i*) relieve the Regular Army of static duties and support civil power if required,

(*ii*) provide coastal defence and anti-aircraft units,

(*iii*) provide units for the Regular Army if and when required.

When embodied, called out or under training, Territorial Army personnel receive the same pay and allowances as are admissible to the corresponding ranks of the Regular Army. It is obligatory for every civilian employer to reinstate a member of the Territorial Army in his civilian post on termination of his military training.

In order to provide an incentive to Territorial Army personnel for hard and meritorious work, 2½ per cent of the actual vacancies available at the Indian Military Academy are reserved for such personnel. On successful completion of the course at the Academy, they are granted regular commissions in the Army.

No officer or enrolled person is required to perform military service beyond the limits of India, save under a general or special order of the Central Government.

The Territorial Army is an auxiliary force to the regular Army and is the second line of Defence. This force consists of citizens who follow their normal avocations and receive military training in their spare time, and undergo active military service when embodied. The present authorised strength of the Territorial Army is 51,083. The actual strength is 42,005. The decrease in the strength during the year is mainly due to the disbandment of a number of Territorial Army units.

When Territorial Army units are embodied, the personnel of the units are assigned duties as in the regular Army. Before the commencement of the emergency, 16 units had been embodied. 84 additional units were embodied thereafter out of a total number of 140. 83 units are at present embodied.

During the year, the Territorial Army recruitment zones were reorganized and the whole country was divided into four zones instead of five which were previously in existence. During 1964, 82 persons have been granted Officers' Commissions and 92 persons Junior Officers' Commissions in the Territorial Army.

Territorial Army officers have been made eligible for promotion to the acting rank of Brigadier, against a specific vacancy, on completion of 20 years of service.

Civil Government servants embodied for service in the Territorial Army are allowed to retain their civil family accommodation for two months from the date of their joining military duty if they are posted to a non-concessional area, or until their transfer to a peace station if they are required to serve in a concessional area.

It has been agreed by the Director of Employment Exchanges, Ministry of Labour, that Territorial Army personnel embodied for service during the present Emergency would be treated as "Discharged Government Employees" and accorded "Priority III" by Employment Exchanges for the purpose of civil employment provided they are employed on a whole-time basis against regular establishment for a period of six months or more.

The role, concept and strength of the Territorial Army are kept under constant review on the basis of the experience gained during the past 15 years, to make it a more effective force.

## LOK SAHAYAK SENA

The Lok Sahayak Sena, which was formed on the 1st of May 1955, has now been disbanded.

## TRAINING INSTITUTIONS

Recruitment for the permanent cadre of commissioned ranks in the Army is done through the National Defence Academy, Khadakvasla, and the Indian Military Academy, Dehra Dun. After completion of their three-year course at the N.D.A., Army cadets have to spend another one year at the Military Academy before being commissioned. Direct admission to the Academy at higher age-levels also continues, though the number of cadets so taken is limited.

The Military Academy at present conducts courses for ex-N.D.A., direct-entry, T.A. and N.C.C. cadets, serving personnel, and technical graduates. Regular and direct-entry cadets commissioned in the technical branches are sent on specialised post-commission courses. The technical graduates' course was specially introduced in January 1948 as a temporary measure to give military training to qualified technicians and engineers for the Corps of Engineers, the Corps of Signals and the Corps of Electrical and Mechanical Engineers to cope with the increased requirements of technicians for the Army.

Two Officers' Training Schools were set up, one at Poona and the other at Madras, to train emergency commission candidates for the Army. The period of training is six months, after which candidates proceed to the Indian Military Academy or other specialised training establishments. The O.T.S. at Poona was closed down from 31st July 1964.

The Armoured Corps Centre and School at Ahmednagar trains recruits as well as regimental instructors. The School of Artillery at Deolali provides training in the field, anti-tank, anti-aircraft and coastal artillery branches. The Army Ordnance School at Jabalpur imparts specialised training to all officers and ORs in identification, handling and storage of various types of items, including ammunition and explosives.

The Infantry School at Mhow is the home of infantry doctrines and a centre for developing infantry weapons. The School also conducts courses for senior officers and junior commanders of all corps in the Army. The Army Service Corps has two schools, one at Meerut and the other at Bangalore, giving training in organisation and administration, animal transport, mechanical transport and supplies. The Army Medical Corps has its training centres at Lucknow and Hyderabad.

The College of Military Engineering at Kirkee, near Poona, trains officers of the Corps of Engineers, the Corps of Signals and the Corps of Electrical and Mechanical Engineers to the degree standard in civil, tele-communication and electrical and mechanical engineering respectively.

The Madras, Bombay and Bengal Engineer Groups at Bangalore, Poona and Roorkee provide basic technical and specialised Corps training to officers and ORs of the Corps of Engineers as also civilian officers of the Military Engineering Service.

The Corps of Electrical and Mechanical Engineers has its training centres at Secunderabad and Bhopal, while the School of Signals, which gives technical training in tele-communication engineering to personnel of the Corps of Signals, is situated at Mhow. The Army Signals School, which trains officers and ORs of all arms as instructors in regimental signals, is located at Jabalpur.

The other training institutions in the Army are the Remounts, Veterinary and Farms Centre and School at Meerut, the Education Corps School and the Military School of Music at Pachmarhi, and the Intelligence Corps School and the Physical Training School at Poona.

The various ranks in the Army from the top downwards are: General, Lieutenant-General, Major-General, Brigadier, Colonel, Lieutenant-Colonel, Major, Captain, Lieutenant, Second Lieutenant, Subedar-Major/Risaldar-Major, Subedar/Risaldar, Jemadar/Dafadar, Havildar, Naik, Lance-Naik and Sepoy/Sowar.

## INDIAN NAVY

The Indian Navy is controlled both administratively and operationally from Naval HQ in New Delhi through a chain of commands. Under the Chief of the Naval Staff are various authorities, ashore and afloat, who are directly responsible to him for the day-to-day administration of the Service.

At the Naval HQ, the Chief of the Naval Staff is assisted in his task by four Principal Staff Officers, namely the Deputy Chief of the Naval Staff, the Chief of Personnel, the Chief of Material and the Chief of the Naval Aviation.

The Deputy Chief is responsible for naval operations, policy and tactics, planning, intelligence, civil engineering and communications, as also overall co-ordination of staff. The Chief of Personnel looks after recruitment, service conditions, education and training, medical services, welfare and discipline of personnel, supply and victualling. The Chief of Material is concerned with fleet maintenance, weapons and equipment, marine engineering, naval construction, electrical engineering, armament supply and inspection and naval stores. The Chief of Naval Aviation deals with all questions relating to development of the naval air service.

The Naval HQ exercises control over the Navy through the following four commands:

1. Flag Officer Commanding, Indian Fleet.
2. Flag Officer, Bombay.
3. Commodore-in-Charge, Cochin.
4. Commodore, East Coast, Vishakapatnam.

Today, the Indian Fleet consists of I.N.S. VIKRANT (Flagship of the Navy), an aircraft-carrier, I.N.S. MYSORE, a Colony-class cruiser, I.N.S. DELHI, a Leander-class cruiser, two Destroyer Squadrons (I.N.S. RANJIT, RAJPUT, RANA, GODAVARI, GOMATI and GANGA) and a number of Frigate Squadrons, including some of the latest types of anti-submarine and anti-aircraft frigates. These new types of frigates, specially constructed for the Navy in the U.K., are I.N.S. BRAHMAPUTRA, BEAS, BETWA, KHUKRI, KIRPAN, KUTHAR, TALWAR, and TRISHUL. The former frigates are I.N.S. CAUVERY, KISTNA, AND TIR, which are now being used for cadets' training. The three Minesweeping Squadrons are formed by I.N.S. KONKAN, KARWAR, KAKINADA, CANNANORE, CUDDALORE, BASSEIN and BIMLIPATAM.

In addition, the Fleet has some survey ships, a tanker and some auxiliary craft. The survey unit of the Navy, which now comprises I.N.S. INVESTIGATOR, JUMNA, SUTLEJ and DARSHAK, carries out the necessary survey of India's coast and approaches to harbours. I.N.S. DARSHAK of 2,750 tons displacement is the first naval ship built in India.

With a beginning having already been made to build certain smaller types of naval craft in India, plans are now afoot to construct major warships, like destroyers and frigates, in the country's shipyards. The naval craft which have already been completed include the seaward defence boats—I.N.S. AJAY, ABHAY and AKSHAY, and more are now under construction. A mooring vessel I.N.S. DHRUVAK has already been launched at the Hindustan Shipyard Ltd., Visakhapatnam.

The Naval Dockyard, which came into being in 1750, has constructed some of the finest ships for the Royal Navy. A 1,000-ton frigate built at the Dockyard in 1870, which was originally named 'Trincomalee', is still being used by the Nautical Committee of the U.K.

The Dockyard is now equipped with a foundry, boiler, engine and ship-fitting shops, electronic and radar workshops, blacksmith, plater, joiner and carpentry shops, sail-making lofts, machine-shops, and gun-mounting and torpedo workshops. Its main function is to carry out all types of major refits of ships of the Navy and the associated harbour craft services. To meet the demands of the growing Service, this Dockyard is being rapidly expanded.

A newly-constructed cruiser-graving dock at this Dockyard, which can also accommodate the Navy's aircraft-carrier, was commissioned for service in January 1962.

A Resident Naval Officers' Organisation has been set up at Port Blair with the necessary transport and communication facilities. Appropriately named I.N.S. JARAWA, after an ancient tribe of the Andaman and Nicobar Islands, the new establishment was commissioned on February 15, 1964. A naval garrison, with facilities for moving to the various islands on patrol, has also been stationed in the Andamans and Nicobars.

It is proposed to develop a naval base and dockyard at Visakhapatnam for which an area of about 550 acres of land is being acquired from the Port authorities. It has also been decided to develop Mormugao as a naval base; it was formally commissioned in March 1964 as I.N.S. GOMANTAK. The base includes the Naval Air Station at Dabolim, where facilities for the operation of jet aircraft are being developed.

### NAVAL AVIATION

The Naval Air Arm, which is one of the youngest branches of the Navy, came into being in 1948 for training aircrew, followed soon after by the setting up of a Naval Air Station at Cochin. Later, the formation of a Fleet Requirements Unit was approved, aircraft, equipment and spares acquired and officers and ratings deputed for training courses abroad. The civil airfield at Cochin was acquired for the Navy in 1953 to be converted into the first Naval Air Station. Soon after, the first batch of Sealand aircraft were purchased from the U.K. and later the station was named I.N.S. GARUDA. Early in 1955, a number of Firefly target-towing aircraft were obtained from the U.K. for providing gunnery-training facilities for the Fleet. The strength of the Fleet Requirements Unit was further augmented when HT-2 aircraft were acquired from the H.A.L. to give instructional training to aircrew and other personnel. A jet flight has been added to the Fleet Air Arm with a number of Vampire jet aircraft, and forms a separate Naval Aviation Establishment, named I.N.S. HANSA.

The first aircraft-carrier, I.N.S. VIKRANT, acquired by the Indian Navy was commissioned at Belfast on March 4, 1961, in the United Kingdom. Formerly known as H.M.S. HERCULES, this light fleet aircraft-carrier, which has a displacement of 20,000 tons (full load), was acquired for the Navy in 1957. The carrier has a complement, including her flying personnel, of over 1,300 officers and sailors. The carrier arrived in India in November 1961 and a number of Sea-Hawks and Breguet-Alize aircraft have since been acquired for it. A Naval Air Training School has been set up at Cochin to train ratings in the maintenance and repair of aircraft. At the same time, the Government are considering setting up a School for Naval Airmen for training non-technical personnel.

To meet the meteorological needs of the Fleet Requirements Unit, a Naval Weather Service Organisation, manned by trained instructor officers, was established at I.N.S. GARUDA towards the end of 1952. Since then, more and more instructor officers have been trained to take over meteorological duties, both ashore and aboard ships. This organisation now also conducts courses of instruction in meteorology for naval ratings.

### TRAINING ESTABLISHMENTS

The training of other naval personnel is carried out in the shore establishments of I.N.S. VENDURUTHY, Cochin, I.N.S. CIRCARS, Visakhapatnam, I.N.S. ANGRE, Bombay, I.N.S. KUNJALI, Bombay, I.N.S. SHIVAJI, Lonavla, I.N.S. VALSURA, Jamnagar, and I.N.S. HAMLA, Bombay. I.N.H.S. ASVINI at Bombay, I.N.H.S. SANJIVANI at Cochin and I.N.H.S. KALYANI at Vishakapatnam are the three naval hospitals.

The various ranks in the Navy from the top downwards are: Admiral, Vice-Admiral, Rear-Admiral, Commodore, Captain, Commander, Lieut.-Commander, Lieutenant, Sub-Lieutenant, Midshipman, Chief Petty Officer, Petty Officer, Leading Rate, Able Rate and Ordinary Rate.

## INDIAN AIR FORCE

The Air HQ is divided into three main branches—Air Branch, which deals with operations, training, policy and plans, signals, reserves and intelligence, Administration Branch and Maintenance Branch. Each is under a Branch P.S.O. who, in turn, has several Directorates under him.

There were previously two Operational Commands of the Air Force with headquarters at Palam and Calcutta. In order to ensure better control and supervision of air defence, a third Operational Command was set up with headquarters at Shillong in June 1963. The three commands, with headquarters at Palam, Calcutta and Shillong, are now respectively known as Western, Central and Eastern Air Commands. The Maintenance Command has moved from Kanpur to Nagpur, while the Training Command remains located at Bangalore.

The Operational Commands control all flying units—fighter, bomber, reconnaissance and air-transport squadrons. The Training Command has under its control training schools and colleges for both officers and airmen for technical and non-technical ground training and for aircrew flying training. The Maintenance Command controls all technical and equipment units in the Air Force. All the five Commands are headed by Air Officers Commanding-in-Chief in the rank of Air Vice-Marshal.

A build-up of the Air Force is being planned in keeping with its role to give support to ground forces and provide protection to vital establishments. The U.S. Government has agreed to provide sets of powerful static radar installations and connected communication equipment, and it is hoped that they will be ready for use in a few months. Meanwhile, some mobile radar sets have been given to provide limited training to Air Force personnel. The U.K. Government has provided electronic and communication equipment and the Canadian Government has supplied a number of transport aircraft. The U.S.S.R. Government has supplied several aircraft and helicopters and other air defence equipment and given training facilities for Air Force personnel.

The fleet of transport aircraft was substantially increased during 1963-64. A number of heavy

transport AN-12 planes were purchased from the U.S.S.R. under deferred payment terms. Sixteen Caribou medium transport planes were contracted for purchase from Canada under a loan given by the Canadian Government, and some of them have already arrived in India. In addition, Canada gave a gift of eight Dakota aircraft. The U.S.A. supplied, under its military assistance programme, 24 Fairchild-Packet aircraft in addition to two Caribous supplied earlier. The U.S.S.R. supplied some Mi-4 helicopters under deferred payment terms. A contract was signed for the purchase of some Alouette helicopters from France.

The different types of aircraft used by the Air Force are :

*Training :* HT-2, Harvard, Vampire and Dakota.

*Fighter :* Vampire, Toofani (Ouragon), Mystere, Hunter, Gnat and MIG-21.

*Transport :* Dakota, Devon, Fairchild-Packet, Otter, Viscount-Ilyushin, 14, Caribou, AN-12, Super Constellations and M1-4, Bell and Alouette-2 Helicopters.

*Bomber :* Canberra.

*Reconnaissance* : Liberator and Canberra.

## TRAINING ESTABLISHMENTS

During the past few years, this youngest Defence Service, which celebrated its silver jubilee on April 1, 1958, has attained a large measure of self-sufficiency in the field of training in flying and technical and non-technical duties. Only a very small number of officers are now sent abroad for specialised courses not available in this country.

The Air Force Flying College at Jodhpur is the nursery of pilots, navigators and air-signallers. Advance flying training to aircrew is provided at Hyderabad, a Jet Training Wing and a Transport Training Wing having been set up at Hakimpet and Begumpet respectively as part of the Air Force Station. On successful completion of their one-year training at Jodhpur, pupil aircrew have to undergo a year's training at Hakimpet or Begumpet before being awarded their wings and commissioned.

The Air Force Administrative College at Coimbatore trains officers of the ground duty branches. The Air Force Technical College at Jalahalli, near Bangalore, imparts training to engineering officers and technical airmen of certain advanced signals trades. The No. 1 Ground Training School at Jalahalli trains non-technical airmen. The No. 2 Ground Training School at Tambaram (Madras) trains technical tradesmen (airmen). The No. 3 Ground Training School at Jalahalli is intended for airmen trainees of higher signals trades.

A School of Land/Air Warfare has been set up at Secunderabad to train Army and Air Force officers in the doctrine and planning of joint operations by air and ground forces, namely close air support, air transport support and air defence. The School has been organised into three wings corresponding to these distinct categories. Likewise, instructional staff of the institution is drawn from the two Services.

The School of Aviation Medicine, set up in Bangalore in 1957, runs courses for the training of medical officers and airmen in the science of aviation medicine. It contemplates subsequently undertaking research in this somewhat new, though extremely fascinating, field and has already established itself as an essential link in the training and research organisation of the Air Force. Aviation medicine seeks to help in the selection of aircrew and in investigating and solving problems associated with military aviation in general and high-speed, high-altitude jet and space flight in particular.

The I.A.F. Paratroopers' Training School at Agra, started in 1949, continues to train paratroopers for the Army, personnel for the I.A.F. Para-Medical Flights and instructors for the School itself.

## EMERGENCY MEASURES

Since the emergency, a scheme for the induction and initial training of pilots at an accelerated pace at Air Force training establishments has been taken up. An Initial Training Wing was started at the Air Force Administrative College, and two new institutions were opened, one for training cadets in the flying of jet planes and the other for training in the flying of transport planes. In addition, five flying clubs are helping in the training programme by imparting elementary stage flying training.

A joint training exercise, known as 'Exercise Shiksha', with the Air Forces of U.S.A., the U.K., and Australia was held in November 1963. About 4,000 Indian officers and airmen participated in it along with about 750 personnel of the U.S.A., U.K. and Australian Air Forces. Apart from giving an opportunity for assimilation of the use of modern radar equipment under operational conditions, the exercise enabled Indian squadrons to practise alongside fighter aircraft of the three countries, and Indian personnel thus gained valuable experience in the latest techniques of air defence.

Now armed with the latest jet trans-sonic aircraft, the Air Force has made rapid headway in the sphere of technical development. It can today boast of an organisation not merely performing maintenance tasks but also participating in research and production activity. It comprises a network of repair units backed by a chain of equipment and storage depots.

Earliest and foremost of these units is the Base Repair Depot. Since its establishment, soon after Independence, as a nucleus of the Air Force repair organisation, it has grown in scope and size. It has sent back into service aircraft after reconditioning and reclaimed, with the assistance of the H.A.L., virtually "dead" Liberators and restored them to operational fitness. Today, the various functions of the B.R.D. are periodical overhaul of planes in use, repair of damaged aircraft, overhaul of aero-engines and rectification of defects in engines.

## AUXILIARY AIR FORCE

In pursuance of the Reserve and Auxiliary Air Forces Act of 1952, seven Auxiliary Air Force Squadrons have so far been raised at Delhi, Bombay, Calcutta, Allahabad, Madras, Bhubaneshwar and Chandigarh. Similar auxiliary squadrons will be formed in other principal cities of India.

The A.A.F. is intended to assist the Regular Air Force in aerial defence and to provide air support to the Regular Army and the T.A. in an emergency. It provides part-time Air Force training to citizens and does not interfere with their normal vocational pursuits in civil life.

The various ranks in the Air Force from the top downwards are : Air Chief Marshal, Air Marshal, Air Vice-Marshal, Air Commodore, Group Captain, Wing Commander, Squadron Leader, Flight Lieutenant, Flying Officer, Pilot Officer, Master Warrant Officer, Warrant Officer, Flight Sergeant, Sergeant, Corporal, Leading Aircraftsman, Aircraftsman Class I and Aircraftsman Class II.

# INDIANS OVERSEAS

THE number of Indians overseas is given below:

| Name of country | Indian Citizens/ Persons of Indian origin | Year of estimate |
|---|---|---|
| *Commonwealth* | | |
| Aden | 18,000 | 1964 |
| Australia | 260 | 1962 |
| Basutoland | 900 | 1963 |
| British Guiana | 2,89,790 | 1963 |
| Brunei | 2,000 | 1960 |
| Canada | 8,954 | 1964 |
| Ceylon* | 9,75,000 | 1963 |
| Dominica | 8 | 1964 |
| Fiji (Suva) | 1,568 | 1962 |
| Gibraltar | 1,258 | 1962 |
| Ghana | 1,200 | 1964 |
| Grenada | 10,000 | 1964 |
| Hongkong | 3,000 | 1964 |
| Jamaica | 30,000 | 1964 |
| Kenya | 1,76,000 | 1963 |
| Malaysia* | 7,00,000 | 1964 |
| Mauritius | 4,77,000 | 1964 |
| New Zealand | 4,000 | 1963 |
| Nigeria | 1,254 | 1964 |
| Nyasaland | 9,630 | 1962 |
| *Commonwealth—Contd.* | | |
| Pakistan (Dacca) | 148 | 1964 |
| Rhodesia (Northern) | 7,110 | 1962 |
| Rhodesia (Southern) | 7,416 | 1964 |
| Sierra Leone | 300 | 1964 |
| St. Lucia | 2,000 | 1964 |
| St Vincent | 2,000 | 1964 |
| Tanzania | 70,000 | 1963 |
| Trinidad and Tobago | 3,01,946 | 1963 |
| Uganda | 63,130 | 1962 |
| United Kingdom | 1,65,000 | 1964 |
| Zanzibar | 19,500 | 1963 |
| *Foreign* | | |
| Abu Dubai | 1,519 | 1963 |
| Afghanistan | 12,361 | 1964 |
| Algiers | 148 | 1964 |
| Argentine | 189 | 1964 |
| Austria | 120 | 1964 |
| Bahrain | 5,000 | 1963 |
| Basra | 250 | 1964 |

* Including Singapore.

| Name of country | Indian Citizens/ Persons of Indian origin | Year of estimate |
|---|---|---|
| *Foreign—Contd.* | | |
| Belgium | 221 | 1964 |
| Berlin (East) | 30 | 1963 |
| Berlin (West) | 490 | 1964 |
| Brazil | 50 | 1964 |
| Burma | 3,00,000 | 1964 |
| Cambodia | 105 | 1962 |
| Cambodia (Phnom Penh) | 200 | 1963 |
| Canary Islands | 539 | 1963 |
| Cemoros | 150 | 1963 |
| Chile | 41 | 1964 |
| China | 118 | 1964 |
| Colombia | 9 | 1964 |
| Congo | 920 | 1964 |
| Costa Rica | 15 | 1962 |
| Cuba | 6 | 1963 |
| Czechoslovakia | 300 | 1963 |
| Dakar (Senegal) | 100 | 1964 |
| Denmark | 86 | 1964 |
| Dominican Republic | 2 | 1964 |
| Ecuador | 1 | 1964 |
| El Salvador | 2 | 1964 |
| Ethiopia | 2,225 | 1964 |
| Fernando Poo | 20 | 1964 |
| Finland | 18 | 1964 |
| France | 410 | 1964 |
| Germany (East) | 95 | 1964 |
| Germany (West) | 538 | 1964 |
| Guatemala | 2 | 1965 |
| Holland | 124 | 1964 |
| Honduras | 20 | 1964 |
| Hungary | 35 | 1964 |
| Indonesia | 20,148 | 1964 |
| Iran | 1,030 | 1964 |
| Iraq | 15,626 | 1964 |

| Yugoslavia | 90 | 1964 |

## EMIGRATION

The following table shows the emigration figures for 1963 and 1964.

| Country | Emigration | |
|---|---|---|
| | 1963 | 1964 |
| Africa | 327 | 268 |
| Burma | — | 2 |
| Ceylon | 20 | 19 |
| Malaysia | 61 | 13 |
| Others | 1,901 | 2,471 |
| Total | 2,309 | 2,773 |

## EMIGRATION LAWS

"Emigration" means the departure, by sea or by air, out of India, of Citizens of India, under an agreement to work for hire in any country beyond the limits of India, or if assisted to depart otherwise than by a relative with the intention of working for hire or engaging in agriculture.

Such emigration is governed by the Emigration Act, 1922 (7 of 1922) and the Rules made thereunder, as amended from time to time.

Emigration for the purpose of 'unskilled work' is prohibited, while emigration for the purpose of 'skilled work' is permissible on compliance with the prescribed formalities.

The functions under the Act are discharged by the Central Government through the Controller-General of Emigration and Additional Secretary to the Government of India in the Ministry of External Affairs, New Delhi, with the assistance of the Protectors of Emigrants at the Ports and airports from which emigration is lawful.

Following are the ports and airports from which emigration is at present lawful. Each port and airport has a Protector of Emigrants.

1. Bombay port and airport (Public Relations Officer (Emi.), Regional Passport and Emigration Office, 148, Mahatma Gandhi Road, Bombay 1).
2. Okha (Port Officer).
3. Porbander (Port Officer).
4. Bedi (Port Officer).
5. Madras port and airport (Public Relations Officer (Emi.), Regional Passport and Emigration Office, 42, Naliamuthu Chetty Street, George Town, Madras).
6. Nagapattinam Port (Protector of Emigrants).
7. Tuticorin and Dhanushkhodi under one Protector of Emigrants with headquarters at Mandapam Camp.
8. Calcutta port and airport (Superintendent (Emi.), Regional Passport and Emigration Office, 4, Brabourne Road, Calcutta).
9. Delhi airport (Public Relations Officer (Emi.), Regional Passport and Emigration Office, 1/2-E-7, Curzon Road, Barracks, New Delhi).

Below we give notes on overseas Indians in some countries.

Generally speaking fresh Indian immigration is either banned or is not permitted as a matter of policy into South Africa, Northern and Southern Rhodesia, Nyasaland, Australia, New Zealand, Burma, Ceylon, most European and South American countries. There are some countries that admit Indians on a quota basis: Canada, U.S.A., the Philippines, Thailand and Indonesia.

## AUSTRALIA

An Indian already domiciled in Australia has full citizenship rights, including the right to bring into the country a spouse and minor unmarried children if they are not already there. Indian businessmen and *bona fide* tourists and sportsmen may visit Australia and stay for periods not exceeding 12 months, and Indian students are permitted to undertake educational courses in Australia.

There is also provision whereby Indian business firms carrying on substantial trade with Australia may station a full-time representative there, and Indian independent overseas traders may in certain circumstances set themselves up in overseas trading enterprises of their own in Australia. Additionally, Indians may be admitted to assist their countrymen in their overseas trading activities from Australia.

Fuller information on the various categories of persons eligible to enter Australia may be obtained from one of the Australian representatives in India.

The majority of persons of Indian origin settled in Australia are engaged in retail trade or agricultural operations.

Indians domiciled in Australia do not suffer from any disability and have all citizenship rights.

## CONGO REPUBLIC

Very little statistical data are available about Indians here due to the unsettled conditions.

## BRITISH GUIANA

British Guiana has an area of about 83,000 sq. miles, and a population of 590,140 of which more than half are people of Indian descent. Georgetown is the capital. As a result of a new constitution, British Guiana attained internal self-government in 1961.

The bulk of the Indian settlers are sugar workers, cane farmers or rice growers and in recent years some have made good progress in professions and in business.

Entry is through a permit against a deposit of S.W.I. 2,000 issued for limited periods. Temporary visitors and tourists with the exception of the citizens of U.S.A., are required to be in possession of a valid passport and visas.

For remittance of money prior approval of the Government is necessary.

## BURMA

Burma was a province of India till 1937 April when it was given a separate constitution. In 1931 the Indian population was reported to be over one million, but consequent upon the Japanese occupation of Burma in 1942, about 4 lakhs of Indians left Burma for India. After the liberation of Burma many did not return to that country in view of the changed conditions in Burma and some have also been leaving Burma for India gradually ever since the latter attained her independence in 1947. The present population of Indians in Burma is estimated to be about 5 lakhs.

Indians in Burma are mainly agricultural, dock and casual labourers and petty traders. Some Indians were also formerly engaged in wholesale import business as also some were big landowners. Ever since the "Land Nationalisation Scheme" introduced in Burma, however, the big Indian landowner class has been eliminated and those in the wholesale import business have also been adversely affected since 1960 with the Burmanisation of the Agency business by the Government of the Union of Burma in that year. Since 1st October 1962 no foreign national is permitted to import licensed or OGL goods even through a Burmese commission agent.

With the introduction of the Burmanisation policy, no foreigner is now allowed to buy any property nor can any property be transferred to any foreigner. Non-nationals in Government service are also being gradually replaced by nationals. The policy of Burmanisation and socialisation is being carried out by the Revolstionary Government at a fast pace. From 1st January, 1964, all foreign doctors practising in Burma were deregistered. The majority of doctors affected are Indians. All Banking business, import-export, wholesale and considerable part of retail trading and other business have been nationalised throwing a large number of Indians out of employment. Consequently, large numbers of Indians of all classes, are returning to India. During 1964, about 60,000 Indians returned from Burma to India, most of them on chartered vessels. Those Indians who leave are not allowed to repatriate their assets.

Under the Union of Burma Citizenship Act of 1955, an alien can become a Burmese citizen by naturalisation after fulfilling certain requirements of a minimum stay in that country. All adult foreigners in Burma require to take out a Foreigner's Registration Certificate for which a fee of K. 50 per annum is charged and, in addition, all such foreigners who are not entitled to the right of permanent stay in the country also need stay permits for which they have to pay K. 100 per annum.

## CANADA

The Government of India and the Government of Canada have entered into a modified Agreement regarding the immigration of Indians into Canada in partial modification of the Agreement of 1951 under which the Government of Canada had agreed to admit annually 150 Indian citizens into Canada. The modified Agreement came into effect on the 1st of January, 1957.

Under the modified Agreement, the Canadian Government have agreed to increase the annual quota of immigrants from India from 150 to 300. Of these 300 immigrants, 150 will be "ordinary quota" immigrants and 150 will be "preference quota" immigrants. Relatives of Indians who have permanently settled in Canada or who have acquired Canadian citizenship will be admissible into Canada as "preference quota" immigrants while other applicants will be admissible under the "ordinary quota". It may be noted that "close relatives" of all those who have become Canadian citizens will be admitted into Canada as non-quota immigrants.

A "relative" means the husband, wife, son, daughter, brother, sister (or the husband, wife or unmarried child under twenty-one years of age of any such son, daughter, brother or sister), father, mother, grandparent, unmarried orphan nephew or niece under twenty-one years of age, fiance or fiancee.

A "close relative" means the husband, wife, unmarried child under twenty-one years of age, father over sixty-five years of age, or mother over sixty years of age.

Applications from prospective immigrants to Canada from India should be addressed to The Canadian Immigration Attache, Office of the High Commissioner for Canada, 13, Golf Links, New Delhi 3.

Indian residents of Canada are largely comprised of labourers employed in lumbering and trucking. There are a few lumber mill owners, and some are working as clerks in various establishments. A good number can also be termed professionals, technicians and highly skilled workers. The majority of Indians are in British Columbia. A good many today go on to industrial centres like Montreal and Toronto. The Indian community is called the "East Indian Community".

Any person admitted to Canada as an immigrant might become a citizen of Canada after five years' continuous residence there. There is no legislation in Canada, federal or provincial which discriminates against any group of citizens on grounds of national origin, race, language or religion.

There are no disabilities on Indians in the matter of owning property, engaging in trade or profession, entering Government service or residence in any locality. In 1952, one Indian was elected to a Municipal Council.

Indians can remit to India any amount earned in Canada.

Figures of Indians arriving in Canada; 1957 : 324 ; 1958 : 451 ; 1959 : 716 ; 1960 : 673 : 1961 : 744 ; 1962 : 725 ; 1963 : 846 ; 1964 : 1,295.

## CEYLON

Out of a total of about 9 lakh persons of Indian origin in Ceylon, about 8 lakhs (labourers, subordinate staff, etc.) are in the tea, rubber and coconut estates. The balance is made up of merchants, shop assistants, land proprietors, and professional men such as doctors, accountants, lawyers and their families.

There is no restriction on Indians acquiring property in Ceylon, but non-Ceylonese are not allotted Crown Land. Trade in certain commodities and with certain countries like Japan and Germany is exclusively reserved for Ceylonese enterprise. Certain rights like fishing rights and the ownership of industries like public transport (omnibuses) are restricted to Ceylonese. Government service is restricted to Ceylonese except that foreigners are appointed on a contract basis when no qualified or suitable Ceylonese is available. Consequently Indians who have not acquired Ceylon citizenship have severe handicaps. Indians are also denied certain privileges such as National Insurance and unemployment relief.

The rights of Indians to citizenship are governed by two Acts enacted in 1948 after a discussion between the Indian and Ceylonese Prime Ministers. These Acts are the Ceylon Citizenship Act and the Indian and Pakistani Residents (Citizenship) Act, which provide that the Indian residents in Ceylon would be entitled to obtain the citizenship of Ceylon by registration subject to the following conditions : (*a*) an applicant must be resident in Ceylon when the laws came into force and must have been residing in Ceylon since January 1, 1936 if a bachelor and since January 1, 1939 if a married man, (*b*) he must have adequate means of livelihood, (*c*) he should be in a position to comply with the laws and customs of Ceylon, and (*d*) the application for registration was filed and submitted to the Controller of Registration before August 5, 1951.

An Agreement was entered into in January 1954 between the Government of India and the Government of Ceylon regarding the citizenship rights of persons of Indian origin in Ceylon. Under this Agreement the Government of Ceylon agreed to expedite the registration of citizens under the Indian and Pakistani (Citizenship) Act and to make every endeavour to complete the disposal of pending applications within two years.

The total number of applicants for Ceylon citizenship is estimated to be about 900,000.

Out of these, about 1,34,000 persons have till the end of Jan. 1965, been registered as Ceylon citizens. The applications of the rest have either been rejected or withdrawn.

At the end of 1954 the Government of Ceylon started implementing its policy of Ceylonization in the course of which a large number of persons holding Temporary Residence Permits of all nationalities had their periods of stay curtailed. In the result some Indians were faced with the prospect of leaving the country.

With effect from Sept., 1960, non-nationals have been subjected to taxes for residence and business registration. All non-nationals holding visas for residence in Ceylon for periods exceeding 3 months are required to pay a tax of Rs. 400.

In April, 1955, the Government of Ceylon amended the Immigrants and Emigrants Act of 1948. One of the amendments brought about was that in the case of a person who is alleged to have committed the offence of illegal entry into Ceylon, the onus of establishing the contrary, in any prosecution launched in the case, would devolve on the accused. Yet another amendment rendered the employment of persons resident in Ceylon illegally, a punitive offence on the part of the employers of such persons. A further amendment to the Immigrants and Emigrants Act, 1948, has recently been passed by the Ceylon Parliament giving wide powers to the armed forces to arrest persons on suspicion of being illicit immigrants and providing for more severe punishment for employing, transporting and harbouring them.

About 1,20,000 Indian nationals had left Ceylon either voluntarily or because of non-renewal of their visas upto the end of March, 1965 as a result of Ceylonisation programme of the Government of Ceylon.

The Prime Ministers of India and Ceylon met at Delhi in Oct. 1964 and reached an agreement regarding the future of the "stateless" persons of Indian origin resident in Ceylon, estimated at 9,75,000. According to the agreement, 3,00,000 persons will be granted Ceylonese citizenship. 5,25,000 persons will be granted Indian citizenship and repatriated to India. The future of the remaining 1,50,000 persons has been left to be determined at a subsequent meeting between the two Prime Ministers. The process of the grant of Ceylonese and Indian citizenships and repatriation of the Indian citizens is to be completed over a period of 15 years ending Oct. 30, 1979.

Officials of the two countries met once in Dec. 1964 to set up a joint committee and formulate procedures for the implementation of the agreement. Details of the procedure etc. are under consideration (June 1965).

About the Ceylonization of business firms, all firms (including Indian firms) are permitted to retain personnel, who are considered essential, technically qualified etc., and that in non-essential categories of employment, Ceylonization should take place. This scheme of Ceylonization envisages departmental action to promote the appointment of Ceylonese nationals to executive posts in the private sector. The number of such persons who have or who are likely to secure executive posts in Indian establishments however is very small. The present scheme of Ceylonisation is to be revised shortly (June 1965).

A non-national leaving Ceylon can repatriate Rs. 1·5 lakhs in the case of those other than Indians and Rs. 75,000 for Indians. The exchange tax on remittance would be doubled from 10 per cent to 20 per cent and the only exemption from such tax is retirement funds.

## EAST AFRICA

Though immigration is not disallowed the scope is now greatly limited.

The former Colonies and Protectorates which had comprised British East Africa are now all independent countries — Kenya, Uganda, Tanganyika and Zanzibar.

In April 1964, Tanganyika and Zanzibar joined in a political union and are now known as Tanzania.

Asians in East Africa number approximately 4,46,000 and mostly concentrated in urban centres of Kenya, Uganda and Tanzania.

The Kenya highlands are now open to non-European farmers on a free seller-buyer basis and under the Land Settlement Scheme, non-Europeans, specially Africans, have rapidly settled in the area. Finance for this large undertaking of land settlement is coming mainly from the U.K.

The well-to-do Asian is, on the whole, inclined to imitate the European pattern of living and behaviour. The ostentatious style of living of some of the richer Asians excites African jealousy. The Asian skilled workers in Kenya earn much higher wages than their counterparts in India. Due to the policy of Africanisation adopted by the Governments of East African countries, non-Africans in Government Departments are being prematurely retired from service. Similarly, in petty trade in the smaller towns, the Africans are coming into the field and threatening to replace the Asians completely, but the Asian trader on the whole continues to strive to retain his place in the economic pattern of these countries.

## ETHIOPIA

Emigration to Ethiopia is neither restricted nor entirely free. Each case is judged on its merits, and there is no quota.

Foreigners who wish to start new industries or go into farming are given special encouragement.

There are no constitutional, legal or any other disabilities specifically on Indian residents. Some Indians own landed property and have been living in Ethiopia for half a century, and are whole-heartedly accepted by the people.

Under the Civil Code of the Empire of Ethiopia, which came into effect from Sept. 11, 1960, some restrictions have been placed on the ownership of immovable property by foreigners.

No foreigner may own immovable property situated in Ethiopia except in accordance with an Imperial Order. Any foreigner who is found to own immovable property in good faith but does not hold such immovable property in accordance with an Imperial Order shall be required by the competent authority to dispose of such property to an Ethiopian within six months. Failure to dispose of such property will result in the property being seized and sold by the competent authority. The foreigner will get only 80 per cent of the sale proceeds, 20 per cent being deducted as penalty and expenses of sale. Ten per cent only will be deducted if the foreigner acquired the property by succession.

Remittances from Ethiopia to India by Indians are restricted and regulated by rules according to which anybody who is for more than six years in Ethiopia can remit only family expenses for near relatives on the basis of affidavits from India.

There is no restriction for grant of foreign exchange for importing goods.

There are nearly 3,500 Indian residents in Ethiopia. Most of them are business men from the Gujarat and Saurashtra regions of India. Almost all of them are well-to-do and are engaged in trade specially in the import of textiles. Besides, there are about 300 Indian teachers. However, due to India losing her textile market in Ethiopia due to local manufacturers etc., Indian traders have taken to imports of diversified items and also exports of coffee etc. Besides, there are over 400 Indian teachers who have been recruited by the Ethiopian Government to further the cause of education. Some Indians are engaged also as Advisers to various Ministries for example, Municipality, Commerce, Social Welfare, Community Development, Agriculture, Customs. There are also a few Indians working as International Civil Servants in the Economic Commission for Africa whose headquarters are at Addis Ababa.

The Indo-Ethiopian Textiles S. A. started with 13,000 spindles and 300 automatic looms in 1960. Now this mill is having 35,000 spindles and 750 automatic looms and an up-to-date plant for the dyeing and finishing machineries.

Thus, within a short period of three years' time, the company trebled its production capacity and it is the biggest textile unit of Ethiopia. Its present production capacity is : Yarn—14·5 million lbs. per year ; cloth—31·4 million yards per year ; blankets—2,10,000 pieces per year.

About 4,000 people are employed in the factory.

Messrs. Birla Brothers, Calcutta have taken over the management of Baar Dar Textile Mills.

Local Indian residents in Ethiopia had been generously contributing from time to time for charitable purposes. In 1955 they constructed a hospital named as Gandhi Memorial Hospital and was presented to the Emperor.

There is a team of two Indian Army officers headed by a Brigadier who function as Advisers to the Imperial Bodyguard and are on deputation.

## FIJI

Immigration into Fiji is limited by the provisions of a special ordinance for Control of Immigration which came into force from June 15, 1962.

In general, permits to land and reside permanently in Fiji will be granted only to the following :—(*a*) farmers and planters if they have already acquired a property in the Colony of not less than 100 acres, three-quarters of which are productive land ; (*b*) professional men and women with recognised qualifications who intend to practise their profession in the colony (no permit to a teacher will be issued unless his entry is recommended by the Director of Education) ; (*c*) ministers of religion ; (*d*) persons entering the colony under contracts of employment with local firms or undertakings, who have commercial or technical skills for which there is need in the colony and which are unobtainable locally ; (*e*) persons who satisfy the Principal Immigration Officer that they have an assured income, that they will not become a charge on public funds.

Permits to enter and reside in the colony for a period not exceeding six months will be issued to the following :—

(*a*) Persons who are employed outside the colony by local firms or undertakings and who are transferred to the Colony ; (*b*) persons entering the colony for or under medical treatment ; (*c*) skilled tradesmen, miners and persons entering the Colony under short-term contracts of employment with public statutory corporations or public local authorities or with local agricultural or commercial undertakings, including trading banks, if there is a reasonable demand for the services of the persons concerned and this demand cannot be met satisfactorily locally, or the applicant is indispensable to the person or body employing him.

Absence from Fiji for a period or periods amounting in all to more than 18 months forfeits residential status of persons who have resided in the colony for a period exceeding not less than seven years.

The people of Indian descent numbered about 2,05,060 out of a total population of 4,13,872, according to the published census figures of 1961.

The immigration of indentured labourers from India started in 1879. Between this year and 1916, when sponsored immigration virtually ceased, some 40,000 to 50,000 Indians were introduced into the Colony, only a small proportion of whom returned to India at the expiration of their contract period. In 1911, there were 43,000 Indians, in 1936 85,000, in 1956 there were 169,403 ; and by the end of 1958 there were 184,090. In 1945, people of Indian origin outnumbered the native Fijians for the first time and their numerical superiority is maintained and is becoming more marked each year.

About the turn of the century, Indians began to assume the role of independent farmers, which completely altered their position in the Colony, and paved the way for further economic progress. Indians today represent by far the greatest proportion of cane farmers while some cultivate cane on freehold properties, or on lands leased from Fijian landlords. Many are tenant farmers of the Colonial Sugar Refining Company under an arrangement whereby the Company makes its lands available to selected tenants for the cultivation of sugarcane.

Although in competition with a more recent arrival—the Chinese—Indians now practically monopolize the Colony's retail trade while the tailoring and footwear businesses are almost entirely in the hands of Bombay craftsmen. The land transport trade—the ownership of public buses and taxis—is another field which Indians dominate.

As more and more Indian students return from overseas each year after obtaining higher academic or professional qualifications, more and more enter the professional ranks including civil service, law, medicine and dentistry.

The Indian community does not suffer from any political or legal disabilities. However, the only major economic disability which affects them is the existing land laws which make it almost impossible for an Indian to acquire land.

When the chiefs of Fiji ceded the Territory to Britain, a condition of the cession was that the land rights of the Fijians should be protected. But as the Indian population grows its demand for land also increases.

New constitutional changes were announced towards the end of 1961. They provide for a greatly enlarged franchise which give the vote to almost every literate adult in the colony who is over 21 years of age. The franchise is on a racial basis—Europeans, Fijians and Indians. (Indians in Fiji have franchise both in respect of legislature and the local bodies.)

Following the order enacted by the Privy Council making changes in the Constitution of Fiji. Fijian Legislative Council was dissolved on 1st March, 1963 and a General Election was held in 1963.

The salient features of the new Constitution are : (*a*) Provision for the Offices of the Governor and the Speaker ; (*b*) Setting up of an Executive Council ; and (*c*) A Legislative Council.

The Legislative Council is to consist of not more than 19 official members and 18 unofficial members — Europeans 6, Fijians 6 and Indians 6. Of the unofficial members, 4 Europeans, 4 Fijians and 4 Indians are to be directly elected on separate racial rolls and 2 Europeans and 2 Indians to be nominated by the Governor. Two Fijians are chosen by the Council of Chiefs voting by secret ballot.

The Executive Council under the order, consist of three ex-officio members, the Colonial Secretary, the Attorney-General, and the Financial Secretary and members to be appointed by the Governor.

There are no restrictions on the remittance of money from Fiji to the countries in the sterling area (except Canada). Money may not be sent outside the sterling area without a permit from the Controller of Foreign Exchange.

## INDONESIA

Migration of foreigners into Indonesia is banned.

Under the law, there are no constitutional, legal or any other disabilities from which Indian residents, as such, suffer. They are not discriminated against and are treated on par with other foreign residents.

Remittance facilities which were previously available to foreigners are now restricted. The Foreign Exchange Control Organisation of Indonesia, faced with extreme difficulties, is exceedingly strict about granting exchange facilities even for those who desire to close their concerns here and repatriate themselves and their capital to their native lands.

The economic condition of Indians here is fairly good. They mostly deal in textiles and sports goods, although a fair number of Indians in parts of Sumatra live off the land and run small dairies etc.

### MALAYSIA*

The Federation of MALAYSIA came into existence on Sept. 16. 1963. This new nation was formed by the merger of independent MALAYA with its neighbour SINGAPORE and with two former British Colonies of SARAWAK and NORTH BORNEO (now renamed SABAH). The estimated total population of Indians and Pakistanis was 9,55,000 in 1961.

The labouring and non-labouring classes of Indians may be roughly estimated at 70 per cent and 30 per cent respectively of the entire Indian population, the former employed in rubber and tin estates and the latter either employed in the clerical ranks of the various Govt. departments, mercantile firms and banks, rubber estates and oil palm plantations etc., or employed in business, trade and other professions like law and medicine.

The Indian trading community is composed of Chettiars, Gujaratis (both Hindus and Muslims), Sindhis, South Indian Muslims (both from Tamil Nad and Malabar) and a few Sikhs.

Indians do not suffer from any special disabilities. They are eligible for citizenship of the Federation of Malaysia if they fulfil the prescribed conditions.

### MAURITIUS

Mauritius is a British Colony. It is an Island in the Indian Ocean approximately 720 sq. miles in area situated about 500 miles off the centre of the East Coast of Madagascar and is practically in the tropic of the Capricorn.

People of Indian origin in Mauritius form about 67 per cent of the total population of 7,27,381 as on Oct. 31, 1964. This population is mainly composed of descendants of "Indentured" labourers from Bihar, Madras, U.P., but there is a sprinkling of traders from Gujarat and Maharashtra. These people have been settled here for generation and are now known as "Indo-Mauritians". Between 35 to 40 per cent of the agricultural land in Mauritius is owned by these Indo-Mauritians. A large number of them are farm labourers in sugar plantation. The rest are engaged in commerce and trade or professions or Government service.

Indo-Mauritians are coming into their own and on the whole their economic and social conditions compare favourably with people of Indian origin in other Colonies.

Immigration of foreigners for the purpose of settling down is not normally allowed. Only in exceptional circumstances when there is a dearth of skilled hands in a particular trade or profession, foreigners are allowed to enter and stay here for a specified period. For this, they have to obtain an offer of employment from a Mauritian employer and Entry Permit from the Government of Mauritius. In such cases, wherever necessary, immigrant should be able to deposit Rs. 1,000 on entry into the Colony. There is, however, no restriction for tourists or visitors or businessmen coming to Mauritius for *bona fide* purposes for a period of six months or so.

### NEW ZEALAND

Entry into New Zealand is controlled under a permit system, exemption being provided, broadly speaking, only for New Zealand citizens and persons of United Kingdom descent. There is no quota system.

The applications from Indians for permanent entry have been approved at the rate of approximately 100 applications per annum over the past few years. Most of those approved have been submitted on behalf of wives and minor children of Indians already resident in New Zealand.

There are some 2,600 Indians at present resident in New Zealand, mainly Gujaratis and Punjabis. The size of the community is, however, steadily increasing. At the moment 13 per cent are under five years of age and 27 per cent under 16 years of age. The greater part of the Indian community is concentrated in the main urban centres, where for the most part they are engaged in small businesses such as grocery stores, importing houses or restaurants. Others, however, are employed in industry and in clerical work and the professions.

There is no differentiation between Indians and other residents of New Zealand and their economic condition would not therefore vary from the economic condition of other residents engaged in similar trades or occupations.

Indians enjoy the right to vote in Parliamentary and Municipal elections and do not suffer from any political, legal or other disability.

Remittances made by all New Zealand residents (including Indians) from New Zealand are subject to exchange control. The maximum amount permitted varies according to the purpose of the remittance and the currency area concerned. The maximum amount normally approved for remittance to India for maintenance purposes in any one year is £240.

### PHILIPPINES

The suspension of Indian immigration into the Philippines was lifted on October 15, 1962. Henceforth, subject to compliance with prescribed requirements, Indian nationals may be admitted to the Philippines as immigrants under an annual quota not exceeding 50 for each calendar year.

In January 1962 foreign exchange control regulations were abrogated and there is now complete decontrol on foreign exchange transactions.

In 1961, in cooperation with other countries in the area, it was declared by Presidential Order that issuance of tourist visas for the Philippines should be greatly facilitated.

Indian nationals as well as other nationals may pass through the Philippines in transit even without a visa and will be permitted to stay for three (3) days or seventy-two (72) hours provided, however, that the traveller has a confirmed ticket for continuous passage to the country of destination.

Indian applicants for temporary visitors' visas, except government officials and seamen, must execute an affidavit affirming whether or not they have close relatives in the Philippines. Close relatives means mother, father, sister or brother. A copy of the affidavit is to be attached to each copy of the application.

### PORTUGUESE EAST AFRICA

In Portuguese East Africa there is no colour bar as such.

Immediately after the liberation of Goa, Daman and Diu in December 1961, the Portuguese Govt. adopted a hostile attitude towards persons of Indian origin, particularly towards Indian nationals resident in Portuguese territories. Early in 1962, about 2,200 Indian nationals resident in Mozambique were summarily interned, their properly sealed and their bank accounts frozen. In accordance with an Agreement reached between the Governments of India and Portugal, these Indian nationals were released on 13th May 1962. They were however required to quit the Portuguese territory at short notice. 98 per cent of the Indian nationals returned to India in 1963. They were allowed to bring with them a limited amount of cash and personal effects. Their moveable and immoveable property has been liquidated by an Official Commission appointed for the purpose. The Agreement reached between the Govts. of India and Portugal provided for the repatriation of sale proceeds of all assets of Indian nationals. The Portuguese authorities have not only adopted arbitrary methods to liquidate the assets of Indian nationals but have also made the repatriation of these assets dependent upon the availability of foreign exchange over a period of three years failing which these assets are to lapse to the State. The Govt. of India have protested to the Portuguese Government against these flagrant violations of the Agreement between the two Governments.

### RHODESIA AND NYASALAND

The Federation of Rhodesia and Nyasaland consisting of the territories of Southern Rhodesia, Northern Rhodesia and Nyasaland, founded in September, 1963, was dissolved on the mid-night of 31st December, 1963. The three territories namely, Southern Rhodesia, Northern Rhodesia and Nyasaland became separate Units from the mid-night of 31st December, 1963.

After the elections, African Governments came into power both in Nyasaland and Northern Rhodesia. As was announced earlier, Nyasaland became independent on the sixth of July 1964, and this country is now known as Malawi. Northern Rhodesia became independent on Oct. 24, 1964 under the name of Zambia.

Southern Rhodesia has an elected Parliament. The new Southern Rhodesia constitution came into effect from 1st November, 1962. The Queen of England is represented in Southern Rhodesia by the Governor there. The Southern Rhodesia Government is also demanding complete independence, but the majority community largely unrepresented in the Parliament is against the granting of independence to the minority government. The latter is pressing for one man, one vote, as a criterion, for election to the parliament.

The colour bar in Northern Rhodesia and Nyasaland has been completely eliminated. In Southern Rhodesia it still exists.

The population of Indians has not been shown separately in any of these countries. The Asian population in Southern Rhodesia is 7,100, in Northern Rhodesia it is 7,900 and in Nyasaland it is 10,700. The majority of the Asian population say (90 per cent) are of Indian origin. Most of them are engaged in trade and commerce except in Nyasaland where 150 to 200 persons are employed in the Railways there. There is no Indian labour as such in these countries. People of Indian origin are generally well off financially.

At present all these countries follow the immigration policy of the former Federation and immigration is selective and the people mostly needed are professional hands like the skilled workers, doctors, nurses and teachers. The Ministers of religion and wives and minor children of the persons already settled here are admitted. There is, however, no place for the immigrant who is classed as a labourer.

Remittance of capital out of these countries at present is subject to compliance with the provisions of the Foreign Exchange Regulations brought into force early in 1961.

### SAUDI ARABIA

The Immigration Law in Saudi Arabia to regulate the entry of nationals of other countries is very strict and the Saudi Government grants Saudi nationality to the foreigners with great difficulty and only in exceptional cases.

No foreigner is permitted to have any business or trade of his own except under the Foreign Investment Regulation in which he is permitted to hold a minority share, subject to other conditions. Every foreigner is required to have a Residence Permit. There are restrictions and for doing any work, a work permit is necessary.

* Singapore came out from the Federation in Aug. 1965.

There is no restriction on remittances sent from here to any part of the world, except Israel, and the foreign exchange position of this country is very stable.

Over 3,000 Indians reside in Saudi Arabia out of which about 500 alone are employed with the Arabian American oil company on contract basis in different capacities.

There is a systematic move to replace the foreigners, including Indians, whose contracts expire, by Saudi nationals.

## SOUTH AFRICA

Persons of Indian origin in South Africa numbering about half a million are mostly labourers, traders, small farmers, factory workers, and a small number of professionals. Ninety per cent of them were born in South Africa.

Racial discrimination against Indians exists in South Africa in every walk of life and in the worst possible form. Persons of Indian origin are practically excluded from parliamentary and provincial franchise as well as from public services except in menial and subordinate posts.

"Apartheid" or racial segregation is the declared policy of the South African Government. In accordance with this policy Indians are subject to a number of restrictions as regards immigration, inter-provincial travel and migration, residence, trade, industry, professional and other occupations. Racial segregation is also enforced in schools, post offices, railways, public transport, hotels, churches, social and religious gatherings and public utility undertakings.

The South African Government has abandoned its earlier policy of repatriation on which it had hitherto pinned its faith as a solution to the Indian "problem".They have now created a Ministry of Indian Affairs. All matters pertaining to Indians are being dealt with by this Ministry. The Minister of Indian Affairs, Mr. W. A. Maree, also announced his Government's plan for the future development of persons of Indian origin which was to be implemented as follows: (*a*) creation of temporary local consultative committees, (*b*) local committees to elect consultative committees; the formation of an (Indian) Advisory Council. The council (according to the Minister) would gradually be given powers to make decisions on matters which affected the Indian community. The Indians, like the Coloureds, would also have their own municipalities and town councils as their residential areas were demarcated and developed in terms of group-areas legislation.

The Group Areas Act which was originally enacted in 1950 has been amended several times since then. The chief sufferers under the Act continued to be the Indian property owners in Natal, Transvaal and the Cape Province. Already, some of them have had to vacate their homes and many more have been given notice to look for residence in their own group areas —many of them are old established communities having their traditional homes in these areas for several generations.

Three "Tribal" University Colleges for Africans (Fort Hare, Turfloop and Ngeya), one for the Coloured people (Western Cape) and one for the Indians (Salisbury Island) were established early in 1961.

Indians have been declared prohibited immigrants since 1913, but the right of entry into the Union of wives and children of Indians domiciled in South Africa was provided for in the Reciprocity Resolution passed at the Imperial Conference of 1918 and later in the Cape Town Agreement of 1927. Under an Act passed in 1953, the South African Government banned the entry into South Africa of the wives and children of persons of Indian origin domiciled in South Africa. But certain specified categories of wives and children of persons of Indian origin were allowed to enter South Africa till 10th February 1956.

Practically all Indians domiciled in South Africa are South African citizens by law, but they are denied some of the most important rights of citizenship.

Indians have no franchise rights in the Provinces of Natal, Transvaal and the Orange Free State. In the Cape Province they enjoy limited franchise rights as for Cape Coloureds.

Indians are not eligible to a place in the Executive Council or Legislature, whether provincial or central.

There is no special limit to remittances by Indians to India.

The Government of India has been foremost in opposing in the United Nations, from its inception, the policies of racial discrimination of South Africa. Numerous resolutions have since been passed by the United Nations condemning their policies and urging South Africa to change them. The Government of South Africa have, however, not only refused to comply with the provisions of those resolutions, but have also persistently violated the principles and provisions of the Charter of the United Nations and the Declaration of Human Rights.

As the Government of South Africa continued to ignore repeated United Nations resolutions, the General Assembly urged the Member States to impose diplomatic and economic sanctions against South Africa, during its 17th Session in 1962 (Resolution No. 1761 (XVII) of 6th November 1962). The Government of India, who withdrew their High Commissioner from South Africa in 1946, have fully implemented this Resolution by breaking diplomatic relation, closing their ports to South African vessels, banning trade with South Africa, refusing landing and passage facilities to South African aircraft etc., etc.

South Africa has persistently refused to accept the numerous resolutions passed by the U.N. urging it to give up its policies of racial discrimination. As a result of pressure exerted by the Commonwealth of Nations, the Government of South Africa withdraw therefrom on May 31, 1961, rather than give up apartheid.

## SUDAN

There are about 3,000 Indians in the Sudan. The Indian Community is mostly in trade of textiles, tea, jute goods, essential oils, gum arabic and dura. Almost all these traders come from Gujarat State and continue maintaining their ties with the motherland.

There are about seventy Indians working under the Government of Sudan on contract basis — a few of them are experts from the United Nations.

The Indian community in the Sudan on the whole is well off. Their relations with the people and the Government are quite good.

Further immigration into Sudan for business or private employment is not allowed. Remittances are governed by exchange control regulations.

## SURINAM

Surinam is an autonomous part of the kingdom of the Netherlands which was formerly known as Dutch Guiana.

There are 93,000 Indians in a total population of 302,000. They form the second largest group.

The Indian community has made rapid economic progress, especially during the last 25-30 years. In medium-size enterprises they already have a strong economic position. Indians are mainly engaged in agriculture, business and trade. The majority of Indians are sugar estate workers or cane farmers.

Hindi is widely spoken and understood.

Migration into Surinam is controlled. Entry permits are issued to technically trained personnel in the interest of national economy. A deposit of Rs. 1,250 as "Show Money" has to be made by every immigrant. There is no quota system and applications are considered on an *ad hoc* basis.

There are no constitutional, legal or any other disabilities on Indian immigrants.

## TANZANIA

There are some 90,000 Indians living in Tanzania including about 5,000 Goans and about 35,000 Muslims. They are mostly engaged in wholesale and retail trade, manufacturing industries, Public Services etc. After independence, however, scope for further employment in Government services has decreased due to Africanisation policy of the Government. Similarly due to encouragement of co-operative societies, marketing boards etc. further participation in wholesale and retail trade is also restricted. The Indians are keeping intimate contacts with India in educational, cultural and economic fields and with restricted opportunities at present for employment in Public Service and economic fields are returning to India in increasing numbers with a view to permanent settlement. As entry to educational institutions is not easily avilable for non-citizens, Indians have to send their children to India for further education. As, however, Government encourages establishment of manufacturing industries, there are sufficient opportunities for foreign capital and technical know-how to take increased share in this sphere. The existence of a foreign investors guarantees bill is a particularly welcome measure to attract foreign investors in this field. East Africa including Tanzania is by and large a free competitive market and there is no exchange control operating at present. If the proposed East African Federation comes about bringing close political union between the three East African territories, there is good scope for Indians to start small scale and medium industries in a growing economy.

The position of Indians in Zanzibar is not very happy. Nationalisation of houses, farms, factories, export and import trade, restriction in sending savings out of the country, denial of educational facilities and various other restrictive practices have made the life of Indians very difficult and many have already left the islands for India during the past year.

## THAILAND

The annual quota is 200 and the selection is made by the Government's Immigration Division in Bangkok.

No discrimination against the Indian population prevails in Thailand.

Remittances out of the country are controlled by the Bank of Thailand's rules and regulations.

## UGANDA

At the time of 1959 Census, there were 63,130 persons of Indian origin, 5,973 Pakistanis and 2,830 Goans.In mid-1962, the total number of Asians in Uganda was 79,900. The persons of Indian origin are predominantly Hindu, but there is also a substantial and influential religious minority of Muslims; Sikhs and Parsees are also to be found. The majority of Indian settlers come from the Gujarat and Saurashtra. Gujarati is the language spoken by them, even by the Muslims. There are some settlers from the Punjab and Maharashtra also.

Apart from the Indian settlers who are mainly in business, there are Indians who are employed as teachers, doctors, nurses, engineers, etc., with the Uganda Government on contract or permanent terms.

The Indian community in Uganda on the whole is fairly well-off.

Entry into Uganda is strictly regulated through entry passes and further immigration is not allowed.

Temporary employment passes for a limited period are issued for skilled personnel to be brought from Indian for employment in the concerns owned by the people of Indian origin.

Besides yearly scholarships awarded to Uganda students, the Government of India have also extended facilities in training of Ugandan Community Development Officers as well as other technical personnel in India at the expense of the Government of India.

### U.S.A.

The U.S.A. has fixed a quota of 100.

There are certain categories of aliens who are excludable under Section 212 of the Immigration and Nationality Act. These exclusions apply to both immigrants and non-immigrants, though there are exceptions and certain discretionary powers are vested in the Attorney-General and the Secretary of State.

The following classes broadly among others are excluded : feeble-minded, insane, mentally defective, drug addicts, chronic alcoholics, those with dangerous contagious diseases like leprosy, or convicted for crimes involving moral turpitude, polygamists, anarchists, those who advocate or teach or are broadly associated with communism or those who attempt to overthrow by violence the government of U.S.A.

There are a variety of requirements which must be met before an immigration visa can be issued. The first is the registration of the intending immigrant on the quota waiting list at a diplomatic or consular office of the United States. These offices are located in New Delhi, Bombay, Calcutta and Madras within India.

Within each quota there are four preference categories which may be stated briefly as follows : First Preference—Immigrants possessing special skills or training and their spouses and children. Second Preference—Parents and unmarried sons and daughters (over 21 years of age) of American citizens. Third Preference—Spouses and children of aliens admitted to the United States for permanent residence. Fourth Preference—Brothers, sisters, and married sons and daughters of American citizens.

Parenthetically, it may be stated that the spouses and children (who are both unmarried and under age 21) of American citizens are admitted on a non-quota basis. For the above preference categories, as well as for non-quota immigrants, petitions must be filed with and be approved by, the Attorney General of the United States.

In the annual allocation of a quota, the law requires that 50 per cent be allocated to the first preference, 30 per cent to second preference and 20 per cent be allocated to third preference. If any quota numbers are unused in the preference categories, they are used to satisfy shortages in first, second or third preference. It is only after all demands for first, second and third preference have been filled that numbers are available for fourth preference and non-preference categories. Of these remaining numbers, 50 per cent are allocated to fourth preference and 50 per cent to non-preference. It must be emphasized that under the Indian quota, the demands for first, second, and third preference have been so high that no numbers have been allocated to fourth preference and non-preference for several years. At present, there are waiting lists also for first and third preference on the Indian quota.

An immigrant, regardless of race, colour or creed, admitted into the United States as a permanent resident alien is eligible for American citizenship, if he fulfils the residence and other requirements laid down in the Immigration and Nationality Act of 1952, as amended.

There are no restrictions on the remittance of American funds abroad.

### THE WEST INDIES

TRINIDAD AND TOBAGO : Trinidad and Tobago attained independence within the Commonwealth on 31st August, 1962. Its capital is Port of Spain. The number of persons of Indian origin is the largest in Trinidad and Tobago. The total area of Trinidad and Tobago is 1,980 sq. miles and the population is 827,927 of which people of Indian descent number about 3,01,946.

The bulk of the people of Indian descent work on agriculture farms, industrial estates and in business houses. They play an important role in the economy of the country. The majority of the departmental stores, petrol stations and taxi stands are owned by people of Indian descent.

Entry into the country is through permits, issued initially for limited periods against cash deposits.

No visa is required for the Commonwealth citizens.

JAMAICA : Jamaica attained independence within the Commonwealth on 6th August, 1962. Its capital is Kingston. The total area of Jamaica is 4,411 sq. miles and the population is 1,685,178 out of which Indians number over 30,000 who are mainly agriculturists.

A bulk of the people of Indian descent are agriculturists.

Entry into the country is through work permits which are issued very sparingly.

BARBADOS : Its capital is Bridgetown. The total area is 166 sq. miles and its population is 232,100. There are a few Indians numbering about 400, majority of whom own dry goods stores.

There are no restrictions for remittances to soft currency areas. Immigration is controlled through a system of work permits.

---

# BHOODAN

The position of the Bhoodan Yagna Movement upto 31st March 1965 is shown in the table below.

Since Gramdan (the whole cultivable land in the village to be donated to the Gram Sabha) proved to be an advanced stage of Bhoodan, the Akhil Bharat Sarva Seva Sangh, by its resolution, gave a call to the country to concentrate on Gramdan. At the same time new items of Sarvodaya Patra and Shanti Sena have been added to consolidate the Gramdan Movement. Due to the above programmes the work of distribution of land was slackened.

The headquarters of the movement are at Akhil Bharat Sarva Seva Sangh, Rajghat, Kashi, Varanasi (U.P.).

# SOME ALL INDIA CORPORATIONS

## AGRICULTURAL REFINANCE CORPORATION

Amar Building, P.B. No. 363, Bombay-1.

The Agricultural Refinance Corporation, a Statutory body established by an Act of Parliament, started functioning from 1st July 1963.

**Authorised Capital :**—Rs. 25 crores divided into 25 000 shares of Rs. 10,000 each.

**Subscribed Capital :**—Rs. 5 crores consisting of 5,000 shares of Rs. 10,000 each. The 5,000 shares were subscribed in the following manner: Reserve Bank 2,955, Central land mortgage banks and State Co-operative banks 1,355 and Scheduled banks, L.I.C., Insurance and investment companies 690.

The shares of the Corporation have been guaranteed by the Central Government both in regard to repayment of the principal and payment of a minimum annual dividend which has been fixed at 4½ per cent. for the first issue. They are treated as trustee securities and also as approved securities for the purpose of the Insurance Act, 1938 and the Banking Companies' Act, 1949. The Government of India has provided an interest-free loan of Rs. 5 crores, the repayment of which will commence after 15 years from the date of the loan. Thus the total resources immediately available for investment in long and medium-term projects are of the order of Rs. 10 crores.

**Objects :**—The Agricultural Refinance Corporation is primarily a refinancing agency and its object is to help augmentation of the resources available for provision of medium-term and long-term finance for agriculture. The Corporation is expected to provide financial accommodation of a medium-term or long-term nature to the various special schemes which cannot be financed by the existing credit agencies either on account of the volume of funds involved or the terms and conditions of repayment or because the projects are such as cannot be brought within the normal rules of business under which the land mortgage banks are functioning.

**Institutions Eligible for Financial Assistance :**—Such of those State co-operative banks, Co-operative Central land mortgage banks and scheduled banks as are shareholders of the Corporation have been made eligible for financial assistance from the Corporation. In exceptional cases, *i.e.*, where a loan for financing any particular activity is considered necessary or desirable but cannot for one reason or another be granted through an institution eligible for being refinanced by the Corporation, co-operative societies (other than State co-operative banks and central land mortgage banks) may be financed direct even though they are not shareholders of the Corporation, provided such societies are approved by the Reserve Bank for the purpose.

**Security :**—The refinance facilities from the Corporation will be available to an eligible institution only if the concerned Government guarantees the repayment of principal and payment of interest on the loans.

A decision was taken by the 'Board' in July 1964 that in cases where the State Government guarantee cannot be obtained, security in the form of sub-mortgage, sub-hypothecation, subpledge, etc. of land, plant, machinery, etc. mortgaged, hypothecated or pledged in favour of the scheduled banks by the planters should be accepted for refinance to be provided by the Corporation to such scheduled banks having good reputation and sound financial position.

**Schemes to be drawn up :**—Every State is expected to come forward with carefully prepared schemes of agricultural development, plantations, dairy farming, etc. The schemes should be businesslike, commercially paying and economic in content, but should not be departmental schemes taken up by the Governments in the normal course of their activity.

**Loans Sanctioned :**—The Corporation has so far sanctioned 5 schemes of reclamation and development of land in the states of Andhra Pradesh, Madras and Maharashtra covering a total of 5·97 lakh acres and involving a total financial outlay of Rs. 2,260 lakhs. Besides these, one scheme for development of coconut plantation in 2,000 acres in Orissa State involving a financial outlay of Rs. 32 lakhs and another for development of orchards in 1,000 acres in Madhya Pradesh involving a financial outlay of Rs. 10 lakhs have also been sanctioned. The Corporation has also under consideration some other schemes for agricultural development received from various States.

**Board of Directors :**—M. R. Bhide, Deputy Governor, Reserve Bank of India (*Chairman*); P. D. Kasbekar, S. Chakravarti, R. K. Seshadri, Prof. D. R. Gadgil, B. K. Dutt, Udaibhansinhji and V. Sivaraman (*Managing Director*); Dr. M. V. Hate (*Secretary*): T. S. K. Chari (*Deputy Secretary*).

## CEMENT CORPORATION OF INDIA LTD.

(A Govt. of India Undertaking)
Udyog Bhawan,
New Delhi.

The Cement Corporation of India was registered under the Indian Companies Act in 1965 as a wholly owned Government of India Undertaking under the Ministry of Industry & Supply.

The Corporation has set up a Limestone Investigation Division which has started detailed investigations and proving of cement grade limestone at several sites. As soon as these investigations are completed the Corporation will be in a position to determine the location of its factories.

The Corporation is charged with the responsibility of installing additional capacity of producing 5 million tonnes of cement annually as soon as possible and at the latest by the end of the Fourth Plan in 1970–71.

The Corporation will also undertake surveying, prospecting and proving of cement grade limestone deposits in the country and all other ancillary and supporting activities connected with the growth and expansion of the cement industry. The data collected by the Corporation will be available for the use of the private entrepreneurs as well as the State Governments.

The Corporation is exploring the possibility of placing orders for the manufacture of its cement plants with the indigenous cement machinery manufacturing industries. There are also plans for two large sized plants with annual capacity of one million tonnes each to be imported from abroad by utilising the foreign aid made available by friendly countries.

The Board of Directors include three non-officials and six officials nominated by the Government of India.

*Chairman* :—Dr. B. V. Keskar; *Managing Director* :—H. V. Narayana Rao; *Financial Advisor & Director* :—Shiv Naubh Singh.

## CENTRAL ROAD TRANSPORT CORPORATION LIMITED

11, Rabindra Sarani,
Calcutta 1.

The Corporation was incorporated on 6th March, 1964 with an authorised capital of Rs. 2 crores divided into 2 lakhs equity shares of Rs. 100 each. All the shares are to be held by the President of India or his nominees. The State Governments have also been invited for participation.

The main function of this Corporation is to supplement the transport capacity by road on inter-state routes in India, specially the eastern sector of the country. The Corporation has a fleet of about 100 Leyland Comet trucks which was expected to rise to 150 by March, 1965. The trucks of the Corporation are at present plying on Calcutta-North Bengal-Assam and Calcutta-Delhi routes. The activities are expected to be extended to Delhi-Bombay, Calcutta-Bombay and Delhi-Kashmir inter-state routes shortly. The Corporation also books traffic between Calcutta and Assam through river-cum-road routes, i.e., through river steamer companies upto Gauhati and beyond Gauhati by road.

The gross mileage operated by the trucks of the Corporation from 6th March to 31st December, 1964 was over 15½ lakhs.

*Board of Directors:*—P. C. Mathew (*Chairman*); A. S. Bhatnagar, R. S. Krishnan, V. P. Ahuja, A. K. Mazumdar (*Managing Director*).

## CENTRAL WAREHOUSING CORPORATION

(A Govt. of India Undertaking)

G-10, New Delhi South Extension Part II,
New Delhi 16.

The Central Warehousing Corporation which was initially constituted by the Government of India on 2nd March, 1957, started functioning only in July of that year. The Corporation was reconstituted with effect from 18th March, 1963, under New Act—the Warehousing Corporation Act, 1962.

The main aims and objects of the warehousing scheme are :—

(*i*) To help storage of agricultural produce and other commodities as are declared to be "Notified Commodities" by the Central Government under Entry 33 of the concurrent list of the Seventh Schedule of the constitution by notification in the Government Gazette, on modern scientific lines so as to avoid loss due to dampness, pests, etc. and

(*ii*) To assist the depositor to secure cheap credit, avoid distress selling and sell his produce as and when the market is favourable to him.

The notified commodities referred to in para (*i*) will include essential Civil Supplies such as cement, steel, textiles, leather and rubber goods, coir and coir goods etc.

**Functions :**—The functions of the Corporation as provided in the new Act are :—(*a*) acquire and build godowns and warehouses at such suitable places in India as it thinks fit ; (*b*) run warehouses for the storage of agricultural produce, seeds, manures, fertilizers, agricultural implements and notified commodities offered by individuals, co-operative societies and other institutions ; (*c*) arrange facilities for the transport of agricultural produce, seeds, manures, fertilizers, agricultural implements and notified commodities to and from warehouses ; (*d*) subscribe to the share capital of a State Warehousing Corporation ; (*e*) act as agent of the Government for the purposes of the purchase, sale, storage and distribution of agricultural produce, seeds, manures. fertilisers, agricultural implements and notified commodities ; and (*f*) carry out such other functions as may be prescribed.

**Share Capital :**—The authorised capital of the C.W.C. is Rs. 20 crores divided into two hundred thousand shares of the face value of one thousand rupees each. Of this authorised capital, half was issued in the first instance in June, 1957, of which 59,522 shares have been subscribed for upto end of March, 1964. 90 per cent of the share capital issued at any time is subscribed for by the Government and the remaining 10 per cent is subscribed for by the following institutions :—(*a*) the State Bank ; (*b*) other schedule banks ; (*c*) co-operative societies ; (*d*) insurance companies, investment trusts and other financial institutions ; (*e*) recognised associations and companies dealing in agricultural produce or any notified commodity.

**Warehousing Facility :**—The Corporation had, by end of March 1964, 85 warehouses

(including two warehouses started mainly for the storage of jute purchased by S.T.C. under the "Price Support Scheme" of the Government of India) in hired accommodation with a total storage capacity of 1·78 lakh tons. The stocks at the end of March 1964 stood at 0·94 lakh tons and the percentage of occupancy of warehouses was 53. About 110 types of commodities were handled at these warehouses.

Side by side along with the opening of warehouses in hired accommodation, construction works were also taken up. By end of March 1964, the total built up capacity owned by the Corporation was 66,700 tons.

**Credit Facility** :—The various scheduled banks make advances against the pledge of warehouse receipts issued at the warehouses. These advances are made up to 60 per cent of the value of the goods and bear interest at about ½ to 1 per cent less than the usual lending rate.

The total outstanding advances against the pledge of warehouse receipts issued by the Central & State warehouses was over Rs. 11 crores as at the end of March, 1964. The advances had gone up to about Rs. 14 crores during the year.

**General** :—The C.W.C. conducts training courses for warehousemen and Technical Assistants in which intensive training (both theoretical and practical) is given on the various aspects of warehousing business and other connected matters. By end of March 1965, 827 candidates were trained by the C.W.C.

The Corporation has undertaken construction of godowns for special commodities like sugar, jaggery, fertilizers, coffee etc. which cannot be stored in ordinary godowns.

**State Corporations** :—The State Governments have with the approval of the Central Warehousing Corporation established a Warehousing Corporation in each State. The C.W.C. subscribes 50 per cent of the share capital of each S.W.C.

The 14 S. W. C. had, by the end of March 1964, set up 429 warehouses, 93 sub-warehouses and a cold storage with a total storage capacity of 4,68,823 tons.

*Mg. Director :* C. S. Ramachandran.

## DEPOSIT INSURANCE CORPORATION

113, Clive Road, Masjid Bunder,
P. Bag No. 5127, Bombay 9.

The Deposit Insurance Corporation was established on the 1st of January 1962 by an Act of Parliament.

The Corporation has been set up with the object of giving a measure of protection to depositors, in particular small depositors, from the risk of loss of their deposits in the event of a bank's inability to meet its liability.

Every functioning commercial bank covered by the Banking Corporation Act, 1949 is registered as an insured bank with the Corporation and all its depositors (except Central and State Governments, Foreign Governments and Banking Companies) get the protection afforded by the Corporation. The Corporation provides insurance to the extent of Rs. 1,500 in respect of each depositor. The limit is in respect of the total amount held by a depositor in all his deposit accounts in the same right and capacity with an insurer bank at its offices in India.

The Corporation's liability in respect of insured deposits arises in the event of liquidation, reconstruction or amalgamation of a bank. When a bank goes into liquidation, the Corporation arranges to pay to every depositor directly or through the liquidator the amount due to him under the insurance scheme. If a bank is reconstructed or amalgamated with another bank and the scheme of reconstruction or amalgamation does not entitle the depositor to get credit for the amount of his deposit on the date on which the scheme comes into force, the Corporation arranges to pay to each depositor of the reconstructed bank or the amalgamated bank such amount in respect of his deposit which together with the credit afforded as above would enable the depositor to get the amount due to him under the insurance scheme.

The insured banks are required to pay to the Corporation a premium on their deposits at the rate of 5 paise for every one hundred rupees per annum. The amount of premium received from banks from time to time is held in the Deposit Insurance Fund which is exclusively utilised for payment of the claims of the depositors.

The Corporation has a capital of Rs. one crore which is held by the Reserve Bank of India.

*Board of Directors :* P. C. Bhattacharyya (*Chairman*); *Directors :* C. S. Divekar; R. K. Seshadri (officer of the Central Government); S. N. Desai and G. S. Diwan (both nominated by the Central Government in consultation with the Reserve Bank); *Manager :* Mangesh S. Nadkarni.

## EXPORT CREDIT & GUARANTEE CORPORATION LTD.

(A Government of India Concern.)
4, Rampart Row, Bombay 1.

The Exports Risks Insurance Corporation which started functioning in October, 1957, was transformed into the Export Credit and Guarantee Corporation Ltd. (E.C.G.C.) with effect from January 15, 1964. The main object of the Corporation is to facilitate the growth of India's Export trade by providing insurance cover to Indian exporters and furnishing various kinds of guarantees to banks with a view to assisting Indian exports to get credit facilities necessary for expanding their export trade.

The authorised capital of the Corporation is Rs. 5 crores of which Rs. 2 crores are to be paid up.

During the year 1964, the Corporation issued 1,142 policies as against 725 in 1963. The value of risks covered by the Corporation during the year amounted to Rs. 34·50 crores. Exporters were able to obtain pre-shipment advances from the banks to the extent of Rs. 17·68 crores with the help of the Packing Credit Guarantee.

By the assignment of policies the policy holders obtained post-shipment finance amounting to Rs. 4·21 crores; and the post-shipment guarantees helped exporters to raise Rs. 0·11 crores at the post-shipment level.

The Corporation paid claims of the value of Rs. 1·75 lakhs during the year 1964 as against Rs. 6·51 lakhs during the previous year. The premium income in 1964 amounted to Rs. 8·93 lakhs against Rs. 6·47 lakhs in 1963.

*Chairman :* B. R. Patel, I.C.S.; *Mg. Director :* C. M. Ghorpade; *Secy. :* Baldev Mehta.

## THE FILM FINANCE CORPORATION LTD.

"White House", 91, Walkeshwar Road,
Bombay 6.

The Corporation was established in 1960 mainly with the object of providing finance for the production of good quality films in the country.

The authorised capital of the Corporation is Rs. one crore. The issued and paid up capital is Rs. 50 lakhs. This is wholly subscribed by the Central Government.

To supplement this capital an amount of Rs. 25 lakhs has been received by the Corporation by way of loan from the Government. In addition to this, Rs. 40 lakhs have been provided in the Central Budget for 1965–66 by way of loans to the Corporation.

The net profit of the Corporation which amounted to Rs. 0·27 lakhs in 1961-62, and Rs. 1·65 lakhs in 1962-63 rose to Rs. 2·58 lakhs in 1963-64.

The Corporation has built up reserves totalling Rs. 1·73 lakhs.

The total loans sanctioned upto March 31, 1965 amounted to Rs. 1,21,64,485 of which a sum of Rs. 80,77,474 has been disbursed. The loans and advances outstanding on that date aggregated to Rs. 54,94,655.

The number of applications received and sanctioned in 1964–65 were 10 and 8 respectively. The total amount involved was Rs. 32,38,500 and Rs. 22,19,000 respectively. Nine applications which were accepted involving a sum of Rs. 20,61,500 were withdrawn/cancelled in 1964–65. The number of applications received and sanctioned from inception till 31st March 1965 is 124 including 67 for Hindi films and 41 respectively.

Eighty applications for a sum of Rs. 2,45,11,910 lakhs were rejected in full or part and three applications involving a sum of Rs. 10,91,000 lakhs were under consideration.

Fifteen pictures have been released upto March 1965. Loans disbursed to them amount to Rs. 38,47,326. Out of these 15 producers, five have paid back the loans with interest amounting to Rs. 17,04,000. Of the remaining, the amount recovered so far amounts to Rs. 25,52,753. Out of the 15 pictures, 6 have won different awards in India and abroad.

*Hon. Chairman :* M. D. Bhat.
*General Manager :* V. C. Desai.

## THE FOOD CORPORATION OF INDIA

1/144, Mount Road, Madras 6.

The Food Corporation of India was established under an Act of Parliament, the Food Corporations Act, 1964 (37 of 1964), with effect from 1st January 1965.

The head office of the Corporation is at Madras. Four Regional offices of the Corporation have been set up one each at Hyderabad in Andhra Pradesh State, Bangalore in Mysore State, Thanjavur in Madras State and Trivandrum in Kerala State. District offices are also being set up in about 30 important centres in these States.

The capital of the Corporation will not exceed Rupees one hundred crores. The equity capital provided by the Central Government to the Corporation for the last quarter of 1964–65 is Rs. 4 crores. The loan capital provided to the Corporation for the same period is Rs. 11 crores.

The board of directors of the Corporation consists of (*a*) Chairman, (*b*) three directors representing Ministries of the Central Government dealing with (*i*) Food, (*ii*) Finance and (*iii*) Co-operation, (*c*) the Managing Director of the Central Warehousing Corporation (ex-officio); (*d*) a Managing Director and (*e*) six other directors.

T. A. Pai (*Chairman*); B. N. Adarkar, Additional Secretary, Ministry of Finance.; N. P. Chatterji, Joint Seeretary, Ministry of Community Development and Co-operation; Prof. D. R. Gadgil; Dr. (Mrs.) Kamla Chowdhry; Krishan Chand, Additional Secretary, Ministry of Food & Agriculture.

C. Narasimham (*Managing Director*); C. S. Ramachandran, Managing Director, Central Warehousing Corporation (*Ex-officio Director*); Satwant Singh; B. K. Shah; P. L. Tandon; T. A. Verghese.

The main functions of the Corporation as provided in the Act are to undertake the purchase, storage, movement, transport, distribution and sale of foodgrains and other foodstuffs.

With effect from the 1st April, 1965, the Food Corporation of India has taken over post-procurement operations in respect of paddy and rice procured in the Southern States of Madras, Andhra Pradesh and Mysore on account of the Central Government. It has also embarked upon direct purchase operations in the Mysore State.

It has also taken over the distribution of wheat products in the States of Andhra Pradesh, Madras, Mysore and Kerala with effect from 1st April 1965.

The Food Corporation of India may lend or advance money to any person engaged in the production of foodgrains upon the security of foodgrains or such other security as may be prescribed, for any purpose connected with such production.

## THE HANDICRAFTS & HANDLOOMS EXPORTS CORPORATION OF INDIA LIMITED

Lok Kalyan Bhavan,
11A, Rouse Avenue Lane, New Delhi 1.

The Indian Handicrafts Development Corporation set up in 1958 was formed into a subsidiary of the State Trading Corporation of India Limited and its name changed to "The Handicrafts and Handlooms Exports Corporation of India Ltd." in June 1962. Later in the year the Handloom Export Organisation was merged with the Handicrafts and Handlooms Exports Corporation of India Ltd. bringing in 'Handlooms' also within the scope of its operations.

Some of the important activities of the Corporation being: (*i*) Participation in exhibitions, Trade Fairs in foreign countries; (*ii*) Import and distribution of essential raw materials to artisans, manufacturers/exporters; (*iii*) Provision of credit facilities to the exporters on easy terms for execution of export orders; (*iv*) Publicity and market surveys in foreign countries; (*v*) Distribution of samples abroad; (*vi*) Establishment of selling agencies; (*vii*) Organising production for execution of export orders within stipulated delivery periods; (*viii*) Development of new designs suitable for export markets, etc. The Corporation also undertakes direct exports of handicrafts and handloom goods, with the main object of introducing new items and exploring new markets.

The authorised share capital of the Corporation is Rs. 1 crore, divided into 100,000 equity shares of Rs. 100 each. The subscribed capital as on the 31st March, 1965, was Rs. 40,00,000 which has been entirely subscribed to by the State Trading Corporation of India Limited.

*Board of Directors:* B. P. Patel, I.C.S. (*Chairman*); Pupul Jayakar, K. P. U. Menon, I.A.S., Kitty Shiva Rao, L. C. Jain, M. L. Kala, I.A.A.S., S. P. S. Sondhi, I.A.A.S. (*Secretary*).

## INDIAN MOTION PICTURES EXPORT CORPORATION LTD.

(Registered Office)

Harchandrai House, 1st Floor, 81, Queen's Road, Bombay 1.

The Corporation was registered as a Public Limited Company under the Companies Act, 1956, on 19th September 1963, with an authorised share capital of Rs. 10 lakhs divided into 10,000 shares of Rs. 100 each (later raised to Rs. 25 lakhs). It is proposed to issue the entire capital. The State Trading Corporation of India Ltd. has agreed to subscribe one-third of the capital of the Corporation.

The Corporation is primarily intended as a trading body. However, in addition to its trading activities it also performs the functions of the Export Promotion Organisation in the interest of increasing the export of Indian films to the traditional markets and exploration of new markets for Indian films. Furthermore, the Corporation has been empowered to execute agreements with foreign organisations for the import or export of films.

Gupta, Joint Secretary, Ministry of Works; S. N. Chib, Director-General of Tourism; a representative of the Ministry of Finance.

## THE INDUSTRIAL CREDIT & INVESTMENT CORPORATION OF INDIA LTD.

163, Backbay Reclamation, Bombay 1.

**The Corporation was established in 1955 with the object of assisting industrial enterprises in the private sector by providing finance in the form of long or medium-term loans or equity participations, sponsoring and underwriting new issues of shares and securities, guaranteeing loans from other private investment sources, furnishing managerial, technical and administrative advice to Indian industry.**

**The authorised capital of the Corporation is Rs. 25 crores and paid-up capital Rs. 5 crores in five lakhs Ordinary Shares of Rs. 100** each. Of this, Rs. 3·5 crores are taken up in India; Rs. 2 crores by Indian banks, insurance companies, various Directors of ICICI and their friends and associates, and Rs. 1·5 crores which was oversubscribed by the U.K. and American subscribers — Rs. 1 crore and Rs. 0·50 crore respectively.

**The Government of India have advanced to** the Corporation a loan of Rs. 7·5 crores and two Government loans aggregating Rs. 20 crores from P.L. 480 funds. In addition to the 5 foreign exchange loans from the World Bank totalling U.S. $90 million, the Corporation is negotiating the 6th line of credit of U.S. $50 million making the total world bank lending U.S. $140 million. The Agency for International Development advanced in 1960 a loan of U.S. $5 million. Four lines of credit aggregating DM40 million have been obtained from Kreditanstalt Fur Wiederanban of West Germany.

The Tenth Annual Report for the year ending December 31, 1964, disclosed that the Corporation sanctioned financial assistance to 88 companies for a total of Rs. 2,266 lakhs (gross): Rupee assistance in the form of loans, underwriting of and direct subscriptions to Ordinary and Preference Shares and Debentures amounting to Rs. 1,134 lakhs to 38 companies and foreign currency loans for the equivalent of Rs. 1,132 lakhs to 61 companies. Ten underwriting operations were completed for a total amount of Rs. 182 lakhs.

The accounts for the year ended December 31, 1964, disclosed a net profit of Rs. 69,09,761, which together with the amount of Rs. 3,58,347 brought forward from the previous year making a total of Rs. 72,97,647. Out of this sum Rs. 17,50,000 have been appropriated to special Reserve and Rs. 14,00,000 to General Reserve, declaring a dividend of 7½ per cent subject to tax absorbing Rs. 37,50,000 and leaving a balance of Rs. 3,97,647 to be carried forward to the next year.

*Directors:* G. L. Mehta (*Chairman*), Dr. Sir Arcot Ramaswami Mudaliar, Kasturbhai Lalbhai, Dharamsey Mulraj Khatau, W. G. Pullen, K. K. Birla, D. P. Goenka, N. A. Palkivala, B. K. Datta, L. J. Mulkern, D. C. B. Pilkington, S. Ranganathan (Government Director), J. Russell (Alternate Director for W. G. Pullen), C. B. Thomas (Alternate Director for L. J. Mulkern).

*General Manager:* H. T. Parekh.

## INDUSTRIAL DEVELOPMENT BANK OF INDIA

Post Box No. 1241,
Reserve Bank Building, Bombay 1.

The Industrial Development Bank of India (IDBI) was set up in July 1964, under a special statute, viz. Industrial Development Bank of India Act, 1964. It is both an apex institution, co-ordinating the operations of banks and other financial institutions providing term finance to industry, and an agency providing direct financial assistance by filling in the gaps that exist after taking into account the assistance available from other institutions. It has been conceived as a financing as also a developmental agency to locate and fill gaps in the industrial structure. A wholly owned subsidiary of the Reserve Bank of India, the Industrial Development Bank of India has been endowed with adequate resources potential and operational flexibility.

*Authorised Capital:* Rs. 50 crores (this may be raised to Rs. 100 crores by the Reserve Bank of India with the prior approval of Central Government).

*Issued Capital:* Rs. 10 crores.

This is supplemented by an interest free loan of Rs. 10 crores from the Central Government repayable in 15 equal annual instalments after a period of fifteen years from the date of the loan. Apart from this initial loan, the Central Government may also grant further loans on the usual terms and conditions. These can be further augmented through sale of its bonds and debentures with or without Government guarantee and acceptance of deposits from the public for periods of not less than 12 months on terms and conditions approved by the Reserve Bank of India. The IDBI may also have recourse to loans from the Reserve Bank of India. Normal banking accommodation for periods upto 90 days will be available to it against trustee securities. It will also be entitled to advances for periods of upto five years on the security of bonafide commercial bills or promissory notes bearing two good signatures. It is also entitled to borrow on long term from a fund, established under section 46(6) of the Reserve Bank of India Act, called the National Industrial Credit (Long-term Operations) Fund. Apart from these, the Development Bank may also acquire resources by borrowing from other sources with Government approval, including amounts in foreign currency from institutions in foreign countries.

The operations of IDBI can broadly be divided into two groups: (*i*) direct assistance to industrial concerns in the form of loans, subscribing to or underwriting of issues of shares and bonds and guaranteeing of loans and deferred payments either on its own or in participation with other institutions, and (*ii*) assistance to specified financial institutions by subscribing to their shares and bonds and refinancing of loans granted by them to industrial concerns. The financial institutions eligible for such assistance comprise commercial banks, state co-operative banks, the Industrial Finance Corporation of India, State Financial Corporations including the Madras Industrial Investment Corporation Ltd. and any other financial institution which may be notified by the Central Government.

During the nine months' period from July 1 1964 to March 31, 1965 the IDBI sanctioned 18 applications for underwriting of shares involving commitments of Rs. 3·08 crores, comprising Rs. 2·29 crores of equity and Rs. 0·79 crore of preference shares. Out of the above commitments, ordinary shares of Rs. 30·75 lakhs and preference shares of Rs. 5·42 lakhs had devolved on the

IDBI, of which Rs. 14·88 lakhs and Rs. 2·09 lakhs, respectively, were actually disbursed by the end of March 1965. Loans sanctioned during the period aggregated Rs. 46·25 lakhs in respect of two industrial concerns and a guarantee of Rs. 1 crore was agreed to be provided to one concern. No loan was actually disbursed nor the guarantee sanctioned executed during the period ended March 30, 1965. Effective March 5, 1965 the lending rate of IDBI is 8 per cent with a penalty charge of ½ per cent for defaults.

The IDBI took over the business of the Refinance Corporation for Industry Ltd. on September 1, 1964. The IDBI now operates all the three schemes of RCI *viz.* (*i*) refinancing of industrial loans, (*ii*) refinancing of export credit and (*iii*) the Government of India's scheme for the guarantee of advances made by specified financial institutions to colliery units in the private sector.

As regards the assistance provided under the refinancing scheme, a sum of Rs. 22·7 crores was sanctioned during the period between 1st April 1964 and 31st March 1965 to all eligible institutions in respect of 125 applications. The total disbursements of refinance during the year was Rs. 21·2 crores. Since the inception of RCI in June 1958 upto the end of March 1965, 694 applications for refinance for Rs. 106·1 crores were received, of which 491 applications for Rs. 77·6 crores were sanctioned. Disbursements amounted to Rs. 54·2 crores, of which a sum of Rs. 45·2 crores was outstanding as on 31st March 1965. The lending rate of IDBI for refinance was raised from 5½ per cent to 6½ per cent with effect from 5th March 1965.

Under the provision of sub-section 1 (*b*) of section 9 of IDBI Act, 1964, IDBI introduced a scheme on the 1st of April, 1965 under which bills/promissory notes drawn in favour of the machinery manufacturers may be discounted with banks and other financial institutions approved by the IDBI. The approved institutions include 59 commercial banks, the Industrial Credit and Investment Corporation of India Ltd. and the Madras Industrial Investment Corporation Ltd. These institutions in turn can avail of rediscounting facilities from the Development Bank at a rate to be fixed from time to time, the present rediscounting rate being 6½ per cent per annum. The scheme covers deferred payment arrangements for a minimum period of six months and of maximum period of five years.

*Chairman :* P. C. Bhattacharyya ; *Vice-Chairman :* Dr. B. K. Madan ; *General Manager :* K. C. Mittra ; *Economic Adviser and Deputy General Manager :* S. L. N. Simha ; *Deputy General Manager :* P. K. Dasgupta ; *Legal Adviser :* B. N. Mehta.

## THE INDUSTRIAL FINANCE CORPORATION OF INDIA†

(*Head Office :* Reserve Bank Building, 6, Parliament Street, New Delhi ; *Bombay Office :* Liberty Buildings, 8, Marine Lines ; *Calcutta Office :* 23, Rajinderanath Mukherjee Road ; *Madras Office :* Keshav Bagh, 88, Whites Road, Royapettah).

*Authorised Capital :* Rs. 10 crores ; *Issued and Paid-up Capital :* Rs. 8.34 crores.

*Board of Directors :* A. Baksi (*Chairman*), C. H. Bhabha, Charat Ram, R. M. Deshmukh, Bar-at-law, Dhiren Mitra, B. K. Dutt, M. V. Mathur, V. G. Pendharkar, P. S. Rajagopal Naidu, S. Ranganathan, I.C.S., S. D. Srinivasan, S. R. Vasavada, M. R. Yardi, I.C.S. ; D. R. Madhok (*General Manager*) ; C. A. Subrahmanyam (*Secretary*) ; S. T. Karnik (*Comptroller*).

Profit and Loss account for the year ended 30th June, 1964 : Interest Discount, Commission etc. Rs. 507·28 lakhs ; Total expenses : Rs. 280·22 lakhs ; Provision for taxation : Rs. 101·62 lakhs ; Net Profit : Rs. 125·44 lakhs.

The Industrial Finance Corporation was established in 1948 under the Industrial Finance Corporation Act of 1948 (XV of 1948), with the object of supplying Indian industries with medium and long term capital. The Corporation is authorised to carry on and transact the following kinds of business, *viz.*, (a) Guaranteeing: (*i*) Loans raised by industrial concerns which are repayable within a period not exceeding twenty-five years, and are floated in the public market, (*ii*) Loans raised by industrial concerns from scheduled banks or State Cooperative Banks ; (b) Guaranteeing deferred payments due from any industrial concern. (*i*) In connection with its import of capital goods from outside India, or (*ii*) In connection with its purchase of capital goods within India ; (c) Guaranteeing, loans raised from, or credit arrangements made with, any bank or financial institution in any country outside India by Industrial concerns in foreign currency ; (d) Underwriting the issue of stock, shares, bonds or debentures by industrial concerns ; (e) Acting as agent for the Central Government or with its approval, for the International Bank for Reconstruction and Development in the transaction of any business with an industrial concern in respect of loans and advances granted or debentures subscribed, by either of them ; (f) Subscribing to the stock or shares of any industrial concern ; (g) Granting loans or advances to, or subscribing to debentures of, industrial concerns, repayable within a period not exceeding twenty-five years from the date on which they are granted or subscribed to as the case may be.

Total assistance sanctioned, by the I.F.C. upto 30th June, 1964 is Rs. 196·78 crores in respect of 599 applications out of which assistance to the extent of Rs. 124·45 crores had been disbursed. Amount sanctioned (gross) in 1963-64 was Rs. 38·27 crores.

The rate of interest charged is 7½ per cent per annum, with a rebate of ½ per cent per annum for punctual payment of instalments of principal and interest. The rate of interest charged during the year on the foreign currency loans (sanctioned out of dollar credit), was 8½ per cent per annum less a rebate of ½ per cent per annum for punctual payment of instalments of principal and interest (net 7¾ per cent per annum) plus an extra ¼ per cent per annum to provide for incidental expenses. The rate of interest on the foreign currency loans (sanctioned out of the credits in French Francs and Deutsche Marks) has been fixed at 8½ per cent per annum less a rebate of ½ per cent per annum for punctual payment of instalments of principal and interest i.e. net 8 per cent per annum.

During 1963-64, 123 applications aggregating an amount of Rs. 38·27 crores were sanctioned. In all 188 applications for financial assistance for an aggregate amount of Rs. 5,884·77 lakhs were received during the year ended the 30th June, 1964.

At the close of the year, 109 applications for Rs. 3,976·75 lakhs were under examination. The pending applications include applications for U.S. Dollars, West German (D.M.) and Francs (France) Sub-loans. During 1963-64, assistance disbursed was Rs. 21·88 crores. During the previous year a sum of Rs. 22·43 crores was disbursed. The gross income of the Corporation in 1963-64 was Rs. 507·28 lakhs as against Rs. 394·72 lakhs in the previous year. The gross profit subject to the provisions of taxation was Rs. 227·06 lakhs as against Rs. 167·62 lakhs for the previous year. The net profit during 1963-64 amounted to Rs. 125·44 lakhs.

## THE MINERALS & METALS TRADING CORPORATION OF INDIA LTD.

**Express Bldg., 9/10, Mathura Road, New Delhi-1.**

**Incorporated : 26-9-1963.**

**Authorised capital : Rs. 5 crores of 5,00,000 equity shares of Rs. 100 each. Subscribed capital Rs. 2 crores of 2,00,000 equity shares of Rs. 100 each.**

Bhandari (*Manganese and other ores and Barter and Links*) ; *Financial Adviser :* A. N. Kaul ; *Regional Managers :* R. J. T. D'Mello (Calcutta) ; A. P. Sharma (Madras) ; G. K. Warrier (Bombay) ; B. C. Banerjee (Vizag.) ; C. R. Das (Goa) ; *Bankers :* The State Bank of India.

## NATIONAL BUILDINGS CONSTRUCTION CORPORATION LIMITED

**44, Ring Road, Lajpat Nagar III, Post Box No. 3044, New Delhi-14.**

**The National Buildings Construction Corporation Ltd., was set up in November, 1960, as a Government Company under the Companies Act 1956, under the aegis of the Ministry of W.H.&R.* with the principal objectives of reducing the cost of construction and improving the quality of work in the building industry. The Corporation primarily undertakes construction works of the Central and State Governments as well as of public sector undertakings through open competitive tenders. It also undertakes Government works through negotiations when private contractors either do not tender or quote unreasonably high rates.**

**The authorised capital of the Corporation is Rs. 2 crores divided into 20,000 equity shares of Rs. 1,000 each. The paid-up capital on April 1, 1965, was Rs. 117·00 lakhs which was entirely subscribed by the Central Government. The shares of the Corporation are not open for subscription by the general public.**

**Works have been taken up at various stations such as Delhi, Bailadilla, Bangalore, Madras, Pondicherry, Tiruchirapalli, Bombay, Calcutta, Durgapur, Ranchi, Imphal, Namrup, Changlong (NEFA) and Bhopal on behalf of the Central and State Governments and Government undertakings and autonomous organisations such as the C.P.W.D., P.W.D. of the Govts. of Mysore and M.P., Indian Institute of Technology, Madras and Delhi, Heavy Electricals (I) Ltd., Bhopal, etc.**

**The Corporation has three chief Regional Managers at Bangalore, Delhi, Calcutta. Regional Managers are located at Delhi, Bhopal and Durgapur. A Planning Cell with a Planning Engineer at the Head has also been set up at the headquarters office to prepare tenders for the works.**

## NATIONAL COAL DEVELOPMENT CORPORATION LTD.

**Darbhanga House, Ranchi.**

**The National Coal Development Corporation was registered under the Indian Companies Act in September 1956, with an authorised capital of Rs. 50,00,00,000, divided into 5,00,000 equity shares of Rs. 1,000 each. The total investment in the N.C.D.C. stands at over Rs. 110 crores as on June 30, 1965. It is a Government of India undertaking under the Ministry of Steel and Mines.**

* Now split into the Ministry of Works and Housing and Ministry of Rehabilitation.

† See Late Particulars for more upto date figures.

The Corporation was brought into existence in pursuance of the Second Five Year Plan objective of expanding the public sector of the Coal Industry. Eleven former Railway Collieries with a total production rate of 2·9 million tons a year were handed over to the Corporation. It produced 8·96 million tons of coal and earned a profit of Rs. 19·54 lakhs during 1963-64.

During the Second Plan period the Corporation had developed 10 new collieries. During the Third Five Year Plan, the N.C.D.C. took up development of several new collieries, mostly in Madhya Pradesh, Maharashtra and Orissa and as a result of its operations N.C.D.C. now owns about 20 revenue collieries and 38 new projects. The most important of N.C.D.C. activities has been the opening of deep shaft mines for producing coking coal in the Central Jharia coalfields (Dhanbad, Bihar) with Polish collaboration. The N.C.D.C. expect to produce about 14 million tonnes of coking coal by the end of the Fourth Plan.

The N.C.D.C. is at present operating one coal washery at Kargali, which is under expansion and constructing two others at Kathara and Gidi in Hazaribagh district. Arrangements are complete for starting the work on the construction of the fourth coal washery at Sawang, also in Hazaribagh (Bihar). The biggest of N.C.D.C.'s coal washeries on completion will be that of Kathara being erected with Russian collaboration. It will have a capacity of washing 3 million tonnes of coal annually and will cost Rs. 8 crores. It is expected to be completed by the end of the Third Plan.

The N.C.D.C. has set up a net-work of large mechanised mines in Madhya Pradesh, Maharashtra and Orissa, which has been a great contributing factor to the industrial development of many backward areas in these regions. N.C.D.C. is one of the largest employers in the country with about 68,000 workers and staff on its pay roll.

The Board of Directors include both government officials and non-officials nominated by the Government of India.

*Chairman :* S. Lall ; *Managing Director :* S. T. Raja ; *Financial Controller :* Rajkumar ; *Deputy General Manager (Technical) :* S. C. Dey.

## NATIONAL CO-OPERATIVE DEVELOPMENT CORPORATION

C56, South Extn. II, New Delhi-16.

The N.C.D. Corporation which was set up by the Central Government under the National Co-operative Development Corporation Act, 1962, started functioning from 14th March 1963.

The Corporation consists of 20 members with Mr. S. K. Dey, Minister of Community Development and Co-operation and B. S. Moorthy, Deputy Minister in charge of Co-operation, Ministry of C.D. & C., as Chairman and Vice-Chairman respectively.

The Corporation is a composite organisation representing non-official co-operative opinion as well as a cross-section of institutions interested in the development of the co-operative movement. The Ministry of Community Development and Co-operation, Planning Commission, Ministry of Finance and certain other Ministries closely connected with the co-operative movement as well as the Central Social Welfare Board are represented on the Corporation. Representation has also been given to the Central Warehousing Corporation so that a link between co-operative marketing and warehousing could be maintained. The new Corporation is to play an important role in planning, promoting and assisting programmes for production, processing, marketing, storage, export and import of agricultural produce and notified commodities through co-operative societies. The Corporation will have Functional Committees to study various problems in greater depth and detail so that greater emphasis on co-operative development in various sectors, particularly credit, marketing and processing, rural supplies and storage and consumers co-operatives could be given. In addition to non-official co-operators, Members of Parliament, etc. are also appointed to these Committees. The Corporation will promote and assist national and inter-State co-operative federations and is also expected to take a positive interest in promoting co-operation in allied fields like milk production, marketing and processing of fish and animal husbandry products.

The Corporation receives funds from the Government of India both as loans and grants. The loans are being utilised for disbursing loans to State Governments, while the grants are being utilised for giving grants to State Governments as well as for meeting the administrative expenses of the Corporation. The Corporation is being subsidised by the Government of India to the extent of interest payable on such loans given by the Government of India to enable it to build up the corpus of a fund.

The programme for the year 1964-65 provided for giving assistance to State Governments for annual plans of 1964-65 for various schemes of co-operative development. Assistance was also provided for centrally sponsored scheme for distribution of consumer articles in rural areas through selected marketing and service societies. Similarly, provision was made for the centrally sponsored scheme formulated by the Govt. of India in 1962-63 for organisation of wholesale and primary consumers' stores in cities and towns of over 50,000 population. During the year 1965-66, the outlay on State plan schemes of co-operative development coming within the purview of the Corporation would be Rs. 12·04 crores, of which the Corporation's share would be Rs. 7·72 crores.

*Chairman :* S. K. Dey, Minister of Community Development and Co-operation, Govt. of India ; *Dy. Chairman :* B. S. Moorthy, Dy. Minister in Charge of Co-operation, Govt. of India.

## THE NATIONAL INDUSTRIAL DEVELOPMENT CORPORATION LTD.

P.O. Box No. 458, Udyog Bhavan, Maulana Azad Road, New Delhi.

In Oct. 1954, the Government of India set up the National Industrial Development Corporation Ltd., as a private company registered under the Indian Companies Act, to act as the agency of the Government for promotion and development of industries in the country. Its main functions are (*a*) the investigation and initial processing of a number of vital projects considered necessary for filling up gap in the industrial structure of the country, (*b*) provision of consultancy and engineering services mainly to public sector projects and (*c*) the grant of special loans to certain selected industries for the purpose of modernisation, rehabilitation, etc.

The Corporation has an authorised capital of Rs. one crore of which Rs. 10 lakhs have been issued and subscribed by the Government. The Board of Directors of the Corporation include both officials and non-officials and is nominated by the Government.

The Corporation has already formulated a number of important industrial projects which have been entrusted by the Government to separate Government companies for further implementation.

The Corporation is acting as the agency of the Government of India for the grant of loans to jute and cotton textile industries for modernisation and rehabilitation and to machine tool units for expansion also. Loans sanctioned to these industries upto the end of March, 1965 amount to Rs. 28·02 crores, out of which Rs. 10·44 crores have so far been disbursed.

*Chairman*, F. C. Badhwar ; *Managing Director*, K. B. Rao ; *Secretary*, H. D. Bahl.

*Chairman :* S. N. Bilgrami ; *Secretary :* J. Padmanabha Iyer.

*Board of Directors :* Govind Narain, R. N. Vasudeva, N. S. Pandey, P. C. Kapoor, G. Ramanathan and Dr. B. R. Nijhawan.

## NATIONAL PROJECTS CONSTRUCTION CORPORATION LTD.

E9, Defence Colony, New Delhi 3.

The Corporation, an enterprise in the public sector, sponsored by the Union Ministry of Irrigation & Power, was set up in 1957 with an authorised capital of Rs. 2 crores. Its paid-up capital at present amounting to Rs. 150 lakhs was subscribed by the Government of India and the State Governments of Madhya Pradesh, Bihar, Rajasthan, Kerala, Gujarat, Jammu & Kashmir, Punjab, Assam, Uttar Pradesh, West Bengal and Mysore. Central Government has subscribed Rs. 50 lakhs whereas the State Governments (except Mysore and Kerala which have subscribed Rs. 5 lakhs each) have subscribed Rs. 10 lakhs each to the Corporation.

The main object of floating this Corporation is to provide the Central and State Governments with an organisation capable of undertaking the execution of River Valley Projects and allied Civil Engineering works requiring high technical skill, mechanical execution, precision and strict adherence to specifications and quality standards.

The progress of various works undertaken by National Projects Construction Corporation in different States and in Nepal is as under :—

*Bihar :* Construction of Badua Dam costing about Rs. 112 lakhs and the Kosi Barrage and Head Regulator costing about Rs. 6 crores and Darbhanga Air Field of the value of Rs. 146 lakhs has already been completed. Two major works in progress are construction of Chandan Dam costing Rs. 330 lakhs and Gandak Barrage costing Rs. 679 lakhs.

*Jammu & Kashmir :* Excavation of out-fall channel and side channel of the Jhelum river below Baramulla costing about Rs. 300 lakhs is in progress. The construction work of two tunnels of a total length of about 8,300 feet for the Chenani Hydro Electric Project costing Rs. 125 lakhs has also been allotted to the Corporation.

*Madhya Pradesh :* On Chambal Project, the Corporation completed works costing Rs. 162·15 lakhs. The construction of Kunwari Aqueduct and earthwork on Chambal Canals costing Rs. 153 lakhs are nearing completion.

The construction of Hasdeo Barrage costing about Rs. 3·5 crores is in progress. An earthern dam across Suthna Nallah costing Rs. 56 lakhs and the work of Amarkantak Thermal Power Station costing about Rs. 22 lakhs have been completed.

*Nepal :* The work of the Trisuli Hydro-electric Project costing about Rs. 220 lakhs is progressing. In addition to this, the Corporation undertook and completed in a very short period

a permanent steel bridge across the River Tadi situated about 40 miles North-West of Kathmandu.

*West Bengal :* The work of construction of Panagarh Air Field costing about Rs. 97 lakhs has been completed in all respects.

The construction of Farakka Barrage costing about Rs. 15 crores and the work of upstream lock costing about Rs. 2 crores are in progress.

The construction of civil works relating to installation of Unit No. III of 1,25,000 kW. in the existing Thermal Power Station at Durgapur costing Rs. 111 lakhs is progressing.

*Gujarat :* The civil works costing about Rs. 164 lakhs of the Gujarat Refinery Project near Baroda is nearing completion. In addition the corporation has undertaken the work of the Administrative Block of the Refinery costing Rs. 12 lakhs.

*Delhi :* The Corporation has already completed the work of construction of Wazirabad Barrage costing about Rs. 50 lakhs ; the work of constructing the Najafgarh Drain Regulator has been completed by the target date at a cost of Rs. 10 lakhs in April 1964.

The construction work of a Regulator near the Wazirabad Barrage pumping Station for the supply of drinking water to the Delhi Town costing Rs. 15 lakhs is going on according to schedule.

During the emergency the corporation took up the execution of Emergency Defence Works costing about Rs. 243 lakhs.

During the financial year 1963-64, the Corporation executed works of the value of Rs. 510·47 lakhs as against Rs. 240·62 lakhs in 1962-63.

*Chairman & Managing Director :* S. S. Kumar ; *General Manager & Chief Engineer :* J. S. Jain ; *Financial Adviser & Chief Accounts Officer :* G. V. Chittal.

## THE NATIONAL RESEARCH DEVELOPMENT CORPORATION OF INDIA*

Mandi House, Lytton Road, New Delhi 1.

The Corporation was incorporated on 31st December 1953 with an authorised capital of Rs. one crore divided into 10,000 shares of Rs. 1,000 each. The paid up capital is Rs. 25 lakhs. All the shares are held by the President of India and/or his nominees.

The main function of the Corporation is to stimulate development and commercial exploitation of patents and inventions arising from national research effort and where feasible, in the public interest, of patented inventions from individuals also. For this purpose, it forms a connecting link between research and industry.

Since its inception, the Corporation has successfully negotiated licences for some 143 patents and processes and out of these about 64 have already gone into production. Amongst these, mention may be made particularly of carboxy methyl cellulose, infant food, synthetic pine oil, mica insulating bricks, and ceramic capacitors. The value of production based on processes licensed by the Corporation and in production during 1962-63 was Rs. 1.62 crores and in the year 1963-64 the production was expected to go up to nearly 2 crores. The processes licensed by NRDC are all foreign exchange saver and potential foreign exchange earner.

Besides licensing of patents and processes, the Corporation's major activity is development of scientific research by arranging pilot plant trials and instituting developmental projects. Till now, the Corporation has instituted some 20 projects at a cost of about Rs. 80 lakhs. The latest ones taken in hand are (*i*) separation of oils and edible proteins from groundnuts, (*ii*) experimental unit for the production of aromatic chemicals and costus root oil and (*iii*) semi-commercial plant for the production of Hykol 'X' activated carbon.

*Board of Directors :* Dr. S. Hussain Zaheer, Director-General, Scientific & Industrial Research (*Chairman*) ; Dr. A. N. Kapur (*Executive Director*) ; Dr. B. R. Nijhawan, Director, National Metallurgical Laboratory, Jamshedpur ; Dr. Y. Nayudamna, Director, Central Leather Research Institute, Madras ; Dr. A. Seetharamiah, Industrial Adviser to the Government of India ; Prof. M. S. Thacker, Member, Planning Commission ; M. G. Raja Ram, Joint Secretary to the Government of India, Ministry of Education ; A. M. M. Murugappa Chettiar, Dr. D. Banerjee, Charat Ram, Arvind N. Mafatlal (*Industrialists*) ; R. P. Padhi, Joint Secetary to the Government of India, Ministry of Finance (*Financial Adviser*).

## NATIONAL SEEDS CORPORATION LIMITED

E-19, South Extension, Part II,
Ring Road, New Delhi-16.

Incorporated as a Limited Company under the Companies Act, 1956 on March 19, 1963 with an authorised capital of Rs. 5,00,00,000 divided into 50,000 equity shares of Rs. 1,000 each. It is a Government of India Undertaking under the Ministry of Food & Agriculture (Department of Agriculture).

The Corporation aims at organising a healthy "seed" industry in the country. For this purpose it concentrates on production of Foundation Seed of promising varieties evolved by research and aims to introduce the quality concept of "certified seed" in the country. The Corporation at present produces foundation seed stocks of hybrid maize, sorghum (Jowar), bajra, jute, berseem and other fodder crops, and some of the vegetables. It also produces certified seeds of some of these crops.

The Corporation has established two Foundation Seed Units—one at Hempur (Nainital-Tarai, U.P.) and the other at Nandikotkur (Kurnool, A.P.). The Corporation encourages progressive farmers in the production of certified seeds of various crops.

The Corporation has introduced the concept of seed processing and testing as part of its certified seed programmes. It has imported necessary equipment for the same under foreign aid programmes. This equipment is provided on lease to private farmers and others who contract with the Corporation for production of certified seeds.

*Chairman :* Dr. M. S. Randhawa ; *General Manager :* Dr. Y. R. Mehta ; *Secretary and Chief Administrative Officer :* J. Veeraraghavan ; *Publicity Officer :* O. S. Rakesh.

## THE NATIONAL SMALL INDUSTRIES CORPORATION LTD.

4, Rouse Avenue, New Delhi 1.

A Government of India concern, started in February 1955, the main objects being to assist, counsel, finance and promote the interest of small industries in the country.

*Authorised capital :* Rs. 50 lakhs.

*Paid-up :* Rs. 50 lakhs divided into 50,000 shares of Rs. 100 each. All shares are held by the President of India and his nominees.

The Government Purchase Division of the Corporation maintains liaison with D.G.S. & D. in order to assist small scale industries in procuring government contracts.

Till June 1965, 15,040 contracts valued at Rs. 85·36 crores had been secured by the Small Scale Units through the assistance of the Corporation and 14,117 units capable of securing government contracts had been enlisted. From April 1961 to Feb. 1965, contracts valued at Rs. 648 lakhs had been placed by Railways on small scale units.

Upto December 1964, the Corporation had received about 15,531 applications from all areas in the country involving 68,835 machines valued at Rs. 7,274 lakhs. Out of these 11,464 applications involving 47,250 machines valued at Rs. 4,319 lakhs were accepted. Orders had been placed for 18,570 machines valued at Rs. 2,001·85 lakhs and deliveries had been effected in respect of 13,408 machines valued at Rs. 2,030·10 lakhs.

The Corporation has taken up an agency from Messrs. Bharat Electronics Ltd., Bangalore to sell the radio valves manufactured by them to small scale assemblers of radios in India. Orders to the tune of Rs. 11·02 lakhs had been executed upto Dec. 1964.

In addition to the marketing of machine tools produced at the Prototype Production and Training Centres, the Corporation has undertaken to market the machine tools produced at the Central Government production centres at Ettumanur and Tiruvalla. So far orders to the tune of Rs. 23·38 lakhs have been booked.

The Corporation constructed two model industrial estates, one at Okhla and the other at Naini.

The Prototype Production and Training Centres have been set up at Okhla, Howrah and Rajkot in collaboration with the Government of Federal Republic of West Germany, Governments of Japan and U.S.A. respectively. The main function of the Centres is to develop prototypes of machines for the purpose of passing them on to the small industrial units for production on mass scale and to train artisans drawn from the small scale industries. The Centre at Okhla is at present engaged in the prototyping work in respect of three machines, namely, Weiler Lathe, Tool and Cutter Grinder and Milling Machine, the manufacturing rights in respect of which have been presented to the Government of India by the Government of Federal Republic of West Germany. The Centre at Howrah is also engaged in the prototyping work of two machines, namely 80 C.T. Die Casting and 45 m.m. P.V.C. Extruder. The number of trainees at the above Centres is as follows :—Centre at Okhla 352 ; Centre at Rajkot 96 ; Centre at Howrah 125.

*Board of Directors :* C. R. Sundaram (*Chairman*) ; Baldev Singh, A. R. Bhat, R. Ganesan, T. Ghose, P. D. Malgavkar, Dr. S. T. Merani, K. L. Nanjappa, R. Mahadevan, R. L. Tuli.

## REHABILITATION INDUSTRIES CORPORATION LIMITED

(A Govt. of India Undertaking).

25, Free School Street, Calcutta 16.

The Corporation was incorporated in April 1959 with an authorised capital of Rs. 5 crores. All the shares are held by the President of India and/or his nominees.

The principal object of the Corporation is to create employment opportunities through industries for the large number of unemployed and partially employed displaced persons from East Pakistan.

To begin with, the Corporation had confined itself to (*i*) granted loan to Industries and (*ii*) establishment of Industrial Estates. From 1962 it started setting up of industries on its own and organising co-operative societies.

In the last 30 months (May, 1965) the Corporation has organised 25 Industrial Units in different parts of India and created about 5,000 employment for the displaced persons through its own Industrial Units, assisted Industries and Industrial Estates.

The major Industries run by the Corporation are (1) Structural Fabrication Unit (Sukumar Engineering Works) Bon-Hooghly, (2) Railway Sleeper Factory, Jagdalpur, Madhya Pradesh, (3) Iron Foundry, Durgapur, (4) Bucket & Sheet-metal Factory, Gayeshpur, (5) Preparatory & Finishing Plant Factory, Bon-Hooghly, (6) Weaving Factories at Habra, Gayeshpur, Taherpur and Khoshbashmohalla, (7) Fruit Canning Factory, Agartala (Tripura), (8) Wood Works, Rupnarayanpur, (for manufacturing of flanges), (9) Leather Works, Bon-Hooghly Industrial Estate (for manufacturing of shoes of all kinds), (10) Tent & Tarpaulin Works, Behala Industrial Estate, (11) Silk Factory, Malda.

The Corporation is also setting up a Spinning Mill of 25,000 spindles in Dandakaranya area.

* See Late Particulars for more upto date figures.

*Board of Directors :* K. V. Venkatachalam ; K. K. Roy ; V. Ramakrishna ; D. J. Madan ; Anil De ; P. V. Gopalan ; S. T. Merani ; S. N. Banerjee ; P. H. Trivedi, B. K. Dube ; A. L. Nair ; S. C. Roy.

*Managing Director :* M. C. Mukharji, I.A.S.

### THE STATE TRADING CORPORATION OF INDIA LTD.

Express Bldg., 9 & 10, Mathura Road, P.B. No. 79, New Delhi 1.

Incorporated on 18th May, 1956.

The authorised capital is Rs. five crores of 5,00,000 equity shares of Rs. 100 each.

The subscribed capital is Rs. two crores of two lakh equity shares of Rs. 100 each.

The President of India holds all the shares excepting three held by the officers of the Government of India in their official capacity.

The central aim of the Corporation is to broaden and enlarge the scope of Indian exports and to arrange for essential imports on an economical basis.

In order to develop and maintain export markets for commodities which are difficult to sell due to high internal procurement prices in comparison with world prices, the Corporation often takes a long range view and undertake exports even if there is a loss or a risk of loss. It has launched a scheme known as 'Export Aid for Small Industries' which provides comprehensive market service to small and medium industries. It has already helped 20 manufacturers to export 27 different products to 27 different countries.

The Corporation has significantly contributed to the development of India's trade abroad particularly with the East European countries, and has created new markets abroad for more than 35 different commodities. Its total trade in 1964–65 was about Rs. 96·86 crores. The Corporation participates in international fairs and exhibitions and has trade centres-cum-depots and offices abroad.

*Board of Directors :* B. P. Patel (*Chairman*), K. P. U. Menon, I. J. Naidu, N. S. Pandey, G. S. Sial, D. N. Banerjee, V. R. Antani.

*Secretary :* P. N. Agarwala ; *Financial Adviser :* M. L. Kala.

*Regional Managers :* R. L. Mehra (Calcutta) ; B. C. Malhotra (Madras).

*Bankers :* The State Bank of India.

### UNIT TRUST OF INDIA

Amar Building, Sir P. M. Road, Bombay-1.

The Unit Trust of India was established with effect from Feb. 1, 1964 under the Unit Trust of India Act, 1963. The basic objective in establishing the Unit Trust of India is to afford the small investor a means of acquiring a share in the widening prosperity based on steady industrial growth of the country which combines the advantages of a minimum risk and a reasonable return.

A Unit Trust pools the savings of the community and invests them in securities of various types. To pool the savings, the Trust sells 'units'. All units rank equal for the distribution of income, no matter when they were acquired. The Trust offers one other important and unique advantage : it is always ready both to sell and buy its units at prices published by it. A Unit holder is thus assured of the liquidity of his investment.

It has an initial capital of Rs. 5 crores contributed as follows : the Reserve Bank of India Rs. 2·5 crores, the L.I.C. Rs. 75 lakhs, the State Bank and its subsidiary banks Rs. 75 lakhs and scheduled banks and other specified financial institutions Rs. 1 crore.

The general direction and management of the affairs and business of the Trust is vested in a Board of Trustees, consisting of a Chairman appointed by the Reserve Bank, four other Trustees, also nominated by the Reserve Bank, one Trustee nominated by the L.I.C., and one Trustee nominated by the State Bank, two Trustees elected by the institutions contributing to the initial capital of the Trust. In addition, one Executive Trustee is appointed by the Reserve Bank. There is an Executive Committee consisting of the Chairman of the Board, the Executive Trustee and two other Trustees nominated in this behalf by the Reserve Bank.

The investment policy of the Trust pays attention to security of capital as well as to a reasonable return, including capital appreciation on investments. In the regulations framed for functioning of the Unit Trust of India, guide lines have been provided in this connection. Firstly, except in the case of certain debentures, investment by the Trust in securities of any one company should not exceed 5 per cent of the value of the total investible funds of the Trust or 10 per cent of the value of the securities issued and outstanding of such company, whichever is lower. Secondly, not more than 5 per cent of the investible funds should be invested in the initial issues of securities of new industrial undertakings.

Under the Unit Trust of India Act, 1963, the Trust has formulated the Unit Scheme 1964 under which units are being offered for sale to the public, from July 1, 1964.

Some salient features : Units are sold through the network of over 4,000 offices of the State Bank of India and its subsidiary banks as well as the commercial banks which have contributed to the initial capital of the Trust.

Upto March 1, 1965 nearly 1,33,000 applications for units have been received, the sum subscribed to being about Rs. 19 crores.

The Trust is exempt from payment of income-tax, super-tax and other taxes on income.

Income from the Unit Trust by individual unit holders upto Rs. 1,000 is free from income tax. Further, income from Unit Trust received by individuals and Hindu undivided families like interest on Government securities, will be treated as earned income for purposes of surcharge on income tax.

Units can be sold back to the Unit Trust of India any time from November 16, 1964 onwards. The sale and repurchase prices of units are determined in accordance with the provisions laid down in the Unit Scheme and are announced daily.

Transfer of units to third parties will be possible after June 30, 1965. A unit holder can always transfer units in favour of a bank for purposes of borrowing.

*Board of Trustees :* R. S. Bhatt (*Chairman*) ; V. G. Pendharkar, N. M. Wagle, B. Mitter, P. Brahmayya, S. D. Srinivasan, R. N. Chettur ; H. T. Parekh, R. L. Tuli, R. C. Sachdeva (*Executive Trustee*).

# INSURANCE

## LIFE INSURANCE

THE Life Insurance Corporation of India did a new total business of about Rs. 701 crores sum assured under 14,35,776 policies during the 12 months ended 31st March, 1965. Of this, foreign business was Rs. 10·97 crores sum assured under 8,636 policies. During the previous period of 12 months ended 31st March 1964, the total business secured was about Rs. 703 crores under 16,46,291 policies, of which foreign business was Rs. 10·21 crores under 8,532 policies.

The total new business completed by the Life Insurance Corporation of India during the first four months of the financial year 1965-66 amounted to Rs. 140·65 crores. The business done in the corresponding period last year was Rs. 132·3 crores. The number of policies assured stood at 2,97,037 as against 2,85,112 for the first four months of last year.

The Life Insurance Corporation of India was established in September 1956 under a special Act, The Life Insurance Corporation Act, 1956, the Central Government contributing the whole of its capital of Rs. 5 crores. It has the monopoly of conducting life insurance business in India and abroad. It took over all the then existing life insurance business of Indian life offices and Provident Societies and also the Indian business of foreign life offices.

It is managed by an autonomous body consisting of 15 Directors, nominated by the Central Government functioning under the guidance and advice of the Finance Ministry of the Central Government within the scope and limits set down in the Act. This board of 15 members consists of 11 non-officials and 4 Government officials one of whom is designated Chairman of the Corporation, working as the chief whole-time officer.

The board has delegated certain of its functions to an Executive Committee of 5 members selected from among themselves, to facilitate speedy and effective execution of its duties. In addition to this, there is an Investment Committee consisting of 7 members which is a consultative body on all questions concerning the investment of the funds of the Corporation.

The Corporation has a network of offices all over the country to procure new business and for servicing the existing business. There are 5 Zonal Offices, one each in Bombay, Madras, Kanpur, Calcutta and Delhi. There are 36 Divisional Offices, and 711 Branch, Sub-offices and Development Centres *i.e.*, 752 offices in all as against 532 in 1961 and 249 offices as on 1st September 1956 the date on which the Corporation was established. The Central Office of the Corporation is in Bombay. The Corporation is now having its offices in 283 districts out of 316 districts of various States in India and in 6 out of nine Union Territories in India, including one in Goa.

The Corporation also transacts business in the following foreign countries with 2 Divisional Offices and 12 Branch Offices : Aden, Fiji, Hong Kong, Malaysia, Kenya, Mauritius, Tanzania, Uganda and the United Kingdom.

### 1963-64 REPORT

At the end of the 12 months accounting period ended 31st March, 1964, the total business in the books of the Corporation including bonuses, stood at Rs. 3,571 crores under 103·28 lakh policies. Of this, Rs. 3,458 crores under 101·19 lakh policies represented life insurance business in India.

The following table gives the life assurance business in force at the end of each of the last seven accounting periods :—

| Business in force as at | In India | | Outside India | | Total | |
|---|---|---|---|---|---|---|
| | No. of policies (lakhs) | Sum assured and bonuses (Rs. crores) | No. of policies (lakhs) | Sum assured and bonuses (Rs. crores) | No. of policies (lakhs) | Sum assured and bonuses (Rs. crores) |
| 31-12-1957.. | 54·17 | 1,375 | 2·69 | 99 | 56·86 | 1,474 |
| 31-12-1958.. | 59·74 | 1,584 | 2·60 | 98 | 62·34 | 1,682 |
| 31-12-1959.. | 66·73 | 1,855 | 2·56 | 103 | 69·29 | 1,958 |
| 31-12-1960.. | 74·56 | 2,176 | 2·57 | 109 | 77·13 | 2,285 |
| 31-12-1961.. | 83·36 | 2,623 | 2·41 | 114 | 85·77 | 2,737 |
| 31-3-1963 .. | 92·61 | 3,054 | 2·26 | 114 | 94·87 | 3,168 |
| 31-3-1964 .. | 101·19 | 3,458 | 2·09 | 113 | 103·28 | 3,571 |

**These figures show that India has a per capita insurance of Rs. 73—an increase of about Rs. 48 in eleven years.**

During the accounting period the Corporation completed a new business of Rs. 702·76 crores sum assured under 16,46,291 policies. Business completed in the previous accounting period amounted to Rs. 745·96 crores under 17,67,544 policies.

About 35·7 per cent of the total number of policies in India assuring about 30·2 per cent of the total new sums assured in India, were issued in rural areas as defined in the 1961 Census. About 44 per cent of the policies or 23·8 per cent of the new sums assured in India were issued under the non-medical schemes. In addition to the total new business stated above, the Corporation issued 588 Deferred Annuities and 109 Immediate Annuities with a total annual payment of Rs. 10·33 lakhs and Rs. 1·83 lakhs respectively.

**New Business :**

| Year | In India | | Outside India | |
|---|---|---|---|---|
| | No. of policies | Sum Assured Crores of Rs. | No. of policies | Sum Assured Crores of Rs. |
| 1959.. .. | 11,43,387 | 419·70 | 7,912 | 9·47 |
| 1960.. .. | 12,49,821 | 487·84 | 7,736 | 9·70 |
| 1961.. .. | 14,61,608 | 598·79 | 8,056 | 10·03 |
| 1-1-1962 to 31-3-1963 | 17,58,046 | 734·72 | 9,298 | 11·24 |
| 1-4-1963 to 31-3-1964 | 16,37,759 | 692·55 | 8,532 | 10·21 |

**A marked variation is noticeable in the size of the average policy sold in the different Zones by the Corporation. The figures are given below (Rs.):**

**Northern Zone (Delhi): 4,963; Central Zone (Kanpur): 4,289; Western Zone (Bombay): 4,547; Eastern Zone (Calcutta): 3,984; Southern Zone (Madras): 3,811; In India: 4,229; Foreign: 11,967; All business: 4,269 as against 4,220 in the period 1-1-1962 to 31-3-1963.**

## ACCOUNTS

**The Life Fund stood at Rs. 808·36 crores on 31st March, 1964, registering an increase of about Rs. 88·80 crores over the adjusted life fund of Rs. 719·56 crores as on 31st March 1963. During this period, the Corporation's income from all sources totalled about Rs. 179 crores, made up of Rs. 146 crores from premiums (excluding consideration for annuities amounting to about Rs. 41 lakhs) and about Rs. 32 crores from returns on its invested funds and from miscellaneous sources.**

**The interest income of Rs. 31 crores represents earnings of 4·07% on the mean life fund after deducting income-tax. The rate of interest from 1958 is given below:**

1958 : 3·52; 1959 : 4·08; 1960 : 3·55; 1961 : 4·58; in 15 months of 1962-63 : 4·08; 1963-64 : 4·07. The reason for this fall in the net rate of interest is that tax refunds in respect of the previous accounting period had not been received in the year under review. The gross rate of interest earned on the mean life fund during the year was 5·11 per cent per annum as against 4·76 per cent per annum for the previous period of 15 months.

**On the outgo side Rs. 50 crores represented claims and other benefits to the policy-holders, Rs. 40 crores expenses of management, and the balance of nearly Rs. 88 crores addition to the Life Fund. On the claims side, nearly Rs. 11 crores represented claims by death and nearly Rs. 34 crores by maturity, annuities, surrender and bonuses in cash etc., accounting for the balance.**

Over-all expenses ratio : 1958 : 29·2; 1959 : 28·7; 1960 : 28·4; 1961 : 28·0; 1962-63 : 29·3; 1963-64 : 27·5%.

**The renewal expense ratio in terms of Rule 25(*b*) of Insurance Rules 1939 was 12·46% as against 14·13% for the 15 months period ended 31st March 1963.**

## INVESTMENTS

**The total investments pertaining to life business as at 31st March 1964 amounted to Rs. 763·45 crores of which Rs. 17·05 crores were out of India. The break-up of Indian investments is as follows:**

| | | |
|---|---|---|
| Indian and State Government and other approved securities | .. .. .. | Rs. 493·50 crores |
| Debentures and shares of Joint stock companies in India | .. .. .. | „ 143·48 „ |
| Loans to Housing Schemes —State Governments and Cooperative Finance | .. .. | „ 56·96 „ |
| Mortgages of Properties | .. .. | „ 9·65 „ |
| House Property | .. .. | „ 29·15 „ |
| Due from State Governments for controlled business taken over | .. .. | „ 4·98 „ |
| Other Loans etc. | .. .. | „ 7·93 „ |
| Share in Initial Capital of Unit Trust of India | .. | „ 0·75 „ |
| | | Rs. 746·40 crores |

**On 31st March 1964, the Corporation held stock exchange securities aggregating nearly Rs. 653 crores, of which about Rs. 637 crores were in India and the balance outside India.**

**A broad classification of investments in India shows that 76·5% was invested in the public sector, and 19·2% in the private sector and 4·3% in the co-operative sector. Besides the loans issued by the Central and State Governments, investments in the public sector include loans, bonds, shares or debentures of municipalities, Improvement Trusts, Port Trusts, Land Mortgage Banks, State Financial Corporations and Statutory Corporations. Investments in the private sector take the form of debentures, preference shares and ordinary shares of industrial and commercial undertakings.**

**Debentures, preference and ordinary shares of joint stock companies held by the Corporation may be classified as under according to the character of the industries (Rs. lakhs):**

Aluminium : 394·13; Banks : 572·44; Cement : 637·49; Coal : 346·22; Cotton Textiles : 1,461·88; Dyes, Chemicals and Pharmaceuticals : 366·44; Electricity: 1,169·96; Electrical Goods : 608·48; Engineering : 2,050·95; Food, Drinks and Tobacco : 140·37; Insurance : 233·06; Investment Trusts : 265·33; Iron and Steel : 1,073·94; Jute : 459·47; Managing Agents : 174·76; Matches : 74·86; Mining : 67·93; Mineral Oil: 1,480·75; Paper and Board : 557·95; Plantations : 242·20; Railways : 65·94; Rubber Products : 260·58; Shipping and Transport : 76·03; Sugar and Breweries : 604·49; Textiles (Other than Cotton): 351·57; Vegetable Oils : 88·99; Cooperative Housing Societies : 23·54; Miscellaneous : 549·26. Total : Rs. 4,348·31 lakhs.

### Underwriting New Capital Issues

During the accounting year ended 31st March, 1964, the L.I.C. underwrote 70 new issues to the extent of Rs. 13,00·07 lakhs, comprising Debentures of Rs. 9,24·37 lakhs, Preference Shares Rs. 1,61·50 lakhs and Ordinary Shares Rs. 2,14·20 lakhs. Of these, 38 issues were placed in the market during the period, in addition to 15 issues placed in the previous year with allotments of Rs. 12,85·08 lakhs against Rs. 13,21·57 lakhs underwritten and Rs. 13,09·66 lakhs applied for.

## PERSONNEL

**On its formation, the Corporation took over about 21,000 employees, of whom 16,000 were in the clerical and supervisory cadre and 5,000 subordinate staff. On 31st March, 1964, there were 49,625 employees of whom 2,751 were officers, 8,585 Development Officers, 31,624 supervisory and clerical staff and 6,665 subordinate staff. The total monthly salary bill in March, 1964 was Rs. 143·74 lakhs.**

**Out of over 1·74 lakh agents on the books on 31st March 1964, about 1·43 lakhs were active.**

The average production per active agent during the accounting period was Rs. 48,359 as against Rs. 47,900 during the previous 15 months.

**Permanent training centres are maintained at the headquarters of the five Zones to train development personnel on the professional aspect of sales and servicing. Other training centres at selected Divisional Headquarters are also in operation including an Officer's training centre at Nagpur.**

## VALUATION & BONUS

**The first biennial valuation was made as at 31st December 1957 and completed in 1959, when Rs. 27·56 crores were reserved for allotting bonuses to participating policy-holders. The second biennial valuation was made as at 31st December 1959 and out of the surplus, Rs. 24·48 crores were available for distribution to the policy-holders.**

**The third biennial valuation was made as at 31st December 1961. The total surplus allocated to the participating policies amounted to Rs. 32·73 crores. The allocation to the Central**

Government as its share of the surplus was Rs. 1·72 crores as compared to the allocation of Rs. 1·45 crores at the first valuation and Rs. 1·28 crores at the second valuation.

The fourth valuation was made as at 31st March, 1963 covering a period of 15 months only. The surplus allocated to the participating policies amounted to Rs. 25·03 crores and the allocation to the Central Government as its share of the surplus was Rs. 1·32 crores. In respect of the policies issued by the L.I.C. itself, the rate of reversionary bonus allotted was Rs. 17·50 per thousand sum assured per annum for whole life policies and Rs. 14·00 for endowment assurance policies. The corresponding rates of bonus at the previous three valuations were Rs. 16·00 per thousand sum assured per annum and Rs. 12·80 per thousand sum assured per annum respectively. The policies issued by the erstwhile insurers were allotted bonuses at different rates as per the scheme of differential bonuses approved by the Government.

## GENERAL INSURANCE

As at 31st December 1964 there were 137 (as against 142 in 1963) companies registered under the Insurance Act, 1938 to transact one or more classes of general insurance business of which 72 were Indian and 65 non-Indian. Four Indian and one non-Indian insurer ceased to operate in 1964. The number of Indian insurers excludes the Life Insurance Corporation of India (which is registered for Life and Miscellaneous insurance business) but includes its three (since amalgamated into one on 1st January 1961) subsidiaries which conduct general insurance business. It also includes 11 insurers registered for Country Craft (marine) insurance business only with 6 non-tariff offices and three doing only reinsurance business, one of which is a subsidiary of the L.I.C.

Of the 65 non-Indian offices, 41 have their head-offices in the U.K.

Since nationalisation of life insurance, 31 Indian and 37 non-Indian companies had closed down their general insurance business.

Early in 1964, the Life Insurance Corporation of India, which was so far conducting life insurance business in India on a monopoly basis and Capital Redemption insurance business, registered itself for conducting general insurance business also as a non-Tariffer. From 1st April, 1964 it started writing, Fire, Marine and Miscellaneous insurance and reinsurance business. During the year ended 31st March, 1965, it secured business bringing a total gross premium income of Rs. 43 lakhs, the shares of Fire, Marine and Miscellaneous Departments being 37%, 20% and 43% respectively.

The total income and outgo in respect of the general insurance business of Indian insurers during 1963 is analysed below:

| Particulars | Rs. lakhs |
|---|---|
| *Income* | |
| Premiums *less* reinsurances: | |
| In India .. | 30,01 |
| Outside India .. | 16,79 |
| Net interest, dividends and rents | 98 |
| Other income .. .. .. | 7 |
| Total .. .. .. | 47,85 |
| *Outgo* | |
| Claims *less* reinsurances .. .. | 25,17 |
| Net commission .. .. | 6,73 |
| Expenses of management .. | 10,28 |
| Miscellaneous outgo .. .. | 33 |
| Total .. .. .. | 42,51 |
| Profits transferred to Profit and Loss Account .. .. | 3,13 |
| Actual increase in Reserves for unexpired risks and Additional Reserves .. .. .. | 2,21 |
| Excess of Income over Outgo .. | 5,34 |

The percentage of the net premium income spent by way of claims, expenses, etc., during the year 1963 is shown in the following table:

| Ratio to Net Premium Income of | Fire | | Marine | | Miscellaneous | |
|---|---|---|---|---|---|---|
| | Indian Insurers | Non-Indian Insurers | Indian Insurers | Non-Indian Insurers | Indian Insurers | Non-Indian Insurers |
| Net Claims .. .. .. .. .. .. .. .. .. | 44·5 | 26·8 | 67·2 | 50·1 | 55·9 | 43·8 |
| Expenses of Management including commission .. .. .. .. | 41·4 | 45·7 | 26·2 | 34·7 | 36·2 | 42·7 |
| Increase in Reserves* .. .. .. .. .. .. .. .. | 0·6 | 3·5 | 3·2 | 5·7 | 3·7 | 4·6 |
| Miscellaneous outgo .. .. .. .. .. .. .. .. | —1·5 | 1·9 | —1·4 | 1·3 | —1·6 | —0·5 |
| Balance .. .. .. .. .. .. .. .. .. | 15·0 | 22·1 | 4·8 | 8·2 | 5·8 | 9·4 |
| TOTAL .. .. .. .. .. .. .. .. .. | 100·0 | 100·00 | 100·0 | 100·0 | 100·0 | 100·0 |

* Increase in Reserve is obtained by taking 40 per cent in the case of Fire and Miscellaneous and 50 per cent in the case of Marine insurance business of the increase in Net premium income during the year 1963 over that of the preceding year.

The following tables present a comparative study of the insurance business in India and outside India of Indian insurers and of the business in India of non-Indian insurers.

(Premiums in lakhs of rupees)

| Year | Fire Premiums | | Marine Premiums | | Miscellaneous Premiums | | Total | |
|---|---|---|---|---|---|---|---|---|
| | Gross | Net | Gross | Net | Gross | Net | Gross | Net |
| I. INDIAN INSURERS | | | *Business in India* | | | | | |
| 1961 .. .. .. .. .. .. .. .. | 10,75 | 7,49 | 6,50 | 3,89 | 14,55 | 12,12 | 31,80 | 23,50 |
| 1962 .. .. .. .. .. .. .. .. | 11,70 | 8,51 | 7,16 | 4,52 | 16,18 | 13,51 | 35,04 | 26,54 |
| 1963 .. .. .. .. .. .. .. .. | 12,46 | 9,26 | 8,03 | 5,38 | 17,76 | 15,36 | 38,25 | 30,00 |
| | | | *Business outside India* | | | | | • |
| 1961 .. .. .. .. .. .. .. .. | 2,53 | 7,72 | 2,15 | 2,64 | 5,00 | 5,61 | 9,68 | 15,97 |
| 1962 .. .. .. .. .. .. .. .. | 2,52 | 8,14 | 2,12 | 3,11 | 5,55 | 6,22 | 10,19 | 17,47 |
| 1963 .. .. .. .. .. .. .. .. | 2,08 | 7,66 | 1,89 | 2,78 | 6,10 | 6,36 | 10,07 | 16,80 |
| II. NON-INDIAN INSURERS | | | *Business in India* | | | | | |
| 1961 .. .. .. .. .. .. .. .. | 5,63 | 3,51 | 2,93 | 2,05 | 3,49 | 2,88 | 12,05 | 8,44 |
| 1962 .. .. .. .. .. .. .. .. | 5,79 | 3,74 | 3,18 | 2,15 | 3,83 | 3,17 | 12,80 | 9,06 |
| 1963 .. .. .. .. .. .. .. .. | 6,36 | 4,10 | 3,53 | 2,43 | 4,43 | 3,58 | 14,32 | 10,11 |

## ASSETS

**The total assets of the general insurance business of Indian insurers amounted to Rs. 90,22 lakhs on 31st December 1963 (as against Rs. 82,03 lakhs on 31st Dec. 1962 and were invested as shown below.**

**The total assets in India in respect of the general insurance business of the non-Indian insurers amounted to Rs. 15,56 lakhs on 31st December 1963 as against Rs. 13,63 lakhs on 31st December 1962 and were invested as shown below. The figures are in lakhs of Rupees.**

| | Indian insurers | | Non-Indian | |
|---|---|---|---|---|
| | 1963 | 1962 | 1963 | 1962 |
| Central Govt. Securities .. .. | 5,85 | 6,36 | 2,02 | 2,08 |
| State Govt. Securities .. .. | 2,08 | 2,39 | 5 | 5 |
| Br. & Foreign Govt. Securities .. | 1,83 | 2,00 | — | — |
| Municipal, Port & Improvement Trust Securities .. .. .. .. | 26 | 28 | 34 | 35 |
| Debentures of Indian Companies .. | 5,63 | 4,76 | 83 | 77 |
| Preference Shares of Indian Companies .. .. .. .. | 5,22 | 4,59 | 49 | 35 |
| Ordinary Shares of Indian Companies | 22,43 | 20,27 | 1,93 | 1,90 |
| Land & House Property .. .. | 2,35 | 2,22 | 68 | 31 |
| Deposit, Cash & Stamps .. .. | 16,24 | 16,26 | 5,81 | 5,22 |
| Loans on mortgage of Property .. | 1,15 | 84 | 9 | 9 |
| Loans on Stocks & Shares .. .. | 30 | 11 | — | — |
| Other Loans .. .. .. .. | 17 | 8 | 20 | 17 |
| Agents' Balances, Outstanding premiums, Amounts due from other insurers and Accrued & outstanding interest .. .. .. .. | 20,61 | 17,13 | 1,66 | 1,28 |
| Miscellaneous .. .. .. .. | 6,10 | 4,74 | 1,46 | 1,06 |
| Total .. .. .. .. | 90,22 | 82,03 | 15,56 | 13,63 |

The following table gives the index numbers of general insurance business in India and the general index numbers of industrial production (base year 1956) for the years 1957 to 1963. Comparison of these figures will indicate the potentiality for progress of general insurance business in India and the actual progress made by this business.

| | 1957 | 1958 | 1959 | 1960 | 1961 | 1962 | 1963 |
|---|---|---|---|---|---|---|---|
| Index no. of general insurance business in India .. | 100·9 | 105·4 | 113·6 | 129·0 | 144·3 | 155·5 | 175·1 |
| General Index no. of industrial production .. .. | 104·1 | 108·1 | 116·9 | 129·8 | 139·3 | 149·8 | 163·3 |

## REINSURANCE

To minimise the drain on account of reinsurance transactions abroad, the Insurance Act, 1938 was amended, early in 1961, by inserting Part IVA Reinsurance, Sections 101A and 101B. Section 101A provides that every insurance company operating in India must reinsure a certain percentage of its business (not exceeding 30%) with Indian reinsurance companies approved in this behalf by the Central Government.

**By various notifications, the Central Government announced the names of the two approved Indian reinsurance companies and the various percentages of the sum assured on each policy to be reinsured by every insurer with each of the two Indian reinsurers. The two approved reinsurers are: India Reinsurance Corporation Ltd., and Indian Guarantee & General Insurance Co. Ltd., both having their registered offices in Bombay.**

The drain on account of reinsurance transactions abroad in respect of the Indian business of non-Indian insurers and total business of the Indian insurers during the years 1961, 1962 and 1963 has been estimated at Rs. 327 lakhs, Rs. 206 lakhs and Rs. 175 lakhs respectively, as follows:—

(in lakhs of rupees)

| | Year | Fire | Marine | Miscellaneous | Total |
|---|---|---|---|---|---|
| 1. Profit in respect of gross direct business in India of all insurers .. .. | 1961 | 380 | 62 | 332 | 774 |
| | 1962 | 560 | 48 | 272 | 880 |
| | 1963 | 455 | 101 | 330 | 886 |
| 2. Profit in respect of total net business of Indian insurers .. .. .. | 1961 | 185 | —47 | 65 | 203 |
| | 1962 | 270 | 2 | 118 | 390 |
| | 1963 | 253 | 39 | 125 | 417 |
| 3. Profit in respect of net business in India of Non-Indian insurers .. .. | 1961 | 94 | 13 | 26 | 133 |
| | 1962 | 107 | 24 | 35 | 166 |
| | 1963 | 90 | 20 | 34 | 144 |
| 4. Profit in respect of gross direct business outside India of Indian insurers .. | 1961 | —2 | —53 | —56 | —111 |
| | 1962 | —5 | —18 | —95 | —118 |
| | 1963 | 13 | —20 | —143 | —150 |
| 5. Drain on account of reinsurers abroad—[(1) + (4) — (2) — (3)] .. .. | 1961 | 99 | 43 | 185 | 327 |
| | 1962 | 178 | 4 | 24 | 206 |
| | 1963 | 125 | 22 | 28 | 175 |

*Note:* Unexpired risk reserves have been taken at 40% of the premium income for Fire and Miscellaneous and 50% of the premium income for Marine insurance business.

To reduce this exchange drain, insurers in the Indian market have taken a number of steps, like increasing their net retentions, obtaining higher commission and profit commission terms and increased reciprocity. Unfortunately, the foreign markets with which Indian insurers had built up a large relationship have been showing bad results over the past number of years.

In April, 1965, the Reserve Bank of India added a new provision to their Exchange Control Regulations, namely "Insurance Companies may enter into reinsurance arrangements with insurers outside India, provided the required reinsurance facilities are not available in India", with a view to eliminating to the extent possible the foreign exchange drain arising as a result of reinsurances placed abroad.

# BROADCASTING

EXPANSION of medium-wave coverage by All India Radio has been achieved in a considerable measure during the year 1964. Efforts are now being made to obtain two extremely powerful transmitters for medium-wave broadcasts to South-East Asian regions, on rupee payment.

Another feature of medium-wave expansion is the introduction of (*a*) stations for relaying the Vividh Bharati programme exclusively and (*b*) auxiliary stations for extensive coverage. There are now 23 Vividh Bharati stations.

Auxiliary centres were opened at Jaypore (Orissa), Gwalior, Jabalpur making a total of 11. The strength of All India Radio by the beginning of 1965 was: 33 principal radio stations; 14 auxiliary centres; 23 Vividh Bharati stations; and total *transmitters*, 103.

*Advisory Committee:* There is an Advisory Committee of 28 members to advise the Ministry of Information and Broadcasting, with the Minister as the Chairman. The members are nominated for two years normally; but their term may be extended. They meet once a year and tender their advice on music, composition of programmes and other matters performed by the Ministry. The first meeting of the combined Central Programme Advisory Committee was held on July 16, 1965.

## BUDGET

For 1964-65, the revised estimates of expenditure on revenue account were Rs. 583·36 lakhs and those on capital account Rs. 212·58 lakhs making a total of nearly Rs. 596 lakhs.

The income from receiver licence fees forms about 70 per cent of the total recurring expenditure on broadcasting.

## INTERNATIONAL CONFERENCES

India was represented by the Director-General, All India Radio in the second International Conference for Broadcasting Organisations on Sound and Television and School Broadcasts held in Tokyo in April 1964. The Director-General and the Chief Engineer, A.I.R., represented India at the first General Assembly of the Asian Broadcasting Union held in Sydney in November 1964.

## TELEVISION

Confined mainly to the area round about the capital, Delhi, the new more powerful transmitter (5 kW in place of 500 Watts) has expanded the radial coverage. So far, 423 sets have been provided in 233 schools out of 366 higher secondary schools, some of which have formed into teleclubs as viewers. There are at present 180 Tele-clubs with an active membership of 3,600 and an average of 18,000 to 20,000 viewers for each programme. Out of the 180 Tele-Clubs, 122 are at present located in school premises. About 50,000 students derive the benefit of these programmes. A sum of Rs. 40 lakhs has been provided for the establishment of a regular television centre at Bombay during the III Plan. There is no progress in this direction so far mainly because of foreign exchange difficulties.

The daily service of Delhi Television Centre was inaugurated on Aug. 15, 1965 by President Dr. S. Radhakrishnan. The studio has been equipped with the assistance of W. Germany.

Delhi's TV service of AIR will be extended to two hours daily (from an hour four times a week) and similar service will soon be introduced at Bombay, Madras and Calcutta. Technical equipment and expert know-how are available from West Germany and other Central European countries. The UNESCO is sponsoring Educational TV Service in Delhi and elsewhere. The new TV services will be available to audiences within 80–100 km. radius. There is a special Committee for advising the Ministry on technical matters about TV expansion.

Total budget provision for the Television Centre for 1964–65 is a little over Rs. 11 lakhs.

The licence fee for a domestic television set is Rs. 30 per annum. This covers sound-cum-vision sets. The commercial licence fee is Rs. 120 per annum, and for a school set Rs. 10 per annum. These licences were issued only in the Delhi Postal Circle.

## OFFICES

All-India Radio has now a multi-storied building Akashvani Bhavan next to Broadcasting House where many offices of All-India Radio are housed.

The head of AIR is the Director-General, All-India Radio, whose office is located in Broadcasting House, Parliament Street, New Delhi.

Other officers at headquarters are: Director of News Services, Director of External Services, Chief Engineer, Deputy Directors-General, Deputy Chief Engineer, Director of Programmes, Director of Programme Planning, Director of Listener Research, Deputy Director of Administration and Assistant Directors of Administration.

AIR stations transmit for about five to ten hours a day.

This is generally split up into three transmissions, morning, afternoon and evening. There is an additional transmission for schools.

Programmes are planned by Station Directors with the assistance of the Programme Executives and Programme Assistants. Details are worked out well in advance of their scheduled dates and are published in the journals of All-India Radio.

**Research and Maintenance Departments.**—These two departments are located in New Delhi with regional offices in Bombay.

The Research Department deals with all technical problems, concerning reception and transmission. Special studies are undertaken on ionospheric data and forecasting transmission conditions, field strengths of short and medium wave stations, atmospheric noise levels prevalent in various parts of India, studio and recording characteristics.

The Department also maintains a field station at Todapur near Delhi where the frequencies of All-India Radio Stations are constantly checked.

The Maintenance Department handles problems which arise in the upkeep and day-to-day operation of the engineering equipment used by All-India Radio in addition to maintaining of Central Stores Depot.

There is a Staff Training School in Delhi, where on an average 180 persons from the staff of All-India Radio, programmes and administrative sides, are trained every year. From 1958, the training facility has been extended to the engineering and technical staff with the opening of a similar training school for them.

**Programme Publicity:** All India Radio has only 8 journals (in 8 languages) for its regular internal publicity programmes. *Akashvani*, the English journal is a weekly, while the rest are fortnightlies in Assamese, Bengali, Gujarati, Hindi, Tamil, Telugu and Urdu.

*Akashvani* (English), *Awaz* (Urdu), *Sarang* (Hindi), *Betar Jagat* (Bengali), *Vani* (Telugu), *Vanoli* (Tamil), *Nabhovani* (Gujarati) and *Radio Goa* (English) are for home services.

For the External Services, *India Calling*, with two versions, the Eastern and the Western, is supplemented by Arabic, Burmese, Chinese and Persian editions.

**Monitoring.**—Monitoring Service housed on a high point in Simla keeps track of about a hundred broadcasts a day in 11 different languages, from 30 different stations, extending to a total of nearly 50 hours. Important items of news from abroad are flashed to Delhi, to the News Division for inclusion in the news bulletins and a check is maintained on what other countries say about India and Indian problems.

**Listener Research.**—The primary purpose of Listener Research is to determine the listening habits and programme preferences of radio listeners by ascertaining from time to time their reactions to items broadcast.

**Advisory Committees, established at the** Broadcasting Stations in consultation with the State Governments, keep the respective Station Directors, All-India Radio, in touch with local public opinion in programme construction and advise them on such matters.

There is also an Advisory Committee with members from Parliament to advise the Minister for Broadcasting.

## PROGRAMMES

**Women's Programmes.**—Programmes for women in English (from important regional centres) and in Indian languages from all stations are broadcast at least twice a week. In the rural programmes too, there is a day devoted to rural women folk. Live messages from defence personnel in forward areas are broadcast in women's programme for wider circulation. Talks, dialogues, stories and songs form the composition of the programme and the topics generally are of feminine interest: child care, family planning, health hints. Group listenings are encouraged. By the end of 1964, there were about 1,500 Women's Listening Groups in India.

**Children's Programmes.**—Wherever possible the children are divided into two or three age groups. The programme is conducted or compered by an elderly character known to the children. Another elderly person usually a woman is used to assist the compere.

**These are generally broadcast twice a week.**

Fables, stories from classics and musical items, form the content of the programmes, and listeners are encouraged to participate.

In the rural broadcasts there is a children's day once a week. The formation of listening clubs has been encouraged and there are now about 2,100 such clubs.

**School Broadcasts.**—The school broadcasts are meant to supplement the regular curriculum of the school.

There are Educational Committees to advise the Station Director on the composition of the programme for the academic term, and these are announced in pamphlets for each term.

A Committee at the centre advises on policy.

Occasionally students from a particular class are taken to the radio station to give a performance.

The idea is that students should listen to the broadcasts while at school in the company of their teachers. Programmes for schools are broadcast from 23 stations during school terms in the regional languages. There were over 26,054 licensed radio sets as on 31-12-1963 in schools which have been registered as listening schools with AIR.

**Rural Broadcasts.**—While the provision of programmes is the Central responsibility, the supply of listening sets to the rural population is the responsibility of State Governments.

Supplementary or spare time occupations are suggested, and information is given on items like improved seed, new implements, sowing, crop and cattle pests and their remedies, and market rates of current agricultural produce.

Weather bulletins during the monsoon are a regular feature of the composite programme.

Programmes are broadcast from all stations (except Port Blair) in 11 Indian languages and about 48 dialects. Duration per day exceeds 30 hours.

**Farm Forums :**—Groups of farmers at each of the community development projects have been formed to listen to rural programmes and discuss later amongst themselves what they have listened about. The gist of these discussions is considered by the programme authorities and suitable answers given to points raised by the listening farmers. All the States have Farm Forums now in their development blocks and/or community projects.

The UNESCO experiment of organising Farm Forums among rural radio listeners was successful in Maharashtra where it was tried first. With a view to expanding the field of this project, FAO organised a Seminar in Delhi on Forum Broadcast in January 1964. It was envisaged that during the 3rd Plan, 25,000 Farm Forums would be organised in all the States together. There are now about 9,000 Forums in the country.

The Union Government has put into operation a scheme for popularising community listening by subsidising State Governments for the purchase of receiving sets. The aim is to provide each village with a population of 1,000 or above, with at least one set.

The subsidy is 50 per cent of the cost of sets and its immediate acceptance is reflected in the rapid rise in the number of community receiving sets.

As part of the scheme, Government has standardised the community receiver set with the help of the radio industry and the Indian Standards Institution. It has been possible to produce such sets for Rs. 120 each and with larger bulk orders the price may go down still further.

## BROADCAST RECEIVER LICENCES AS ON DECEMBER 31, 1964

(by Postal Circles)

| Postal Circle | Domestic Receiver Sets | Community | School |
|---|---|---|---|
| Andhra .. | 2,43,132 | 8,404 | 2,335 |
| Assam .. | 56,925 | 1,819 | 331 |
| Bihar .. | 1,63,699 | 791 | 4,044 |
| Bombay .. | 5,93,749 | 10,662 | 1,437 |
| Central .. | 2,70,086 | 3,668 | 1,316 |
| Delhi .. | 2,46,545 | 29 | 143 |
| Gujarat .. | 3,28,761 | 3,234 | 1,730 |
| Kerala .. | 1,03,854 | 2,693 | 1,153 |
| Madras .. | 4,21,193 | 13,436 | 2,630 |

| Rajasthan .. | 1,27,834 | 2,727 | 1,904 |
| U.P. .. | 3,58,491 | 11,982 | 3,688 |
| W. Bengal .. | 5,73,193 | 1,863 | 1,753 |
| Total .. | 40,87,506* | 74,023* | 26,820* |

*These figures are inflated to the extent of renewals for 1965 which were possible since the beginning of Nov. 1964.

Assam Circle comprises Assam, Manipur, Tripura, Nagaland and N.E.F.A.

Central Circle comprises Madhya Pradesh.

Punjab Circle comprises Punjab, Himachal Pradesh, and Jammu & Kashmir.

The number of radio licences of all types at the end of 1963 was 37,36,688. The number now (end of 1964) is estimated to have crossed the four million mark. There were also 600 television receivers in operation in Delhi at the end of November 1964.

The total number of radio sets supplied to the various States and Union Territories numbered 82,442 at the end of 1963 and 3,427 more radio sets were expected to be supplied by the end of 1963–64. Including the radio receivers supplied under the other subsidy schemes, there are now nearly 1,60,000 community listening centres all over the country.

The Union Government distributed nearly 9,400 community listening sets for the different States and the Union Territories. The larger recipients were :—Andhra Pradesh 1,672 ; Maharashtra 1,617 ; Uttar Pradesh 1,510 ; Orissa 580 ; Madhya Pradesh 565 ; Mysore 550 ; Punjab 505 ; Bihar 500 ; Gujarat 430 ; Kerala 420 ; and others, 1,040 making a total of 9,389 sets.

**Wire Broadcasting :** Started in May 1958, to enable low-income groups in Delhi to listen to the A.I.R. broadcasts, the Wire Broadcasting Service covers the Lodi Colony, Kasturba Nagar, Aliganj, Karbala and Thyagaraja Nagar localities of Delhi. The total programme coverage is about 280 hours per month in three daily transmissions. There are at present 1,636 subscribers.

## TRIBAL LANGUAGES & DIALECTS

All India Radio now broadcasts programmes regularly in 82 tribal languages, from Gauhati, Shillong, Kurseong, Kohima, Imphal, Simla, Cuttack, Calcutta, Indore, Ranchi, Hyderabad and Vijayawada. For rural programmes, 11 languages and 48 dialects are used. For news services, 29 Indian and foreign languages are used.

**Anniversary Programmes.**—Anniversaries of national leaders and of great musicians are now celebrated on a national scale.

**National Programmes.**—The Saturday National Programmes of music lasting 90 minutes have been quite popular. It is generally so planned that Northern and Southern (Karnatic) music alternate every Saturday. Arrangements are being made to have this item originate at other places. At present most of the Saturday concerts originate from Delhi and all stations relay them.

**Talks.**—Important topics of a national character are dealt with by an accepted authority in a nation-wide broadcast on Sundays and Wednesdays at 8·30 p.m. Since its inception in 1953, this programme has featured 527 talks and discussions.

**Plays, Operas.**—On alternate Thursdays, a national programme of plays or operas is arranged in such a way that all stations have the same item, in their respective languages, prepared from one single script. The literature of one region is thus made available to all the other parts of the country at the same time. Up to 31-12-1964, 104 such plays have been included in this series.

**Development Projects, Factories.**—In order to make the country plan-minded, a feature on some of the bigger national projects is arranged once a month, and it is put out on the air simultaneously from all the stations, the script with actual effects having been supplied from Delhi.

**Gandhi Prayers & Memories.**—Mahatma Gandhi had his own way of saying prayers and those prayers are broadcast from all stations on Friday mornings. Also the reminiscences of men and women who had known him, immediately after the prayers.

**Prasar Geet & Sugam Sangit.**—In order to provide all stations with standardised light and popular music, All-India Radio organised its own units in different regions for the production of songs. A processing plant capable of producing many discs for its own use in the first instance and for selling them to outside agencies on the lines of the BBC's Transcription Service, has been set up.

**Orchestral Music.**—All-India Radio also established an Orchestral Unit (Vadya-Vrinda) with two wings—one for the North Indian and the other for Karnatic music—for composing orchestral music, using mainly Indian instruments, though the violin, the double-bass and the clarionet were included among Indian instruments. So far over 110 compositions have been finalised and recorded for use when required.

**Transcription Service.**—The object of the transcription service is to keep A.I.R. stations supplied with the pick of the programme items suitable for each target area. During 1963–64, 7,844 recordings were supplied comprising 5,099 items of music including about 800 patriotic songs in all languages, 1,176 talks and 1,569 plays and features.

Taped-copies of important programme items have been prepared for record, altogether totalling 10,000 hours.

**Voice Recordings.**—AIR already has a unique collection of Mahatma Gandhi's prayer-speeches—(100 hrs.). It possesses 3,000 recordings of Pandit Nehru's speeches comprising nearly 800 hours in terms of duration. Some of his Red-Fort speeches are being released commercially on LP records.

Vedic recordings of about 20 hours have been preserved for broadcasting as and when needed.

Recordings of maestros, living and past, both in Karnatak and North Indian style, vocal and instrumental, have been acquired for preservation.

### Nehru Programmes

Nation's grief was expressed by a variety of tributes paid to his memory during the period of mourning—27th May to 8th June 1965. Tributes (4,313), features (923), scriptural reading and special compositions (777), News-reels (529), life-sketches, special bulletins, commentaries (396), Eye-witness reports, commentaries etc. (306), making a grand total of 7,144 items, covering all the languages and all the stations of All India Radio.

**Vividh Bharati.**—This all-entertainment programme, broadcast on short-wave 100 kW transmitters, from Madras and Bombay simultaneously, was introduced in October 1957. The programme is also broadcast on medium wave from 21 centres on special transmitters provided :—Bangalore, Bombay, Calcutta, Cuttack, Delhi, Hyderabad, Indore, Jaipur, Kanpur, Lucknow, Madras, Nagpur, Patna, Rajkot, Trichy, Vijayawada, Bhopal, Dharwar, Poona, Srinagar and Chandigarh.

The popular "Manoranjan" programme is also relayed by Goa while Gauhati presents a taped copy of this programme.

The duration of this recorded variety programme, mostly of music extends to 11¼ hours on week days and 12¼ hours on Sundays and principal festival days. A number of new features were introduced in the service with effect from Oct. 1963 to provide listeners all over the country with a larger and richer fare. The entire time is divided into 5 or 6 transmissions. For nearly 75 mts. a day, a special transmission is devoted to Karnatic music. Another half hour daily is allotted to "Request" programme for our Forces on the fronts.

Request programme for others is put on twice daily, for nearly 90 mts. together. Listeners' letters are answered every day and regional and folk music invariably finds place in the variety provided. Vividh Bharati receives on an average about three lakhs of letters from listeners per year.

Special items for South Indian listeners are broadcast daily for two hours in the afternoon from Madras.

A unique feature of this programme in which all the stations of All-India Radio contribute by sending choice items from their artistes on tapes, was the building up of an elaborate library of tapes, light and classical music, both vocal and instrumental, folk-songs, devotional music, skits, dialogues.

recitations of modern poetry, songs of regional groups in many languages.

Some of the news bulletins and commentaries (in Hindi) are being included in the Vividh Bharati; but that is perhaps a temporary arrangement to meet the emergency.

**Urdu Majlis:**—Half an hour's programme daily has been introduced for Urdu speaking audiences. The item originates in Delhi and is relayed by stations interested in it. Allahabad/Lucknow, Jammu/Srinagar, Jullundur, Hyderabad and Patna are other stations which have a regular Urdu programme in their schedules.

**Competitions.**—In its ceaseless effort to find new talent, All-India Radio holds many competitions every year. They are for music, light and classical, vocal and instrumental, northern and southern (Karnatak) styles. The first round of these is held Station-wise and the All-India round takes place in Delhi.

*Radio Sangeet Sammelan* has indeed become a regular annual feature of All-India Radio. It consists of a series of concerts before invited audiences arranged in Delhi, Bombay and Madras, and the programme is relayed by all stations.

A side-light of the Sammelan is the music competition meant to discover latent talent among younger artistes. Musicians vocal and instrumental between the ages 16 and 21 are invited to participate. The preliminary screening takes place at the respective stations within whose jurisdiction they come, and the final tests are held for Northern music at Delhi and for Karnatic music at Madras.

**Programme Libraries.**—At the headquarters of All-India Radio, New Delhi three important libraries have been built: (*i*) Recordings on tape and disc; (*ii*) Scripts of important programmes from all stations; and (*iii*) Tape recordings of entertainment programme items contributed by all stations of AIR.

## NEWS SERVICES DIVISION

During the national emergency, there was a greater demand for news, for accurate and reliable news. During 1964–65 the News Services Division broadcast a total of 132 bulletins in 29 Indian and foreign languages round the clock.

Two special news bulletins in English and other languages were added, one in the early morning and the other late at night before closing down. Besides the actual news, there were many topical talks and comments that were put out regularly to boost up the morale of the public. Two overseas correspondents will soon be appointed for covering news from (*i*) Africa and East Asia and (*ii*) West Asia. More news bulletins are to be introduced.

*Extended Programmes:* Bombay, Calcutta, Delhi and Madras stations of AIR were expected to have from 15th Sept. 1965 an extended (non-stop) broadcasting service for nearly 16 to 18 hours daily.

In addition to the bulletins originating from Delhi, regional news are now broadcast in 16 languages from all State capitals, Kohima being the latest addition.

The languages used in the Home Services are:

Assamese, Bengali, English, Gujarati, Hindi, Kanarese, Kashmiri, Malayalam, Marathi, Oriya, Punjabi, Sanskrit, Tamil, Telugu, Urdu, Konkani and about 20 other dialects.

All the news bulletins are prepared in the News Service Division and broadcast from the transmitters at Delhi set apart for news.

Each regional station relays the bulletins suitable for its listening areas.

## SIMPLE HINDI

A Committee of 11 members of Parliament was appointed to suggest ways and means of simplification of All India Radio's Hindi expression, particularly in its news-bulletins. Its Report has been received and another committee with Mr. Sri Prakasa as the Chairman has been entrusted with the task of implementing the decision. An expert Hindi Adviser has also been appointed to help the committee.

A similar committee to suggest the standardisation of Urdu expression has been appointed.

**Patriotic Songs:** In addition to the existing stock of national songs, All India Radio broadcast over one thousand new patriotic songs, composed by well-known poets in all the languages of the country and rendered by popular artistes. They were broadcast with good effect during the emergency.

**Dictionaries of Music & Folk-music:** Technical and descriptive terms of both the Karnatak and North Indian music will be explained in a compilation undertaken by All India Radio; the names and characteristics of the *Ragas* of both the varieties will also be provided. In the other dictionary, all forms of folk-music will be described in detail for a complete study of the subject. Tapes which will carry records of the folk-music, will serve as specimens.

**Radio News Reels:** Twice a week, radio news reels of 10 mts. duration, prepared by the News Service Division are broadcast from Delhi for an all-India consumption, and once a week in Hindi. On special occasions, such as receptions to visiting dignitaries, or of our leaders visiting other countries, extra "editions" of the radio news reels are broadcast. English, Hindi and other languages are used for these "newspapers of the air."

**Regional News.**—Centralised news from Delhi does not meet the requirements of the listeners adequately. In an effort to broadcast only news of All-India importance from Delhi, items of local interest are dropped. The State legislatures and other local institutions require to be covered for news. All capitals of States, now devote ten minutes a day for covering regional news in languages other than English. The timings however are late in the afternoon.

A few minutes are set apart at each station for local announcements. This period accommodates news of purely local interest.

**External Services.**—That the External Services serve a useful purpose can be seen from the fact that nearly 10,000 copies of *India Calling* (English) are distributed among listeners. Other Monthlies are: *Idhaat-ul-Hind* (Arabic); *Sada-i-Hind* (Persian); *Ponghubung* (Indonesian); *Lay Daiga Athan* (Burmese); *Yintudze Sheng* (Chinese); *Gya-Gar-Gi-Dra-Tan* (Tibetan); *D-Hind Awaz* (Pushtu).

For 22 hours and 30 minutes every day, the External Services of All India Radio broadcast programmes in 17 different languages for many parts of the world. The languages used are: Arabic, Burmese, Cantonese, English, French, Indonesian, Kuoyu, Nepali, Persian, Portuguese, Pushtu, Swahili and Tibetan. Among the Indian languages are: Hindi, Tamil, Gujarati and Konkani. Broadcasts in Sinhalese, Malay and Thai will be introduced shortly.

These broadcasts serve two purposes: they help Indians staying in different parts of the world to keep in touch with India; and to others, they help appreciate our art, culture, thought and general way of living. On the political front, the Indian viewpoint is best represented without any room for mis-interpretation.

Five more high power transmitters for external services are to be set up during the 3rd Plan.

In relation to time these broadcasts are composed of 25 per cent news, 33 Indian music, 3 Western music, 12 talks-discussions, 3 drama, 3 programme publicity, 21 Koran and other religious items.

## AIR STATIONS

Medium-Wave Stations as on June 15, 1965.

| Visakhapatnam .. .. | 322·6 | 930 |

Medium wave length remains unchanged throughout the year; its coverage after sun-set gets considerably extended.

* These are Vividh Bharati Relaying stations. § Transmission on short wave (also); the Changing wavelengths according to part of the day and season may be ascertained from Programme journals.

### HAMS—AMATUER BROADCASTERS

For a wider penetration of broadcasting technique, HAMS or amatuer broadcasters, with a small transmitter, are useful to pave the road for and help build an unofficial second line of technical experts. Hams are good wireless operators in times of emergency and they, by their continuous experimenting, help disclosing some of the unknown secrets of electronic engineering. For one reason or the other, the HAM movement has not been encouraged in India adequately. By 1962, there were just 300 Hams in India. About 100 were added to the number during 1963 and there are only 400 Hams. Even with this small number, the Hams are well organised. They have 9 clubs at Ahmedabad, Bangalore, Bombay, Calcutta, Delhi and Madras. Three periodicals are devoted to Ham Activity, the *Ham Bulletin*, the *Siran* and *63 de Mars*. The noteworthy feature is that the ladies of Bangalore have been enamoured of Ham activity and have formed themselves into a Ladies' Group.

### BROADCAST LICENCES & PRODUCTION OF RECEIVING SETS

Broadcast receiver licences are issued at all head and sub-post offices at a fee of fifteen rupees per year, and cover the use of receiving sets throughout India.

Broadcast Receiver Licences are issued to Municipalities or other public bodies for the reproduction of broadcast programmes in public places by the Postmaster-General of the State.

A licence issued for this purpose covers the use of one wireless receiver only.

A separate Broadcast Receiver Licence is, however, necessary in the case of clubs, institutions, messes, etc., for reproducing broadcast programmes at dances, concerts, bazaars, etc., to which the public are admitted.

Production of receiving sets in India has been a tricky business and collection of relevant statistics more difficult than ever. In the first place the organised sector and the small-scale sector form two distinct groups and there is some discrepancy in the State Govt.'s statistics and those of the Union Govt. Figures by the financial as well as by calendar years are published, without any reference to the production of cottage or small-scale industries. The transistor age has added further complications: what is a complete radio receiving set? The definition is not yet final and production reports have to be classified into many types of radio sets. The figures therefore must be viewed subject to such considerations.

### LICENCES & PRODUCTION OF SETS 1955-64

Domestic receiver licences as on 31st December and Total Yearly production of receiving sets (organised sector only)* Units.

1955: 9,47,353; 2,01,204; 1956: 10,75,909; 1,50,600; 1957: 12,30,814; 1,90,692; 1958: 14,27,421; 1,98,108; 1959: 17,18,182; 2,13,864; 1960: 19,79,820; 2,68,320; 1961: 24,20,681; 3,26,340; 1962: 28,69,739; 3,43,284; 1963: 35,35,942; 4,19,460; 1964: 42,13,934 (provisional).

* This sector consists of 20 registered factories.

### BHARAT ELECTRONICS LTD.

In the manufacture of electronic equipment Bharat Electronics Ltd., Bangalore, plays the most important role in India, being the only unit in the public sector under the Defence Ministry. Established in 1954, BEL started production on a small scale in 1956. (See under "Government Industrial Undertakings" for more details).

# HOUSING

WORKING on the basis of the data collected in the 1961 Census and further population projections and taking into account possible new constructions and depreciation of existing houses, it has been estimated that the total shortage of urban housing in the country, by the beginning of the Fourth Plan, would be of the order of 11·4 million dwelling units. In addition, nearly 62·7 million houses in the rural areas are either kacha or substandard and require to be rebuilt.

The Third Plan roughly envisages an investment of about Rs. 1,550 crores in housing—Rs. 1,125 crores in the private sector and Rs. 425 crores in the public sector. The latter figure includes Government funds to the extent of Rs. 122 crores and L.I.C. funds to the extent of Rs. 60 crores earmarked in the Third Plan for the various social housing schemes administered by the Union Ministry of Works, and Housing, namely subsidised industrial housing, low and middle income group housing, slum clearance, rental housing for State Government employees, plantation labour housing, land acquisition and development and village housing schemes. The remaining investment in the public sector is intended for additional housing programmes, such as housing provided by the Central and State Governments, public undertakings and local bodies, mainly for their own employees, housing for the labour employed in coal and mica mines, and housing for the backward classes, etc. As against this, the outlay for housing in the Fourth Plan is likely to be of the order of Rs. 2,460 crores, including a possible investment of about Rs. 1,450 crores in the private sector, about Rs. 530 crores expected to be provided from Government and institutional sources for the various social housing schemes of the Ministry of Works and Housing and Rs. 480 crores for the housing programme of Central Ministries for their employees.

The details of progress, under individual Housing Schemes administered by the Ministry of Works and Housing, are indicated below.

### SUBSIDISED INDUSTRIAL HOUSING SCHEME

The Subsidised Industrial Housing Scheme, which was introduced in September 1952, contemplates grant of financial assistance by the Government of India to the State Governments and through them to other approved agencies, such as Statutory Housing Boards, Local Bodies, Industrial Employers and registered Co-operative Societies of industrial workers, for construction of houses for industrial workers, covered by Section 2(1) of the Factories Act, 1948, and mine workers (other than those engaged in coal and mica mines) falling within the meaning of Section 2(*h*) of the Mines Act, 1952. The benefits of financial assistance under the Scheme are available to workers, whose income does not exceed Rs. 350 per mensem. The Scheme is administered through the respective State Governments, within whose territorial jurisdiction the construction is contemplated.

Under the Scheme, the Government of India provides the entire cost of houses to be constructed for industrial workers by the State Governments, Statutory Housing Boards and Municipal Bodies (50 per cent as outright subsidy and the remaining 50 per cent by way of loan) subject to the maximum of the prescribed ceiling costs for various types of houses. Assistance is also given to employers and co-operative societies of industrial workers by offering them an outright subsidy at 25 per cent of the estimated cost of houses (subject to prescribed ceiling costs) to be constructed by them in addition to loans at 50 per cent of the total cost of construction in the case of employers and at 65 per cent of the cost in the case of co-operatives of industrial workers.

The following four types of accommodation can be provided under the Scheme, depending upon various factors, such as the rent-paying capacity of the workers, the cost and availability of land and local considerations etc.:—(*a*) Open developed plots; (*b*) Skeletal houses; (*c*) Pucca houses; (*d*) Hostel and dormitory buildings.

The ceiling costs and rents prescribed under the scheme for various types of dwelling units have been increased by about 15 per cent with effect from April 1, 1964. The ceiling costs and the subsidised rents per month respectively are as follows: (1) For places outside Bombay and Calcutta and their industrial areas: Rs. 1,600 to Rs. 1,700; Rs. 5·50 to Rs. 26·50. (2) For places in Bombay and Calcutta and their industrial areas: Rs. 2,400 to Rs. 9,200; Rs. 9·50 to Rs. 41·00.

The ceiling costs and the rents indicated above can, however, be increased, in view of certain specified special considerations.

Since the introduction of the Scheme in Sept. 1952, upto the end of March 1965, a total sum of Rs. 60·96 crores has been sanctioned for the construction of 1,72,578 houses, out of which 1,44,632 houses (1,15,238 in the States' sector, 25,043 in the employers' sector and 4,351 in the co-operative sector) had been completed till then. A sum of Rs. 51·81 crores has been released to the different construction agencies.

The State-wise break-up of houses sanctioned and built is given in the table below:

| State | Houses sanctioned | Houses built |
|---|---|---|
| Andhra Pradesh .. | 5,213 | 4,943 |
| Assam .. .. | 417 | 303 |
| Bihar .. .. .. | 13,652 | 12,155 |
| Gujarat .. .. | 25,595 | 18,671 |
| Jammu & Kashmir .. | — | — |
| Kerala .. .. | 790 | 790 |
| Madhya Pradesh .. | 11,577 | 9,024 |
| Madras .. .. | 6,986 | 5,629 |
| Maharashtra .. .. | 35,887 | 29,944 |
| Mysore .. .. | 10,777 | 9,503 |
| Orissa .. .. .. | 3,441 | 2,368 |
| Punjab .. .. | 5,768 | 4,752 |
| Rajasthan .. .. | 4,012 | 3,615 |
| Uttar Pradesh .. | 31,878 | 28,632 |
| West Bengal .. .. | 13,414 | 11,436 |
| *Total* .. .. | 1,69,411 | 1,41,765 |
| Delhi .. .. .. | 3,167 | 2,867 |
| *Grand Total* .. | 1,72,578 | 1,44,632 |

State Governments can utilise funds upto 10 per cent of their total allocation under the scheme as loans for the construction of schools, dispensaries, welfare centres, shops, etc. in industrial housing colonies in order to provide basic amenities in these colonies.

### PLANTATION LABOUR HOUSING SCHEME

Since the beginning of the Scheme in April 1956, the States have so far sanctioned projects for the construction of 1,644 houses at a cost of Rs. 36·78 lakhs out of which 921 houses have been completed. The Scheme has not made satisfactory progress mainly due to the inability of the planters to furnish the security required for the loans. A working group on Plantation Labour Housing set up by the Ministry of Labour and Employment have *inter alia* examined this

question and have recommended the grant of 25 per cent of the cost of each house built under the scheme as capital subsidy for planters. The recommendation has been accepted by the Government of India.

## LOW INCOME GROUP HOUSING SCHEME*

This Scheme, which was introduced in November, 1954, envisages the grant of long-term loans for construction of new houses for persons having an annual income not exceeding Rs. 6,000. The loan to individuals and others generally bears an interest of about 5¾ per cent per annum (plus about ¼ per cent administrative charges of State Governments) and is repayable in a period not exceeding 30 years. The following categories of persons or institutions can obtain loan assistance under the Scheme :—

(*i*) Individuals with annual income not exceeding Rs. 6,000 and co-operative societies of such individuals, for building their own houses.

(*ii*) Public Institutions run on a no-profit-no-loss basis and non-governmental but recognized health institutions, hospitals, educational trusts and educational institutions (including universities) and charitable institutions, for the construction of houses, which should be sold or let out to such of their member employees as are eligible for benefits of the Schemes.

(*iii*) Local bodies and State Governments and their designated agencies, for the construction of houses which should be sold or let out to eligible persons

Short-term loans, repayable in a period not exceeding ten years, are also advanced under the Scheme by the Central Government to the State Governments, for acquisition and development of land and for the subsequent sale of the developed sites to eligible persons on a no-profit-no-loss basis.

The State Governments have been authorised to utilise amounts not exceeding one-third of the allocations under the Scheme for the construction of houses for the economically weaker sections of the community. The Central Government will give a capital subsidy of 25 per cent of the cost of the houses. These houses will be given on rent to persons with an annual income not exceeding Rs. 3,000 in Bombay, Calcutta and Delhi, Rs. 2,400 in other capital towns of States and Rs. 2,100 elsewhere.

Since the introduction of the Scheme in November, 1954, upto 31st March, 1965, a sum of Rs. 60·30 crores had been advanced as loan to the various States (including Rs. 4·84 crores advanced to third parties in the Union Territories). Another sum of about Rs. 5·6 crores has been provided in the budget for 1965-66 for State Governments and Union Territories. Out of a total of 1,29,023 houses sanctioned upto the end of March 1965, construction work was completed on about 92,985 houses.

## SLUM CLEARANCE IMPROVEMENT SCHEME

The Scheme, which was introduced in May 1956, contemplates provision of four types of accommodation viz., open developed plot, skeletal houses, pucca houses and hostel and dormitory — depending upon various factors such as the rent-paying capacity of the slum families involved, the cost and availability of land and other local considerations. Wherever it is possible to improve the living conditions in a slum area by providing amenities and total clearance of the areas is considered inadvisable, the scheme envisages improvement work being taken up in the area. Besides these, it is also permissible to undertake pilot projects for construction of night shelters to provide sleeping accommodation, on payment of nominal charge, to pavement dwellers or other houseless persons in the cities. With a view to popularising this programme, it has been suggested that the responsibility for the management of the night shelters should be entrusted to social service organizations such as the Bharat Sevak Samaj, who may also be invited to bear a portion of the cost of construction of these shelters, by raising public contributions, etc.

Since the inception of the Scheme in May, 1956, upto March 31, 1965, Central assistance totalling Rs. 22·23 crores was given to all the State Governments and in the Union Territories of Delhi and Tripura.

In all, upto March 31, 1965, projects for the construction of 89,825 dwelling units costing Rs. 33·29 crores have been sanctioned. Out of these, 48,613 dwelling units have already been completed. A sum of Rs. 5·93 crores has been provided for the implementation of the scheme in the budget estimates for 1965-66.

## JHUGGI & JHOPRI REMOVAL SCHEME

The Scheme aims at providing alternative accommodation on rental basis to unauthorised squatters on Government and public lands in Delhi, numbering about 50,000 families, whose occupation dates from before July 31, 1960. The programme aims at providing 5,000 tenements, 20,000 plots of 80 sq. yds. and 25 000 camping plots of 25 sq. yds., the total cost of which will be about Rs. 10 crores. The entire expenditure on this Scheme is met by the Central Government and a sum of Rs. 5·50 crores has been disbursed to the Delhi Municipal Corporation, which is implementing this Scheme. Till 31st March 1965, since the inception of the Scheme in January 1960, projects have been formulated for the laying of 38,247 plots (27,246 of 25 sq. yds. and 11,001 of 80 sq. yds.) and construction of 5,000 tenements at a total cost of Rs. 7·68 crores. Out of these, 19,450 plots (15,647 of 25 sq. yds. and 3,803 of 80 sq. yds.) have already been laid. The work of construction of 3,800 tenements has also been taken in hand. About 16,000 families have so far been allotted plots.

## VILLAGE HOUSING PROJECTS SCHEME

The Village Housing Projects Scheme which was introduced in October, 1957, envisages the establishment of housing projects in about 5,000 selected villages all over the country. Financial assistance is given in the form of loans not exceeding Rs. 2,000 or 66⅔ per cent of the cost of construction of the house, whichever is less. It has been decided to increase these limits to Rs. 3,000 and 80 per cent of the cost of the house respectively with effect from August 1965. Loan assistance is also granted to villagers for improving their existing houses. The Scheme is based on the principle of aided self help, and necessary technical guidance to beneficiaries is given by the Rural Housing Cells set up in the States.

As against the Second Plan provision of Rs. 5 crores, the total assistance availed of by the State Governments amounted to Rs. 3·8 crores, representing a performance of 75·5 per cent. The Third Plan provision for the scheme is Rs. 12·7 crores, including Rs. 5 crores earmarked for providing house sites to landless agricultural workers. A sum of Rs. 1·51 crores had been utilised by the States during the first two years of the Third Plan.

According to the reports received so far (July 1965), all the 5,000 villages allotted to States and Union Territories for development had been selected, survey had been conducted in about 3,500 villages and layout plans drawn up for 3,000 villages. About 49,630 houses have been sanctioned for construction, out of which about 24,055 houses have been completed.

Formerly, funds were given to the States mostly by way of loans, but now nearly fifty per cent of the financial assistance to them will be given as grants for the purpose of providing house sites to landless agricultural workers and laying of streets and drains in the selected villages. In addition, the amount of subsidy given to the State Governments for the Rural Housing Cells has been enhanced to enable them to employ additional staff to provide technical guidance to persons building houses under the Scheme. These decisions are expected to remove some of the causes holding up the progress of the Scheme. The question of taking up these new programmes, *viz.*, provision of house sites to landless agricultural workers and streets and drains in the selected villages is reported to be under various stages of consideration of the State Governments.

The Government of India have also set up six regional Research-cum-Training Centres, for undertaking work relating to research, training and extension, in rural housing and village planning. The Ford Foundation have agreed to provide financial assistance to these Centres, to the extent of about Rs. 9·6 lakhs during the Third Plan period for construction of Research-cum-Demonstration Houses in rural areas.

## L.I.C. FUNDS FOR HOUSING

From the financial year 1958-59, for the first time, L.I.C. funds were harnessed in a systematic manner for financing the Middle Income Group Housing Scheme and the Rental Housing Scheme for State Government Employees. From 1962-63, L.I.C. funds are also being availed of by States for Land Acquisition and Development Scheme, and for meeting expenditure over and above their Plan provision, on three Plan schemes, namely Low Income Group Housing Scheme, Plantation Labour Housing Scheme and Village Housing Projects Scheme.

During the period from 1958-59 to 1964-65, L.I.C. funds to the extent of Rs. 62·15 crores have been made available to State Governments through the Union Ministry of Works and Housing. Out of this amount, about Rs. 15 crores were allocated and drawn by the various States during 1964–65.

## MIDDLE INCOME GROUP HOUSING SCHEME

Under the Middle Income Group Housing Scheme, introduced in February, 1959, the Life Insurance Corporation advances loans to the State Governments to the extent authorized by the Central Government at 5¾ per cent interest, repayable in 25 annual equated instalments. The State Governments, in turn, advance loans to individuals within the income range of Rs. 6.001-15,000 per annum, or their co-operatives, for the construction of houses for their bonafide residential purposes, recovering the amounts over the same period (or any shorter periods as the individuals may desire), with an additional interest of about ¼ per cent to cover normal administrative charges.

The amount of loan to be granted for the construction of a house is not to exceed 80 per cent of the estimated cost of the house, including cost of developed land, subject to a maximum loan of Rs. 20,000 per house. The Scheme has been amended to permit advance (out of the approved house building loan) to an applicant for the purpose of completing the purchase of a developed plot of land, where he has already paid 50 per cent of the cost from his own resources, provided that the amount already paid by the applicant towards the cost of the plot is not less than 25 per cent of the approved loan amount.

The loans are advanced in stages. Before advancing loans to individual applicants, the State Governments have to scrutinise and approve the layout, designs, specifications etc. and have also to ensure that the necessary essential services in accordance with the normal standards applicable to the area are available. The floor area of house constructed under this scheme should not be, ordinarily, less than 400 sq. ft. and the cost (exclusive of the cost of developed land) should not exceed Rs. 30,000. One-half of the allocation under the scheme can be utilised by the State Government for construction of houses for allotment on rent. The loans advanced by the L.I.C. under the scheme, to the various State Governments during the Second Plan period, amounted to Rs. 10·18 crores. The total funds released during the first four years of the Third Plan amount to Rs. 15 01 crores, including a sum of about Rs. 4·33 crores released during 1964-65. According to the reports received so far (July 1965), the various State Governments have sanctioned about 14,513 houses for construction, out of which 8,442 houses have been completed.

* The Union Ministry of Works and Housing has raised the maximum amount of loan admissible under the low income group housing scheme to Rs. 10,000.

### RENTAL HOUSING SCHEME

Another Scheme called the Rental Housing Scheme for State Government Employees, financed by the Life Insurance Corporation, was also introduced in February, 1959. The Scheme envisages the grant of loan assistance to State Governments for the construction of houses for allotment to their employees on a rental basis.

During the Second Plan period the L.I.C. advanced under the Scheme a sum of Rs. 6·96 crores to nine States, viz. Andhra, Bihar, Kerala, M.P., Madras, Mysore, Orissa, Rajasthan and West Bengal. The scheme is in operation in all the States except Jammu & Kashmir, Nagaland and Uttar Pradesh. The total amount of funds made available to State Governments for the Scheme during the first four years of the Third Five Year Plan is Rs. 7·93 crores, while an amount of about Rs. 2·90 crores was advanced during 1964-65. According to the reports received so far (July 1965), the State Governments have sanctioned projects for construction of 14,590 houses, out of which 10,120 houses have already been completed.

### HOUSE BUILDING ADVANCES TO CENTRAL GOVERNMENT EMPLOYEES

House building advances are made to Central Government employees for the construction of houses, enlargement of existing accommodation and for the purchase of ready-built houses from Government, semi-Government or autonomous institutions like the improvement trusts. The maximum amount of advance admissible is 36 months' pay of the Government employee subject to a maximum of Rs. 25,000 in the case of construction or purchase of ready-built houses, and a maximum of Rs. 10,000 in the case of enlargement of existing accommodation. Low-paid employees can, however, be granted advance up to Rs. 4,800 irrespective of their pay.

From April 1956, when the Scheme was revived, applications for advances involving the grant of loan to the extent of Rs. 5·37 crores have been approved up to July 31, 1965.

### LAND ACQUISITION AND DEVELOPMENT SCHEME

High land prices and general scarcity of developed plots have been responsible, in a large measure, for the slow progress in housing and slum clearance. A Land Acquisition and Development Scheme was therefore formulated and introduced in October, 1959, to assist the State Governments to arrange bulk acquisition and development of land in large and growing towns and to make available to public, developed plots at reasonable rates. The Scheme would also help in the stabilisation of land prices, rationalisation of urban development and promotion of self-sufficient composite colonies, giving due consideration to factors like provision of essential services, shopping centres, schools, and transport and other community facilities.

During the Second Plan period, the State Governments availed of Central assistance to the extent of Rs. 2·2 crores. For 1961–62, loans amounting to Rs. 3·5 crores had been released to the State Governments. From the year 1962-63 onwards, the scheme is being financed from the funds provided by the L.I.C. and a sum of Rs. 11·10 crores was drawn by the States, during the period 1962-63 to 1964-65. From 1959 the State Governments are reported to have sanctioned projects for acquiring and developing 22,153 acres at a cost of Rs. 40·59 crores, out of which 11,251 acres have been actually acquired and 6,940 acres developed.

### THIRD AND FOURTH FIVE YEAR PLANS

In the five years of the Third Plan, between 1961 and 1966, it is expected that something like Rs. 1,565 crores will have been spent on building houses — Rs. 460 crores by the Government and the rest by individuals.

During the Fourth Plan period (1966-1971), the investment in house-building is expected to be Rs. 2,460 crores — more than a tenth of the total outlay on the Plan. Something like 57 lakh houses will be built from this money (of which Rs. 1,010 crores will come from public funds).

### HOUSES FOR POLICEMEN

The Centre has advanced so far nearly Rs. 18 crores to the States for building houses for the policemen.

In 1963-64 budget also, Rs. 3 crores had been set apart for this purpose.

The scheme was introduced in 1956 to help the States in providing better housing facilities to their police personnel.

The police housing loans advanced to State Governments are repayable in 20 equal instalments, and the interest charged is 4½ per cent per annum.

# ADMINISTRATION OF JUSTICE

THE Indian Union though a dual polity has no dual judiciary at all. The Supreme Court and the High Courts form one single integrated judiciary having jurisdiction and providing remedies in all cases arising under the constitutional law, the civil law or the criminal law. This is done in order to eliminate all diversities in remedial procedure.

The writs are now issued by the Supreme Court of India and the various High Courts in the territory of India. All laws which existed before independence continue to operate in India as before subject to adaptation and modification made therein. Article 372 of the Constitution provides *inter alia* that, subject to the other provisions of the Constitution all laws in force in the territory of India immediately before the commencement of the Constitution shall continue in force therein until altered, repealed or amended by a competent Legislature or other competent authority.

Article 13 of the Constitution provides that all laws in force in the territory of India immediately before the commencement of the Constitution, in so far as they are inconsistent with the provisions of the Constitution relating to Fundamental Rights (Part III) shall to the extent of such inconsistency be void.

The State is also debarred from making any law which takes away or abridges the Fundamental Rights conferred by this Part, and any law made in contravention shall be void to the extent of such contravention (Art. 13 (2)).

Article 14 ensures to all persons equality before the law by providing that the State shall not deny to any person equality before the law or the equal protection of the laws within the territory of India.

The continuity of the existing laws and legal procedure is further ensured by Article 375 under which all courts of civil, criminal and revenue jurisdiction and all authorities and officers continue to exercise their respective functions subject to the provisions of the Constitution.

The indigenous law of India is personal and divisible with reference to the two great classes of the population, Hindu and Muslim. Both systems claim divine origin and are inextricably interwoven with religion, and each exists in combination with a law based on custom. The rules of the Shastras and the Koran have, however, been in some cases altered and relaxed. Instances can be found in the Bengal Sati Regulation Act of 1829, the Indian Slavery Act, 1843, the Caste Disabilities Removal Act of 1850, the Hindu Widows' Remarriage Act, 1856, and some other Acts and Codes like those which remove the civil disabilities of Harijans.

During recent years indeed there had been a determined demand on the part of social reformers, and various women's organisations in India for an amendment of the Hindu Law so as to bring it into line with progressive social opinion, in consonance with the spirit of the times.

The Draft Hindu Code that was before the provisional Parliament aimed at abolishing the archaic principles of the ancient system of law, the removal of sex and caste disabilities, and generally simplifying, secularising, and modernising the law governing all Hindus, including Lingayats, Buddhists, Jains and Sikhs. But the Code lapsed on account of the dissolution of the provisional Parliament. The special Marriage Act was passed in 1954.

The Government of India however introduced piecemeal legislation regarding reforms in Hindu Law.

The following Acts have already been passed : The Hindu Marriage Act 1955, The Hindu Succession Act 1956, The Hindu Minority and Guardianship Act 1956, The Hindu Adoptions and Maintenance Act 1956. The new Hindu code is thus part of the statute book.

In the meanwhile, an opposite tendency has been observable among the Muslims, who by recent legislation have sought to revert to the law of the Shariat, discountenancing the application of Hindu Law and custom to the sections of the Muslim community who as converts from Hinduism had retained Hindu Law in matters of inheritance and succession.

Apart from this, the entire legal system which has hitherto prevailed in the country is in course of time bound to undergo a profound transformation by reason of the withdrawal of British rule and the partition of India. A Law Commission has been appointed by the Government of India for this purpose, and it has already submitted to the Government interim reports on certain laws. It has also submitted its report on the administration of justice and legal education.

A summary of this was given in the 1959-60 *Directory*.

A demand has been made for the simplification of the procedure and law for the administration of justice.

Accordingly a bill for amending the code of Criminal Procedure was passed. The amendment gives the accused certain new rights. He can now take an oath and give evidence if he so desires.

The Indian Penal Code has from time to time been amended. The rules of Civil Procedure have been embodied in the Code of Civil Procedure. The Code of Civil Procedure was remodelled in 1908 and the Code of Criminal Procedure in 1898. These Codes as amended from time to time are now in force. The Law Commission has also submitted its report on the amendments to the Civil Procedure Code.

## SUPREME COURT

Art. 124 of the Constitution provides for the establishment of a Supreme Court of India consisting of a Chief Justice of India and seven other judges. There is provision in law for the appointment in all of 13 other judges. At present there are 11 judges including the Chief Justice (see Act 17 of 1960). Every judge of the Supreme Court shall be appointed by the President and shall hold office until he attains the age of sixty-five years. In the course of appointment of a Judge the Chief Justice shall always be consulted. Only a citizen of India who has been for at least 5 years a judge of a High Court, or for 10 years an advocate of a High Court, or a person, who in the opinion of the President, is a distinguished jurist, is qualified to be appointed judge of the Supreme Court.

A judge of the Supreme Court is not liable to be removed from his office except by an order of the President passed after an address by each House of Parliament, supported by a majority of the total membership of that House, and by a majority of not less than two-thirds of the members of that House present and voting, has been presented to the President in the same session for such removal, on the ground of proved misbehaviour or incapacity. No person who has held office as a judge of the Supreme Court shall plead or act in any court or before any authority within the territory of India.

The Supreme Court is a court of record with all the powers of such a court including the power to punish for contempt. The seat of the Court is to be in Delhi or such other place as the Chief Justice with the approval of the President may from time to time appoint.

The Supreme Court has exclusive original jurisdiction in any dispute (*a*) between the Government of India and one or more States; (*b*) between Government of India and one or more States on the one side and one or more other States, on the other; (*c*) between two or more States, if and in so far as the dispute involves any question (whether of law or fact) on which the existence or extent of a legal right depends (Article 131).

The appellate jurisdiction of the Supreme Court extends over all appeals from any judgment, decree or final order of a High Court, in civil, criminal or other proceedings, if the High Court certifies that the case involves a substantial question of law as to the interpretation of the Constitution. If the High Court refuses such a certificate the Supreme Court may grant special leave to appeal in a proper case (Art. 136). An appeal shall also lie to the Supreme Court from a High Court in civil matters, when the amount or value of the subject matter in dispute is not less than Rs. 20,000 or the High Court certifies the case to be a fit one for appeal to the Supreme Court (Art. 133).

In criminal matters under Art. 134 an appeal lies to the Supreme Court from any judgment, final order or sentence of a High Court, if the High Court has (*a*) on appeal reversed an order of acquittal of an accused person and sentenced him to death; or (*b*) has withdrawn for trial before itself any case from a subordinate court and has in such trial convicted the accused person and sentenced him to death; or (*c*) the High Court has certified that the case is a fit one for appeal.

For purposes of appeals to the Supreme Court, the Judicial Commissioners' Courts are to be considered as High Courts.

Under Art. 136 discretion is given to the Supreme Court to grant special leave to appeal from any judgment, decree, sentence or order, in any matter passed by any Court or Tribunal in the territory of India.

The Supreme Court has also power to review its own judgement (Art 137).

The jurisdiction and powers of the Federal Court under the existing law are also exercisable by the Supreme Court (Art. 135) including the advisory power to give its opinion on questions of law or fact referred to it by the President (Art. 143).

The law declared by the Supreme Court shall be binding on all courts in the territory of India excepting the Supreme Court itself.

The dual system in the Supreme Court was abolished with effect from January 26, 1955.

Parliament has the power to legislate on the constitution, organisation, jurisdiction and powers of the Supreme Court.

Article 32 of the Constitution guarantees the right to move the Supreme Court by appropriate proceedings for the enforcement of Fundamental Rights; and for the enforcement of such rights the Supreme Court has power to issue directions or orders or writs, including writs in the nature of Habeas Corpus, mandamus, prohibition, *quo warranto* and *Certiorari* whichever may be appropriate.

Power is given to Parliament to enlarge the jurisdiction of the Supreme Court by appropriate legislation (Art. 138).

The royal prerogative to grant pardons, reprieves, respites or remissions of punishments now resides in the President (Art. 72).

Under Art. 348, all proceedings in the Supreme Court and in every High Court in India and the authoritative text of all Bills and Acts of Parliament and the State Legislatures and of all Ordinances promulgated by the President or Governors and of all orders, rules and regulations issued under the Constitution or any law shall be in the English language. If this language is to be replaced by any other language, Parliament must legislate to that effect. Parliament has passed the Official Languages Act (No. 19 of 1963). Though the Act enables the Governor of a State to authorise the use of Hindi or the official language of the State in the High Court, it does not include any provision, with respect to the language in the Supreme Court.

All authorities, civil and criminal in the territory of India, have to act in aid of the Supreme Court (Art. 144). The independence of the judges of the Supreme Court, is secured by charging their salaries on the Consolidated Fund of India, and by prohibiting any discussion in the legislature on the conduct of the judges in their official capacity.

*Some important judgments of the Supreme Court of India during* 1963-64:

I. *Mohan Chowdhurry* v. *The Chief Commissioner, Union Territory of Tripura*, A.I.R. 1964 S.C. 173.

This case laid down the following two principles. (1) When the President of India by an order under Article 359(i) suspended the right of any person to move any court for the enforcement of the rights guaranteed by Articles 21 and 22 during the period of emergency, a person cannot move the Supreme Court under Article 32 for the enforcement of his rights. (2) The President's order does not suspend the Supreme Court power under Act 32, but only the right of a person to move the court.

II. *Express Newspapers* v. *Somayajulu*, A.I.R. 1964 S.C. 279.

In this case the Court laid down that on a construction of S. 2 (b) of the Working Journalists (Conditions of Service) and Miscellaneous Provisions Act (No. 45 of 1955), it would not be possible to hold that a part-time employee who satisfies the test prescribed by S. 2 (b) can be excluded from its purview merely because his employment is part-time.

III. *Makhan Singh* v. *State of Punjab*, A.I.R. 1964 S.C. 381.

In this case, the court laid down the following principles:

(1) The suspension of Article 19 during the period of emergency, removes the fetters on the powers of the Legislature and the Executive. Hence, if the Legislature and/or the Executive commits acts which violate the rights under Article 16, their validity is not open to challenge either during the period of emergency or even after that, by virtue of Art. 358.

(2) The Presidential order under Art. 359 cannot widen the authority of the legislature or the executive; it merely suspends the right to move the Supreme Court. However, as soon as the order ceases to be operative, the infringement of the rights made either by legislative enactments or by executive action can perhaps be challenged in a court of law if the rights infringed were in operation during the pendency of the Presidential order. The validity or Indemnity Act, if passed, may also be carefully scrutinised.

(3) Proceedings taken under S. 491(*i*) (*b*) of the Criminal Procedure Code also fall under Article 359 (*i*). Hence, the prohibition contained in 359 and the Presidential order apply as much to proceedings under S. 491(*i*) (*b*) as to those under Article 226 (*i*) and Article 32 (*i*).

(4) Though an order of detention under the Defence of India Act and the Rules cannot be challenged on the ground that the Article and the Rules contravene the fundamental rights under Art. 147, 21 and 22, the detention, can be challenged on grounds of infringement of the rights conferred by Part III of the Constitution other than those specified in the Presidential order.

(5) A detenue can move the court for a writ on the ground that his detention has been ordered malafide or there has been excessive delegation.

IV. *The Andhra Pradesh State Road Transport Corporation* v. *Income-tax-Officer*, A.I.R. 1964 S.C. 1486.

In this case the Court laid down that the income derived from its trading activity by the Andhra Pradesh Road Transport Corporation is not the income of the State of Andhra Pradesh within the meaning of Article 289 (*i*) of the Constitution. Hence, it is not exempt from Union taxation.

V. *Amarchand* v. *Union of India*, A.I.R. 1964 S.C. 1658.

In this case the question of claim of privileges of documents was decided by the Court. The Supreme Court laid down that though under sections 123 and 162 of the Evidence Act, the court cannot hold an enquiry into the possible injury to public interest which may result from the disclosure of the document in question, the Court is competent to hold a preliminary inquiry and determine the validity of the objection to its production. This would necessarily involve an enquiry into the question as to whether the document relates to the affairs of the State.

VI. *Chitralekha* v. *State of Mysore*, A.I.R. 1964 S.C. 1828.

In this case, the court laid down that the State Government has power to prescribe a machinery and also the criteria for admission of qualified students to Medical and Engineering Colleges run by the Government and with the consent of the management of the Government aided colleges, to the said college also.

## HIGH COURTS

Every High Court is a court of record and has all powers of such court including the power to commit for contempt of itself.

Every judge of a High Court is appointed by the President after consultation with the Chief Justice of India, the Governor of the State and the Chief Justice of the particular High Court; and he holds office until he attains the age of sixty-two years.

A person is not qualified to be appointed a judge of a High Court unless he is a citizen of India and has either held judicial office or practised as an advocate for 10 years in any of the States.

A High Court judge is not liable to be removed from his office except in the manner provided in Art. 124 (4) for the removal of a judge of the Supreme Court of India.

No person who after the commencement of the constitution has held office as a permanent judge of a High Court could plead or act in any court or before any authority in the territory

of India except the Supreme Court or other High Courts.

There is provision in the Constitution for the appointment of additional or acting judges.

Power is given to the President in consultation with the Chief Justice of India to transfer a judge from one High Court to any other High Court in India. (Art. 222.)

Article 225 preserves the jurisdiction and powers of the High Courts as they existed immediately before the commencement of the Constitution. Restrictions on the exercise of the original jurisdiction in revenue matters are removed.

Art. 226 gives to every High Court in India power throughout its jurisdiction to issue to any person or authority including Government directions, orders, writs, including writs in the nature of Habeas Corpus, mandamus, prohibition, *quo warranto* and *Certiorari* for the enforcement of Fundamental Rights and for any other purpose. (Art. 226.)

The High Courts have powers of superintendence over all subordinate Courts and tribunals within their respective jurisdiction.

Legislation affecting constitution and organisation of the High Courts can be passed by Parliament alone.

The Law Commission appointed by the Government of India has rejected the suggestion that the powers of the High Courts under Art. 226–227 should be curtailed.

The Commission has also recommended to the Government of India that a High Court should not have Benches. It has also expressed the view that the establishment of tribunals will be necessary in view of the ideal of a Welfare State.

Some of the other recommendations of the Commission are :

(1) Article 217 of the Constitution should be amended to provide that a Judge of a High Court should be appointed only on the recommendation of the Chief Justice of that State and with the concurrence of the Chief Justice of India.

(2) The Senior Puisne Judge should not be automatically appointed as the Chief Justice unless he possesses the qualification they have referred to.

(3) The retiring age of High Court Judges should be raised to sixty-five, in the case of appointments to be made hereafter.

(4) The pension of the Chief Justice of a State High Court should be fixed at Rs. 2,000 per month and that of a Puisne Judge at Rs. 1,750 per month for 12 years of service.

(5) High Court Judges should not be permitted to practise in any court after retirement.

(6) The Constitution should be amended to bar a Judge of a High Court from accepting any employment other than as a Judge of the Supreme Court after retirement either under the Union or under the State.

(7) The jurisdiction of the city civil courts in Madras and Bombay should be reduced to Rs. 10,000.

On an average more than 14,000 cases are filed in the High Courts of India every month.

Figures collected for the first seven months of 1959 show that the cases filed in the 14 High Courts totalled 1,02,593. The highest number filed was in the Allahabad High Court while the lowest was in Jammu and Kashmir.

The break-up was: Allahabad—16,673; Andhra Pradesh—12,463; Assam—763; Bombay —13,623; Calcutta—7,959; Kerala—7,908; Madhya Pradesh—4,545; Madras—12,642; Mysore—3,517; Orissa—1,236; Patna—4,355; Punjab—11,841; Rajasthan—4,523; and Jammu and Kashmir—545.

The Central Government has made separate judicial arrangements in the Union Territories, Delhi, Goa, Daman and Diu, Himachal Pradesh, Manipur, Tripura, Andaman and Nicobar Islands and Laccadive, Minicoy and Amindivi Islands.

Under Article 241 of the Constitution, Parliament can by law constitute a High Court or a Union Territory or declare any court in any such territory to be a High Court for all or any purposes of the Constitution. Judicial Commissioner's Court in Goa, Daman and Diu is declared High Court for certain purposes.

## LOWER COURTS

The Code of Criminal Procedure provides for the constitution of inferior criminal courts styled as courts of session and courts of magistrates.

Every State, outside the towns of Madras, Bombay and Calcutta, is divided into sessions divisions consisting of one or more districts, and every sessions division has a court of session and a sessions judge, with assistants if need be. These stationary sessions courts are like the English Assizes, and are competent to try all accused persons duly committed, and to inflict any punishment authorised by law, but sentences of death are subject to confirmation by the highest court of criminal appeal in the State.

The Govt. of Bihar had decided to abolish the system of trial by jury in the year 1961. The Government of Maharashtra have abolished the system. The question of abolishing the system in Mysore and West Bengal is under the consideration of the State Govts. The system does not exist in Andhra Pradesh, Assam, Gujarat, Kerala, M.P., Madras, Orissa, Punjab, Rajasthan and U.P.

Magistrates' courts are of three classes with descending powers. Provision is made and largely utilised in the towns, for the appointment of honorary magistrates. In the towns of Madras, Bombay and Calcutta, Presidency Magistrates deal with magisterial cases and benches of Justices of the Peace or Honorary Magistrates dispose of the less important cases.

Article 50 of the Constitution lays down that the States shall take steps to separate the judiciary from the executive in the public service of the States.

Separation of judiciary from the executive is in force in Andhra Pradesh, Gujarat, Kerala, Madras, Maharashtra, Mysore, West Bengal, the Madhya Bharat, Vindhya Pradesh and Bhopal regions of Madhya Pradesh, the PEPSU region and five districts of Punjab and in 47 districts of U.P.

In Bihar the separation is introduced in all districts except five. The districts in which the separation is introduced are Patna, Gaya, Shahabad, Muzaffarpur, Darbhanga, Saran, Champaran, Bhagalpur, Monghyr, Saharsa, Hazaribagh and Purnea.

The Governments of Assam and Rajasthan had set up committees to consider the question. The reports of the committees are being considered

The constitution and jurisdiction of the inferior civil courts vary. Broadly speaking one district and sessions judge is appointed for each district. As District Judge he presides in its principal civil court. His functions as Sessions Judge have already been described.

For these posts members of the Indian Civil Service were mainly selected in the past though some appointments were made from the Provincial Service. Now members of the Bar are recruited. In the majority of cases members of the subordinate judiciary are promoted to the posts of District judges.

Next come the Subordinate Judges and Munsiffs, the extent of whose original jurisdiction varies in different parts of the country.

There are in addition a number of Courts of Small Causes, with jurisdiction to try money suits up to Rs. 500. In the towns of Madras, Bombay and Calcutta where the High Courts have original jurisdiction, Small Causes Courts dispose of money suits up to Rs. 3,000.

In Bombay and Madras there are also City Civil Courts. The City Civil Court in Bombay has a pecuniary jurisdiction of upto Rs. 25,000.

As Insolvency Courts the High Courts of Calcutta, Bombay and Madras have jurisdiction in the Presidency towns. In the mofussil similar powers are conferred on the District Courts by the Provincial Insolvency Act of 1920.

There are Coroners only for the Presidency Towns of Calcutta and Bombay. Elsewhere their duties are discharged by the ordinary staff of magistrates and police officers unaided by jurors.

## SPECIAL COURTS

Labour Courts and Industrial Courts now exist in most States.

A Labour Court consists of a single judge.

These Courts decide upon disputes regarding (*a*) propriety or legality of an order passed by an employer, (*b*) the application and interpretation of standing orders, (*c*) they also decide disputes referred to them by Government for arbitration. Legality or otherwise of strikes or lock-outs or closure, etc. is also decided by them.

An appeal against the judgment of the Labour Courts lies to the Industrial Court. This court has also original jurisdiction regarding matters referred to it by the Government or by representative Unions. It decides upon questions of law referred to it by Wage Boards and references regarding interpretation of the Act and the Rules. It has power of superintendence over Labour Courts.

The Industrial Disputes Act was passed by the Central Legislature in 1947 for the investigation and settlement of industrial disputes.

Industrial Tribunals were established under this Act. If the conciliation bodies set up under this Act fail to bring about a settlement, the matter is referred to the Industrial Tribunals.

Neither party to a dispute is entitled to be represented by a legal practitioner except with the consent of the other party and by leave of the Tribunal.

Industrial Tribunals are not permanent Courts. Whenever a matter is referred to the Government regarding an industrial dispute the Government appoints one or more persons as Industrial Tribunal to adjudicate upon the dispute.

The Industrial Disputes (Amendment and Miscellaneous Provisions) Act No. 36 of 1956 makes provision for the constitution of the following courts and tribunals:

1. Labour Courts to be constituted by the appropriate Government. A court is to consist of one judge only.

2. Industrial Tribunals. A Tribunal is to consist of one judge only. A person is not qualified to be a member of a Tribunal unless he has been judge of a High Court. The Tribunals will be constituted by the appropriate Government.

3. National Tribunals. These Tribunals will be constituted by the Central Government. Here also a tribunal is to consist of one judge only.

This Act came into force on 1st Sept., 1956.

The Industrial Disputes (Amendment) Act 41 of 1956 and the Dock Workers (Regulation of Employment) Act, 1948, are two other Acts with respect to labour cases.

Administration of labour laws is a divided responsibility. The Central Government has the following organisations for the administration of labour laws. (1) The Office of the Chief Labour Commissioner, New Delhi. (2) The Office of the Coal Mines Welfare Commissioner, Dhanbad. (3) The Office of the Coal Mines Provident Fund Commissioner, Dhanbad. (4) The Office of the Welfare Commissioner, Mica Mines Labour Welfare Fund, Dhanbad and Nellore. (5) The Office of the Chief Inspector of Mines, Dhanbad. (6) The Office of the Chief Adviser of Factories, New Delhi. (7) The Office of the Director-General, Employees' State Insurance Corporation, New Delhi. (8) The Office of the

Controller of Emigrant Labour, Shillong. (9) The Office of the Director, Labour Bureau, Simla. (10) The Office of the Central Provident Fund Commissioner, New Delhi.

The State Governments also have their own organisations for the administration and enforcement of labour laws.

Juvenile offenders are tried by the Juvenile Courts. In places where there are no juvenile courts the offenders are tried either by the High Court or the Court of Session or a salaried Presidency Magistrate or a salaried Magistrate of the First Class.

Legal practitioners are not entitled to appear in any case or proceeding before a Juvenile Court. However the Court may grant permission in exceptional cases.

Probation officers are appointed by the State Government for helping the Court in the discharge of its functions. The powers and duties of such officers are laid down in the rules. Their main duty is to investigate the history of the juvenile offender and other help to the Court. An appeal against the judgment of a Juvenile Court lies to the Chief Presidency Magistrate in Greater Bombay, and in other places to the Court of Session. If a case is decided by a Presidency Magistrate or a Court of Session the appeal lies to the High Court.

Panchayat Courts (called Nyaya Panchayat) are in existence in many States. The members of the Panchayat Court are elected by the Village Panchayat. Sections 9-11 of the Act lay down rules about the suits that may be tried and the suits that may not be tried by the Court. A Nyaya Panchayat cannot alter or revise its decision. An appeal against a decision of the Nyaya Panchayat lies to the District Judge.

Under the Defence of India Act (No. 51 of 1962) provision is made for the establishment of Special Tribunals (section 13) for trying offences under any rule made under section 3.

## LEGAL OFFICIALS

The Government of India have their own law colleague in the Law Minister of the Union Cabinet. All Government measures are drafted in his Ministry after their substance is decided upon by the administrative departments concerned.

Outside the Cabinet the principal law officers of the Government of India are the Attorney-General, Solicitor-General and Additional Solicitor-General appointed by the President. At Bombay and Calcutta the Government of India have their own law officers.

Each of the State Governments has its own Advocate-General.

Article 76 of the Constitution of India says that for the post of Attorney-General the President shall appoint a person qualified to be appointed a Judge of the Supreme Court. It shall be the duty of the Attorney-General to advise the Government of India on such legal matters and to perform such other duties of a legal character as may be referred or assigned to him by the President, and to discharge the functions conferred upon him by the Constitution.

In the performance of his duties the Attorney-General shall have right of audience in all Courts in the territory of India. The Attorney-General has a right to take part in the proceedings of Parliament and address it.

Under Article 165 the Governor of each State is authorised to appoint a person qualified to be appointed a Judge of a High Court to be Advocate-General for the State.

The Advocate-General is appointed by the Governor. He has to give advice to the Government of the State upon such legal matters and to perform such other duties of a legal character as may be referred to or assigned to him. He holds office during the pleasure of the Governor. He appears in the Court on behalf of the Government. He is also authorised to take part in the proceedings of the State legislature, if his advice is sought.

In addition to the Advocate-General there is also a Government Pleader in many States. He usually belongs to the Appellate Side of the High Court while the Advocate-General belongs to the Original Side where the High Court has both Original and Appellate Sides. The Government Pleader is assisted by an Assistant Government Pleader and they look after criminal work.

The State Governments have their own law officers, in addition to the Advocate-General and the Government Pleader. The law officer is designated Remembrancer of Legal Affairs. He also works as Secretary to the Legal Department. He is never a practising lawyer, but a Government servant. Usually one of the District Judges is appointed Remembrancer of Legal Affairs.

The Legal Remembrancer drafts Government Bills and gives advice to Government Departments on all legal matters.

Sheriffs are attached to the High Courts of Bombay, Calcutta and Madras.

They are entrusted with the work of preparing jury lists, serving summons and other legal processes. The Sheriff in Bombay is the ex-officio Chairman of the Maharashtra State Permanent Famine Relief Committee. He can also convene public meetings on behalf of the citizens.

The detailed work of the office is entrusted to the Deputy Sheriff who is an officer of the High Court.

There are Official Assignees in three States—Maharashtra, W. Bengal and Madras. The appointment is made by the Chief Justice of the High Court concerned.

The duties of the Official Assignee are two-fold, *viz.* realisation and distribution of the insolvent's estate, and the control of the property of the insolvent and his conduct generally.

A party aggrieved by the decision of the Official Assignee may appeal to the Insolvency Judge of the High Court.

In addition to the Official Assignee, a Deputy Official Assignee may also be appointed. Another officer of the court is the Insolvency Registrar who may be vested with the powers mentioned in section 6 of the Presidency Towns Insolvency Act.

There are two classes of legal practitioners, practising in the Supreme Court. They are Senior Advocates, and other Advocates (popularly known as Junior Advocates).

All Advocates of the Supreme Court are entitled to practise in High Courts. An Advocate of the Supreme Court can appear on the original side of the High Court even without an Attorney. In Bombay and Calcutta an Advocate can appear on the original side only when instructed by an Attorney. An Advocate of a High Court is entitled to practise in the High Court concerned and in all the courts subordinate to it. An Attorney-at-Law if enrolled as an Advocate can also practise in the High Court, except on the original side. He, however, can plead in insolvency and chamber matters.

Pleaders are entitled to practise in the District for which they hold sanads.

In addition to these classes, there are Mukhtars in the States of Assam, Bihar, Orissa, Uttar Pradesh, West Bengal and Rajasthan. In Assam there is one more class of legal practitioners known as Revenue Agents.

The dual system was abolished in the Supreme Court on 26th Jan. 1955.

The Parliament passed the Advocates Act (No. 25 of 1961). This Act provides for amendment and consolidation of the law relating to legal practitioners and provides for the constitution of Bar Councils and an All-India Bar. There shall be a Bar Council for each State and a Bar Council of India. The Bar Council of India will maintain a common roll of advocates, will lay down standards of professional conduct, will promote legal education and lay down standards of such education in consultation with the Universities in India, will recognize Universities whose degree in law shall be a qualification for enrolment as an advocate. There could be two classes of advocates, senior and the junior advocates. An advocate shall be entitled to practise in all courts including the Supreme Court, before any tribunal or person legally authorised to take evidence, etc.

Formerly official Law Reports were published only in five series—Bombay, Allahabad, Calcutta, Madras and Nagpur. Nagpur series is discontinued from 1956 and the following are added. Andhra (1955), Assam (1949), Cuttack (1949), Kerala (1957), Madhya Pradesh (1957), Mysore (1951), Patna (1922) and Rajasthan (1951).

These reports contain cases decided by the High Courts and the Supreme Court of India.

In addition to these series a "Supreme Court Reporter" is also published. It contains important decisions of the Supreme Court of India.

Besides these official reports there are a number of private agencies that also bring out reports of the decisions of the Supreme Court and the High Courts. The Law Commission has recommended that it is neither feasible nor desirable to restrict the publications of reports or to confer the monopoly of citation on one set of reports. Reports are also published of important cases determined by Labour Courts, Industrial Courts and Labour Appellate Tribunals.

## HINDU LAW REFORM

A short note on Hindu Law reform is in order as it concerns the welfare of the women of this country.

As a result of increasing consciousness on the part of Indian women of their social and political status, there has in recent years been a move to revise and codify the somewhat vague and contradictory law governing the Hindu home, especially as it affects marriage, divorce, succession to property, etc.

In 1937 the Indian Legislature enacted the Hindu Women's Rights to Property Act. This Act, for the first time, gave to Hindu widows a right to claim a share in the husband's property and demand partition.

Four years later the Government of India set up a Committee to overhaul and codify the Hindu Law. This Committee, which was known as the Rau Committee, drafted two bills dealing with Hindu intestate succession and Hindu marriage.

When the measures came up for consideration by the two Houses of the Central Legislature, a joint committee of the Houses recommended the revival of the Rau Committee with a view to the codification of the entire Hindu Law. Consequently the Rau Committee was revived early in 1944. During 1944–45, the Committee made a tour of the country and elicited public opinion on the proposals embodied in the two measures and on the codification of the Hindu Law as a whole. They gathered evidence from leading lawyers and representative organisations of various shades of Hindu opinion on a draft Hindu Code prepared by them.

During the last few years, the Central and the Provincial Legislatures passed various Acts, which aimed at improving the condition of Hindu women.

The Hindu Marriage Disabilities Removal Act of 1946, legalised marriages between Hindus belonging to the same Gotra or Pravara.

The Hindu Married Women's Right to Separate Residence and Maintenance Act of 1946 enabled

a married Hindu woman to claim from her husband separate residence and maintenance on certain grounds.

The Hindu Marriage Validating Act, 1949 removed the caste-barriers from the sphere of marriages and validated even the Pratiloma marriages.

The Child Marriage Restraint (Amendment) Act of 1949 raises the marriage age of girls from 14 to 15 years.

In the State of Bombay,* monogamy was made a rule by the Prevention of Hindu Bigamous Marriage Act of 1946, and dissolution of marriages by divorce was allowed under certain conditions by the Bombay Hindu Divorce Act of 1947.

In the State of Madras, there was an Act preventing bigamous marriages and providing for divorce. The Act was called the Madras Hindu (Bigamy Prevention and Divorce) Act.

The Madras Legislature passed the Madras Devadasis (Prevention of Dedication) Act in 1947. This Act puts an end to the unhealthy practice of dedicating Hindu women as 'devadasis' to Hindu deities.

Bombay Hindu Women's Right to Property Act (Extension to Agricultural Land) extended the application of the Hindu Women's Right to Property Act, 1938 to agricultural land also. A similar law was passed in Madras.

Though the Hindu Code Bill was dropped, the Government of India have passed several Acts affecting Hindu Law.

The Special Marriage Act of 1954 repeals the Special Marriage Act of 1872. Though the Act of 1954 is not a part of Hindu Code, it affects Hindus in so far as it provides for civil marriages both for Hindus and non-Hindus.

The Hindu Marriage Act of 1955 came into force on 18th May, 1955. The Act has repealed the following laws :—

1. The Hindu Marriage Disabilities Removal Act of 1946 ; 2. The Hindu Marriage Validity Act of 1949 ; 3. The Hindu Divorce Act of 1947 (Bombay Act) ; 4. The Prevention of Hindu Bigamous Marriage Act of 1946 ; 5. The Madras Hindu (Bigamy Prevention and Divorce) Act ; 6. The Saurashtra Prevention of Hindu Bigamous Marriage Act ; 7. The Saurashtra Hindu Divorce Act.

Under the Hindu Marriage Act 25 of 1955, monogamy has become a rule in Hindu Society. Divorce is allowed on certain grounds. Inter-caste marriages and Sagotra marriages are valid.

The Hindu Minority and Guardianship Act (32 of 1956) seeks to regularise the law regarding guardianship.

The Hindu Succession Act 29 of 1956 aims at simplifying the Hindu Law of succession. It does away with the distinction between the Mitakshara and Dayabhaga law of succession. However, special provision is made for regulating succession to the property of intestates governed by Marumakkattayam, Aliyasantana or Nambudri laws of inheritance. The Act creates two classes of heirs. Preferential heirs are included in Class I. The Act confers a right to a share on a daughter, a provision unknown to the previous Hindu Law.

The Hindu Succession Act has also made the following changes, which are revolutionary. in the old Hindu Law :

All property held by a Hindu woman is now her absolute property and there are no restrictions on her rights.

The heirs of a deceased Hindu are entitled to get a share even in the undivided interest in the Mitakshara coparcenary property. A Hindu can make a will even of his undivided interest in the coparcenary property.

The Hindu Adoptions and Maintenance Act 79 of 1956 was passed in December 1956. Under the Act the adoption of a son or a daughter is permitted. The consent of the wife is necessary for adoption, which is now purely secular in character.

### SOCIAL REFORMS

Besides these laws, Parliament has passed two important Acts relating to social reform. The Suppression of Immoral Traffic in Women and Girls' Act (No. 104 of 1956) was passed in December 1956. This Act provides in pursuance of the International Convention signed at New York on 9th May 1950 for the suppression of immoral traffic in women and girls. The Women's and Children's Institutions Licensing Act (No. 105 of 1956) was passed in December 1956. This Act provides for the licensing of such institutions and of matters relating to them.

Yet another Act, in social reform is the Probation of Offenders Act (20 of 1958).

The Bombay* Legislature has passed an Act for the registration of marriages. The Dowry Prohibition Act (No. 28 of 1961) was passed in 1961. The Act provides for penalty and imprisonment upto six months for giving and taking dowry.

Another Bill called "The Orphanages and Charitable Homes (Supervision and Control) Bill, is also introduced in Parliament.

The Children Act (No. 60 of 1960) provides for the care, protection, maintenance, welfare, training, education and rehabilitation of neglected or delinquent children and for the trial of delinquent children in the Union Territories.

* Bilingual.

## LAW COMMISSION REPORT

A Law Commission to revise the Statute Law of the country and suggest ways and means of improving the system of judicial administration was appointed on Aug. 5, 1955 with Mr. M. C. Setalvad as Chairman. The names of the other members are given in the 1961-62 Directory.

The Commission was to function in two sections. The first section consisting of the Chairman and the first three members was to deal mainly with the question of the reform of judicial administration. The second was to consist of the other seven members and was to deal with the revision of statute law. The two sections would however work in close co-operation under the direction of the Chairman.

While the section dealing with the revision of statute law submitted periodical reports, the one dealing with judicial administration submitted its full report sometime in the second half of 1958. It was laid on the table in Parliament on 25th Feb. 1959.

In Dec. 1958 the Law Commission was reconstituted for a period of three years with Mr. T. L. Venkatarama Iyer as Chairman to enable it to continue the work of statute revision. Names of other members are given in 1961-62 Directory.

In Dec. 1961, the Commission was again reconstituted with Mr. Justice J. L. Kapur as Chairman. The Law Commission has till now (Jan. 1965) submitted to the Government altogether 27 reports.

In Dec. 1964 the Commission was again reconstituted with the following members : Mr. Justice J. L. Kapur (*Chairman*) ; Mr. S. K. Hiranandani, Mr. S. P. Sen-Verma, Mr. K. G. Datar (*Whole-time members*) ; Principal T. K. Tope, Mr. Rama Prasad Mukherjee (*Part-time members*).

A summary of the report of the Law Commission on judicial administration is given in the 1959-60 edition of the Directory.

# LAWS OF 1963

THE Indian Parliament placed on the Statute book altogether 56 Acts during the year 1963. The date mentioned against the Act indicates the date on which the corresponding Bill received the assent of the President

In addition to 56 Acts, the Parliament also passed two Constitution Amendment Acts during the year 1963.

1. The Hindi Sahitya Sammelan (Amendment) Act No. 1 of 1963 : 25th January 1963.
2. The Representation of the People (Amendment) Act No. 2 of 1963 : 25th January 1963.
3. The Indian Tariff (Amendment) Act No. 3 of 1963 : 25th January 1963.
4. The Delhi Rent Control (Amendment) Act No. 4 of 1963 : 8th March 1963.
5. The Appropriation (Railways) Act No. 5 of 1963 : 18th March 1963.
6. The Appropriation (Railways) No. 2, Act No. 6 of 1963 : 23rd March 1963.
7. The Appropriation Act No. 7 of 1963 : 23rd March 1963.
8. The Central Sales Tax (Amendment) Act No. 8 of 1963 : 23rd March 1963.
9. The Appropriation (Vote on account) Act No. 9 of 1963 : 23rd March 1963.
10. The Agricultural Refinance Corporation Act No. 10 of 1963 : 24th March 1963.
11. The Marine Insurance Act No. 11 of 1963 : 18th April 1963.
12. The Appropriation (No. 2) Act No. 12 of 1963 : 27th April 1963.
13. The Finance Act No. 13 of 1963 : 28th April 1963.
14. The Super Profits Tax Act No. 14 of 1963 : 4th May 1963.
15. The Bengal Finance (Sales Tax) (Delhi Amendment) Act No. 15 of 1963 : 4th May 1963.
16. The Appropriation (Railways) No. 3 Act No. 16 of 1963 : 10th May 1963.
17. The Appropriation (Railways) No. 4 Act No. 17 of 1963 : 10th May 1963.
18. The Appropriation (No. 3) Act No. 18 of 1963 : 10th May 1963.
19. The Official Languages Act No. 19 of 1963 : 10th May 1963.

The object of the Act is to provide for the continued use of English language after

26th January 1965, in addition to Hindi for official purposes of the Union and for transaction of business in Parliament etc.

20. The Government of Union Territories Act No. 20 of 1963 : 10th May 1963.

The Act establishes legislatures and Councils of Ministers in the Union Territories of Himachal Pradesh, Manipur, Tripura, Goa, Daman and Diu and Pondicherry.

21. The Compulsory Deposit Scheme Act No. 21 of 1963 : 22nd May 1963.

This Act provides for compulsory deposits with a view to augmenting the resources of the nation for national development. The Act empowers the Government to prepare a scheme for that purpose.

22. The Export (Quality Control and Inspection) Act No. 22 of 1963 : 24th August 1963.

23. The Indian Emigration (Amendment) Act No. 23 of 1963 : 24th August 1963.

24. The Iron Ore Mines Labour Welfare Cess (Amendment) Act No. 24 of 1963 : 24th August 1963.

25. The Appropriation (No. 4) Act No. 25 of 1963 : 31st August 1963.

26. The Code of Civil Procedure (Amendment) Act No. 26 of 1963 : 4th September 1963.

27. The All-India Services (Amendment) Act No. 27 of 1963 : 6th September 1963.

28. The Employees Provident Funds (Amendment) Act No. 28 of 1963 : 7th September 1963.

29. The Institutes of Technology (Amendment) Act No. 29 of 1963 : 12th September 1963.

30. The Customs and Central Excises (Amendment) Act No. 30 of 1963 : 12th September 1963.

31. The Appropriation (Railways) No. 5 Act No. 31 of 1963 : 12th September 1963.

32. The Special Marriage (Amendment) Act No. 32 of 1963 : 22nd September 1963.

33. The Indian Sale of Goods (Amendment) Act No. 33 of 1963 : 22nd September 1963.

34. The Warehousing Corporations (Amendment) Act No. 34 of 1963 : 22nd September 1963.

35. The Dramatic Performances (Delhi Repeal) Act No. 35 of 1963 : 26th September 1963.

36. The Limitation Act No. 36 of 1963 : 5th October 1963.

This Act repeals the Indian Limitation Act 1908 and makes new provision for the law of limitation.

37. The Personal Injuries (Compensation Insurance) Act No. 37 of 1963 : 8th October 1963.

This Act provides for imposing on employers a liability to pay compensation to workmen sustaining personal injuries and for the insurance of employers against such liability.

38. The Major Port Trusts Act No. 38 of 1963 : 16th October 1963.

39. The Industrial Employment (Standing orders) Amendment Act No. 39 of 1963 : 22nd December 1963.

40. The Public Premises (Eviction of unauthorised occupants) Amendment Act No. 40 of 1963 : 2nd December 1963.

41. The Textiles Committee Act No. 41 of 1963 : 3rd December 1963.

This Act provides for the establishment of a Committee for ensuring the quality of textiles and textile machinery and for matters connected therewith.

42. The Drugs and Magic Remedies (Objectionable Advertisements) Amendment Act No. 42 of 1963 : 7th December 1963.

43. The Income-Tax (Amendment) Act No. 43 of 1963 : 9th December 1963.

44. The Appropriation (No. 5) Act No. 44 of 1963 : 11th December 1963.

45. The Administrators-General Act No. 45 of 1963 : 11th December 1963.

46. The Appropriation (Railways) No. 6 Act No. 46 of 1963 : 12th December 1963.

47. The Specific Relief Act No. 47 of 1963 : 13th December 1963.

This Act implements the recommendations of the Law Commission in its Ninth Report. It repeals the Specific Relief Act 1877.

48. The Requisitioning and Acquisition of Immovable Property (Amendment) Act No. 48 of 1963 : 14th December 1963.

49. The East Punjab Ayurvedic and Unani Practitioners (Delhi Amendment) Act No. 49 of 1963 : 14th December 1963.

50. The Indian Tariff (Second Amendment) Act No. 50 of 1963 : 20th December 1963.

51. The Preventive Detention (Continuance) Act No. 51 of 1963 : 30th December 1963.

This Act extends the life of the Preventive Detention Act to 31st December 1966.

52. The Unit Trusts Act, No. 52 of 1963 : 30th December 1963.

This Act provides for the establishment of a corporation with a view to encouraging saving and investment and participation in the income, profits and gains accruing to the corporation from the acquisition, holding etc.

53. The Companies (Amendment) Act No. 53 of 1963 : 30th December 1963.

54. The Central Boards of Revenue Act No. 54 of 1963 : 30th December 1963.

This Act provides for the constitution of a separate Board of Revenue for certain purposes.

55. The Banking Laws (Miscellaneous Provisions) Act No. 55 of 1963 : 30th December 1963.

56. The Delhi Development (Amendment) Act No. 56 of 1963 : 30th December 1963.

### Constitution Amendment Acts

The Constitution (Fifteenth Amendment) Act 1963 : 5th October 1963.

This Amendment raises the retirement age of judges of the High Court from sixty to sixty-two. It also provides for the appointment of retired judges at sittings of High Court. It empowers the High Courts to issue writs under Act 226 to persons who may be outside the State to which the High Court belongs, if the cause of action arose within its jurisdiction. It also amends Act 311 of the Constitution.

The Constitution (Sixteenth Amendment) Act 1963 : 5th October 1963.

This Amendment amends clauses (2), (3) and (4) of Article 19 in order to empower the State to make any law imposing reasonable restrictions on the exercise of the rights conferred by subclauses (a), (b) and (c) of that article, in the interests of sovereignty and integrity of the country. It also amends Articles 84, 173 and the forms of oath in the Third Schedule.

# CONSTITUTION OF INDIA

THE present constitution of India was drawn up by a Constituent Assembly which first met on 9th December 1946. A draft constitution was published in February 1948. The constitution with amendments in the original draft was finally adopted on 26th November, 1949. It came into effect on 26th January 1950.

There were sixteen amendments to the constitution upto the end of Jan. 1964. One more bill for amending the constitution is before Parliament.

A whole Schedule, the Ninth Schedule, was added by an amendment in 1951. This Schedule is sought to be considerably amended by the proposed 17th amendment.

A major amendment was concerned with the re-formation of the constituent units of the Union. The States as re-formed came into existence on 1st Nov., 1956.

A smaller change came on May 1, 1960 when one of the States Bombay was divided into two States, Maharashtra and Gujarat.

## STATES

India, that is, Bharat is a sovereign democratic republic.

It is variously called the Republic of India, the Union of India, The Indian Union.

The Union is made up of 16 States and 9 Union Territories.

The States with their capitals given in brackets are :

Andhra Pradesh (Hyderabad); Assam (Shillong); Bihar (Patna); Maharashtra (Bombay); Gujarat (Ahmedabad)*; Kerala (Trivandrum); Madhya Pradesh (Bhopal); Madras (Madras); Mysore (Bangalore); Orissa (Bhubaneshwar); Punjab (Chandigarh); Rajasthan (Jaipur); Uttar Pradesh (Lucknow); West Bengal (Calcutta); Nagaland (Kohima).

Jammu and Kashmir (Srinagar).

The 9 Union Territories with their capitals in brackets are :

Delhi (Delhi); Himachal Pradesh (Simla); Manipur (Imphal); Tripura (Agartala); Laccadive, Minicoy and Amindivi Islands (Kozhikode, provisional headquarters); Andaman and Nicobar Islands (Port Blair); Dadra and Nagar Haveli (Silvassa); Pondicherry (Pondicherry); Goa, Diu & Daman (Panjim).

The States are administered by State Governments, the Union Territories by the Central Government. The Union Territories of Himachal Pradesh, Manipur, Tripura, Goa, Daman and Diu and Pondicherry have a legislature and a Council of Ministers, under an Act of Parliament. (Act 20 of 1963).

In addition to the States and Territories mentioned above there is one administrative unit—the North-East Frontier Agency, called NEFA for short.

The NEFA is administered by the Governor of Assam as agent of the Central Government.

## FEDERATION

The constitution of India is quasi-federal in nature.

The distribution of power between the Centre and the local administrations follows the accepted principle that subjects which for convenience and efficiency ought to be administered on an all-India basis are vested in the Union Government, while others (of the nation-building sort) which can be conveniently administered on a local basis are vested in the State Governments.

Thus, defence, foreign affairs, transport and communications, currency and coinage, banking, customs and export duties, and the administration of justice at the higher level are all Central

* Temporary capital.

subjects, while State powers include those over police, public health, education, agriculture, forests and so on.

There is a third group of subjects that fall betwixt and between such as trade and industry, economic and social planning, social security and insurance, labour welfare, price control, electricity, newspapers and books and vital statistics. On these subjects both the Centre and the State can freely legislate, it being understood that whenever there is conflict between Union and State legislation the Union laws will ordinarily prevail.

Three detailed lists of subjects are drawn up, the Union List, the State List and the Concurrent List, and the residuary power rests with the Union. That is to say, if at any time, a subject which does not figure in any of the three lists, comes up for consideration the power of dealing with it lies with the Union Government.

The three lists are given in the Seventh Schedule.

It may be added that the Union List has 97 entries, the State List 65 and the Concurrent List 47.

All elections are directed and controlled by an Election Commission. Elections to the Lok Sabha and the Legislative Assemblies of the States are on the basis of adult suffrage. Seats are reserved in the Lok Sabha for the Scheduled Castes and the Scheduled Tribes.

There is a Public Service Commission for the Union and also for the States. Two or more States may agree to have only one Commission for the group. Actually, every State has a Public Service Commission at present while the Union Public Service Commission operates for the Union Territories as well. Appointment of members of the Commission are made by the President or the Governor as the case may be. The Commissions conduct examinations for appointments to the services of the Union or the States. The Union Commission submits an annual report to the President.

Provision is made for removing differences between the various States by empowering the President to establish an Inter-State Council. Such a Council, however is not established as yet.

## FUNDAMENTAL RIGHTS

In the Indian Union the rights of Indian citizenship are given to 1. One who is born in India, 2. Either of whose parents was born in India, and 3. Who has been a resident of India for five years. Provision is also made for persons who are affected by the partition of the sub-continent.

Details were filled in by the Citizenship Act of 1955 which also provides for the termination and deprivation of citizenship under certain conditions. The Act also empowers Government to extend the rights of citizenship to any country in the Commonwealth and the Republic of Ireland on a reciprocal basis.

Certain fundamental rights are guaranteed to every citizen for the first time. All citizens are equal before the law and no discrimination is made on grounds of religion, sex, caste, etc. All citizens have equal opportunities.

Freedom of speech and expression is guaranteed, and the right to hold meetings (without arms), to form unions and associations, to move freely in India and to reside in any part, to acquire property and to practise any profession are also assured under the Constitution.

Life and personal liberty are protected under the law, and there will not be punishment for the same offence more than once. Preventive detention is also forbidden except in certain cases.

Children under the age of 14 will not be allowed to be employed in factories and forced labour like *begar* is prohibited.

India is a secular State and as such there is freedom of conscience. Citizens are allowed to profess, practise and propagate any religion; and the State will not ordinarily interfere in religious questions. The minorities are assured of cultural and educational rights.

The State can acquire compulsorily property for public purposes, but compensation may be paid to the owner of the property concerned although questions relating to the quantum of compensation are not justiciable. But property may also be acquired without compensation in certain cases.

All titles, except military or academic, are also abolished, though honours for meritorious service may be conferred.

Untouchability is abolished.

These fundamental rights can be enforced by the Supreme Court and by High Courts which have the authority to issue prerogative writs such as *habeas corpus*, *certiorari*, *prohibition*, etc.

In respect of the Defence Forces, however, Parliament has power to legislate on these fundamental rights.

It must also be pointed out that some of these fundamental rights can be suspended in case of emergency, and the remedies available for their enforcement may also be suspended by an order of the President. Accordingly as a result of the proclamation of emergency in October 1962, fundamental rights guaranteed by Article 19 are suspended and the President has also issued an order declaring that enforcement of rights under articles 14, 21 and 22 will remain suspended.

There are also certain Directive Principles in accordance with which the State has to direct its policy. These principles are of a recommendatory character and cannot be enforced in a court of law. However the State is expected to look upon them as a kind of touch-stone for its policy and action.

These principles include organization of village panchayats, provision for just and humane conditions of work, equal pay for equal work, unemployment benefit, assistance in old age and sickness, maternity relief, a uniform civil code for the citizens, provision for compulsory and free education of children and separation of judiciary from executive.

Other principles are the organization of agriculture and animal husbandry on modern and scientific lines, prohibition of intoxicating drinks and drugs, protection of national monuments, promotion of international peace and security and settlement of international disputes by arbitration.

There are special provisions to safeguard the interests of two groups—The Anglo-Indians and the Scheduled Castes and Tribes.

The Scheduled Castes and Tribes have special representation in the legislatures of the country upto 1970 (see separate articles on the Scheduled Castes and Tribes) In certain tribal areas there are autonomous administrative bodies.

As for Anglo-Indians, the President may nominate not more than two members of the Anglo-Indian community to the Lok Sabha if he thinks that the community is not adequately represented. Similar power is given to the Governor of a State. The Governor can nominate one member to the Legislative Assembly. In West Bengal, however, he can nominate not more than two.

The claims of the Scheduled Castes and the Scheduled Tribes are to be considered in making appointments to services, and for two years after the commencement of the Constitution the Anglo-Indians were to have the same proportion in the services as they had immediately before 15th August 1947. This reservation is to be progressively reduced by 10 per cent every two years in such a way that it is to cease completely ten years after the commencement of the Constitution.

Originally all reservation including reservation of seats for Scheduled and Tribal classes were to cease ten years after the commencement of the Constitution.

In 1960 the constitution was amended—it was the eighth amendment to the constitution—to extend the period of reservation of seats in the legislatures for another ten years from 1960.

A special officer for the Scheduled Castes and the Scheduled Tribes has been appointed.

## UNION EXECUTIVE

The executive head of the Indian Union is the President. He is elected by the elected members of the Houses of Parliament and the Legislative Assemblies of all the States. His term of office is five years, and he is eligible for re-election. Only a person who is a citizen of India and has completed the age of thirty-five years is qualified to contest the election.

He is the Supreme Commander of the Armed Forces.

He has the power to grant pardons or remission of punishment.

The President is entitled to the use of an official residence without payment of rent, and a salary of Rs. 10,000 per month and allowances. Provision has also been made by an Act of Parliament for a pension of Rs. 15,000 per annum.

The President has the power of summoning, proroguing and dissolving Parliament. At the commencement of each session he addresses both Houses of Parliament assembled together. He has the right of sending messages to Parliament and sending back a Bill presented to him for his assent. This power however can be used by him only once.

The President has legislative powers under certain circumstances. When neither of the Houses of Parliament is in session and the President is satisfied that circumstances exist which make immediate action necessary he may promulgate an ordinance.

Such ordinance must be put before both the Houses of Parliament and will cease to operate at the expiration of six weeks from the re-assembly of Parliament.

The President can also declare emergency if he is satisfied that the security of India or any part thereof is threatened either by war or internal disturbances when the legislature is in session. Such a proclamation would give additional powers to the Union executive and the Legislature.

Accordingly the President issued the proclamation of emergency in October 1962 as a result of the Chinese aggression.

The judges of the Supreme Court and the High Courts, the Attorney-General of India and the Comptroller and Auditor-General of India are all appointed by the President. The heads of States, *i.e.*, Governors are also appointed by the President.

The President has the power of appointing ambassadors abroad and receiving diplomatic representatives of foreign States.

The President places a number of annual reports before Parliament: the Annual Financial Statement, the report of the Auditor-General of India relating to the accounts of the Government of India, the annual report of the Union Public Services Commission and the report of the Special Officer for Minorities.

All executive action of the Government of India is taken in the name of the President and it is the duty of the Prime Minister to communicate to the President all decisions of the Council of Ministers.

Provision is made for the impeachment of the President, by Parliament, for violation of the Constitution. If such a resolution is passed by a majority of not less than two-thirds of the total membership, such a resolution has the effect of removing the President from office.

In the exercise of his functions, the President has the aid and advice of a Council of Ministers, with the Prime Minister at the head of it. The President appoints the Prime Minister and other Ministers are appointed on the advice of the Prime Minister.

The Council of Ministers is collectively responsible to the Lok Sabha (the Lower House). Every Minister must be a member of either House of Parliament, and he is required to take an oath of office and secrecy.

The salaries and allowances of Ministers are determined by Parliament.

There is a Vice-President of India, who is ex-officio Chairman of the Rajya Sabha (the Upper House). The Vice-President acts as President during a casual vacancy in the office of the President. He is elected by the members of both Houses of Parliament and his term of office is five years.

## UNION PARLIAMENT

The Parliament consists of the President and two Houses known as, as already mentioned, the Lok Sabha and the Rajya Sabha. It must meet at least twice a year. The maximum strength of the two Houses is fixed at 250 (12 nominated) for the Rajya Sabha and 525 for the Lok Sabha (not more than 500 from the States and 25 from the Territories).

In May 1964 the Rajya Sabha had a total strength of 238. Of these members 12 were nominated by the President.

In May 1964, the Lok Sabha had a total strength of 510. Of these 13 members were nominated. The fourth General Election to the Lok Sabha will be held in February 1967.

A new delimitation order was issued in March 1963. The allocation of seats for the next General Election would be as follows :—

| Name of the State | Total No. of Seats | Scheduled Castes | Scheduled Tribes |
|---|---|---|---|
| Andhra Pradesh .. .. .. .. .. | 43 | 6 | 2 |
| Assam .. .. .. .. .. .. | 12 | 1 | 2 |
| Bihar .. .. .. .. .. .. | 53 | 7 | 5 |
| Gujarat .. .. .. .. .. .. | 22 | 2 | 3 |
| Kerala .. .. .. .. .. .. | 18 | 2 | Nil |
| Madhya Pradesh .. .. .. .. .. | 36 | 5 | 8 |
| Madras .. .. .. .. .. .. | 41 | 7 | Nil |
| Maharashtra .. .. .. .. .. | 44 | 3 | 3 |
| Mysore .. .. .. .. .. .. | 26 | 4 | Nil |
| Orissa .. .. .. .. .. .. | 20 | 3 | 5 |
| Punjab .. .. .. .. .. .. | 22 | 5 | Nil |
| Rajasthan .. .. .. .. .. .. | 22 | 4 | 3 |
| Uttar Pradesh .. .. .. .. .. | 86 | 18 | Nil |
| West Bengal .. .. .. .. .. | 36 | 8 | 2 |
| Jammu & Kashmir .. .. .. .. | 6 | — | — |
| Union Territories .. .. .. .. .. | 21 | — | — |
| Nominated .. .. .. .. .. | 2 | — | — |
| Total .. | 510 | 75 | 33 |

A Delimitation Commission has been appointed to recommend the allotment of seats in the various Houses of Legislature and the House of the People.

The Rajya Sabha is elected by the elected members of the Legislative Assemblies of the States and of the Union Territories of Himachal Pradesh, Manipur, Tripura and Pondicherry, while the Lok Sabha is elected directly by the voters in the country.

The electoral college for the Territory of Delhi consists of persons who were members of the Delhi Legislative Assembly immediately before 1st November 1956.

The elections to the Lok Sabha are based on adult suffrage and joint electorates. There is no reservation of seats for any group except Scheduled Castes and Scheduled Tribes.

The representatives of Jammu and Kashmir in the Lok Sabha are appointed by the President on the recommendation of the legislature of the State.

The Rajya Sabha is a permanent body with one-third of its members retiring every second year. The Vice-President of the Union is also the Chairman of the Rajya Sabha. The Rajya Sabha has also a Deputy Chairman.

The Lok Sabha has a duration of five years ordinarily. There is a Speaker and a Deputy Speaker of the House both of whom are elected by its members.

All these posts carry a salary and allowances.

Under certain circumstances, the members can be disqualified and their seats declared vacant.

All legislation requires the consent of both Houses of Parliament, and every question is decided by a simple majority of those present and voting except on amendments to the constitution.

Money Bills can be introduced only in the Lok Sabha. The Rajya Sabha can only return a bill with its recommendations to the Lok Sabha within a period of fourteen days of its receipt. Bills passed by Parliament are submitted to the President for his assent. Only on such assent being given does the Bill become law.

A Bill normally goes through the following stages. It is first published. After introduction there is a general debate. Third, there is a clause-by-clause discussion. Then it is voted upon. A specially important measure may go before a select committee or a joint select committee. A Money Bill has a slightly different passage. After it has been passed in the Lok Sabha it is sent to the Rajya Sabha which has to return it within fourteen days with its recommendations which may be accepted or rejected.

The quorum is fixed at one-tenth of the membership of the House.

The language used in Parliament is either Hindi or English.

### Distribution of Seats

The distribution of seats in the Rajya Sabha is as follows :

Andhra Pradesh 18 ; Assam 7 ; Bihar 22 ; Gujarat 11 ; Kerala 9 ; Madhya Pradesh 16 ; Madras 18 ; Maharashtra 19 ; Mysore 12 ; Orissa 10 ; Punjab 11 ; Rajasthan 10 ; Uttar Pradesh 34 ; West Bengal 16 ; Jammu and Kashmir 4 ; Delhi 3 ; Himachal Pradesh 2 ; Manipur 1 ; Pondicherry 1 ; Tripura 1 ; Nagaland 1 ; Total 226.

The President has nominated 12 members. Thus the total of elected and nominated members is 238.

The allocation of seats in the Lok Sabha is as follows :

Andhra Pradesh 43 ; Assam 12 ; Bihar 53 ; Gujarat 22 ; Kerala 18 ; Madhya Pradesh 36 ; Madras 41 ; Maharashtra 44 ; Mysore 26 ; Orissa 20 ; Punjab 22 ; Rajasthan 22 ; Uttar Pradesh 86 ; West Bengal 36 ; Jammu and Kashmir 6 ; Delhi 5 ; Himachal Pradesh 4 ; Manipur 2 ; Tripura 2 ; Andaman and Nicobar Islands 1 ; Laccadive, Minicoy and Amindivi Islands 1 ; Nagaland 1 ; North-East Frontier Tract 1 ; Dadra & Nagar Haveli 1 ; Goa 2 ; Pondicherry 1 ; two Anglo-Indians are nominated.

As mentioned above the six members from Jammu and Kashmir are also nominated by the President on the recommendation of the State legislature.

Parliament's control over the administration is also exercised through a series of committees. The Committees can summon witnesses or require documents to be produced. There is a Committee on Privileges which sees to breaches of Parliamentary privilege, a Business Advisory Committee which helps the Ministry of Parliamentary Affairs in drawing up the programme for a session.

Two very important Committees are the Public Accounts Committee and the Estimates Committee. They are elected by the House of the People and Ministers are barred from membership. The Public Accounts Committee ensures that money is spent for the purpose for which Parliament has voted it, and critici es cases of waste, or extravagance. The Estimates Committee examines possibilities of economy and reform in financial administration and the manner in which estimates may be presented to Parliament.

The programme of work for any session is worked out by the Ministry of Parliamentary Affairs.

## SUPREME COURT

The Supreme Court of India consists of a Chief Justice of India and not more than thirteen other Judges. The appointments are made by the President. The salary of the Chief Justice is Rs. 5,000 per month and of the other Judges Rs. 4,000 per month.

The Judges could hold office till the age of 65.

For purposes of constitutional law the Supreme Court has exclusive original jurisdiction in any dispute (*a*) between the Government of India and one or more States, (*b*) between the Government of India and one or more States on one side and one or more other States on the other, (*c*) between two or more States only in so far as the dispute involves any question on which the existence of a legal right depends.

The Supreme Court has also jurisdiction both appellate and original in matters which involve a substantial question of law as to the interpretation of the constitution.

An Attorney-General for legal advice and a Comptroller and Auditor-General of India for audit and accounts are appointed by the President. The Attorney-General has the right to appear in all courts in India.

(See also under 'Administration of Justice'.)

## STATE GOVERNMENT

The 16 States have Governors at their heads, the Union Territories Andaman & Nicobar Islands, Delhi, Manipur and Tripura have Chief Commissioners, Himachal Pradesh, Goa and Pondicherry have Lieutenant-Governors, Laccadive and Dadra have Administrators.

### Zonal Councils

The States and Union Territories are grouped into geographical zones, and for each zone there is a Zonal Council, which is an advisory body.

These came into existence as part of the scheme relating to the reorganization of States embodied in the States Reorganization Act of 1956.

There are five zones : Northern zone (Punjab, Rajasthan, Kashmir, Delhi and Himachal Pradesh) ; Central zone (Uttar Pradesh and Madhya Pradesh) ; Eastern zone (Bihar, West Bengal, Orissa, Assam, Manipur and Tripura) ; Western zone (Gujarat, Maharashtra and Mysore) ; Southern zone (Andhra Pradesh, Madras, and Kerala and also Mysore as a permanent invitee).

Each Zonal Council consists of a Union Minister to be nominated by the President, the Chief Minister of each of the States in the Zone and two other Ministers of each State. The two Ministers are to be nominated by the Governor

of the State. If there is no Council of Ministers in a State the three members from that State will be nominated by the President. In the case of a Union Territory there will be only two members and they will be nominated by the President.

The Union Minister is to preside over the meetings.

The first Union Minister nominated by the President was late Govind Ballabh Pant, the Home Minister.

The Council will normally meet by rotation in the States included in the Zone.

The idea in constituting Zonal Councils is to develop the habit of cooperative working and to arrest the growth of particularist trends like regionalism and linguism.

It would also help in encouraging co-operation among the States in the execution of major development projects.

The Councils may discuss matters of common interest—and more especially problems arising out of the reorganization of States such as border disputes, linguistic minorities, inter-State transport and also economic or social planning—and advise the Central or State Governments on the action to be taken in such matters.

All questions at meetings will be decided by a majority of the members present.

The proceedings of every meeting of a Zonal Council have to be forwarded to the Central Government and the States Governments concerned.

Wherever there is a problem in which States of more than one Zone have a common interest it will be discussed at a joint meeting.

The joint meeting will be held at such time and place as the Chairman may decide. The rules of procedure at these meetings will be framed by the Central Government.

The office of each Zonal Council has been located as follows :

North Zone—New Delhi, Central Zone—Allahabad, Eastern Zone—Calcutta, Southern Zone—Madras, Western Zone—Bombay.

The administrative expenses of the office, except the salary and allowances of the Secretary will be borne by the Central Government.

### States

The Governor of a State is appointed by the President. Executive power is vested in the Governor who is appointed for a term of five years, ordinarily. Only a citizen of India and one who has completed 35 years of age, is eligible for such an appointment.

The Governor, like the President, has power to grant pardon, etc. He will have a Council of Ministers to aid and advise him. The Governor also appoints an Advocate-General for the State.

### Legislature

Ten States, Andhra Pradesh, Bihar, Kashmir, Madhya Pradesh, Madras, Maharashtra, Mysore, Punjab, Uttar Pradesh, West Bengal have two Houses of Legislature ; the others, only one. The two Houses are called the Legislative Assembly (sometimes Vidhan Sabha) and the Legislative Council (sometimes Vidhan Parishad). The former has a duration of five years, while the latter is a permanent body with one-third of the members retiring every second year.

The minimum strength of an Assembly is 60 and the maximum 500.

The minimum strength of a Council is 40, and the maximum one-third of the State Assembly.

An Assembly is elected directly on a basis of adult franchise with reservation of seats for the Scheduled Castes and Tribes. The composition of a Council is more complicated. About a third are elected by the Assembly, another third by local authorities (municipalities, district boards), about a twelfth by registered teachers in schools not lower than the secondary school standard, and about a twelfth by registered graduates of not less than three years' standing. And the rest are nominated by the Governor from among persons who have distinguished themselves in art, science, literature, co-operation and social service.

The Legislature must meet at least twice a year. While the Assembly consists of members who are directly elected from territorial constituencies, the Council consists of members nominated by the Governor, elected by the Assembly and of representatives of local bodies and special interests.

The legislature can frame its own rules of procedure but it is more or less the same as in Parliament. The quorum for a meeting is one-tenth of the membership or ten whichever is higher.

In case of disagreement, if the Bill is passed a second time after three months of its reference to the Council it automatically becomes law after one month of its passage in the lower house.

The State legislature too has its Committees like Parliament.

The number of seats (including nominated members) in the Legislative Assembly and the Legislative Council is as follows (the first figure shows the number of seats in the Assembly, and the second in the Council):

As on June 1, 1964 : Andhra Pradesh : 301 ; 90 ; Assam : 105 ; — ; Bihar : 319 ; 96 ; Gujarat ; 154 ; — ; Kashmir : 100 ; 36 ; Kerala : 127 : — ; Madhya Pradesh : 289 ; 90 ; Madras : 207 ; 63 ; Maharashtra : 265 ; 78 ; Mysore : 209 ; 63 ; Nagaland: 46;—; Orissa: 140; — : Punjab : 154 ; 51 ; Rajasthan : 176 ; — ; Uttar Pradesh : 430 ; 108 ; West Bengal : 256 ; 75.

The total number of seats in the Vidhan Sabha of Himachal Pradesh is 43, Legislative Assembly of Manipur 30 and of Tripura 30. The number of seats in the Pondicherry Legislative Assembly is 30. Goa Legislative Assembly 30.

About the Kashmir Assembly it may be mentioned that 25 seats are now vacant waiting to be filled in by members from that part of Kashmir now under occupation by Pakistan troops.

The effective strength of the Assembly is 75.

The right of summoning, proroguing and dissolving the legislature is vested in the Governor, who addresses the legislature at the commencement of each session.

Like the Parliament there is a Speaker, a Deputy Speaker, a Chairman and a Deputy Chairman for the Legislative Assembly and the Legislative Council respectively. These officers of the legislatures are entitled to salary and allowances.

The language in the legislature can be either Hindi or English or any other language allowed by the Speaker.

The State Legislatures cannot discuss the conduct of any judge of the Supreme Court or of a High Court in the discharge of his duties.

As the Governor is a part of the legislature, he has certain legislative powers. He can promulgate ordinances during the recess of the legislature ; such ordinances must be placed before the legislature and cease to operate at the expiration of six weeks from the re-assembly of the legislature.

The salary of the Governor is Rs. 5,500 per monthand he is also entitled to certain allowances.

If the government of a State cannot be carried on in accordance with the provisions of the Constitution, and the Governor makes a report to that effect to the President, the President may by proclamation assume to himself all or any of the functions of the Government of the State. He may also declare that the powers of the State legislatures shall be exercised by Parliament, and suspend any provision of the constitution relating to the State.

However, he cannot assume to himself, or suspend any of the provisions of the Constitution relating to High Courts.

### UNION TERRITORIES

In accordance with the provisions of the Territorial Councils Act of 1956 three Union Territories namely, Himachal Pradesh, Manipur and Tripura had Territorial Councils. The Act is now repealed by Act 20 of 1963.

The Fourteenth Amendment Act inserts a new section (239A in the constitution) and empowers Parliament to create for any of the Union Territories of Himachal Pradesh, Manipur, Tripura, Goa, Daman and Diu and Pondicherry a body to function as a legislature and/or a Council of Ministers. Accordingly a bill was introduced in the Parliament for that purpose (Bill No. 5 of 1963). It is now on the statute book in the term of an Act (No. 20 of 1963.) The main provisions of the Act are as follows :

Five Union Territories *viz.* Himachal Pradesh, Manipur, Tripura, Goa, Daman and Diu and Pondicherry have legislative Assemblies. The total number of seats in these Assemblies will be 30 except in H. P. and Pondicherry where it would be 43 and 39 respectively. The Assembly will be directly elected. The Central Government may nominate not more than three persons to the Assembly. These Assemblies may pass a law on any matter in the State list or the concurrent list. There are restrictions on the powers of the Assembly with respect to certain matters. For certain legislative proposals, sanction of the Administrator is required. Special provisions are laid down in regard to financial Bills. Every Bill passed by legislative Assembly shall be reserved by the Administrator for the consideration of the President.

Each Union Territory shall have a Council of Ministers to aid and advise the Administrator. In case of difference of opinion between the Administrator and the Council of Ministers, the Administrator will refer the matter to the President of India, whose decision shall be final. The Administrators of Himachal Pradesh, Manipur and Tripura have special responsibility for the security of the border. In these matters they shall act in their discretion. The Chief Minister and other Ministers shall be appointed by the President. The Administrator and the Council of Ministers shall be under the general control of the President.

There are special provisions for Hill Areas of Manipur (Section 52).

The Act also provides for appointment of a Judicial Commissioner.

Provision is also made for introduction of President's rule in case of failure of constitutional machinery in the Union Territory.

For the Union Territory of Delhi there is established an Advisory Committee which will be associated with the Minister of Home Affairs who is responsible for the administration of Union Territories. This Committee consists of all members of Parliament representing Delhi, the Chief Commissioner of Delhi, the Vice-Chancellor of the University of Delhi, the Mayor of the Delhi Municipal Corporation and the Senior Vice-President of the New Delhi Municipal Committee.

As regards Andaman and Nicobar Islands (Union Territory), the President makes rules and regulations for the peace and good government of the State, and appoints a Chief Commissioner for administration. The President has the power of making regulations which have the effect of amending or repealing an Act of Parliament.

NEFA is administered by the Governor of Assam, who acts as the agent of the Union Government.

It may be mentioned here that the tribal areas of Assam have a special status. The Governor of Assam administers them on behalf of the President and can set up councils for districts and regions. These councils have powers of

legislation about disposition of land, inheritance of property, matrimonial and other customs. They can set up and administer courts, schools, dispensaries and markets. They can collect certain specified taxes.

These areas are often referred to as the autonomous districts of Assam.

Dadra and Nagar Haveli has an elected Administrative-cum-Legislative Council.

There is a High Court for each State and a Judicial Commissioners' Court each for the Union Territories of Himachal Pradesh, Manipur, Tripura and Goa, Daman and Diu.

The salary of a Chief Justice of a State is Rs. 4,000, and of a High Court Judge Rs. 3,500.

The highest court for Delhi is the District Court. Appeals from here go to the Punjab High Court, a circuit bench of which sits in Delhi. There is a proposal to have a separate High Court for Delhi. For Andamans, the highest court is the Chief Commissioner's Court. Appeals go to the Calcutta High Court.

## FINANCE

The financial relations between the Union and the States are as follows:—There is a Consolidated Fund of India and a Consolidated Fund of each State, and all money received is credited to the public account of India or the public account of the State as the case may be. Provision is also made for the establishment of a 'Contingency Fund of India' and a 'Contingency Fund of the State.'

Certain duties and taxes are levied and collected by the Government of India, such as duties in respect of succession to property, terminal taxes, taxes on railway fares and freights, etc. But the net proceeds are assigned to the States, in accordance with such principles of distribution as formulated by Parliament. Certain other taxes, like income-tax are levied and collected by the Government of India, but are distributed between the Union and the States.

These matters are fixed in accordance with the recommendations of a Finance Commission appointed for the purpose.

No moneys can be appropriated out of the Consolidated Fund of India or of a State except in accordance with an Appropriation Act by the appropriate legislature.

The property of the Union is exempt from the taxes imposed by a State, and the property and income of States are exempt from Union taxation.

Provision is made for the appointment of a Finance Commission.

The privy purse sums of the Rulers are a charge on the Consolidated Fund of India, and these sums are to be exempt from taxes on income.

## OFFICIAL LANGUAGE

Hindi in the Devanagari script is the official language of the Union and the form of numerals is the international form of the Indian numerals. The English language, however, will continue to be the official language for a period of not more than fifteen years from the commencement of the Constitution.

The Parliament passed in May 1963 the Official Languages Bill (Act No. 19 of 1963) providing for the continuance of English after 1965 for an indefinite period. An official bill purporting to amend the Act was introduced in Parliament in 1965. The object is to continue the use of English as an official language along with Hindi even after Jan. 1965.

The official language of the Union, *i.e.*, English will be used for communication between the Union and a State or between one State and another. However, if two States agree, Hindi may be used instead of English between them.

All proceedings in the Supreme Court and High Courts, the texts of Bills and Acts passed by the legislatures and ordinances promulgated by the appropriate authorities are to be in the English language, until Parliament by law provides otherwise.

But Hindi could be used as an additional language after 1965.

By previous consent of the President proceedings in a High Court may be conducted in Hindi or any recognised State language but judgments, decrees or orders passed by the court must be in English.

It is the duty of the Union Government to promote and spread the Hindi language. The vocabulary for the development of the language is to be drawn primarily from Sanskrit.

The States have been given the liberty of adopting any one or more languages used in their territory or Hindi as the official language of the State.

The following languages are recognised by the Constitution: (1) Assamese, (2) Bengali, (3) Gujarati, (4) Hindi, (5) Kannada, (6) Kashmiri, (7) Malayalam, (8) Marathi, (9) Oriya, (10) Punjabi, (11) Sanskrit, (12) Tamil, (13) Telugu, (14) Urdu.

A Commission was appointed in accordance with the provisions of the Constitution to make recommendations to the President as regards the progressive use of the Hindi language for official purposes of the Union, and other allied matters.

After the Commission reported, Parliament decided that while Hindi would become the official language in 1965 as laid down in the Constitution English would continue to be used side by side with Hindi though in a progressively diminishing degree until it is completely replaced. No date is fixed for the change-over. The Supreme Court and the High Courts could use Hindi in addition to English after 1965.

The President of India issued an order on official language on April 27, 1960. (No. 2-8-60-OL.)

## EMERGENCY PROVISIONS

If the President is satisfied that a grave emergency exists, and the security of India or any part thereof is threatened either by war or internal disturbance, he may make a declaration to that effect. Such proclamation must be approved by both the Houses of Parliament, before the expiration of two months, otherwise it ceases to operate at the end of that period. As a result of this proclamation Parliament will be authorised to legislate on items included in the State list and the President, to issue directions to the Governor. The President of India made a Proclamation of Emergency in October 1962 after the Chinese aggression.

The President may proclaim a failure of constitutional machinery in a State if he learns that the Government of the State cannot be carried on according to the provisions of the constitution. If this is done, President's rule will be introduced in the State.

This, however, would not be applicable to the functions of the High Courts. Somewhat similar provision is also made for financial emergency.

## AMENDMENT OF THE CONSTITUTION

For purposes of amendment the items are divided into three classes with a different procedure for each class.

For amendment of the provision with respect to the Supreme Court and the High Courts, the distribution of legislative powers between the Centre and the States, the representation of the States in Parliament, etc., the amendment must be passed by both the Houses of Parliament by a majority of the total membership of the House and by a majority of two-thirds of the members present and voting, and must further be ratified by the legislatures of not less than one-half of the States.

In other cases no reference to the State legislatures is necessary. Parliament by itself can amend the Constitution in the manner mentioned above. In some cases amendments can be effected even by a bare majority such as is required for the passing of any ordinary law.

There were seventeen amendments to the Constitution from the coming into force of the constitution on 26th January 1950 to the end of January 1964.

The Constitution (First Amendment) Act, 1951 aimed among other things at enabling the State to make special provision for the advancement of socially and educationally backward classes. It also gave the State broader powers to restrict freedom of speech and writing in the interests of friendly relations with foreign States, public order, decency, morality and in relation to defamation or incitement to an offence.

Two new articles were added after Art. 31 to save the laws relating to the acquisition of estates and the validation of certain land reforms Acts and Regulations passed by certain States. These Acts were specified in an extra Schedule added to the list, the Ninth Schedule.

The Articles affected by the First Amendment were 15, 19, 85, 87, 174, 176, 341, 342, 372 and 375. It added two new Articles 31A and 31B and a new Schedule, the Ninth Schedule.

The object of the Constitution (Second Amendment) Act, 1952 was to make adjustments in the representation in the Lok Sabha consequent on the completion of the 1951 census. The Article affected was Article 81.

The Constitution (Third Amendment) Act, 1954 changed entry No. 33 in the Concurrent List in the Seventh Schedule by adding foodstuffs, cattle fodder, raw cotton and jute whose production and supply could be controlled by the Centre if necessary.

The Constitution (Fourth Amendment) Act, 1955 enables the State to acquire private property compulsorily for a public purpose and bars any reference about the quantum of compensation fixed by the legislature to a court of law. Also, the temporary taking over of private property in the public interest or to secure better management is excluded from the compensation clause. Laws providing for State monopolies are also saved from invalidation. Seven new entries were made to the Ninth Schedule.

The Articles affected were 31, 31A, 31(2) and 305.

The Constitution (Fifth Amendment) Act, 1955 merely fixed a time for State legislatures to give their opinion on Central laws affecting the area, boundary etc. of the State concerned. The Article affected was 3.

The Constitution (Sixth Amendment) Act, 1956 added a new entry in the Union List in the Seventh Schedule, thus giving the Centre authority to legislate on the taxes, on the sale and purchase of goods in the course of inter-State transactions.

The Constitution (Seventh Amendment) Act, 1956 dealt with a whole host of problems thrown up by the reorganisation of the States, such as the alteration of State boundaries, the creation of new States, the classification of certain areas as Union Territory, the allocation of seats in the Rajya Sabha, the provision of a bicameral legislature for certain States. Other points the Amendment dealt with are the original jurisdiction of the Supreme Court, the High Courts and safeguards for linguistic minorities.

Some articles affected were 1, 80, 81, 82, 131, 168, 216, 217, 220, 222, 224 and the First Schedule, and the Fourth Schedule. Four new Articles 290A, 350A and 350B and 372A were added.

The Constitution (Eighth Amendment) Act, 1959 is concerned with the representation of Scheduled Castes and Tribes and Anglo-Indians in Parliament and State legislatures. Article 334 of the Constitution lays down that the reservation of seats in these bodies should cease ten years after the commencement of the Constitution, that is, in 1960. The Amendment proposes that the reservation of seats for the

**Scheduled Castes and Tribes and the representation of Anglo-Indians by nomination should continue for a further period of ten years—till 1970.**

Article 333 is also amended so that the number of members so nominated to a State legislature may be fixed—not more than two in West Bengal and not more than one elsewhere.

The Constitution (Ninth Amendment) Act, 1960, gives effect to the transfer of territories between India and Pakistan under the Nehru-Noon Agreement of 1958.

The Constitution (Tenth Amendment) Act amends the First Schedule to the Constitution of India for integration of the territory of Dadra and Nagar Haveli with the Union of India.

The Constitution (Eleventh Amendment) Act provides for a slightly new procedure for the election of the President and Vice-President.

The Constitution (Twelfth Amendment) Act incorporates Goa, Daman and Diu in India and designates it as Union Territory.

The Constitution (Thirteenth Amendment) Act introduces a new Art. 371A regarding the administration of the State of Nagaland.

The Constitution (Fourteenth Amendment) Act incorporates Pondicherry as a Union Territory.

The Constitution (Fifteenth Amendment) Act among other things raises the retirement age of judges from 60 to 62 and also amends the clause on disciplinary action against Government servants.

The Constitution (sixteenth Amendment) Act. This Act amends Art. 19 with a view to conferring on the Government adequate powers for maintaining the integrity and sovereignty of the Union. Arts. 84 and 173 are also amended.

The Constitution (Seventeenth Amendment) Act amends Art. 31A by inserting an additional proviso after the existing proviso and the ninth schedule. Forty-four new Acts are added to the ninth schedule.

# STATE CORPORATIONS

## ANDHRA PRADESH INDUSTRIAL DEVELOPMENT CORPORATION LIMITED

(A State Government Undertaking).

B-1-174, Fatch Maidan Road, Hyderabad-4.

The Andhra Pradesh Industrial Development Corporation Limited was set up by the Government of Andhra Pradesh under the Companies Act 1956 on 16th Dec. 1960. ## GUJARAT INDUSTRIAL DEVELOPMENT CORPORATION

1, Mill Officers Colony, Opp. Mill Owners Assoc. Bldg., Ashram Rd., Navrangpura, Ahmedabad 9.

The Corporation was established in August 1962, as per Gujarat Industrial Development Act, 1962.

The main functions of the Corporation are (1) generally to promote and assist in the rapid and orderly establishment, growth and development of industries, (2) to establish and manage industrial estates at places selected by the State Government, (3) develop industrial areas selected by the State Govrnment, and (4) develop land on its own account or for the State Government, for the purpose of facilitating the location of industries thereon.

*Areas, etc.:* The Corporation has decided to start development of industrial townships at Odhav and Vatwa near Ahmedabad, Vitthal Udyognagar near Vallabh Vidyanagar, Nandesari near Baroda, and also industrial townships at Umbergaon, Udhna near Surat, Saij-Sertha, Porbandar and Bhavnagar. The Corporation has ten members on its Board.

The State Govt. has made provision of Rs. 30 lakhs (Rs. 15 lakhs for acquisition and Rs. 15 lakhs for development of lands) for 1965-66.

*Chairman*, Chinubhai Chimanbhai Sheth; *Vice-Chairman*, Babubhai Jasbhai Patel; *Member-Secretary and Chief Executive Officer*: M. A. Malek.

## GUJARAT MINERAL DEVELOPMENT CORPORATION LIMITED

"Shiva-Prasad", Opp. Sardar Patel Stadium, Navrangpura, Ahmedabad-9.

*Aims and Objects:* Mining and development of minerals in the State of Gujarat with a view to contributing to the development of mineral-based industries.

*Authorised Capital:* Rs. 50,00,000.

*Distribution of Shares:* All the fully paid 17,000 shares of Rs. 100 each are owned by the Government of Gujarat.

The Corporation has, at present, commenced mining of the following two minerals —

(*i*) Glass-sand at village Vavdi in Chotila Taluka of Surendranagar District, with a capacity of 30 tons a day under manual labour with a provision of expansion upto 200 tons per day when the complete Crushing and Screening Plant to be imported from France is installed, with a view to supplying silica-sand in standardised mesh sizes to glass, silicate, abrasive and ceramic industries, refractories, potteries and foundries of the State.

(*ii*) Fluorspar at Ambadungar in Chhotaudepur Taluka of Baroda District. This is one of the rare minerals of the world. The Corporation is raising the Fluorspar Beneficiation Project in the vicinity of that area, with a capacity of beneficiating the raw fluorspar into acid, metallurgical and ceramic grade to the extent of 200 tons per day. This project would contribute to the growth and development of chemical industries and industries like Atomic Energy, Metallurgical, ceramic, refrigeration, etc., of the State and of the country. Above all, it would greatly help to the development of defence industry of the country. The beneficiated fluorspar is at present entirely imported from abroad.

Besides, the Corporation is considering to undertake mining of bauxite and to raise Alumina Project in the State of Gujarat.

*The Board of Directors:* Babubhai Jashbhai Patel (*Chairman*); Premjibhai Bhavanji Thakkar; Jaswantlal Saubhagyachand Shah; F. N. Rana, I.A.S.; K. T. Satarawala, I.A.S.; Dr. B. R. Nijhawan; Prof. K. V. Subrahmanyam; Dr. G. G. K. Sastri; C. K. Shah (*General Manager and Secretary*).

## GUJARAT SMALL INDUSTRIES CORPORATION

Ambica Nivas, Ashram Road, Navarangpura, Ahmedabad 9.

The State-sponsored Gujarat Small Industries Corporation has made a net profit of Rs. 1·50 lakhs in 1964. The turnover during the year was Rs. 1·27 crores.

The Corporation has also done well in terms of service to small industries.

The disposable profit was placed at Rs. 75,000 in 1964.

*Chairman:* Chinubhai Manibhai; *Managing Director:* J. M. Mehta.

The rate of interest on loans out of its own funds is 8¼ per cent per annum with effect from 1 April 1965 subject to the ¼ per cent rebate for prompt payments. The present effective lending rate of the Corporation is 8 per cent.

The Corporation had issued 4½% ten year Bonds for Rs. 55.00,000 redeemable in March 1968. The Corporation issued in Jan. 1962 a second series of 4¾ per cent 12-Year Bonds for Rs. 55,00,000·00 redeemable in 1974.

K. P. Elankath (*Chairman*), C. Thomas, N. Chandrabhanu, Kayiath Damodaran, U. M. Banerjee, S. N. Pai, Joseph Chakola, J. Matthan, Ravi Karunakaran, *Managing Director :* A. Prabhakaran ; *Secretary :* C. Nilakanta Menon.

## KERALA STATE INDUSTRIAL DEVELOPMENT CORPORATION LTD.

Vellayambalam, Trivandrum 1.

The Kerala State Industrial Development Corporation Limited was registered on 21st July 1961 as a private limited company under the Companies Act 1956.

The Corporation has an authorised capital of Rs. 5 crores divided into 50,000 equity shares of Rs. 1,000 each. Shares worth Rs. 2·35 crores (two crores thirty-five lakhs) have been issued and subscribed. The paid-up capital is Rs. 2,06,75,000. The entire share capital has been subscribed by the State Government.

Joint Stock Companies registered in India and Co-operative Societies which are engaged or have for their objects the establishment and operation of industries and have a share capital of not less than Rs. 5 lakhs are eligible to receive assistance from the Corporation.

The assistance will be given to large-scale and medium sized industries. It will normally entertain applications for loans from industrial concerns only if the amount involved exceeds Rs. 10 lakhs in the case of Private Limited Companies and Rs. 20 lakhs in the case of Public Limited Companies.

Assistance will be granted for the establishment of new industries, expansion or modernisation of existing industries, diversification of the lines of production, purchase of plant and machinery and installation thereof, purchase of land for factory sites and factory buildings, construction, including extension of factory buildings, working capital for existing undertakings etc.

The assistance will be granted in the form of :—

(*a*) Direct participation in the equity or preference capital or debentures.

(*b*) Underwriting of equity or preference capital or debentures.

(*c*) Granting of medium and long term loans, and

(*d*) furnishing of guarantees.

The Corporation will charge interest at the Reserve Bank of India's lending rate plus 2½ per cent, less ½ per cent rebate for prompt payment of the loan subject to an absolute minimum of 7 per cent. For furnishing guarantees the Corporation will charge a commission of 1¾ per cent less ¼ per cent rebate for prompt payment.

## MADHYA PRADESH FINANCIAL CORPORATION

(Shiv Vilas Palace, Indore City).

Started functioning on 1st July 1955.

The object of the Corporation is to assist and further the industrialisation of the State by providing institutional credit, medium and long term, to industrial concerns in Madhya Pradesh.

The rate of interest will be 8½ per cent per annum with half-yearly rests, subject to a rabate of ¼ per cent allowed on timely payments of interest and repayment of instalment of principal.

The period of loan is decided on the merits of each case, but does not ordinarily exceed 10 to 12 years though the maximum period upto which loans can be granted has been fixed at 20 years. The principal amount of loan is determined according to the circumstances of each case. Loans for working capital are repayable in five years.

The assets offered in mortgage to the Corporation are to be insured by the borrowing concern upto their full value with insurance companies approved by the Corporation.

The authorized share capital of the Corporation is Rs. 2 crores divided into two lakh fully paid shares of the face value of Rs. 100 each, out of which one lakh fully paid shares of the value of Rupees one crore are issued in the first instance. A dividend of 3½ per cent per annum on the share capital of the Corporation has been guaranteed by the Government. The Corporation, to augment its working funds has issued bonds of Rs. 1 crore carrying interest at 5 per cent in 1965.

The Corpororation has reduced the minimum limit of the loan from Rs. 20,000 to Rs. 10,000 with a view to encouraging small scale industries. The Corporation has also reduced the margin of security from 50 per cent to 40 per cent and upto 25 per cent in the case of small scale industries. The Corporation has started sanctioning loans to Hotels and Transport Industries.

Since inception the Corporation received 518 completed loan applications till 31st March 1965. The Corporation sanctioned advances to 256 industrial concerns for Rs. 6,81,54,700 and rejected 72 cases for Rs. 1,02,09,000. 133 applications for Rs. 2,79,91,500 were withdrawn by the applicants. 57 applications for Rs. 1,22,46,000 were under consideration as on 31st March 1965.

## MAHARASHTRA STATE FINANCIAL CORPORATION

United India Building, Sir Pherozeshah Mehta Road, Bombay 1.

*Branch Offices :* National Indian Building, Mount Road Extension, Nagpur ; Mohan Talkies, Sarafa, Aurangabad ; Renuka Nivas, Station Road, Miraj ; Ghanekar Building, Rua Jose Falcao, Panjim, Goa.

The Bombay State Financial Corporation, established on 30th Nov. 1953, was reconstituted under Section 70 of the Bombay Reorganisation Act 1960 and named the Maharashtra State Financial Corporation as from the 14th of August, 1962.

The main object of the Corporation is to provide financial assistance to medium and small scale industrial concerns in the Maharashtra State for purchase of land, plant and machinery and other assets, for renovation and expansion of existing units, and for the development of new ones.

Under an arrangement with the Government of Maharashtra, the Corporation considers applications from Small Scale Units, under Agency-cum-Guarantee arrangement for loans from Rs. 10,000 to Rs. 75,000, and in exceptional cases, upto Rs. 1 lakh. These loans are guaranteed by the State Government.

The Corporation also considers applications under its own rules for loans above Rs.1,00,000 to Rs. 10,00,000 from all types of managements. and upto Rs. 20,00,000 from Public Limited Companies and Registered Cooperative Societies.

The amount of loan is advanced generally to the extent of 50 per cent of the net value of the fixed assets, consisting of land, building, plant and machinery.

Industrial concerns engaged or to be engaged in the manufacture, preservation or processing of goods or in mining or in Hotel industry or in the transport of passengers or goods by road or water or in the generation or distribution of electricity or any other form of power or in the Development of Industrial Estates are eligible for financial assistance from the Corporation.

The authorised and paid up capital of the Corporation is Rs. I crore, divided into 1,0C,000 shares of Rs. 100 each.

The shares of the Corporation are guaranteed by the State Government as to the repayment of the Principal. Payment of annual dividend at the minimum rate of 3½ per cent per annum is also guaranteed by the State Government.

Rate of interest for loan advances :—9 per cent per annum. In the case of loans under Agency-cum-Guarantee Agreement, the rate or interest varies from 6½ to 9 per cent according to the amount sanctioned and the region of location of the concern.

A rebate of ½ per cent will be granted if payments on account of principal and interest are made punctually.

The period of loan is decided on merit, but will not generally exceed ten years.

The Corporation accepts fixed deposits for one to five years at rates of interest from 5½ to 6½ per cent per annum. The deposits are guaranteed by the State Government as to repayment of principal and payment of interest.

During 1964-65, the Corporation under its own rules received 188 applications and the total loan applied for was Rs. 7,35,83,429. The Corporation sanctioned loans aggregating Rs. 3,36,16,500 to 116 concerns.

Under Agency-cum-Guarantee Arrangement, the Corporation received, for consideration during the year 1964-65, 267 applications for Rs. 1,50,45,600. The Corporation sanctioned loans aggregating Rs. 72,52,900 to 149 concerns.

The total loans disbursed by the Corporation upto 31st March, 1965 aggregated Rs. 10,66,21,419.

*Board of Directors :* B. D. Garware (*Chairman*), Pravinchandra V. Gandhi, H. Nanjundiah, C. C. Chokshi, R. M. Deshmukh, M. L. Apte, V. D. Chowgule, A. R. Thanawalla, V. P. Pandit, P. S. Mokashi (*Managing Director*).

## MAHARASHTRA STATE WAREHOUSING CORPORATION

18, Bombay Road, Poona-3.

The Maharashtra State Warehousing Corporation has an authorised share capital of Rs. 2 crores divided into two lakh shares of Rs. 100 each. The share capital is to be subscribed by the Central Warehousing Corporation, New Delhi & the Maharashtra State Government in equal proportions. The present paid up share capital of the Corporation is Rs 60 lakhs.

The Corporation has established warehouses at 53 centres spread all over the Maharashtra State. The maximum custom during the year 1963-64 was 6,20,055 bags of agricultural produce. The Corporation is authorised under the Warehousing Corporations Act of 1962 to store other notified commodities also in its warehouses. Against warehouse receipts issued by the Corporation, the depositors can secure advances by pledging the same with the scheduled banks, the State Bank of India and Dist. Central Cooperative Banks.

Upto the end of the financial year 1963-64, the Corporation's working had resulted in a loss of Rs. 2,93,408.

*Chairman :* M. V. Deo, I.A.S.

## ORISSA CONSTRUCTION CORPORATION LTD.

(A Govt. of Orissa Undertaking)

Bhubaneswar.

This Corporation was set up on 22nd May, 1962, with an authorised capital of Rs. one crore and the entire issued share capital has been fully subscribed by the State Government.

Though it is a departmental agency, it functions independently of departmental rules and regulations. Thus, it combines the advantages of departmental construction with the flexibility of working associated with the execution of works by private construction agencies.

While the Board of Directors is in over-all charge of the Corporation, its day-to-day administration is under the control of the Director-in-Charge who is assisted by technical and non-technical staff.

The Corporation has a big plan for expansion. It has already invested large amounts on machinery and equipments needed for major construction works.

*Chairman :* Kartar Singh, I.A.S. ; *Director-in-Charge :* A. R. Rao ; *Secretary :* P. K. Paul.

## THE PUNJAB EXPORT CORPORATION LIMITED

15-E, Sector 9-D, Post Box 20, Chandigarh, Punjab.

The Corporation was incorporated under the Companies Act, 1956 in June, 1963. It is a Punjab Government undertaking.

The authorised share capital of the Corporation is Rs. 50 lakhs, divided into 50,000 equity shares of Rs. 100 each. Eighty per cent of the share capital has been subscribed to by the Government of Punjab ; the remaining 20 per cent is to be subscribed by the private enterprise. The administrative control of the Corporation is vested in a Board of Directors consisting mainly of experienced business men.

The Corporation has been set up to serve as a channel for the outflow of goods from Punjab's medium and small-scale industries to the export markets. It organises and effects exports from India of all such goods and commodities as are manufactured and produced in Punjab and coordinates the activities of exporters with various export promotion councils. It arranges supply of scarce raw materials required for the manufacture of goods meant for export, as also finance to enable the manufacturers to process firm orders for export. In addition, the Corporation renders institutional service and guidance to manufacturers/exporters in Punjab.

The promotional efforts of the Corporation include assistance to industrialists in sponsoring them for study teams/delegations, organising participation of Punjab industry in exhibitions and trade fairs, developing new lines of export and help in solving problems of exporters by coordination with various agencies.

*Vice-Chairman :* Ravindra Nath.

*Mg. Director :* L. R. Mago.

## THE PUNJAB STATE SMALL INDUSTRIES CORPORATION LTD.

44-E, Sector 9-A, Chandigarh.

The Punjab State Small Industries Corporation was set up by the Punjab Government with a paid-up capital of Rs. 20 lakhs during 1962-63. Its objects are to aid, counsel assist, finance, protect and promote the interest of small industries in the state.

In brief the main functions of the Corporation comprise procurement, storage and distribution of essential raw materials *viz.* ferrous and non-ferrous metals, coal, molasses yarn, dyes, chemicals etc.

The Corporation declared a dividend of 9·5 per cent during the 2nd year of its functioning. The financial results for 1963-64 are summed up as under :—

Paid-up capital Rs. 20,00,000 ; Turnover Rs. 1,84,22,883 ; Gross profit Rs. 8,69,706 ; Total expenses Rs. 2,23.308 ; Profits (subject to income tax) Rs. 6,46,308.

*Chairman :* R. S. Talwar, I.A.S.

*Mg. Director :* J. P. Gupta.

## RAJASTHAN FINANCIAL CORPORATION

Surya Nivas, C-18, Bhagwandas Road, Post Box No. 63, Jaipur.

The Corporation has an authorised capital of Rs. 2 crores, divided into two lakh shares of Rs. 100 each. Only one lakh shares were issued and fully paid-up. The position of shares held by various classes of shareholders as on 31st March 1965 was as follows : State Government 36,200, Reserve Bank of India 20,000, Scheduled Banks, Insurance Companies and other financial institutions 39,250, and parties other than the above 4,550. The object of the Corporation is to provide financial assistance to medium and small-scale concerns in the State.

The Corporation sanctioned loans amounting to Rs. 4,13,87,000 to 151 industrial concerns by the end of March 1965, out of which loans aggregating Rs. 68,07,629 had been cancelled. Against the effective sanctioned loans for Rs. 3,45,79,370, a sum of Rs. 2,73,24,574 was disbursed by the Corporation till the end of March 1965.

Under the Rajasthan State-Aid to Industries (Loans) Rules, 1963, the Corporation sanctioned loans amounting to Rs. 8,02,400 to 50 industrial concerns by the end of March, 1965, out of which loans aggregating Rs. 99,950 had been cancelled. Against the effective sanctioned loans for Rs. 7,02,450 a sum of Rs. 6,27,950 was disbursed by the Corporation till the end of March 1965.

During 1964-65 the Corporation made a net profit of Rs. 6,71,856 as compared to Rs. 5,57,622 made during 1963-64, subject to taxation.

*Chairman, Board of Directors :* Ram Nath A. Poddar, J.P.

*Managing Director :* G. S. Purohit.

*Directors :* A. K. Roy, S. T. Karnik, O.P. Gupta, L. N. Birla, C. L. Thareja, Kamal Nayan Bajaj, J. M. Lalwani and P. V. Shrikanta Rao.

## U. P. FINANCIAL CORPORATION

7/154, Swarupnagar K

The Corporation was established on Nov. 1, 1954. It has an authorised capital of Rs. 8 crores, which is divided into 3 lakh fully paid-up shares of Rs. 100 each. The paid-up capital of the Corporation as on date is Rs. 1 crore divided into 1 lakh shares of Rs. 100 each fully paid-up. These shares have been distributed in this way : 55,360 State Government ; 15.000 Reserve Bank ; 27,096 Scheduled Banks, Co-operative Banks, Insurance Companies, Investment Trusts and other Financial Institutions ; 2,544 others.

The object is to provide finance to small and medium scale industries.

The Corporation received during the year 1964-65 (upto March 31, 1965) 65 applications as against Corporation Funds and 129 applications forwarded by the Director of Industries as against Government Funds placed at the disposal of the Corporation.

Out of the above applications received, 33 applications amounting to Rs. 1,34,44,000 were sanctioned against Corporation and 54 applications amounting to Rs. 34,32,000 were sanctioned against Government Funds.

Profit for 1964-65 : Rs. 7,95,088·90 p.

Bharat Bhushan (*Managing Director*) ; B. L. Manchanda (*Secretary*).

## U.P. SMALL INDUSTRIES CORPORATION LIMITED

7/62, Tilak Nagar, Kanpur.

The U.P. Small Industries Corporation Ltd. was registered under the Indian Companies Act, 1956 on June 13, 1958. It was formed to assist the development of small industries in the State. Its present share capital is Rs. 47,50,000 which is entirely subscribed by the State Government. The Board of Directors consists entirely of officers of U.P. and Central Governments.

Activities : (1) It has so far enlisted 806 units and helped them in securing contracts to the extent of about Rs. 33,00,000.

2. Distributes scarce raw material to small scale units through its regional depots located at Kanpur, Agra, Naini (Allahabad), Varanasi and Meerut. The Corporation is functioning as registered stockists of iron & steel. The figures of purchases and sales respectively from the inception of the scheme till 31st December 1964 are Rs. 3,13,63,834 and Rs. 3,01,39,342.

3. Supply of machinery on hire purchase to S.S.I. units has been started from January 1965.

4. Participates in share capital of new units in selected industrially backward areas.

The Corporation has under examination a proposal to take over the commercial schemes at present being run by the Directorate of Industries, Uttar Pradesh.

*Chairman :* H. C. Saxena, I.A.S.
*Managing Director :* S. C. Goil, I.A.S.
*Secretary :* J. P. Srivastava.

## U. P. STATE INDUSTRIAL CORPORATION LIMITED

Building of the Directorate of Industries, 117/420, G. T. Road, Post Box No. 413, Kanpur.

U.P. State Industrial Corporation was established in March 1961, as a private limited company with an authorised capital of Rs. 5 crores. The issued and paid-up capital of the Corporation stands at Rs. 100 lakhs and has been contributed entirely by the U.P. Government. A further sum of Rs. 65 lakhs was to be contributed towards the share capital by the U.P. Government during 1965-66.

The Corporation has been set up under the Third Five Year Plan of Uttar Pradesh with the principal object of assisting the process of rapid and extensive industrialisation of the State. The Corporation is an autonomous body functioning under the Company law and is at present engaged in the following activities :—

(1) Acquisition and development of land in Ghaziabad, Hardwar, Bareilly, Kanpur, Lucknow, Gorakhpur, Varanasi and Mirzapur for offering to industrialists on lease ;

(2) Underwriting of equity and preference capital of new industrial companies and participation in share capital in special cases;

(3) Exploitation of limestone deposits in Mirzapur district and of magnesite deposits in Almora district for the indigenous steel industry.

(4) Preparation of techno-economic feasibility reports on selected industrial projects for use by industrialists.

Loan funds are provided by the State Govt. to the Corporation for developing industrial areas. Noticeable progress has been made in the acquisition and development of land.

For underwriting the issue of share capital, the Corporation charges underwriting commission at a rate of 2½ per cent of the nominal value of the shares underwritten and brokerage of 1 per cent of the nominal value of the shares subscribed in terms of the underwriting agreement. The general policy of the Corporation is to favour the underwriting of preference shares at 9·5 per cent cumulative dividend and to underwrite equity capital also in meritorius cases. Upto the end of March 1965 the Corporation has granted underwriting to 18 units for a total of Rs. 156·48 lakhs equity and Rs. 107 lakhs preference.

An industrial licence for the manufacture of 36,000 tons of dead burnt magnesite per year has recently been granted to the Corporation by the Govt. of India. Global tenders have already been invited and steps are being taken for the erection of the plant at an early date.

*Board of Directors:* B. B. Lal (*Chairman*); Sir Padampet Singhania; B. P. Bajoria; S. S. Kanoria; V. M. Bhide; H. C. Saxena; R. Chandra; P. N. Kapoor; K. N. Srivastava; A. B. Malik; P. N. Agrawal (*Managing Director*).

## WEST BENGAL FINANCIAL CORPORATION

**P-11, Mission Row Extension (5th Floor), Calcutta-1.**

The Corporation was established as from 1st March 1954. The object of the Corporation is to provide financial assistance, chiefly by way of long and medium term loans, to industrial concerns in the State.

Authorised Capital Rs. 2 crores divided into 2,00,000 fully paid-up shares of Rs. 100 each, of which 1,00,000 fully paid-up shares of the total value of Rs. 1 crore were issued in the first instance and are held by the following classes of shareholders:

The shares are guaranteed by the State Govt. as to the repayment of principal and the payment of annual dividend at the minimum rate of 3 per cent per annum.

The Corporation issued the following bonds guaranteed by the State Govt. as to the repayment of principal and the payment of interest.

(*i*) 4½ per cent ten-year bonds 1968, Rs. 50 lakhs.

(*ii*) 4½ per cent twelve-year bonds 1972 Rs. 50 lakhs.

(*iii*) 4½ per cent twelve-year boands 1974 Rs. 50 lakhs.

(*iv*) 4½ per cent ten-year bonds 1972 Rs. 50 lakhs.

(*v*) 5 per cent bond redeemable in 1976, Rs. 1,04,26,000.

(*vi*) 5 per cent bonds (1966) Rs. 67,00,000.

## BALANCE OF PAYMENTS

India's balance of payments position in 1963-64 has been described in the Currency and Finance Report (1964-65) of the Reserve Bank as follows:

In the absence of information covering the entire financial year, the detailed discussion on balance of payments that follows is confined to the trends during the calendar year 1964. During the year 1964, the reserves *declined* by Rs. 52·1 crores, as compared to an *increase* of Rs. 45·6 crores during the preceding year. If borrowings from and repayments to the IMF were excluded, the reserves would show a fall of Rs. 28·3 crores, as against an accretion of Rs. 33·7 crores during the preceding year, *i.e.* an adverse swing of Rs. 62 crores as between the two years. On a quarterly basis, the balance of payments transactions during the first quarter (*i.e.* January–March, 1964) resulted in a modest net accretion to the reserves, while in each of the remaining three quarters, there was a draft on them.

The overall balance of payments picture shows a significant bulge in the current account deficit, from Rs. 297·9 crores in 1963 to Rs. 433·2

crores in 1964, which was due exclusively to a widening of the gap on the merchandise account, from Rs. 395 crores to Rs. 570·3 crores, there being larger receipts under official transfer payments and other invisibles (net). Payment for aggregate imports particularly those on Government account, went up by Rs. 219·0 crores to Rs. 1,387·9 crores; nearly half of this increase was financed by foreign aid available under various external assistance programmes. Performance on the export front was noticeably better, the value of exports rising by Rs. 43·7 crores; but the pace of growth in exports slowed down considerably compared to 1963. The outflow on account of unidentified transactions, representing, by and large, the lag between actual receipts of foreign exchange and the value of goods exported was almost twice that in 1963. As against these, the net inflow of capital was substantially larger (by Rs. 74·4 crores), thus considerably reducing the pressure on the reserves.

The balance of payments for the calendar years 1963, 1964 and the four quarters of 1964 are shown in the table below:

(Preliminary) (Crores of Rupees)

| | Jan.-March 1964 | April-June 1964 | July-Sept. 1964 | Oct.-Dec. 1964 | Jan.-Dec. 1964 | Jan.-Dec. 1963 |

## DEVELOPMENTS IN TRADE POLICY

According to the Report on Currency and Finance (1964-65) the main accent of India's trade policy continued to be on maximisation of export earnings and keeping down imports to a minimum consistent with the country's requirements for development and expansion. Thus, in the context of continuing concern over the foreign exchange situation, action was taken to impose additional restrictions on imports, including a ten per cent. regulatory import duty, and to further rationalise the import policy so as to provide closer co-ordination between imports and exports. On the exports side, the various promotional measures adopted during the past several years were strengthened and supplemented by several new schemes designed to create larger export awareness among the exporters and to offer an edge of competitiveness to Indian products in the international markets. At the same time, elaborate institutional arrangements were also made to study the problems and prospects of individual export commodities and to undertake market research so as to facilitate adoption of suitable measures which would not only enhance export earnings in the short period but would also place the export trade on an enduring basis.

On the export front, a major step during the year was the setting of up a free trade zone at the Kandla port, the first of its kind in India. The main object of creating this zone was to make merchandise exports more competitive in world markets by effecting reductions in overhead costs through eliminating the elements of customs and excise duties and to stimulate the growth of processing industries for exports in that zone. Also, action was taken during the year to extend larger fiscal concessions to exporters in order to mitigate the adverse impact of the various tax measures on the export trade and thus to reduce the prices of Indian goods in the markets abroad. In addition to the scheme of rebates granted in respect of income-tax on profits earned on exports, which has been in operation since 1962-63, a new scheme of granting tax credit certificates to exporters was announced in the budget proposals for 1965-66. According to this scheme, tax credit certificates are to be issued to exporters upto a maximum of 15 per cent. of the value of export proceeds realised in India in respect of goods exported after February 28, 1965. The exact quantum of assistance, which will vary from commodity to commodity, will be determined by an Advisory Board which has since been constituted (On the basis of the recommendations of the Board, the Government announced on July 17, 1965 a list of export items on which tax credit certificates should be granted together with the rates applicable in each case). Among other fiscal incentives provided to exporters during the year, mention may be made of the abolition of the export duty of Rs. 25·00 per bale on Bengal Deshi cotton with effect from August 31, 1964. The policy of granting drawbacks of customs and central excise duty paid on imported materials used in export commodities was continued.

An improvement in the competitive position of Indian exports was also sought to be achieved by providing cheaper and larger export credit to the exporters. With this end in view, the Export Credit and Guarantee Corporation (a state-owned institution) introduced during the year two new schemes, *viz.* (*i*) the post-shipment export credit guarantee scheme and (*ii*) the export finance credit guarantee scheme. Under the first scheme, the preshipment export credit guarantee offered by the Corporation was extended to the post-shipment stage to cover any loss sustained by a bank or a financing institution due to the protracted default or insolvency of the exporter during the period from the stage of shipment to the actual payment received in India. The Corporation's indemnity in this regard would be upto 66⅔ per cent. of the loss incurred. Under the export finance credit guarantee scheme, banks would be enabled to offer to the exporters, on a selective basis, in respect of commodities whose export prices are lower than domestic prices, discounting facilities upto 125 per cent. of the value of exports according to shipping documents; and the bank advance in excess of the value upto 25 per cent. of the f.o.b. value of the export bills will be guaranteed by the E.C.G.C.; its indemnity will be upto 75 per cent. of the loss incurred in the event of the loanee's insolvency or protracted default.

The Government also approved during the year with some modifications a scheme for the establishment of an Export-Import Stabilisation Funds as recommended by the Mudaliar Committee. The administration of the scheme is entrusted to the E.C.G.C. In pursuance of the provisions of the scheme, all banks authorised to deal in foreign exchange would be permitted to participate and raise lines of credit in foreign exchange through their correspondents, branches or principals abroad. The credit will be made available on a revolving basis to manufacturers/exporters in respect of all items covered by the various export promotion schemes for importing raw materials, components and spares for manufacturing goods meant for export. The foreign exchange credit thus made available would be repaid out of the proceeds received from the exports of goods produced with the raw materials and components imported under this arrangement.

The activities of the E.C.G.C. recorded a further all-round expansion during the year. The total number of policies issued in 1964-65 rose to 988 from 684 in 1963-64; similarly, the number of packing credit guarantees issued was higher at 246 as against 155 in the preceding year. The value of risks covered by the Corporation during the year also showed a substantial rise of 32·7 per cent. over the year, from Rs. 28·82 crores to Rs. 38·25 crores.

In the sphere of institutional and organisational arrangements, the year witnessed a number of important developments. A new feature in this direction was the enlistment of the active co-operation of the States in the export drive. As a result, some of the States like Maharashtra, Punjab, U.P., West Bengal, Mysore, Andhra Pradesh and Gujarat undertook to establish their own export promotion organisations. The need to have an apex body of export organisation to secure an effective co-ordination among exporting agencies of the country was also recognised and a Federation of Indian Export Organisations (FIEO) with its headquarters in New Delhi was formed. The Federation will concern itself largely with the co-ordination of export promotion activities of the different agencies and undertake common services and functions.

A new Export Promotion Council for wool and woollen goods was set up during the year (October, 1964) thus bringing the total number of these Councils to seventeen. With a view to reviewing the working of these Councils, some of which have now been functioning for several years, and the progress made by them in developing exports of particular group of commodities for which the respective Councils were formed, an *ad hoc* committee was appointed in September, 1964. This committee would also examine, *inter alia*, the question of bringing about proper coordination in the working of the various Councils so that an integrated and systematic effort might be made in the drive for export promotion of the various commodities.

In order to discourage unhealthy trade practices in metal scrap exports and help in the negotiations of long-term trade contracts on favourable terms, a Corporation called the Metal Scrap Trade Corporation was set up in September, 1964. All exports and imports of ferrous and non-ferrous scrap would be channelled through this Corporation which would also undertake processing of ferrous scrap for domestic use as well as export. A co-operative enterprise of the silk and rayon industry and trade known as Rayex (India) Private Ltd., was also established in March, 1965, by the Silk and Rayon Textiles Export Promotion Council to supplement the existing export efforts of the Council.

During the year, the State Trading Corporation (S.T.C.) and the Minerals and Metals Trading Corporation (M.M.T.C.) registered significant progress. The total value of the trade handled by the STC increased from Rs. 66·8 crores in 1963 to around Rs. 75 crores in 1964, comprising Rs. 41 crores of direct and Rs. 34 crores of indirect trade. The Corporation also entered into a number of link/parallel deals to augment exports and to import commodities essential for industrial and economic development of the country. Besides, the Corporation continued its buffer stock operations, which were confined to three items viz., raw jute, seed, lac and lemon grass oil.

During the year total exports of iron ore effected by the M.M.T.C., which was set up in September, 1963, were higher at 5·31 million metric tons valued at Rs. 22·87 crores compared to 4·18 million metric tons valued at Rs. 19·86 crores in 1963-64 (including exports effected by the S.T.C. prior to the formation of the M.M.T.C.). Exports of manganese ore by the M.M.T.C. also increased significantly from 6·4 lakh metric tons (Rs. 4·95 crores) in 1963-64 to 13·5 lakh metric tons (Rs. 11·46 crores) in 1964-65, mainly with the help of link and barter arrangements. It may be mentioned here that in view of the adverse trends in world markets, the Corporation directly undertook exports of manganese ore from January, 1965, and link/barter or compensation deals for exports involving manganese ore are no longer left to private parties. Imports mostly of non-ferrous metals and certain steel items effected by the M.M.T.C. amounted to approximately Rs. 20·4 crores during 1964-65.

During the year, the Board of Trade held discussions on several aspects of export promotion including the need to ensure continuity and stability in export promotion schemes and policies. In this connection, the Board appointed a 'standing sub-committee on Export Promotion Scheme' for reviewing the working and progress of these schemes. The Export-Import Advisory Council also held meetings during the year to assess the progress of the development in the field of exports and to ascertain the difficulties experienced by the export trade. A number of committees was appointed by the Government to examine problems of various commodities and to recommend suitable measures to improve their exports. Thus, in January, 1965, a separate committee was appointed to identify export commodities where the existing shipping freight rates formed an obstacle to their export and to recommend suitable measures in each case so that the commodities might be exported at competitive prices. Similarly with a view to improving the export performance of traditional export products like cotton and jute textiles, tea, tobacco and iron and manganese ores, special committees were appointed.

The Quality Control and Preshipment Inspection measures, which form an integral part of India's export promotion measures, were vigorously pursued during the year ; exports of mica were subjected to compulsory preshipment inspection while exports of jute goods, tussar fabrics and some varieties of fish and fish products were brought under compulsory quality certification and preshipment inspection. So far about 58 per cent. of India's exports have been covered by the Quality Control and Preshipment Inspection Schemes and it is programmed to cover around 80 per cent. of the total exports by the end of 1965.

The work of the Directorate of Commercial Publicity and of the Indian Council of Trade Fairs and Exhibition was also expanded during the year. A large number of pamphlets, brochures and folders on various subjects relating to Indian export policy and products were issued during the year, some of which were distributed at the New York's World Fair, the first session of which was concluded on October 18, 1964. The Directorate also brought out a number of reports of the committees set up by the Government and the Indian delegations sent abroad.

The Indian Council of Trade Fairs and Exhibitions, which was established in January, 1964 expanded its activities during the year and it has been decided to transfer the management and control of the existing showrooms and trade centres abroad to this Council so that they could be managed and run more on commercial lines with the help of experts and people of experience in actual trade, whose services could be obtained by the Council from established industry and trade. During the year, the Council participated in the Bangkok Industrial Trade Fair while it is expected to arrange about 11 exhibitions and open more showrooms in 1965-66. The Indian Institute of Foreign Trade, which started functioning in April 1964, also undertook a number of programmes in the fields of training commodity and market studies, etc.

Exports of items in short supply like vegetable oils, oilseeds, etc. were brought under control whereas export of commodities like H.P.S. groundnut kernel was banned during the year. In some cases, the export quotas of particular items like raw goat skins were also curtailed to make available larger supply of raw materials to increase the domestic production of finished goods. On the other hand, the ban imposed earlier on exports of certain items (*e.g.* textile cloth of olive green shade, woollen and carpet yarn produced for indigenous wool) was lifted in view of an improvement in the domestic supply position of these commodities. In the sphere of price stabilisation, the year witnessed the fixing of minimum and/or maximum f.o.b. export prices of mica, cardamom and lac.

The Import Policy for 1964-65 announced on March 31, 1964 was basically restrictive, reflecting the difficult foreign exchange situation caused by the stresses and strains of development combined with defence mobilisation. No material changes in the policy were made except for a slight liberalisation of the quotas for the small-scale sector and some of the defence-oriented industries. However, in the expectation of an increase in non-project aid a slightly increased provision was made for maintenance imports required by actual users in order to facilitate fuller utilisation of installed capacities. The scope of annual licensing for actual users was widened so as to cover almost all of their requirements of raw materials, components and spares except raw jute, cashew nuts, raw wool, raw cotton and jute and cotton textile machinery, subject, of course, to the usual half-yearly review. Besides, 14 new items were added to the list of items permissible to actual users. The level of imports permitted to established importers was more or less the same as last year. While the quotas of some 12 items were reduced taking advantage of increased internal production, the quotas for 17 items including, among others, drugs and medicines, steel belt lacings etc. were increased. The policy in respect of established importers continued unaltered in the second half of the year also without any cut but, in respect of actual users, certain cuts were announced in December, 1964, at the time of the announcement of the policy for the second half, due to the unexpected deterioration in the foreign exchange situation. Assurance, however, was given that the cuts would be effected in such a way as not to affect production adversely. In order to reinforce the physical restriction by the imposition of fiscal restraints also, the Finance Minister announced on February 17, 1965 his decision to levy a regulatory import duty of 10 per cent. *ad valorem* on all imports except food grains, fertilisers, pesticides, books, and accessories for family planning (Subsequent additions to the list of items exempted from the regulatory import duty of 10 per cent. *ad valorem* are raw jute, exposed cinematographic films and soyabean oil). The measure, besides bringing in additional revenue was expected to reduce profit margins and bring about greater import substitution. The Finance Minister also announced his intention to have all commitments for Government imports against free foreign exchange resources examined to see if any economy was possible in this regard.

The provisions of the import policy for 1964-65 were made applicable to Goa, Daman and Diu also. Earlier in September, 1963 the scope of the Import-Export Control Act had been extended to cover these territories.

Details of the general import policy as well as important announcements in regard to selected individual items are set out.

Among other developments in the field of import control policy, the more important related to the Government's decisions on the Swaminathan Committee Report and Mathur Committee Report. The Swaminathan Committee which had been appointed to examine the possibilities of simplifying industrial licensing procedures made certain recommendations in respect of import policy also. The Committee submitted its report in March, 1964 and the Government announced in June, 1964 its decisions on the report. The Committee recommended that, as far as possible, import licences for raw materials and components should be issued within three months of the commencement of the licensing period. If this was not feasible, *ad hoc* licences equivalent to 50 per cent. of the value of licences issued during the corresponding half of the previous year should be issued for use pending final announcement of the policy. While issuing licences for raw materials the limitations should be normally value-wise and not in terms of quantity so that it would give the option to the licensee to import any of the permitted items in the proportions desired. The Committee also recommended a speedy issue of import licences for spare parts received short or in damaged conditions and which were being replaced free of cost. The Government accepted the recommendations of the Committee in principle but preferred simpler alternatives in respect of some of them. For example, in regard to the licensing of raw materials, when it was not feasible to expedite the issue of licences, the Government proposed to issue in the first instance, for items subject to annual licensing, licences equivalent to the previous year's level, laying down, as usual, the proportions permissible for each of the half-years. In the case of items subject to half-yearly licensing, licences equal to the value of licences in the corresponding half of the previous year would be issued. The value of the licences will be suitably adjusted, if necessary, when the final policy was announced.

The Mathur Committee, which was appointed by the Government to examine possibilities of simplification of the import and export control procedures, submitted the first part of its report on March 8, 1965. The Government announced its decision on the report on March 31, 1965, accepting most of the recommendations of the Committee. One of the important recommendations of the Committee was that all licences

should, subject to certain conditions, be issued on an annual basis without any need for a formal mid-year endorsement.

### TARIFF COMMISSION

In 1964-65, the Tariff Commission completed (an inquiry is treated as complete only after the Government's decision on the report has been published). six tariff inquiries related to an examination of the need for the continuance of existing protection. The working of six of the industries, in respect of which the protection granted was due to expire at the end of December, 1964 namely (*i*) Titanium dioxide, (*ii*) calcium carbide, (*iii*) Soda ash, (*iv*) Caustic soda, (*v*) Aluminium and (*vi*) Dyestuffs, was examined during the year. The Commission recommended the continuance of protection to all the six industries at the existing rates except in the case of titanium dioxide in whose case a reduction in the rate of protection was suggested. In the case of the dyestuffs industry, a few more items besides the existing ones were recommended for protection.

The Government accepted the recommendations of the Commission in regard to the continuance of protection to only two of these industries, namely, aluminium industry and dyestuffs industry. However, since the rates suggested by the Commission for some of the newer items of dyestuffs were considered rather high, the Government refixed them in such a way that the protective standard duty did not exceed 75 per cent. *ad valorem* for any of them. As regards the remaining four industries viz. titanium dioxide, soda ash, caustic soda and calcium carbide industries, the Government could not agree with the Commission's recommendation for the continuance of protection of these, since it felt that these industries had made satisfactory progress and there was no fear of unhealthy competition from imports.

In addition to the six tariff inquiries, the Commission completed, during the year, the price inquiry in respect of electrical lamps and fluorescent tubes. The Commission suggested price schedules for (*i*) general lighting service lamps and train lamps, (*ii*) fluorescent tubes, (*iii*) high pressure mercury vapour lamps and (*iv*) miniature lamps. Of these, the prices of high pressure mercury vapour lamps and automobile lamps were only to serve as indicators. Since the Commission felt that the benefit of large scale production should be passed on to the consumer it recommended that the retail prices should be stamped on lamps also and the present practice of stamping prices on lamp cartons should be followed by all producers uniformly. The Commission also suggested that the producers should ensure, through arrangements with distributors and agents, the imposition of controls on margins in order to keep the retail price in line with the wholesale prices. The Government accepted the recommendations with certain modifications in the suggested price schedules. The Government also accepted the recommendations in respect of stamping of retail prices on lamp cartons.

## TRADE AGREEMENTS

During the year, a fresh trade agreement was concluded with the Republic of Korea, while the existing agreements with Greece, Iraq, Jordan and Italy were renewed. Further, annual trade plans under the existing agreements were finalised and revised schedules drawn up with Afghanistan, Bulgaria, Ceylon, Czechoslovakia, East Germany, Hungary, Poland, Rumania, the U.A.R., and the U.S.S.R. A feature of these annual trade plans as well as of the revised trade schedules was that although traditional items predominate in the list of exports from India, more of manufactured items, particularly light engineering goods, were also included. The Agreement with Morocco expired in August, 1964. As at the end of March, 1965, 30 trade and payments agreements were in force with different countries. (These are with (1) Afghanistan, (2) Austria, (3) Bulgaria, (4) Burma, (5) Ceylon, (6) Chile, (7) Czechoslovakia, (8) East Germany (German Democratic Republic), (9) France, (10) Greece, (11) Hungary, (12) Indonesia, (13) Iran, (14) Iraq, (15) Italy, (16) Japan, (17) Jordan, (18) South Korea, (19) Nepal, (20) Pakistan, (21) Poland, (22) Rumania, (23) Sweden, (24) Switzerland, (25) Tunisia, (26) U.A.R., (27) U.S.S.R., (28) Viet Nam North, (29) West Germany (Federal Republic of Germany), and (30) Yugoslavia. Negotiations for a trade agreement with Brazil have been completed and the agreement is expected to be signed shortly and a trade agreement with Argentina is under negotiation.)

In terms of the trade agreement of 1963 the Governments of India and Pakistan signed two protocols in July 1964 and one in January, 1965, specifying the commodities to be exchanged between the two countries within a maximum upper limit.

The United Nations Conference on Trade and Development, a reference to which was made in the last year's Report, was held in Geneva from March 23 to June 6, 1964. India played an important role in the deliberations of the Conference and in the formulation of the main recommendations which cover all aspects of trade, finance and economic developments of the developing countries. The Conference urged special treatment by the developed countries for imports, both of primary commodities and processed, semi-processed and manufactured items from the developing countries so as to enable the latter to expand and diversify their exports. On the basis of the recommendations of the Conference, the Secretary General of the United Nations appointed two committees : (*i*) the Committee of 24 Governmental experts to draw up a convention on the access to the seas by land-locked countries, and (*ii*) a special Committee on conciliation procedures to prepare proposals for procedures within the continuing machinery. Further, in pursuance of the recommendations of the Conference, a United Nations Conference on Trade and Development (UNCTAD) and its subsidiary, the Board of Trade and Development, have since been established as permanent organs of the General Assembly by a resolution adopted by the XIX Session of the General Assembly. The Conference is to be convened at an interval of three years. Its main functions include promotion of international trade with a view to accelerating economic development, particularly the trade between countries at different stages of development, formulations of principles and policies on International trade and related problems of economic development. It would also review the activities of other institutions within the United Nations System in the field of International Trade and Development. The Board shall carry out the functions that fall within the competence of the Conference (UNCTAD) when the latter is not in session, and shall, in particular, keep under review and take appropriate action within its competence for the implementation of the recommendations and decisions of the Conference. It may also initiate studies and reports in the field of trade and related problems of development. India served on the two committees appointed by the Secretary General and is also represented both in the UNCTAD and in the Board of Trade and Development.

During the year under review the General Agreement on Tariffs and Trade underwent an important change through the incorporation of a new chapter on Trade and Development of the less developed countries, to meet a longstanding demand from India and other developing countries. In a special session of the GATT held in November 1964, the draft of the new chapter on Trade and Development was finalised and was finally approved in another special session held on February 8, 1965 when 28 member countries including India signed the protocol accepting this chapter. According to the chapter, which will come into force when it is accepted by two-thirds of the Contracting Parties, the developed countries would undertake 'to the fullest extent possible', to encourage the growth of exports of less developed countries without demanding reciprocal concessions for exports of the developed countries.

# THE CO-OPERATIVE MOVEMENT (1962-63)

DURING 1962-63, the number of all types of co-operative societies rose by 4,333 to 3,46,174 from the previous year. Nearly half of the total number of societies was accounted for by the four States of Uttar Pradesh, Punjab, Maharashtra and Bihar. Agricultural Credit Societies numbering 2,11,132 constituted the largest single group among all societies forming about 61 per cent of the total. Among non-credit societies, weavers' and other industrial societies numbering 12,732 and 22,278 respectively, continued to be the most important groups. The other important types of societies were sugarcane supply societies (9,011), other processing societies (8,467), consumers stores (8,507), housing societies (8,909), milk supply societies (5,098), farming societies (4,512) and marketing societies (3,295).

The membership of all primary societies which stood at 415·69 lakhs as on June 30, 1963 showed an increase of 37·34 lakhs or about 10 per cent over the position as on June 30, 1962. Assuming that an average family consists of five members, it may be estimated that by the end of 1962-63 roughly 20·78 crores or 45·4 per cent of the total population was covered by the co-operatives. The owned funds and working capital of all societies increased from Rs. 368·79 crores and Rs. 1,534·78 crores as on June 30, 1962 to Rs. 429·03 crores and Rs. 1,769·04 crores respectively as on June 30, 1963. The loans advanced by all primary societies during 1962-63 were Rs. 495·39 crores, representing an increase of Rs. 45·97 crores over the loans advanced during the previous year.

## STATE CO-OPERATIVE BANKS

The number of state co-operative banks remained steady at 21 as in 1961-62. The number of central societies and primary societies which were members of the apex banks showed a decline during 1962-63 from 883 to 838 and from 22,091 to 15,155 respectively, while the membership of individuals and others increased from 7,493 to 7,611. The paid-up share capital of the state co-operative banks at Rs. 23·18 crores as on June 30, 1963 showed an increase of Rs. 1·92 crores over the year. Of this increase Rs. 0·94 crore was accounted for by contribution by Government. The total working capital increased from Rs. 256·09 crores as on June 30, 1962 to Rs. 281·51 crores as on June 30, 1963, the increase in reserves, deposits and other borrowings being Rs. 1·17 crores, Rs. 15·87 crores and Rs. 6·45 crores respectively.

Position as on 30th June 1963 :

(Crores of rupees)

| Item | Amount |
|---|---|
| 1. Working capital | 281·51 |
| 2. Owned funds | 31·95 |
| 3. Deposits | 97·31 |
| 4. Borrowings from | |
| (i) Government | 10·08 |
| (ii) Reserve Bank | 138·87 |
| (iii) Other Sources | 3·30 |

The utilisation of resources of the apex banks as on June 30, 1964 revaeled that Rs. 27·45 crores (including call deposits of Rs. 13·91 crores) were in the form of cash and balances with banks, Rs. 50·23 crores represented investments (Rs. 30·84 crores in Government and Trustee Securities, Rs. 11·33 crores in fixed deposits, Rs. 8·06 crores in other investments, chiefly shares in other co-operative institutions) while outstanding loans accounted for Rs. 214·09 crores.

## CENTRAL CO-OPERATIVE BANKS

The number of central co-operative banks showed a further decline from 387 on June 30, 1962 to 386 on June 30, 1963. The reduction in number was accounted for by West Bengal (3) and Rajasthan (1) and was offset by an increase of two banks in Uttar Pradesh and one in Madras. The membership of the central co-operative banks stood at 3,99,299 consisting of 1,904 central societies, 2,52,963 primary societies and 1,44,432 individuals and others. The number of individual members showed a reduction of 3,327 when compared to that on June 30, 1962. The working capital of the central banks showed an increase from Rs. 352·65 crores as on June 30, 1962 to Rs. 400·12 crores as on June 30, 1963, representing an increase of 13·5 per cent.

Working Capital of Central Co-operative Banks as on June 30, 1963 :

(Crores of rupees)

| Item | Amount |
|---|---|
| 1. Working capital | 400·12 |
| 2. Owned funds | 72·28 |
| 3. Deposits | 145·64 |
| 4. Borrowings | 182·20 |

The total loans advanced by central co-operative banks during 1962-63 amounted to Rs. 440·56 crores as against Rs. 384·40 crores during 1961-62, the former comprising short and medium-term loans of Rs. 416·32 crores and Rs. 25·35 crores respectively. Among individual States, advances by central co-operative banks in Maharashtra were the highest at Rs. 116·54 crores, the advances by central banks in other states being Gujarat Rs. 76·08 crores, Madras Rs. 68·45 crores, Uttar Pradesh Rs. 41·81 crores, Andhra Pradesh Rs. 35·46 crores, Mysore Rs. 27·22 crores, Madhya Pradesh Rs. 23·62 crores and Punjab Rs. 16·29 crores.

The outstanding loans of central co-operative banks as on June 30, 1963 amounted to Rs. 292·13 crores of which Rs. 288·69 crores were due from societies and Rs. 3·44 crores from individuals and others. The total over dues amounted to Rs. 52·89 crores, constituting 18·1 per cent of the outstandings; the corresponding figures at the end of 1961-62 were Rs. 40·74 crores and 15·7 per cent respectively.

## AGRICULTURAL CREDIT SOCIETIES

The primary agricultural credit societies numbered 2,11,132 as on June 30, 1963 as against 2,15,081 at the end of June 30, 1962. Of these 65 per cent and 35 per cent were of the limited liability and unlimited liability type respectively. The number of dormant societies at the end of 1962-63 was 39,129 and constituted 18·5 per cent of the total number of societies as against 18·9 per cent an year ago.

The membership of agricultural credit societies was 217·34 lakhs at the end of 1962-63 as against 195·72 lakhs at the beginning of the year, representing a rise of 11·0 per cent. The rise in membership during the previous year was 14·9 per cent.

Of the total membership, 104·53 lakhs or 48 per cent borrowed during the year as against 51 per cent during 1961-62.

The working capital of primary agricultural credit societies as on June 30, 1963 amounted to Rs. 370·03 crores representing an increase of Rs. 44·70 crores over the previous year, the percentage of increase being 12·1 as against 18·8 during 1961-62. The paid-up share capital of these societies amounted to Rs. 79·51 crores, of which Rs. 8·01 crores were contributed by the State Governments in 13,476 societies. The total deposits of these societies were meagre at Rs. 20·33 crores forming 5·5 per cent of their working capital. Their total borrowings amounted to Rs. 248·10 crores of which as much as Rs. 236·43 crores were from central co-operative banks. Borrowings other than deposits formed about 67·05 per cent of the working capital. Owned funds constituted the balance of 27·45 per cent. On the assets side, the cash on hand and balances with banks amounted to Rs. 21·19 crores and investments to Rs. 49·95 crores, while loans and advances stood at Rs. 302·78 crores comprising short-term loans of Rs. 254·30 crores and medium-term loans of Rs. 48·48 crores.

Of the total number of societies, only 1,64,429 societies issued loans amounting to Rs. 257·37 crores of which Rs. 232·18 crores were short-term and Rs. 25·20 crores medium-term.

Their total recoveries during the year amounted to Rs. 210·95 crores while the overdues were of the order of Rs. 77·18 crores forming 25·5 per cent of the outstandings. The overdues showed an increase of Rs. 14·25 crores during the year and the proportion of overdues to outstanding also increased by one per cent.

The all-India averages of membership, share capital, deposits, working capital and loans advanced per member for agricultural credit societies are given in the following table :

(Amounts in Rs.)

| Item | 1962-63 |
|---|---|
| 1. Membership per society | 103 |
| 2. Working capital per society | 17,526 |
| 3. Share capital : | |
| (a) per society | 3,766 |
| (b) per member | 37 |
| 4. Deposits : | |
| (a) per society | 963 |
| (b) per member | 9 |
| 5. Loans advanced per borrowing member | 246 |

During 1962-63, 4,519 societies marketed agricultural produce of the value of Rs. 11·52 crores as against 4,185 societies which had marketed agricultural produce of the value of Rs. 10·15 crores in 1961-62. There were a few agricultural credit societies in Orissa, Delhi, Gujarat and Maharashtra which undertook processing also. In regard to distribution of requisites, the number of societies engaged in this work increased from 64,814 during 1961-62 to 75,769 during 1962-63 while the value of goods distributed by them increased from Rs. 39·13 crores to Rs. 51·25 crores. The value of seeds and fertilizers distributed showed a substantial increase from Rs. 5·87 crores and Rs. 19·23 crores to Rs. 6·03 crores and Rs. 25·52 crores respectively. The value of consumer articles distributed increased from Rs. 9·94 crores to Rs. 14·07 crores.

In terms of individual States Uttar Pradesh had the largest number of agricultural credit societies at 49,617, while Maharashtra came next with 19,794 societies; the number of such societies in Punjab, Bihar and Madhya Pradesh was 19,389, 18,943 and 17,950 respectively. The membership of these societies in Uttar Pradesh and Madras was 41·29 lakhs and 36·60 lakhs respectively. The average membership per society was the highest in Kerala at 452; it was 321 and 234 in Madras and Jammu and Kashmir respectively. The average amount of loans advanced per borrowing member during 1962-63 was Rs. 246.

The value of produce marketed by agricultural credit societies during 1962-63 in Gujarat, Maharashtra and Assam amounted to Rs. 3·85

crores, Rs. 2·73 crores and Rs. 1·30 crores respectively. The value of goods distributed amounted to Rs. 12·67 crores in Maharashtra, Rs. 9·62 crores in Gujarat and Rs. 9·13 crores in Uttar Pradesh, constituting 60 per cent of the value in all the States put together.

## LARGE-SIZED SOCIETIES

The number of large-sized societies recorded a further reduction from 7,822 as on June 30, 1962 to 7,719 as on June 30, 1963. The fall in number was mainly in Maharashtra from 1,262 to 1,232 ,Orissa from 580 to 556, Andhra Pradesh from 587 to 572, Gujarat from 1,013 to 1,003 and West Bengal from 500 to 491.

A table showing the comparative operations of large-sized and small-sized societies per society and per member during 1962-63, is given below.

(Amounts in rupees)

| Item | Large-sized Societies | Small-sized Societies |
|---|---|---|
| 1. Membership per society .. .. | 519 | 87 |
| 2. Working capital per society .. .. | 1,27,507 | 13,353 |
| 3. Share capital : | | |
| (*a*) per society .. | 29,801 | 2,778 |
| (*b*) per member.. | 57 | 32 |
| 4. Deposits : | | |
| (*a*) per society .. | 7,287 | 723 |
| (*b*) per member.. | 14 | 8 |
| 5. Loans advanced per borrowing member | 292 | 234 |

## GRAIN BANKS

The number of grain banks showed a fall from 9,190 as on June 30, 1962 to 9,083 as on June 30, 1963, the reduction being accounted for by Madhya Pradesh, Maharashtra and Mysore ; there was an increase in their number in Orissa and West Bengal. Their overall operations showed an increase. Their working capital which stood at Rs. 6·08 crores as on June 30, 1962 reached Rs. 7·00 crores as on June 30, 1963. The loans advanced by them during 1962-63 amounted to Rs. 3·08 crores as against Rs. 2·54 crores in the previous year. The loans advanced by Orissa during 1962-63 amounted to Rs. 2·52 crores. The 2,318 grain banks in the State had 6·41 lakh members, being even more than those of agricultural credit societies in the State viz. 5·53 lakhs. The overdues of all grain banks in the country and in Orissa as on June 30, 1963 were Rs. 2·43 crores and Rs. 1·43 crores forming 46 per cent and 37 per cent of the amount outstanding, respectively.

## NON-AGRICULTURAL CREDIT SOCIETIES

The non-agricultural credit societies consisting of urban banks and employees' credit societies which cater to the credit requirements of small traders, government servants, other salaried employees and other urban and semi-urban residents including artisans numbered 12,850 as on June 30, 1963 as against 12,477 at the end of the previous year. Their membership also showed an increase from 49·69 lakhs to 55·03 lakhs. The working capital of these institutions was of the order of Rs. 185·32 crores showing an increase of about Rs. 20·40 crores over the previous year. Their deposits at Rs. 115·39 crores, compared favourably with those of all the State and central co-operative banks in the country, which amounted to Rs. 97·31 crores and Rs. 145·64 crores respectively on the same date. The deposits of non-agricultural credit societies in Maharashtra, West Bengal, Gujarat and Madras amounted to Rs. 34·09 crores, Rs. 30·39 crores, Rs. 12·48 crores and Rs. 11·23 crores respectively. The loans advanced by these societies during 1962-63 amounted to Rs. 166·21 crores showing an increase of over Rs. 4·58 crores over the previous year.

## LAND MORTGAGE BANKS

**Central Land Mortgage Banks :** The number of central land mortgage banks increased from 17 to 19 over the year 1962-63. The Ajmer Central Land Mortgage Bank in Rajasthan was dormant. The membership of all central land mortgage banks as on June 30, 1963 consisted of 553 primary land mortgage banks, 177 other co-operative institutions and 3,71,901 individuals as against 500, 182 and 2,98,701 respectively at the end of 1961-62. Their share capital showed an increase from Rs. 5·73 crores to Rs. 7·81 crores. Their total borrowings as on June 30, 1963 amounted to Rs. 75·17 crores of which Rs. 68·19 crores were in the form of debentures as compared to Rs. 53·20 crores and Rs. 47·74 crores respectively as on June 30, 1962. Their working capital increased from Rs. 61·70 crores to Rs. 85·85 crores over the year 1962-63. Their cash and bank balances and total investments on June 30, 1963 amounted to Rs. 1·35 crores and Rs. 17·83 crores respectively, while the long-term loans outstanding to them stood at Rs. 67·89 crores. Their overdues on June 30, 1963 were Rs. 1·75 crores. These banks floated debentures of the value of Rs. 21·76 crores during 1962-63 of which Rs. 21·08 crores were actually subscribed to. Of the 19 central land mortgage banks in the country, 11 issued ordinary debentures worth Rs. 18·85 crores and eight issued rural debentures worth Rs. 2·23 crores during the year. The loans advanced by them during 1962-63 amounted to Rs. 24·62 crores against Rs. 14·75 crores during the previous year. During 1962-63 an amount of Rs. 13·36 crores was advanced for land improvement, Rs. 6·78 crores for purchase of machinery and Rs. 3·49 crores for redemption of debt.

**Primary Land Mortgage Banks :** The primary land mortgage banks increased in number from 536 as on June 30, 1962 to 571 as on June 30, 1963 (including the land mortgage banking sections of 15 central co-operative banks). Mysore, Andhra Pradesh and Madras accounted for 65 per cent of the total number of primary banks. The membership of the primary land mortgage banks showed an increase from 8·52 lakhs to 10·51 lakhs, while their working capital increased from Rs. 38·31 crores to Rs. 55·02 crores. The loans outstanding to these banks as on June 30, 1963 were Rs. 51·36 crores as against Rs. 35·28 crores in the previous year.

## AGRICULTURAL MARKETING AND PROCESSING SOCIETIES

**National and State Marketing Societies :** Besides the National Agricultural Marketing Federation with headquarters at Delhi, there were 21 state marketing societies consisting 19 general purpose marketing societies, one society for arecanut in Mysore and one for fruits and vegetables in Delhi. The state societies had 4,370 societies and 925 individuals and others as their members. Their working capital as on June 30, 1963 amounted to Rs. 14·27 crores consisting of Rs. 3·44 crores of owned funds, Rs. 0·35 crore of deposits and Rs. 10·48 crores of borrowings. The total value of agricultural produce sold by them both as owners and as agents was Rs. 9·38 crores as compared to Rs. 12·38 crores in 1961-62. These institutions also sold agricultural requisites of the value of Rs. 21·25 crores of which as much as Rs. 19·79 crores represented fertilizers.

**Central Societies :** These societies which were functioning at the district or regional level numbered 152 as on June 30, 1963. Of these four dealt in cotton, four in fruits and vegetables and 144 were of the general purpose type. Many of these societies, particularly in Madras, also functioned as wholesalers for the primary co-operative stores. Their sales of agricultural produce amounted to Rs. 6·48 crores, while the agricultural requisites were valued at Rs. 21·32 crores. The value of consumers' articles sold by them amounted to Rs. 4·7 crores only as against Rs. 8·40 crores in 1961-62.

**Primary Marketing Societies :** The total number of primary marketing societies in the country as on June 30, 1963 was 3,121 comprising 96 societies dealing in cotton, 214 in fruits and vegetables, 21 in arecanut, 14 in tobacco, 61 in coconut, 126 in other specialised commodities and 2,589 general purpose marketing societies. Their total membership was 16.17 lakhs. Their working capital as on June 30, 1963 was Rs. 35·40 crores consisting of Rs. 9·71 crores of share capital, Rs. 5·53 crores of reserve and other funds, Rs. 3·47 crores of deposits and Rs. 16·69 crores of borrowings. The total value of their purchases was Rs. 52·73 crores while their total sales amounted to Rs. 111·71 crores of which as much as Rs. 70·55 crores were agents. Agricultural produce accounted for Rs. 70·55 crores & agri. requisites Rs. 26·86 crores. Of the former, oilseeds (Rs. 5·94 crores), paddy (Rs. 12·84 crores), wheat (Rs. 6·17 crores), cotton (Rs. 4·21 crores) and other food grains (Rs. 10·13 crores) were prominent. During the year 1962-63 the marketing societies advanced loans to the tune of Rs. 2·99 crores to societies and Rs. 22·91 crores to individuals and others. Of the total, 1,641 marketing societies earned a profit of Rs. 1·16 crores and 1,049 societies incurred loss of Rs. 0·43 crore, while 431 societies worked without profit or loss. The marketing societies owned 2,417 godowns with an estimated capacity of 65·56 lakh quintals and two lakh cubic feet. They also hired 3,946 godowns.

**Sugarcane Supply Societies :** The number of sugarcane supply societies at the end of 1962-63 was 9,011 including one state society, 69 central societies and 8,941 primary societies. The state society was in Uttar Pradesh and all the central societies and 8,743 primary societies were in Bihar. The primary societies had a membership of 2,183 societies and 25·90 lakh individuals. The working capital of the state, central and primary societies stood at Rs. 0·46 crore, Rs. 0·94 crore and Rs. 11·33 crores respectively. The value of sugarcane marketed by the central and primary societies was Rs. 3·01 crores and Rs. 38·35 crores respectively. Of the latter amount, Rs. 33·38 crores represented sales by societies in Uttar Pradesh. The primary sugarcane supply societies also distributed agricultural requisites of the value of Rs. 4·73 crores both as agents and owners.

**Co-operative Sugar Factories :** The number of sugar co-operatives which stood at 66 at the end of 1962-63 was one less than the number at the end of the previous year. They had 10,803 societies, 1,98,561 growers and 16,955 others including individuals and institutions other than co-operative societies and Government as their members during 1962-63 as against 10,809, 1,78,236 and 11,771 respectively during the previous year. Their paid-up share capital was Rs. 21·51 crores, of which Governments' contribution was Rs. 8·57 crores as against Rs. 19·47 crores and Rs. 7·82 crores respectively in the previous year. Their borrowings at the end of 1962-63 were of the order of Rs. 42·47 crores, of which Rs. 11·26 crores were from co-operative banks, Rs. 3·30 crores from the State Bank of India, Rs. 20·67 crores from the Industrial Finance Corporation and Rs. 0·86 crore from Government. Their total working capital amounted to Rs. 77·10 crores as against Rs. 78·37 crores in the previous year. Among their assets, fixed assets were of the order of Rs. 57·13 crores and stocks of sugar were valued at Rs. 16·68 crores. The value of sugar produced by them was Rs. 47·80 crores during 1962-63 as against Rs. 44·93 crores in the previous year, while their sales of sugar during 1962-63 amounted to Rs. 64·98 crores as against Rs. 43·95 crores in 1961-62. Among the states, Maharashtra had the largest number of sugar co-operatives viz. 20 of which 17 were in production. The value of sugar produced by them was Rs. 29·82

crores, forming more than half of the total production by co-operative sugar factories in the country. While in Maharashtra 14 factories recovered loans to the tune of Rs. 4·55 crores advanced by 654 primary credit societies, in Gujarat one factory recovered loans to the extent of Rs. 0·11 crore advanced by 46 societies.

**Other Agricultural Processing Societies:** Other processing societies were mostly cotton ginning and pressing societies, oil crushing units and paddy husking societies. In the case of cotton ginning and pressing societies, all the 134 societies were primary societies. These societies had 4,455 societies and 66,346 individuals as members. They had a total working capital of Rs. 4·90 crores. Of these, 92 societies operated 93 ginning factories and gained 19·03 lakh quintals of cotton. 46 societies having 50 pressing units pressed 4·19 lakh bales during 1962-63. The quantity of cotton ginned and baled during 1961-62 was 19·16 lakh quintals and 4·49 lakh bales respectively. These societies sold cotton of the value of Rs. 11·08 crores, while their total sales of agricultural requisites amounted to Rs. 0·54 crore. They advanced Rs. 4·02 crores as loans and recovered Rs. 4·03 crores, in addition to recovering Rs. 0·08 crore of loans advanced by 32 agricultural credit societies. Of the total sales of Rs. 11·08 crores, sales valued at Rs. 10·46 crores were effected by the societies in Gujarat. Other agricultural processing societies are mainly grouped under five heads, (a) Paddy husking other than rice mills, (b) Rice mills, (c) Oil crushing, (d) Fruits and vegetables and (e) Others.

## OTHER NON-CREDIT SOCIETIES

**Agricultural Non-Credit Societies:** The number of joint farming societies was 3,101 as on June 30, 1963 as against 2,381 on June 30, 1962, while their total membership increased from 56,435 to 67,351. The number of members working full-time in field operations increased from 21,015 to 31,143, while those engaged in part-time field operations increased from 10,093 to 12,376. The area commanded by these societies was 4·37 lakh acres of which 3·25 lakh acres were under cultivation as compared to 3·65 lakh acres and 2·73 lakh acres respectively in 1961-62. The value of production showed an increase from Rs. 1·10 crores to Rs. 1·37 crores, while their sales also increased from Rs. 1·35 crores to Rs. 1·60 crores.

Over the year 1962-63, the collective farming societies increased in number from 1,196 to 1,411 while their membership rose from 40,904 to 46,488. The area commanded and brought under cultivation by them also increased from 1·97 lakh and 1·12 lakh acres to 2·46 lakh acres and 1·55 lakh acres respectively. The value of their production increased from Rs. 0·47 crore to Rs. 0·60 crore while their sales rose from Rs. 0·42 crore to Rs. 0·63 crore.

The number of irrigation societies showed a slight decrease from 1,469 to 1,466 while the area commanded by them increased from 2·73 lakh acres to 2·94 lakh acres. The area actually irrigated by them also slightly increased from 1·52 lakh acres to 1·53 lakh acres. The societies had Rs. 179·05 lakhs worth of irrigation works at the end of the year 1962-63.

The fisheries societies showed an all-round progress over the previous year. They numbered 2,729 as on June 30, 1963 with 2·79 lakh members as against 2,538 societies and 2·68 lakh members in 1961-62. They advanced loans to the extent of Rs. 63·91 lakhs. The value of their catch was Rs. 120·87 lakhs while their sales were of the order of Rs. 236·42 lakhs.

## INDUSTRIAL SOCIETIES

**Handloom Weavers' Co-operative Societies:** There were 20 apex weavers' societies, 114 central societies and 12,598 primary weavers' societies as on June 30, 1963. The apex societies had 6,910 societies and 1,571 individuals as members; the central societies had 3,509 societies and 4,343 individuals as members and the primary societies had 65 societies and 13·07 lakh individuals as members. The total working capital of the apex societies was Rs. 8·65 crores consisting of Rs. 1·18 crores of share capital Rs. 0·33 crore and Rs. 0·59 crore of reserve and other funds respectively and Rs. 6·55 crores of borrowings (of which Rs. 3·72 crores were from Government and Rs. 1·67 crores were from central financing agencies). The value of cloth purchased by them amounted to Rs. 7·43 crores while their sales were of the order of Rs. 11·69 crores.

The central weavers' societies had Rs. 1·53 crores of working capital of which as much as Rs. 0·94 crore were in the form of borrowings (Rs. 0·28 crore from Government and Rs. 0·40 crore from central financing agencies). The cloth produced by them was valued at Rs. 0·68 crore while their sales amounted to Rs. 1·89 crores.

The primary weavers' societies had Rs. 26·34 crores as working capital consisting of Rs. 4·99 crores of share capital, Rs. 3·61 crores and Rs. 3·17 crores of reserve and other funds respectively, and Rs. 14·57 crores of borrowings. Of the total borrowings, Rs. 5·69 crores were from Government and Rs. 5.68 crores were from the central financing agencies and Rs. 3·20 crores from others. The primary weavers' societies produced during 1962-63, cloth worth Rs. 45·80 crores and sold cloth valued at Rs. 48·67 crores. They had 1,580 sales depots, 60 pattern making factories and 623 dyehouses. The total number of looms under these societies was 12·96 lakhs, of which 7·65 lakhs were active.

**Other Industrial Societies:** There were 18 state, 96 central and 22,164 primary industrial societies as on June 30, 1963. The membership of the primary societies consisted of 2,401 societies and 10·98 lakh individuals. The working capital of the state, central and primary societies stood at Rs. 0·69 crore, Rs. 1·37 crores and Rs. 21·09 crores respectively. The value of production by the societies at the three levels was Rs. 0·02 crore, Rs. 0·29 crore and Rs. 13·54 crores respectively; their sales amounted to Rs. 1·61 crores, Rs. 2·31 crores and Rs. 14·61 crores respectively.

**Spinning Mills:** The total number of co-operative spinning mills as on June 30, 1963 was 30 with 7,378 societies and 10,609 individuals as members. These societies had a total working capital of Rs. 9·57 crores and the number of spindles under their fold was 2·73 lakhs. The value of yarn sold by them during 1962-63 amounted to Rs. 3·47 crores. Their fixed assets were of the order of Rs. 6·25 crores of which Rs. 4·06 crores represented the value of plant and machinery.

**Consumers' Stores:** The number of wholesale consumers' stores showed a rise from 32 to 100 during the year under review. The primary stores also showed an increase from 7,266 to 8,407. The primary stores had a net-work of 1,075 branches and had 16·06 lakh members. As on June 30, 1963, their paid-up share capital was Rs. 3·22 crores and reserve and other funds Rs. 3·60 crores; their borrowings amounted to Rs. 3·65 crores and the total working capital Rs. 10·47 crores. Their purchases and sales during the year 1962-63 amounted to Rs. 36·14 crores and Rs. 38·21 crores, respectively.

**Housing Societies:** There were six state and 8,903 primary housing societies at the end of 1962-63 with 2,664 and 5,23,026 members respectively. The working capital of state societies amounted to Rs. 14·14 crores of which borrowings accounted for Rs. 12·22 crores. The total working capital of primary societies amounted to Rs. 77·98 crores of which Rs. 60·34 crores were in the form of borrowings. The amount of loans outstanding to them was Rs. 24·09 crores, while the value of land and buildings owned by them was Rs. 54·94 crores. The number of independent houses and tenements constructed by these societies during 1962-63 was 9,382 and 9,108 valued at Rs. 8·24 crores and Rs. 5·16 crores respectively, while the number and value of houses constructed by members were 12,167 and Rs. 9·91 crores respectively.

## STATE PARTNERSHIP

The total State Govt. contribution as at the end of 1962-63 was Rs. 55·88 crores as against Rs. 47·50 crores at the end of the previous year. Of the total, Rs. 35·46 crores were contributed to credit institutions and Rs. 20·42 crores to non-credit institutions. Table No. 7 shows the participation by Government in the share capital of various types of societies.

## CO-OPERATIVE UNIONS AND INSTITUTES

At the end of 1962-63, there were one national union, 19 state unions and 200 divisional, district and sub-divisional unions and institutes. The state and central unions had 50,373 and 42,545 societies affiliated to them respectively. The state unions imparted training during the year to 10,574 members of staff of co-operative institutions, 71,634 honorary office-bearers and 6,15,465 members, while the central unions trained 4,962, 19,656 and 1,74,486 persons of the above categories respectively. The state unions had 864 teaching and propaganda staff while the central unions had 271 of such staff. The state unions and central unions received Rs. 96·34 lakhs and Rs. 5·54 lakhs as Government grants respectively.

## GENERAL INSURANCE SOCIETIES

The number of these societies continued to be six while their membership increased to 10,195. Their income by way of premia (less reinsurance paid) amounted to Rs. 73·99 lakhs as against Rs. 46·95 lakhs in 1961-62. They paid claims of the value of Rs. 19·11 lakhs during 1962-63 as against Rs. 13·22 lakhs in 1961-62.

## SOCIETIES UNDER LIQUIDATION

The number of societies under liquidation a the beginning of the year was 22,034 of which 15,731 were pending for two years and more, 5,223 societies were brought under liquidation during the year while liquidation proceedings were finalised in respect of 2,524 societies leaving 24,733 societies under liquidation at the end of the year. The assets realised and the liabilities paid off during the year were Rs. 68·51 lakhs and Rs. 80·27 lakhs respectively. The total liabilities and assets of societies under liquidation at the end of the year were Rs. 11·43 crores and Rs. 9·51 crores respectively.

## PROFIT AND LOSS OF CO-OPERATIVES

See Table 2 for details.

## FIVE YEAR PLANS

For development of co-operation in the country, the estimated expenditure during the Second Plan period was Rs. 34 crores as against Rs. 7·11 crores during the First Plan period.

The Third Plan provides Rs. 80 crores for the development of co-operation and contains specific programmes for co-operative credit and supplies, marketing and processing, consumer co-operatives and industrial and other co-operatives.

In the next five years, the number of primary agricultural credit societies is expected to increase to 2,30,000 and membership to 37 million, covering about 60 per cent of the agricultural population.

The total amount of short and medium term credit is expected to be of the order of Rs. 530 crores and that of long term, Rs. 150 crores by 1965-66.

The share capital of primary co-operative societies is expected to increase from Rs. 42 crores in 1959-60 to Rs. 85 crores in 1965-66. In addition, the deposits of primary co-operatives are expected to rise from Rs. 12 crores to about Rs. 42 crores and the deposits in the Apex banks, from Rs. 60 crores to Rs. 142 crores by 1965-66.

## TABLE 1. FIGURES AT A GLANCE (1962-63)

Amount in lakhs of rupees

| Type of society | Number | Membership (in thousands) | Working capital | Loans advanced | Value of goods | |
|---|---|---|---|---|---|---|
| | | | | | Received or produced | Sold |
| I. ALL SOCIETIES | 3,46,174 | 4,27,95 | 17,69,04 | 4,95,39[1] | 3,43,36 | 5,67,75 |
| II. Credit Societies | | | | | | |
| (A) SHORT-TERM[2] | | | | | | |
| 1. State Co-operative Banks | 21 | 24 | 2,81,51 | 2,94,82 | — | — |
| 2. Central Co-operative Banks | 386 | 3,99 | 4,00,12 | 4,40,56 | — | — |
| 3. Primary Credit Societies | | | | | | |
| (a) Agricultural | 2,11,132 | 2,17,35 | 3,70,03 | 2,57,37 | 55,12 | 62,77 |
| (b) Grain Banks | 9,083 | 12,83 | 7,00 | 3,08 | — | — |
| (c) Non-agricultural | 12,850 | 55,03 | 1,85,32 | 1,66,21 | 4,20 | 4,50 |
| (B) LONG-TERM | | | | | | |

# GOVERNMENT INDUSTRIAL UNDERTAKINGS

**IN the following pages we give short notes on Government industrial undertakings.**

The return on a total investment of Rs. 1,573·59 crores in 52 Government companies in 1963-64 was Rs. 26·27 crores (1·67 per cent of the investment).

During 1963-64, the paid-up capital of the 52 Government companies increased to Rs. 912·88 crores from Rs. 743·28 crores and the loans taken from the Government to Rs. 628·40 crores from Rs. 526·77 crores.

A committee on the Public Undertakings, which include 10 members of the Lok Sabha and five of the Rajya Sabha has been constituted and started functioning from May 1, 1964.

The functions of the Committee is to examine reports and accounts of public undertakings, which are established by the Central Acts or the Government companies. It will examine, in the context of autonomy and efficiency of the Undertakings, whether their affairs are being managed in accordance with sound business principles and prudent commercial practices.

## ASHOKA HOTEL

50-B, Chanakyapuri, New Delhi.

*Telegram and Cables:* "Ashoka Hotel". *Telephone:* 70311 (40 lines).

The largest luxury hotel in India. It is fully airconditioned and has private swimming pool, refrigerator, telephone and bath for every room.

When started: October 30, 1956. Total cost: Rs. 2·78 crores. Expenditure as on March 31, 1964: Rs. 82·30 lakhs. Income as on March 31, 1964; Rs. 118·31 lakhs. Net profit Rs. 36·01 lakhs; No. of rooms 349; No. of beds 450. The highest and lowest charge per day: Rs. 250 to Rs. 50. Total no. of persons who stayed from April 1963 to March 1964: 1,47,166.

The average daily occupancy during 1963-64 has been 402 persons as against 369 during 1962-63. The Hotel's loan liability has been reduced to Rs. 27 lakhs at end of March 1964 as against Rs. 32 lakhs at end of March 1963.

*Board of Directors:* S. Ratnam (*Chairman*); C. P. Gupta; S. N. Chib; D. J. Maden; H. H. Maharani Yasho Rajya Lakshmi of Jammu and Kashmir; K. L. Hathi; M. R. Dhawan; Yuvaraj Maharajkumar Shri Shatrushalyasinhji of Nawanagar. *Manager:* George Verghese.

## ATOMIC REACTORS

(Trombay, Bombay 71)

APSARA, the first reactor in Asia outside the USSR, attained criticality on August 4, 1956. It is a pool type reactor and was designed, engineered and built entirely by the engineers and scientists except for the enriched uranium fuel elements, which were provided by the United Kingdom Atomic Energy Authority under an agreement. It operates at a maximum power level of 1 MW.

The reactor has been designed to provide experimental facilities for various investigations and has proved itself to be invaluable for training personnel in reactor technology and fundamental research in neutron physics, engineering and biology.

The reactor has been used for the production of isotopes, irradiation of biological samples and testing of various types of reactor and health physics instruments as well as for fundamental research.

The first fuel charge was removed from the reactor in Dec. 1964, since it had attained its maximum burn-up. Complete maintenance of the various reactor components and repairs to the reactor pool were carried out in the first quarter of 1965 before loading the reactor with the second charge of enriched uranium fuel elements.

Several improvements have been incorporated in the cooling and control systems. A polishing circuit has been added to increase the purity of the pool water while the visual clarity of the water is ensured by special microfilters. Ion chambers of the most recent type fabricated at Trombay have been installed for reactor control.

Apsara completed 8½ years of operation in December 1964, with a record in power output of 2·23 million kilowatt hours during 1964. The total power output since date of first criticality is 10·09 million kilowatt hours.

THE CANADA-INDIA REACTOR (C.I.R.) is India's second reactor, built as a joint Indo-Canadian project under the Colombo Plan. Work on this project was taken up in February 1956 and the reactor attained criticality on July 10, 1960. The total cost of the project is approximately Rs. 10 crores, being shared in roughly equal proportions by the two countries.

CIR is a natural uranium-filled, heavy water moderated and light water cooled high flux research reactor with a thermal power of 40MW. The reactor is used for basic research in physics, chemistry, metallurgy and reactor technology, for the production of large quantities of high activity radioisotopes, and for the training of personnel for future reactor programmes.

CIR at its full power of 40 MW is one of the most powerful radioisotope producers in the world.

ZERLINA is India's third reactor. It is a zero energy reactor for lattice investigations and new assemblies. The reactor reached criticality on Jan. 14, 1961. It has been designed and built by Indian scientists and engineers of the Trombay establishment. It is designed to operate at a maximum power level of 100 watts, and is primarily meant for carrying out studies relating to new fuel configuration. It also provides flexibility for changing system components and experimental facilities.

Trombay scientists and engineers have also designed, built and commissioned a number of complex production plants. Some of them are as given below:

*Fuel Element Fabrication Facility:* This Facility, the first of its kind in Asia outside USSR and one of the half-a-dozen in the world, was designed and built entirely by Indian engineers and metallurgists. It went into operation in June 1959. The entire charge of fuel elements used for CIR and for Zerlina was fabricated here. The present capacity of this plant is about 30 to 40 tonnes of fuel elements per year.

*Graphite Shop:* A medium sized machine shop with special purpose machines for machining of nuclear purity graphite has been functioning at Trombay. This shop has undertaken during the course of the last few years the machining of over 300 tons of graphite required for the three reactors *viz.* the Apsara, the CIR and the Zerlina besides numerous other works such as graphite moulds, crucibles and other components required by the various Divisions of the Trombay Establishment for their research and development work.

*Central Workshop:* A manufacturing facility for the production of specialized equipment and apparatus required for the country's nuclear research and development programme is being set up at Trombay at an estimated cost of Rs. 2·3 crores. The routine work load on these shops is expected to be over Rs. 50 lakhs a year, excluding major projects and large scale fabrication of prototype equipment and experimental set-ups likely to be referred to these shops. This, over a period of years, will not only save large amounts of foreign exchange but also expedite development work in a fairly big way.

*Radiochemistry Laboratory:* This laboratory was commissioned in 1957 to train chemists in the handling of highly radioactive substances. It is equipped with the most modern facilities for handling plutonium and other highly radioactive elements. Here, the chemistry of actinide elements is studied. Research on various aspects of the fission of heavy elements is being carried out using radiochemical techniques. Fission product isotopes are being supplied to various customers. A large number of scientists from the establishment as well as outside institutions including from outside India have been trained in radiochemical techniques.

*Isotope Laboratory:* This Laboratory which was set up at its present site at Trombay in 1960, is responsible for the production and processing of radioisotopes like iodine-131, phosphorus-32, chromium-51, iron-59 etc. The laboratory has also facilities for the production of radiopharmaceuticals required for diagnostic purposes in nuclear medicine, and for the production of organic compounds labelled with carbon-14 and tritium. Facilities have been provided for the fabrication of multicurie sealed radiation sources of cobalt-60 and irridium-192 required for industrial use and also for development work connected with the applications of radioisotopes to industrial problems such as gamma radiography, siltation studies, etc.

*Electronic Instruments:* The Electronics Group of the Trombay Establishment has so far designed, developed and fabricated more than 75 different types of instruments such as portable G.M. counters, scalers, amplifiers, ratemeters oscilloscopes, analogue computers, and industrial instruments like thickness gauges, strain gauge pH meters, and so on. Diverse types of instruments for radiation health monitoring, survey and protection are also being fabricated for use in the Trombay Establishment, in other institutions using radiation sources and in the Tarapur Atomic Power Station.

*Plutonium Plant:* The irradiated fuel contains a small amount of plutonium, a valuable nuclear material along with a large quantity of radioactive fission products. Investigations have been conducted on the separation of plutonium from the irradiated fuel. A plant has been built at Trombay for treating primarily the natural uranium fuel rods irradiated in the Canada India Reactor for recovering plutonium from them. The plant was commissioned for trial operation in April 1964 and highly irradiated fuel was fed to the plant in August 1964. The plant was formally inaugurated by the Prime Minister on January 22, 1965.

An auxiliary plant has been built that will reduce considerable quantity of the radioactive waste resulting from the plutonium Plant to a small bulk so that it can be stored in underground tanks.

All parts of the Plutonium Plant complex are in continuous operation at present.

*Uranium Ore Mill:* A uranium mill with a capacity to treat 1,000 tonnes of uranium ore per day is being set up in Jadugoda area in Bihar. The process to be employed has been developed in the Atomic Energy Establishment laboratories at Trombay. The mill, estimated to cost Rs. 7 crores, is expected to go into operation in 1965.

*Uranium Metal Plant:* This plant, designed and built entirely by the Establishment's personnel, was commissioned in January 1959. It has an annual capacity of about 30 tonnes of nuclear grade Uranium. A process for the production of ceramic grade uranium dioxide has been successfully developed on the basis of which design of a 200 tonnes uranium oxide plant has been completed.

*Heavy Water Reconcentration Plant:* The plant designed entirely by Indian engineers for the reconcentration of down-graded heavy water had been completed and has been operating continuously since early part of 1962.

A small-scale electrolyser assembly for reconcentration of down-graded heavy water has

also been developed and designed by Indian engineers and has been taken into operation.

A pilot plant for producing enriched Boron-10 used in neutron counters has been designed, fabricated and installed at Trombay. The plant has been operating continuously since the middle of 1964.

*Heavy Water Plant :* The first Heavy Water Plant in Asia designed to produce 15 tonnes of heavy water annually in conjunction with the Fertilizer Corporation of India's Nangal Unit went into operation and has started producing nuclear grade heavy water since Dec. 1962. This plant has been operating continuously without any break.

**Industrial Operations**

With the object of exploiting fully the indigenous raw materials for the speedy and successful implementation of its programme, the Commission has already set up a number of plants, while others are in the process of being set up. They are :

*Rare Earth Plant :* This plant which was set up in 1952 at Alwaye is now owned by the Government of India. Its capacity for processing 1,800 tons of monazite has been increased to 3,000 tons annually. It produces rare earths (chiefly cerium) compounds and a cake containing thorium and uranium. Trisodium phosphate, a detergent, obtained as a by-product, has a good market. The rare earths compounds (mixed rare earths chloride, carbonate and hydroxide) are sold in the world market. Small amounts of naphthenate, fluoride and oxide of cerium are also produced.

A plant, for the manufacture of Cerium Fluoride, has been designed and erected by the Company at Alwaye. The plant is now on trial runs and is likely to be in regular production by June 1965.

This plant would be able to meet the country's entire requirement of rare earths fluoride for the manufacture of arc carbons.

*Thorium Plant :* This plant, built entirely by Indian scientists and engineers for processing the thorium concentrates from the Rare-Earths Plant at Alwaye, went into production at Trombay in September 1955. Its capacity was increased six fold in 1958. The plant is one of the largest in the world for the production of thorium nitrate. Besides supplying virtually the entire requirements of the gas mantle industry in India, it also supplies markets in Europe and America, helping India to save foreign exchange to the tune of Rs. 219 lakhs (upto 31st March 1964). It also produces nuclear grade thorium oxide which is being used by Canada-India Reactor for the production of uranium-233.

*Minerals Division, Quilon :* Recently, the Company has taken over the assets of Travancore Minerals Ltd., Quilon, which has gone into liquidation on 27th January 1965. The company has taken over the operation of the mineral sands industry which was being run by Travancore Minerals Ltd.

## BHARAT EARTH MOVERS LTD.

**Hindustan Aircraft Post, Bangalore-17.**

Bharat Earth Movers Limited was registered as a company in the public sector, under the Ministry of Defence, Department of Defence Production on May 11, 1964 with an authorised capital of Rs. 7·5 crores.

The company has been formed in technical collaboration with Messrs. Le Tournean-Westinghouse Company of U.S.A. for the indigenous manufacture of various types of heavy earth moving equipment for India's border roads, river valleys, irrigation and mining projects.

The erstwhile railcoach division of Hindustan Aeronautics Limited which has a strength of 3,600 employees, has been merged with this company on Jan. 1, 1965 as a distinct division. The railcoach division turns out its installed capacity of 25 broad gauge integral rail coaches per month.

In its Earth Movers Division, the company will manufacture heavy motorised scrapers, rear dumps, rubber tyred tractors, crawler tractor drawn scrapers, haulpaks, motor graders and cranes.

The company has the sole distribution rights in India, Nepal and Bhutan, of the complete range of Earth Moving Equipment manufactured by Messrs. Le Tournean Westinghouse Company, U.S.A.

*Board of Directors : Chairman :* M. M. Philip, I.C.S. (Retired) ; *Members :* S. Jayasanker, M. K. Hariharan, R. B. Vaghaiwalla, I.C.S., P. Sahai, A. R. Venkataraman, Maj.-Gen. R. A. Loomba, K. Balachandran, I.C.S., Brig. P. R. Kumar, (*Managing Director*).

## BHARAT ELECTRONICS LTD.

(Jalahalli P.O., Bangalore 13)

Under the Ministry of Defence)

Bharat Electronics Limited was registered as a company with an authorised capital of Rs. 10 crores in April 1954 with the object of making the country self-sufficient in electronic equipment including Radar. The paid-up capital is Rs. 5·2125 crores. Actual production started in 1956 in a small way with two items in the production line—a General Purpose Communication Receiver and a Medium Power Transmitter. Since then production has been progressively diversified and expanded and the total number of electronic equipment including Measuring and Test instruments produced or under production is now of the order of about seventy.

Various types of HF and VHF equipment are now in the production line of the factory. These include :

*A. F. Equipment :* Preamplifiers ; General Purpose Amplifiers ; 10 Watts and 40 watts Monitoring Amplifiers ; Equalised and output Regulated Line Amplifiers ; Engineer's Consoles ; Console and Portable Tape Recorders ; Tape Playback Decks ; Belhaler.

*H. F. Equipment :* Communication Receivers for A.M., S.S.B., I.S.B., F.S.K., etc. ; Diversity Receiving equipment ; H.F. Transmitters, Receivers and Transreceivers for mobile and static use ; Low Power S.S.B. Transmitters/Receivers ; 80 watts, 500 watts and 2·5 k.w. Navigational Beacon Transmitters ; 400 watts H. F. Transmitters ; 1·kw, 10 kw and 20 kw M. W. Broadcast Transmitters ; 1 kw and 5 kw S.S.B. Communication Transmitters ; 2 kw and 20 kw I.S.B. Communication Transmitters ; Direction Finding Receivers/Radio Compass.

*V. H. F. Equipment :* 400 Milliwatt and 750 Milliwatt F. M. Manpack Transreceivers ; 20 watts (Mobile) and 50 watts (Static) F. M. Transreceivers ; Single, Twin and Ten channel V.H.F. Airborne A.M. Transreceivers ; V.H.F., A.M. Transmitters/Receivers for air to ground communication V.H.F., A.M., Tone Signalling equipment ; V.H.F., F.M., Multichannel Equipment of different types ; Balloon-borne Transmitters " BELWIN " for Meterological use.

*Measuring Instruments and other Equipment :* Vacuum Tube Voltmeters ; A. F. Oscillators ; Audio and R. F. Output Power Meters ; Cathode Ray Oscilloscopes ; Harmonic Generators ; Ultrasonic Flaw Detectors ; Faraday Cages ; Clinical Audiometers for the medical profession ; RADARS.

*Components :* Piezo Electric Crystals ; Radio Receiving Valves ; Mica and Ceramic Capacitors ; Germanium Diodes ; Transistors.

During 1964-65 about 10 million components including Valves, Transistors, Crystals, Semiconductors etc., were manufactured.

The total foreign exchange saved by the Company is nearly Rs. 11·85 crores upto 1964-65. The present strength of the employees is 4,825. The production rose from Rs. 302·74 lakhs in 1963-64 to Rs. 707·97 in 1964-65.

*Chairman, Board of Directors :* Dr. S. Bhagavantam (Scientific Adviser, Ministry of Defence).

*Board of Management :* B. V. Baliga (Managing Director) ; A. Rangaswami (Controller of Finance) ; C. B. Cariapa (Deputy General Manager) ; C. R. Subramanian (Dy. General Manager, Components).

## BHARAT HEAVY ELECTRICALS LTD.

(A Govt. of India Undertaking)

*Regd. Office :* 5, Parliament Street, New Delhi-1.

Authorised capital : Rs. 40 crores. The company has under it the following four units :— (1) Ranipur Unit, Hardwar (U.P.) ; (2) Ramachandrapuram Unit, Hyderabad ; (3) Tiruverumbur Unit, Tiruchirapalli (Madras) ; (4) Switchgear Unit, Hyderabad.

The Tiruverumbur Unit of the company has started production and was inaugurated on May 1, 1965.

The Ranipur Unit is designed to produce 1·5 million kW of steam turbines and turbo-alternators, 1·2 million kW of hydro turbines and generators and 0·5 million kW of medium and large sized AC and DC motors. The total annual production at the ultimate capacity of the plant will be of the order of about Rs. 40 crores. The factory is proposed to be commissioned in stages starting towards the latter part of 1965.

The Ramachandrapuram Unit is designed to manufacture steam turbines, turbo-alternators and certain power station auxiliaries like condensate pumps, feed water pumps and circulating water pumps. The output capacity planned is about 800 MW, comprising mainly of unit sizes of 55 MW and 100 MW. The full output from this plant is expected in 1972-73, but it is proposed to commission this factory also in stages, starting from about the last quarter of 1965.

Tiruverumbur Unit will manufacture high pressure boilers complete with mills, high pressure fittings and valves. The output in the first stage of development will be sufficient to match a power generating capacity of 7,50,000 kW. It is proposed to further enlarge the scope of this Plant in the Fourth Plan period upto a production equivalent of 2,000 MW of generating capacity.

The Switch Gear Unit is designed to manufacture air blast circuit breakers in collaboration with a Swedish firm.

*Board of Directors :* K. B. Mathur (*Chairman*) ; K. M. Chinnappa, K. L. Ghei, O. N. Misra, B. D. Sanwal, M. Aswath, P. P. Khanna (*Secretary*).

## BOKARO STEEL LTD.

C/o Hindustan Steel Ltd.,

P.O. Hinoo, Ranchi.

The Union Government is setting up another steel plant in the public sector at Bokaro.

A public sector company known as Bokaro Steel Ltd. for setting up the Bokaro steel plant was registered at New Delhi on January 29, 1964. This company will have a share capital of Rs. 100 crores.

An agreement was signed on 25th January, 1965 between the Government of India and the Government of the USSR for co-operation in the construction of an integrated iron and steel works at Bokaro.

The agreement provides for the construction of a modern steel works at Bokaro with a capacity of 1·5 to 2 million tonnes with provision for expansion to 4 million tonnes. This will be the fourth steelworks in the public sector.

The Government of the U.S.S.R. are extending a credit upto 190 million roubles (Rs. 100·5 crores) for the purpose of meeting the foreign exchange cost of the plant. It bears an interest of 2·5 per cent and is repayable in twelve years.

The agreement envisages that Bokaro, as Bhilai, will be Indian built, with such assistance of Soviet specialists as the Indian organisations may require for the construction, erection and commissioning of the plant. It also envisages that the Soviet organisations will assist in

the training of Indian specialists and workers both in the USSR and in India.

The Soviet organisations are to prepare within nine (1965) months a detailed project report for the construction of Bokaro. The detailed Project Report will be for a 4 million tonnes plant.

Bokaro will produce hot and cold rolled strip and sheet and galvanised sheet. These are products in which there is acute shortage today. The mill complex consists of a 1,250 mm Slabbing mill, capable of rolling ingots over 30 tonnes and 2,000 mm wide Continuous Hot and Cold Rolling Mills. Steel is to be made by the basic oxygen converter process. Iron is to be made in 2,000 cu.m. furnaces which will be among the largest in Asia. It is also envisaged that the plant will incorporate the latest technological developments in steel production and a large scale use of automation.

According to the agreement, the Soviet orgaisations are to supply such equipment as are not available in India, during the period 1966 to 1969. The commissioning of the plant early in 1970 will contribute in a significant manner towards meeting the capacity target of 16·5 million tonnes set for the steel industry in the Fourth Plan period for the development of the Indian economy.

*Board of Directors :*—N. N. Wanchoo (*Chairman*); K. M. George (*Mg. Director*); K. L. Ghei; N. M. Wagle; K. Sreenivasan; Dr. A. K. Bose; T. P. Singh; G. D. Khandelwal.

## CHITTARANJAN LOCOMOTIVE WORKS

(Chittaranjan, Burdwan Dt., West Bengal)

Branch Office : Hindustan Buildings, 4, Chittaranjan Avenue, Calcutta 13)

*General Manager :* D. V. Reddy.

**The works are under the Ministry of Railways.**

Construction started in March 1948 and was completed on September 30, 1952. Production started on January 26, 1950. The first locomotive rolled out on November 1, 1950. The total estimated cost is Rs. 14·93 crores. The present capital cost at charge is Rs. 20 crores.

The total number of workshop staff (under Factory Act), 5,234; apprentices, 500. The total strength of the organization 11,120 (corrected upto Dec. 1964).

**The production schedule has been as follows:**

Rs. lakhs.

| Year | No. of locomotives | Cost per locomotive |
|---|---|---|
| 1950-51.. .. .. | 7 | 7·13 |
| 1951-52.. .. .. | 17 | 7·47 |
| 1952-53.. .. .. | 33 | 7·94 |
| 1953-54.. .. .. | 64 | 6·05 |
| 1954-55.. .. .. | 98 | 5·33 |
| 1955-56.. .. .. | 129 | 4·05 |
| 1956-57.. .. .. | 156 | 4·07 |
| 1957-58.. .. .. | 164 | 4·09 |
| 1958-59.. .. .. | 165 | 4·09 |
| 1959-60.. .. .. | 173 | 4·10 |
| 1960-61.. .. .. | 173 | 4·06 |
| 1961-62.. .. .. | 176 | 4·13 |
| 1962-63.. .. .. | 183 | 4·31 |
| 1963-64.. .. .. | 176 | 4·30 |

At present the value of imported contents in respect of W. G. locomotive is only 1·9 per cent.

A steel foundry with an estimated cost of Rs. 6·31 crores and annual capacity of 10,000 tonnes of finished castings per year started production towards the end of Nov. 1963.

With a view to conserving foreign exchange, a Galvanizing Plant at a cost of Rs. 14·57 lakhs was set up at Chittaranjan for galvanising the steel masts of the Railway Electrification Project.

Plans are under way for the manufacture of the traction equipment such as traction motors, rectifiers and axle boxes required for the electric locomotives and also for the manufacture of broad gauge diesel shunters and narrow gauge diesel locomotives.

## ENGINEERS INDIA PRIVATE LIMITED

C/o., Ministry of Petroleum & Chemicals, New Delhi.

The Government of India and the Bechtel International Corporation of San Franscisco, U.S.A. have jointly formed an engineering company known as Engineers India (Private) Limited.

The company will provide technical and other services in the development of petroleum, petrochemical and other industrial programmes in India.

The company will employ engineers from India and the U.S.A.

## THE FERTILIZERS AND CHEMICALS, TRAVANCORE LTD.

P.O. Udyogamandal, Alwaye, Kerala State.

The Fertilisers and Chemicals, Travancore Ltd. popularly known as FACT, started production in 1947. It was the first unit to manufacture ammonium sulphate on a commercially large scale in India. In addition to ammonium sulphate, the Company has a variety of other products like ammonium phosphate, superphosphate, ammonium chloride, sulphuric acid, anhydrous ammonia and liquid sulphur dioxide At present FACT has an annual production capacity of 100,000 tons of ammonium sulphate, 8,000 tons of ammonium chloride, 35,000 tons of ammonium phosphate, 44,000 tons of superphosphate, 100,000 tons of sulphuric acid and 3,500 tons of liquid sulphur dioxide.

The first and second stages of expansion programme involving respectively Rs. 30 million and Rs. 20 million have been completed. The second stage expansion which was completed in 1962, inaugurated the new oil gasification complex, the like of which was introduced for the first time in India. The Company is at present engaged in putting through a third stage expansion programme involving an investment of Rs. 120 million which aims at more than doubling the production capacity. This programme includes the installation of another oil gasification plant and a Tonnage Oxygen plant to enable the production of an additional 140 tonnes of ammonia per day. In addition, a 450-ton sulphuric acid plant, a 300-ton ammonium phosphate plant, a 100-ton phosphoric acid plant, a 50-ton ammonium chloride plant and a 300-ton ammonium sulphate plant based on the utilisation of by-product gypsum, are also being installed. The end-product pattern on completion of the third stage expansion which is expected to be completed by 1965, will be as follows :—

Ammonium sulphate 200,000 tons; Ammonium phosphate 135.000 tons; Ammonium chloride 25,000 tons; Superphosphate 44,.000 tons; Sulphuric Acid 250.000 tons; Fertiliser Mixtures (NPK) 350,000 tons.

To meet the fertiliser requirements of Kerala, Madras and other States in South India, FACT has organised a well-knit distribution system. In Kerala alone the Company has more than 2.000 selling points. For encouraging the use of balanced fertilisers, FACT is doing intensive field publicity and extension work. Today it manufactures over 20 grades of NPK mixtures to suit the needs of different types of soils as well as the numerous varieties of crops.

Lately, the Company has been taking a leading role in the manufacture of plant and equipment required for the chemical, petrochemical, petroleum refining and fertiliser industries, and in this connection it has already entered into negotiations with Messrs. Davy-Ashmore Ltd., UK for the construction of a highly specialised fabrication shop capable of manufacturing medium pressure vessels, heat exchangers and stainless steel equipment.

The Company has also built up a competent design and engineering organisation which will be expanded further to take up the work entrusted by the Government of India for the planning, designing and construction of three complete fertiliser factories in South India during the Fourth Five Year Plan period.

*Managing Director :* M. K. K. Nayar.

## FERTILIZER CORPORATION OF INDIA LTD.

F-43, South Extension Area, Part I, Ring Road, New Delhi-3.

(Under the Ministry of Petroleum and Chemicals)

The Fertilizer Corporation of India was formed on January 1, 1961, integrating the fertilizer units in the public sector and bringing them under a unified control. This was done in order to secure co-ordination in policy and ensure efficient and economic expansion and working of fertilizer factories in the public sector.

The constituent units of the Corporation now are the two operating fertiliser factories at Sindri in Bihar, Nangal in Punjab and four projects under implementation at Trombay in Maharashtra, Namrup (Assam), Gorakhpur (U.P.) and Durgapur, (West Bengal). Korba in M.P. is likely to be taken up shortly (May 1965).

The Corporation has an authorized capital of Rs. 75 crores and issued and subscribed capital of Rs. 48,05,14,000.

With the completion of all the aforesaid projects, the Fertilizer Corporation in another three years will have developed an overall production capacity of 6,37,000 tonnes of nitrogen and 1,53,500 tonnes of Phosphate per year.

The Third Five-Year Plan has set a target of one million tons of nitrogen and 4 lakh tons of phosphate to be achieved at the end of the Plan period. These targets are proposed to be raised to two million tons of nitrogen, one million tons of phosphate and 0·35 million tons of potash by the end of the Fourth Plan.

The Corporation's operating factories have so far produced over 55½ lakh tonnes of various types of nitrogenous fertilizers valued at over Rs. 166 crores. These fertilizers have gone to different parts of the country to make a very substantial contribution towards increasing agricultural production.

The Rourkela Fertilizer Factory, which was managed by the Corporation on behalf of Messrs. Hindustan Steel Ltd., has been handed back to them with effect from May 1, 1964.

### Sindri Unit

Sindri, the first largest fertilizer factory in India, was originally planned to produce 355,000 tons of Ammonium Sulphate per year and it went into production in 1951. Since then, Sindri's nitrogen capacity has been augmented to the extent of 121,920 tons of Double Salt (Ammonium Sulphate-Nitrate) and 23,470 tons of Urea annually. The expansion plants were brought to production in 1959.

Sindri thus produces three types of nitrogenous fertilizers, Ammonium Sulphate, Ammonium Sulphate-Nitrate and Urea. Ammonium Sulphate has 21 per cent of nitrogen while Ammonium Sulphate-Nitrate has 26 per cent and Urea 46 per cent of nitrogen.

*Plants :* The main group of plants for the production of ammonium sulphate are the Coke Oven Plant, the Gas Plant, the Ammonia Synthesis Plant and the Sulphate Plant.

The Coke Oven Plant has been designed to produce 600 tons of coke per day and various by-products of industrial importance.

The Gas Plant produces a gas mixture for ammonia synthesis after necessary purification and is capable of producing 33 mil. c.ft. of raw gas per day.

The Ammonia Synthesis Plant, is designed to produce 270 tons of ammonia per day.

In the Sulphate Plant, finely ground gypsum is mixed with the solution of ammonium carbonate and the resultant chemical reaction

produces ammonium sulphate which is crystallised and separated. The fertilizer is then either sent for storage in the silo or to the bagging plant.

The factory has also a power plant with a capacity of 80,000 Kw. to provide it with electricity and process steam.

The requirements of main raw materials for the production of 974 tons a day of fertilizer are 1,600 tons of gypsum and 600 tons of coke per day.

The Expansion Plants to produce two new types of fertilizer, utilising the coke oven gas, consist mainly of a Gas Reformation Plant, Double Salt Plant and Urea Plant.

The Double Salt Plant has two sections, the Nitric Acid Plant, producing 225 metric tons of 53 per cent nitric acid and the Double Salt Section, producing ammonium sulphate nitrate.

The Urea Plant operates on the 'once-through' process. Liquid ammonia and pure carbondioxide are compressed separately and then after further processing the fertilizer is produced.

The total cost on the original plants and the expansion plants has been about Rs. 45 crores.

Sindri produced 39,81,333 tonnes of ammonium sulphate, 2,71,194 tonnes of double salt and 83,811 tonnes of urea till the end of March, 1965. This has saved the country about Rs. 132 crores in foreign exchange.

### Nangal Unit

The second largest fertilizer factory in the public sector was built at Nangal and was successfully commissioned on February 22, 1961.

The factory has been designed to produce annually 3,88,000 tons of calcium ammonium nitrate, a nitrogenous fertilizer containing 20·5 per cent nitrogen. It has been located close to the world's highest dam, because the main raw materials for the production of fertilizer are electric power drawn from the Bhakra Hydro-electric Station and water from the Sutlej river. The full requirement of electric power for the factory is of the order of 1,64,000 kW and 80 million gallons of water per day.

The Nangal factory has cost over Rs. 31 crores.

A brief description of the plants is given below :—

*Electrolysis Plant :* In this plant, 25,000 cubic metres of hydrogen are generated every hour by the eletrolysis of water. There are in all 60 electrolysers, each containing 108 cells. The 60 electrolysers consume 1,32,000 kW of power. In addition to hydrogen, the plant also produces oxygen, a part of which is later utilised in the nitric acid plant for the oxidation of ammonia.

*Ammonia Plant :* This plant is the heart of the entire scheme of production of fertilizer. For it is here that nitrogen drawn from liquefied air is mixed with hydrogen into a processable substance-ammonia. The rated output of the plant is 300 tons of ammonia a day in three streams.

*Nitric Acid Plant :* The next process is the production of nitric acid, the daily production capacity being 560 tons of 100 per cent nitric acid or over 1,200 tons of 53 per cent nitric acid which is the dilution actually used in the process.

*Fertilizer Plant :* The active ingredient of the finished fertilizer is ammonium nitrate—the reaction product of ammonia and nitric acid. The reaction is carried out in a neutraliser, and the resulting solution of ammonium nitrate is concentrated to 94 per cent under vacuum. The chemistry of the reaction is simple but the process being inherently hazardous, accurate control of temperature concentration and flow conditions has to be maintained throughout this section of the plant.

In a separate section of the plant, limestone is crushed and ground to a fine powder. Powdered chalk is then mixed with ammonium slurry in a granulator. The granules of calcium ammonium nitrate are then successively passed through screens, driers and coolers and finally through a coating drum where the fertilizer is coated with a fine layer of powdered soap-stone.

The purpose of dilution with chalk is to reduce the nitrogen content to a safe lower limit of 20·5 per cent and thus render it absolutely safe for handling by the farmer.

The finished product is either sent straight to the bagging plant or sent to a silo for temporary storage. The bagging plant fills 1,000 bags (50 kgs. each) every hour. It has been designed to fill two days' fertilizer production every day.

To supply power and water requirements, two separate plants have been installed.

The water supply and treatment plant is designed to handle 80 million gallons per day of water drawn from the Sutlej.

*Heavy Water Plant:* The fertilizer production has been tied up with the production of heavy water as well, according to the latest and best available process and in the best economical way.

The designed capacity of the Heavy Water Plant is 14,000 kg. of heavy water annually. The plant went into production on August 9, 1962.

Till the end of March, 1965 the Nangal Fertilizer Factory produced 12,42,183 tonnes of calcium ammonium nitrate. This has saved the country about Rs. 34 crores in foreign exchange.

### New Projects

The Corporation's new projects are in different stages of progress.

### Trombay
(Maharashtra)

The Trombay Fertilizer Project, which is estimated to cost approximately Rs. 33·5 crores, is designed to produce 90,000 tonnes of nitrogen and 45,000 tonnes of phosphate ($P_2O_5$) per year in the form of urea and nitrophosphate, a complex fertilizer, containing two major plant nutrients — nitrogen and phosphate (12·9 : 12·9) — will be the Corporation's third unit to be commissioned. The project is in its final phases of construction and trial runs of various sections of the factory are scheduled to start in the near future (May, 1965).

*Menthonal Plant :* The scope of the Trombay Project has been enlarged by the decision to set up, at the instance of the Government of India, a 100-tonne per day Menthonal Plant estimated to cost over Rs. 4 crores to meet the country's defence and industrial requirements. The Plant was expected to be commissioned by Oct., 1965.

### Namrup
(Assam)

The Namrup Project, which is estimated to cost Rs. 18 crores approximately, is designed to produce 45,000 tonnes of nitrogen per year in the form of 1,00,000 tonnes of ammonium sulphate and 55,000 tonnes of urea. The Plant is expected to go into production early in 1967.

### Gorakhpur
(U. P.)

The Gorakhpur Plant is designed to produce 80,000 tonnes of nitrogen per year exclusively in the form of 1,73,920 tonnes of urea and is estimated to cost a little over Rs. 26 crores. The factory is expected to go into production in 1967.

The final project report of Korba with details estimated for an anticipated total capital outlay of approximately Rs. 31 crores has already been submitted to the Government and is now under consideration (May 1965). The Plant is designed to produce 1,00,000 tonnes of nitrogen per year exclusively in the form of 2,17,800 tonnes of urea.

*Welfare :* The Corporation has established fully developed townships at Sindri, Nangal and Trombay having respectively 5,900, 2,200 and 1,750 units of accommodation at a cost of approximately Rs. 7·50 crores.

The Corporation's total expenditure in 1963-64 on account of welfare measures for its employees in its operating units at Sindri and Nangal amounted to nearly Rs. 39 lakhs.

BOARD OF DIRECTORS

*Chairman & Managing Director:* Satish Chandra, I.C.S. ; *Directors :* Dr. S. Husain Zaheer ; K. L. Ghei ; I. J. Naidu ; H. N. Sethna ; R. L. Mehta ; Lalbhai Patel ; Syed B. Rahman ; Uma Dutt Shastri ; T. Bullaiah ; J. N. Bhardwaj; M. K. K. Nayar ; M. Ramakrishnayya.

## GARDEN REACH WORKSHOPS LTD.

43/44, Garden Reach, Calcutta 24.

(*See under Late Particulars*).

## HEAVY ELECTRICALS INDIA LTD.

( A Government of India Undertaking )

( Post Box No. 46, Bhopal )

(Under the Ministry of Industry)

The Company has an authorised capital of Rs. 50 crores. Its issued and paid-up capital including amount awaiting allotment is Rs. 48 crores.

The production of switchgear started in 1958 followed by that of transformers and capacitors. Subsequently, the manufacture of traction motors and associated electrical equipment was taken up. The factory has also commenced the manufacture of industrial motors.

The factory was originally planned for an annual output of Rs. 12·5 crores to be achieved by 1968. Subsequently, it was decided to raise the production capacity of the factory to about Rs. 40 crores in the optimum level. The total strength of employees at optimum level is expected to be nearly 20,000.

**Ancillary Services :** The factory has its own blue water gas plant, boiler plant, power house, oxygen and acetylene plants and electroplating shop. One of the unique features of construction is the provision of a one-and-a half mile long, 7 ft. × 6 ft. wide concrete service tunnel which runs below each block to supply electricity, gas, water etc.

An industrial estate has come up in the vicinity of the factory on an area of 132 acres. The estate will accommodate ancillary industries for the manufacture of components required for heavy electrical equipment and thus reduce imports. Six such industries have already been set up. These industries will provide a regular flow of material and components to suit the factory's production requirements.

**Production Programme :** The factory has turned out equipment of the sale value of Rs. 9·78 crores during the period from July 1, 1960 to March 31, 1964. During 1964-65 the sale value was over Rs. 6·15 crores.

**Township :** The Heavy Electricals township is spread over an area of 10 sq. miles with 85 miles of roads already laid. Nearly 8,000 quarters have been constructed in the township. The township is equipped with all modern amenities such as hospitals, dispensaries, shopping centres, community centre, play grounds, clubs, post offices, schools and auditoriums. The township has a population of about 35,000.

**Board of Directors :** *Chairman and Managing Director :* K. C. Lall. *Directors :* K. M. Chinnappa, R. L. Mehta, K. L. Ghei, K. P. S. Nair, O. N. Misra, P. S. Bapna, V. P. Appadurai and S. Swayambu. *Secretary :* R. C. Gupta.

## HEAVY ENGINEERING CORPORATION LTD.

Old Secretariat Bldg., P.O. Hinoo, Ranchi.

(Under the Ministry of Industry)

Heavy Engineering Corporation Limited, a fully owned Government of India Undertaking, was incorporated in Bihar on 31st Dec., 1958 with Headquarters at Ranchi for developing the manufacture of heavy capital equipment in India. The Corporation is now engaged in establishing the following projects :—

1. Heavy Machine Building Plant at Ranchi in collaboration with U.S.S.R. ; 2. Foundry

Forge Project at Ranchi in collaboration with Czechoslovakia; 3. Heavy Machine Tools Project at Ranchi in collaboration with Czechoslovakia.

At full capacity, the projects will provide employment to a total of approximately 19,000 staff, engineers and workers.

**Heavy Machine Building Project:** The plant is being set up at Ranchi in collaboration with the U.S.S.R. The project is being implemented for production capacity of 80,000 tons of machinery items every year. Adequate provision has also been made for further expansion of the capacity to 1,65,000 tons of finished machinery items. The plant is intended to produce primarily machinery and equipment for the iron and steel industry. It will also possess adequate facilities and capacity to meet the requirements of machinery and equipment for other major industries like mineral oil (Oil Drilling Rigs), coal mining, chemical, fertiliser, cement etc. as well as for the manufacture of general engineering items like heavy cranes, excavators, crushing and grinding equipment. The plant will have on its roll over 4,500 workers and staff at the 80,000-ton stage.

**Foundry Forge Project:** The Foundry Forge Plant with a capital outlay of Rs. 100 crores is being set up at Ranchi in collaboration with Czechoslovakia and is expected to have the following production per year from its main production shops: Grey iron Foundry (shaped castings) 33,345 tonnes; Steel Foundry (shaped castings) 40,182 tonnes; Non-Ferrous Foundry (castings) 700 tonnes; Forgings 50,000 tonnes; Grey Iron, Steel and Forged Rolls 21,310 tonnes.

The plant will have in addition, its own well-equipped pattern shop, fettling shop, battery of gas producers, Acetylene and Oxygen plants besides the power and gas services. The plant will also be equipped with a 6,000-ton press which will be the biggest so far (1965) in India.

This plant is mainly meant to supply all types of grey iron and steel castings and forgings—ranging from a few kilograms to as heavy as 100-ton piece weight—to meet the requirements of Heavy Machine Building and Heavy Machine Tools Plants. Provision has also been made for some surplus capacity to meet the demand of heavy castings and forgings from various other industries both in the private and public sectors. A fully equipped central laboratory is also being set up for quality control of its products. The Plant is expected to go into full production by 1968 when it will employ about 8,000 persons.

**Heavy Machine Tools Project:** In November, 1960 the Government of India entrusted the Corporation with the responsibility of setting up a Heavy Machine Tools Plant, in collaboration with Czechoslovakia. The plant will have an annual production capacity of 10,000 tons of certain diverse items of Heavy Machine Tools. Machine tools of these types of large size and capacities will be produced for the first time in Inia. Adequate provision has been made for increasing the capacity of the plant to 20,000 tons per year or to any other intermediary stage, if considered necessary. When in full production, the plant is expected to manufacture approximately 278 complete machine tools. The average weight of each machine will be 25/30 tons while the maximum weight of an individual machine is expected to be approximately 180 tons, the maximum weight of a single component being 50 tons.

The plant is expected to go into trial production of heavy radial drills, heavy centre and roll-turning lathes and planing machines by 1966. At full production, it will provide employment to more than 2,000 staff and workers. A site measuring 130 acres to the north of the Heavy Machine Building Plant has been selected for this unit.

**Training Programme:** To ensure a regular flow of technical personnel and skilled and semi-skilled workers for such huge and complex plants, a comprehensive programme of training has been worked out. Over 650 Indian engineers and technicians in USSR and Czechoslovakia have received training from 6–18 months. A large number of Indian engineers is now undergoing training in the factories and design operation of these two countries, while many have also returned after training. Exports from the USSR and Czechoslovakia, experienced in design and technology, are also being drawn to assist the staff for training of engineers and technicians. At Ranchi, the Corporation has set up a Central Training Institute, complete with workshop facilities, Foundry, Forge Shop to provide specialized training to skilled workmen.

In order to develop healthy trade union practices, the management have also trained a large number of workers in leadership. This course has been organised by the Ministry of Labour, Government of India. The trained workers are now training other workers in healthy practices of trade unionism.

**Township:** To provide residential accommodation to its employees the Heavy Engineering Corporation is building a modern township at Ranchi, about 5,600 acres in area, named Jagannathnagar. It is estimated that up to 16,000 quarters will be constructed.

**Welfare Activities:** For the benefit of the employees of the Corporation, the Contractors' staff and workers, the Corporation runs a Plant Hospital with 130 beds at Ranchi. The Hospital is equipped with a modern X'Ray Plant, Electrocardiograph, Air-conditioned Operation Theatre, Maternity Centre, Dental, Eye, Nose, Throat and Physio-theraphy Departments, a Pathological Laboratory and Out Patient Department with dispensing facilities at various centres. To attend to emergency cases, a Casualty Department is run round the clock. First Aid Posts have been set up in each plant. Mobile dispensaries have been introduced to render medical facilities to those who are staying far away in the township and labour colonies. Family Planning Units have also been set up under qualified Health Officers and Medico-social workers. The Industrial Health Department including Public Health looks after the sanitary and hygienic measures. Besides handling accident cases as well as usual seasonal and other diseases, adequate sanitary and prophylactic measures are taken regularly against epidemics of cholera, typhoid, small pox, dyphtheria, etc.

At Ranchi the Corporation runs one Higher Secondary School, four Middle Schools (Hindi Medium), one Middle School (English Medium), one Upper Primary School and a Lower Primary School, besides one Montessory School. At present (April 1965), nearly 2,000 students are attending the various schools. Training in crafts, such as sewing and toy-making is imparted to the wives of the employees.

*Chairman:* T. R. Gupta.

## HEAVY VEHICLES FACTORY

Avadi, Madras.

The Rs. 16 crore Heavy Vehicles Factory, a giant defence project, is located on a 1,400 acre site at Avadi near Madras. The foundation stone of the factory was laid on 29th Dec. 1962 by the Defence Minister.

The factory, established with the technical guidance of a British firm, is being geared up to manufacture tracked vehicles and other major heavy engineering equipment required for military as well as civilian purposes.

The construction work is in an advanced stage of completion and nearly a thousand quarters for staff and workmen are in various stages of construction.

Production in the Tool Room of this factory has already commenced.

## HINDUSTAN AERONAUTICS LTD.

(Bangalore Division)

(Hindustan Aircraft P.O., Bangalore 17, Mysore)

Tel. & Cable address: Aircraft, Bangalore.

Hindustan Aeronautics Ltd., was formed on Oct. 1, 1964, implementing the decision of the Government of India to amalgamate Hindustan Aircraft Ltd., and the Aircraft Manufacturing Depot, Kanpur. The new Corporation will also take over the MIG Manufacturing Projects at Koraput, Nasik and Hyderabad. From this date, Hindustan Aircraft Ltd., became the Bangalore Division of Hindustan Aeronautics Ltd. The Railcoach Division forming part of HAL was separated from Jan., 1965 and merged with Bharat Earth Movers Ltd., recently (1965) set up under the Ministry of Defence.

The first air-craft was assembled and flown and production of Hawk-P-36 and Harlow PC-5 commenced by HAL in 1941. Almost at the same time the first 10 seater Indian Glider was locally designed, built and test flown.

**Prentice Trainer:** In 1947, HAL was entrusted with the manufacture of Percival Prentice Trainer aircraft for the Indian Air Force. The first HAL manufactured Percival Prentice Trainer flew in April, 1948.

**Ht-2:** In 1947-48, "All-Metal Basic Trainer Aircraft" the HT-2, was designed and developed by HAL.

**Vampire:** In March 1950, the Government of India entered into a licence agreement with the De Havilland & Co. of U.K. for the manufacture of Vampire Jet Aircraft in HAL.

**Gnat:** The Government of India entered into an agreement in Sept. 1956 with Follance Aircraft Ltd., U.K., for the manufacture of the Gnat, under Licence, at HAL. Of the various progressive stages of manufacture, HAL is now in the final stage of manufacturing the aircraft from raw materials.

The Government approved in 1956 the appointment of a team of German engineers to assist HAL in the design and development of a supersonic fighter aircraft known as the HF-24. The first proto-type of the HF-24 MK.I aircraft powered by two Orpheus 703 engines made its successful flight in June 1961 and the second prototype in Oct. 1962.

**Pushpak:** HAL undertook and completed the development of an ultra-light air-craft, the Pushpak, in the middle of 1958. This is an ultra-light two seater aircraft suitable for flying clubs.

**Krishak:** This is a light four seater aircraft. The first prototype made its successful first flight in Nov. 1959 and the second in Nov. 1960.

**Basic Jet Trainer:** The aircraft is powered by a Viper 11, turbo-jet engine. It is a single engined aircraft, fully aerobatic, with two side by side seats for basic pilot training.

The Government of India have entrusted to HAL, the manufacture of "Alouette" helicopters, under licence from Sud-Aviation of France.

**Artouste:** The Government of India have entrusted to HAL, the manufacture of the Artouste turbo-jet engine under licence from Turbomecca of France. Necessary pre-planning work connected with its manufacture has been taken on hand.

**HJE-2500:** The HJE-2500 is a turbo-jet engine designed and developed by HAL for the Basic Jet Trainer aircraft. The first prototype of the HAL designed engine was expected to be ready for test bed running soon (April 1965).

**Other Development Work:** Other development work includes the design of a Pneumatic Starter for the starting of turbo-jet engines of 5,000,10,000 lbs. thrust range and installation of the Orpheus 701 engines as an auxiliary jet pack for the Fairchild Packet aircraft for high altitude flying.

**Training:** The company gives short-term training in different trades to personnel of the Indian Air Force, Indian Navy, the IAC., etc.

**Staff Strength:** The personnel strength of the company increased from 21,199 in 1963 to 23,443 in 1964.

*Board of Directors:* S. S. Khera, I.C.S. (*Chairman*); Air Marshal Arjan Singh, D.F.C.; Dr. S. Bhagavantam; Prof. S. Dhawan; M. K. Harfharan; H. C. Sarin, I.C.S.; Air Vice Marshal Ranjan Dutt (*Managing Director*); P. M. Reddy (*General Manager*).

## HINDUSTAN ANTIBIOTICS LIMITED

(Pimpri, Poona-18)

(Under the Ministry of Petroleum and Chemicals)

Hindustan Antibiotics Limited is situated on a 200-acre land at Pimpri 9 miles from Poona. Share Capital: Rs. 4 crores, the shares being held solely by the President of India or his nominees. The factory went into production in August 1955. The factory came into being as a result of the tripartite agreement between the Government of India, the World Health Organisation and the UNICEF. The initial capacity of the plant of 9 Million Mega Units, has been increased to 50 M.M.U. in 1962-63 as a result of technical developments. The Government of India has approved further expansion of the penicillin plant at a cost of Rs. 25 lakhs, which will raise its capacity to 84 M.M.U.

The sterile finished bulk penicillin in Million Mega Units produced in the factory over the past 5 years are 39·72, 40·24, 45·53, 50·17, 60·00 (estimated for 1963-64). The Streptomycin Plant of the company with a rated capacity of 40 tons per annum was established with the technical collaboration of Messrs. Merck & Company Inc. U.S.A. This plant is now producing Dihydrostreptomycin Sulphate and Streptomycin Sulphate. Expansion of the plant to double the production before the end of the financial year 1963-64, was in progress (Jan. 1964). The capital cost of the plant which is now Rs. 2·15 crores will be Rs. 2·75 crores after completion of the expansion.

A plant for production of 1·5 tons of broad spectrum antibiotics of the Tetracyclines group at a cost of Rs. 10 lakhs is now fully engaged on production of Chlorotetracycline.

Another important development is the discovery of antifungal antibiotics like Hamycin, and Dermostatin by the company's research laboratories. Hamycin is already in the market. A project for its manufacture on a larger scale costing Rs. 30 lakhs has been approved for implementation.

All these expansion activities including streptomycin project have been financed from the company's earnings.

When all these schemes materialise, the company will be producing antibiotics worth Rs. six crores a year.

The company has a complement of 1,960 employees, more than 60 per cent of whom are housed in the company's residential colony having all modern amenities.

A Research Laboratory well equipped for research on antibiotics together with a pilot plant has been established as an important adjunct to the factory costing over Rs. 20 lakhs.

A production bonus of Rs. 3·5 lakhs was distributed to the staff and workers in respect of the working year 1962-63.

To meet the country's requirements of Penicillin, Streptomycin and other antibiotics the Government of India is also establishing another antibiotics factory in the public sector at Rishikesh with U.S.S.R. aid, having an annual capacity of 300 tons. When this project goes on stream the country would not only be self-sufficient in antibiotics but will have exportable surplus.

*Mg. Director*, C. A. Subramanyam.

## HINDUSTAN CABLES LTD.

P.O. Hindustan Cables, Burdwam Dist.

(*See Late Particulars*).

## HINDUSTAN HOUSING FACTORY LIMITED

(Jangpura, New Delhi 14)

The Hindustan Housing Factory Ltd. was taken over completely by the Government of India with effect from 15th August 1955. It is now under the control of the Ministry of Works and Housing.

The present Directors of the company are :—

*Chairman*, Ujjal Singh ; *Directors*, C. P. Gupta ; B. R. Seth ; J. Durai Raj ; N. G. Dewan, I.S.E. ; D. J. Madan.

*Managing Director*, J. Durai Raj ; *Secretary*, G. S. Ahuja.

The authorised share capital of the company is Rs. 75·00 lakhs of which paid-up capital is Rs. 48·99 lakhs. The Government have advanced to the company interest bearing loan aggregating Rs. 48·75 lakhs for its working capital.

Production during 1963-64 was worth Rs. 1·51 crores and the net profit for the same period was Rs. 5,10,561.

Main products of the Hindustan Housing Factory are as under :—

Prefabricated components for multistoreyed buildings ; Prestressed concrete transmission line poles ; Prestressed concrete street light poles ; P.C.C. Beams for industrial sheds with sheeted roofs ; P.C. assembled trusses for industrial sheds ; P.C. Beams for composite constructions ; Roofing and flooring components with prestressed concrete beams ; Precast R.C.C. cladding panels ; Precast prestressed units for fencing posts ; R.C.C. door and window frames ; Hollow blocks for roofing ; Hollow blocks for walling ; Overhead concrete tanks for residential use , Large panels for large panel house construction ; Precast concrete flooring slabs ; Prestressed concrete railway sleepers ; R.C.C. railway sleepers ; Precast vibrated pipes for drains ; Precast vibrated Porous Pipes ; Reinforced foam concrete panels ; Foam concrete blocks for cold storage and air-conditioned buildings ; Foam concrete blocks for multistoreyed buildings ; Machine-made doors and window frames and shutters ; Flush doors ; Seasoning and chemical treatment of timber.

The management has introduced monthly graded scales of pay for all the employees in the factory. They get city compensatory allowance in addition to the usual dearness allowance. The rates of D.A. are revised from time to time.

## HINDUSTAN INSECTICIDES LIMITED

Regd. Office : New Delhi-3.

Factories : Udyogmandal, Alwaye (Kerala) Industrial Area, New Delhi 15.

The company was incorporated in March 1954 to manage the affairs of the first Government owned DDT Factory at Delhi, with an authorised capital of Rs. one crore. Later the Government of India decided to put up the second factory at Alwaye, under the management of the same company. Both the factories are managed by Government through the company with a Board of Directors under the Ministry of Petroleum and Chemicals.

### Delhi Factory

This factory is situated in the industrial suburb of New Delhi and was set up with the assistance of United Nations agencies of UNICEF and W.H.O. (UNTAA). The UNICEF agreed to supply the plant and machinery at a cost of $250,000 and the W.H.O. (UNTAA) technical assistance to the extent of $100,000. The Government of India agreed to provide land, buildings, services, auxiliaries and the installation of plant and equipment at an estimated cost of Rs. 35,00,000

The construction of the factory was started in 1953. The factory went into production in March 1955. The capacity of the plant was 700 tons Technical DDT per annum.

For doubling the plant's capacity an agreement was reached by the Govt. of India with the UNICEF for an additional gift of equipment worth $275,000.

Expansion started in 1956 was completed in 1958 thus giving the Delhi plant a capacity of producing 1,400 tons of Technical DDT per annum. The factory now produces DDT to its full capacity.

*Production :* Since the commencement of operations in March 1955 production has been steadily stepped up. From 10·6 tons production in April 1955 the D.D.T. factory reached the record figure of 147 66 M. tons in March 1965. Production during the following years was—

(*In M. Tons.*)

| | Technical D.D.T. | Formulated D.D.T. |
|---|---|---|
| 1961–62 .. .. | 1,502·55 | 2,109·88 |
| 1962–63 .. .. | 1,394·60 | 2,702·00 |
| 1963–64 .. .. | 1,444·51 | 2,800·00 |

The factory earned a net profit of Rs. 25·84 lakhs during 1963-64 as against Rs. 22·31 lakhs during 1962–63.

### Alwaye Factory

The firm of Messrs. Singmaster & Breyer Inc., New York, was awarded the contracts for both Technical DDT plant and the Formulated DDT plant on a turn-key basis in the years 1956 and 1957 respectively.

Trial production began in February 1958. The plant is now in regular production.

Within five months the factory crossed the rated capacity by producing 125·16 M. tons in October 1958. Production during the past years was as under :—

(*In M. Tons.*)

| | Technical D.D.T. | Formulated D.D.T. |
|---|---|---|
| 1959–60 .. .. | 1,109·00 | 2,252·50 |
| 1960–61 .. .. | 1,371·22 | 1,959·41 |
| 1961–62 .. .. | 1,223·60 | 1,518·93 |
| 1962–63 .. .. | 1,219·00 | 1,716·88 |
| 1963–64 .. .. | 1,166·48 | 1,486·30 |

The factory earned a net profit of Rs. 21·11 lakhs during 1962-63 and Rs. 10 lakhs during 1963-64.

The entire output of the Delhi factory and the bulk production of the Alwaye Factory are earmarked for the Health Ministry (Malaria Eradication Programme).

The Company employs approximately 578 persons at both the factories and was awarded a certificate of Honour by the President of India for satisfactory performance for second year in succession during the year 1962.

Training facilities have been provided in both the factories. Other amenities like canteen, dispensary, housing etc. exist in the factories.

*Chairman:* Maj-Genl. M. S. Himmat Sinhji.

*Managing Director :* B. B. Mathur.

## HINDUSTAN MACHINE TOOLS LIMITED

(Jalahalli P.O., Bangalore 13.)

This is a limited company under the Ministry of Industry, registered in Mysore on February 7, 1953 and located in Jalahalli, Bangalore.

The authorised share capital of the company is Rs. 12 crores.

Commencing its production with one type of machine *viz.* High Precision Lathe (H.22) in 1956, the factory has been able to progressively diversify the production and turn out a wide range of machine tools like Milling Machines, Radial Drilling Machines, General Purpose Lathes, Turret Lathes, Grinding Machines, Special Purpose Machines and all-Electric Heavy Duty Programme Controlled Milling Machines. Further technical collaboration agreements have been signed for the manufacture of Gear Shapers, Single Spindle Automatic Lathes and Gear Hobbing Machines.

The Company employs 9,500 skilled and semi-skilled workers.

Since starting its commercial production in 1956, till the end of March 1965, the factory turned out 9,812 machines valued at Rs. 41·2 crores. During 1964-65, production came to 2,170 machines valued at Rs. 11·2 crores. The Bangalore factories accounted for a total production of 2,070 machines as against 1,983 machines during 1963-64. A new addition to HMT's production line was the Special Purpose Machines.

Sixty all-Electric Milling Machines were turned out by the factory's plant at Pinjore in the Punjab. Production of these machines has been introduced for the first time in India.

The fourth plant at Kalamassery in Kerala, which commenced its token production in October, 1964, accounted for an output of forty lathes.

During 1964-65, HMT had orders for supply of 2,469 machines against which it could despatch 2,258 machines. During 1963-64, it despatched 1,982 machines against order for 2,270 machines.

The HMT declared a net profit of Rs. 3 crores during 1963-64, representing a return of 37·5 per cent over its share capital of about Rs. 8 crores. Profits during 1962-63 came to Rs. 2·15 crores, representing a return of 33 per cent over the company's share capital. The HMT further declared a dividend of 10 per cent for the fourth consecutive year.

HMT has its own training centre where training is offered in the following trades : (1) Highly skilled operators, fitters, turners, millers, grinders, and (2) Reconditioning of machine tools and preventive maintenance.

#### Future Plans

The demand figures for the Fourth Plan have been worked out tentatively and according to these estimates machine tool requirements towards the end of the Fourth Plan *i.e.* by 1970-71, are placed at Rs. 100 crores per annum. To meet at least 50 per cent of this demand and be able to export some portion of its production, HMT has again offered to the Government to establish five more factories during the Fourth Plan period at the rate of one factory per year and the capital expenditure for all these additional Units is planned to be met entirely by the Company from its own internal resources. The Government have provisionally approved this offer and the pre-planning work on the sixth Unit has just been entrusted to the HMT's Project Department.

#### Industrial Estate

The scheme of establishing ancillary units in the neighbourhood of HMT was initiated by the Hindustan Machine Tools in 1957. Out of 50 units planned, 30 units have already been commissioned. The total cost of the Estate is approximately Rs. 17·0 lakhs, the capital investment in these first 30 units being approximately Rs. 48·0 lakhs. While the annual turn over of these units is around Rs. 70·0 lakhs, 20 more units are likely to be commissioned soon and are expected to go into production during 1965-66.

With the establishment of further factories by the Hindustan Machine Tools at Pinjore in the Punjab, Kalamassery in Kerala and Hyderabad in Andhra Pradesh, setting up of an Industrial Estate in each place with a chain of 50 ancillary units has also been planned.

#### Watch Project

Construction of the Watch Factory on the site adjoining the Machine Tool Factories in Jalahalli near Bangalore commenced during 1961, and was completed in October 1962 in collaboration with Messrs. Citizen Watch Co., Japan. After erection of the plant and machinery, manufacture of watches with 54 per cent indigenous content commenced during April 1963.

The HMT Watch Factory turned out 1,95,048 watches during 1964-65 valued at Rs. 1·80 crores as against 1,21,600 during 1963-64. The factory, which manufactures three types of gent's' watches, *viz.* Citizen, Janata and Janata Luminous, and one type of ladies', *viz.* Sujata, catered to a bulk order of about 35,000 luminous black dial watches for the personnel of the fighting forces. The present rate of production is running at 800 watches per day with 60 per cent indigenous content.

The HMT Watch Factory has now a network of 13 Sales-cum-Service Centres all over the country. Besides, watches are being sold and after-sales service arranged at its factories in Bangalore, Pinjore in the Punjab, Kalamassery in Kerala and Hyderabad in Andhra Pradesh.

The Company has been contributing 8¼ per cent of the total emoluments of its employees towards Provident Fund.

Under the subsidised housing scheme, about 30 per cent of the employees have been provided with houses on the HMT townships.

The average earnings of the HMT employee, which stood at Rs. 116 during 1956-57, have more than doubled during the last seven years and his average earnings today are Rs. 235 per month.

Employees also enjoy many other benefits like free uniforms, free watches, subsidised meals and subsidised transport.

### HINDUSTAN ORGANIC CHEMICALS LTD.

Harchandrai House, 81, Queen's Road, Bombay 2 BR.

This is a Government of India Undertaking, under the administrative control of the Ministry of Petroleum and Chemicals.

The Company was incorporated in Dec. 1960 in technical collaboration with a consortium of four West German firms for manufacture of about 40 organic chemicals and intermediates required for the Dye stuff, Drugs and Plastic Industries.

But early in 1965 the programme was revised to enable the Company to work on its own and a product-programme has been selected for development in two phases so that the project becomes economically viable. The revised scheme would require an investment of Rs. 31·00 crores for the first stage to be completed by mid 1968 and of further Rs. 19 crores for the 2nd phase, to be taken up subsequently.

The Company has done considerable work on its factory site which is near Panvel, about 56 miles from Bombay. The new production programme includes besides a large number of organic derivatives of Benzene, Toluene and Naphthalene, several inorganics such as Caustic Soda, Chlorine, Sulphuric and Nitric acids, Ammonia etc. The athorised capital of the Company is Rs. 12 crores.

*Managing Director :* Dr. G. S. Kasbekar.

### HINDUSTAN PHOTO FILMS MFG. CO. LTD

P.B. No. 27, Ootacamund.

The raw film factory, located on the outskirts of the hill station of Ootacamund in South India, is a public sector project for the manufacture of a large variety of photographic sensitised materials.

The Government of India have secured the collaboration of the French Firm, Messrs. Bauchet & Co. The Collaboration agreement covers the supply of machinery and equipment as well as the training of Indian technical personnel and assistance in the erection of plant and machinery, etc.

When the factory goes into full production, it is expected to turn out annually 5·80 million sq. m of photographic film and photographic paper, the sale value of which would be nearly Rs. 9·25 crores per year. As an adjunct to this project, a Silver Sludge Recovery, Silver Refining and Silver Nitrate Plant, as also a plant for the manufacture of organic chemicals, which constitute important raw materials for the project, are also being set up.

The total cost of the Project excluding the Township is estimated at Rs. 9·35 crores. The cost of the Township, which is being put up in the neighbourhood of the factory is estimated at Rs. 1·69 crores. The Project will be manned and operated by Indian personnel, many of whom have already received training in France in the factory of the collaborators.

*Managing Director :* N. D. J. Rao.

### HINDUSTAN SALTS LTD.

Badnor House, HI-68, Bhagwan Das Road, 'C' Scheme, Jaipur.

(Under the Ministry of Industry)

The Hindustan Salts Limited was registered on 12th April 1958 at Jaipur. The salt sources at Sambhar Lake and Didwana in Rajasthan and Kharaghoda in Gujarat States were transferred to the Company on 1st January 1959, when the Company actually started functioning. The Didwana Salt Source was subsequently handed over to the Govt. of Rajasthan in 1960 and the Mandi Salt Mines were transferred to the company by the Govt. of India on May 1, 1963.

The authorised capital of the Company is Rs. two crores divided into 20,000 equity shares of Rs. 1,000 each. The total subscribed and paid up capital is Rs. 1,78,81,000 divided into 17,881 shares of Rs. 1,000 each and are held by the Government of India.

During the fiscal year ending September 30, 1964, the Company produced 3,94,000 M. tonnes of Common Salt ; 51·80 M. tonnes of Table Salt ; 107·80 M. tonnes of Dairy Salt ; 1·00 M. tonnes of Sodium Chloride (BP & USP) ; 233·00 M. tonnes of Sodium Sulphate Anhydrous and 93·00 M. tonnes of Burkeite.

The Company has provided employment to about 1,000 men.

A separate subsidiary company—Sambhar Salts Limited—was registered on 30th September 1964 for the working of the Sambhar Salt Works.

The affairs of the Company are under the control of a Board of Directors appointed by the President of India. *Chairman*, M. S. Himatsinhji, I.R.A.S. ; *Managing Director*, D. R. Sundaram, I.A.S. ; *Secretary*, B. B. Mookerjee.

### HINDUSTAN SHIPYARD LIMITED

(Visakapatnam 5, Andhra Pradesh)

This is located at Vishakapatnam in Andhra Pradesh. It was originally designed by the firm of Sir Alexander Gibb and Partners.

The original design envisaged the provision of eight berths but the shipyard now has four building berths to build ships ranging from 320 to 550 ft. in length, and from about 5,000 tons and from about 5,000 tons to about 15,000 tons deadweight capacity.

A fifth berth suitable for building small craft has also been constructed.

It has a fitting-out wharf 1,310 ft. long.

There are about 5,000 techniciana. workers and staff.

The yard has been managed by Hindustan Shipyard Limited since the 1st of March 1952, a company in which the Government of India have a controlling interest. At present the entire capital of Hindustan Shipyard Ltd. is owned by the Government of India.

The authorised capital of Rs. 10 crores is divided into 100,000 ordinary shares. Issued and paid-up capital is Rs. 5,83,33,000.

The value of work done at the Shipyard during 1957-58, 1958-59, 1959-60, 1960-61, 1961-62, 1962-63 and 1963-64 was Rs. 3·43 crores, Rs. 3·45 crores, Rs. 4·01 crores, Rs. 4·66 crores, Rs. 4·61, Rs. 4·98 and Rs. 4·75 crores respectively.

During 1959-60 the value of production was Rs. 401·48 lakhs. The profit during 1959-60 was Rs. 68,873 and in 1960-61 the profit was Rs. 63,783. It was Rs. 24,000 during 1961-62 and Rs. 36·732 during 1962-63 and Rs. 64,000 during 1963-64.

Orders to build nine more ships are under execution.

"Darshak" the first ship built in India for the Indian Navy was launched at Vishakapatnam on Nov. 2, 1959. This is a survey ship of 2,750 tons displacement, constructed in the Hindustan

shipyard. She was commissioned on Dec 25 1964.

A provision of Rs 2 44 crores had been made for further development of the shipyard in the Third Five Year Plan and an amount of about Rs 74 lakhs has already been sanctioned.

A full-fledged training school has been started in which recruits get intensive training for 4½ years in batches of 100 each.

It is now decided that the second shipyard would be located in Cochin.

The following table gives details of the ships built at the shipyard :

| | Name of ship | Date of laying keel | Date of launching | Date of completion and sailing | To whom sold |
|---|---|---|---|---|---|
| 1. | "Jala Usha" (8,000 DWT) .. | 22- 6-46 | 14- 3-48 | 15-10-48 | Scindia S. N. Co. Ltd. |

The company is managed by a Board of Directors, as already mentioned, under the Ministry of Transport. *Chairman*, Dr. Nagendra Singh, I.C.S. ; *Managing Director*, H. C. Raut; *Members*, Michael John ; Rear Admiral S. N. Kohli ; Dr. M. V. Krishnarao ; I. P. Chatterjee ; Jehangir P. Patel ; Mohan Wahi ; Rear Admiral T. B. Bose ; R. M. Dave ; Rear Admiral Daya Shankar ; F. V. Badami.

## HINDUSTAN STEEL LIMITED

P.O. Hirapur, Rourkela.

(See under Late Publications.)

## THE HINDUSTAN TELEPRINTERS LTD.

Guindy, Madras-32.

(Ministry of Communications)

This is a limited company under the Department of Communications registered in Madras on 14th December, 1960 and is located in Guindy, Madras.

The authorised capital of the company is Rs. 3 crores.

The Company has been set up for the manufacture of teleprinters and ancillary equipment. For this purpose an agreement has been entered into by the Government of India with Messrs. Ing. C. Olivetti & C., S.p.A., of Italy, one of the leading manufacturers of teleprinters in the world. Initially it is proposed to assemble and manufacture the tape and page models of teleprinters, printing reperforator attachment, transmitter attachment and independent automatic tape transmitter. The production target of 1,000 machines per year has been reached. The company has plans to expand its capacity for producing 8,500 machines by 1970-71.

The company suffered a loss of Rs. 3·79 lakhs during 1963-64.

*Managing Director* : C. A. Cornelius.

## HOTEL JANPATH

Janpath, New Delhi-1.

Till March 31, 1964, Hotel Janpath was being managed departmentally by the Ministry of Works and Housing. In order to provide more efficient service the Government decided to set up a company in the public sector for the purpose. Janpath Hotels Ltd., was accordingly registered and the new company took over the management of the Hotel with effect from April 1, 1964.

The Hotel has 222 rooms, a large dining hall, a lounge each on the ground floor and on the first floor and provides facilities of a conference room and a small shopping arcade.

It has a bed capacity for 280 persons. The occupancy in winter months is generally above 90 per cent and in summer season nearly 70 per cent.

## INDIA GOVERNMENT SILVER REFINERY

(Ministry of Finance, Dept. of Economic Affairs)

47, Strand Road, Calcutta 7.

This refinery has been installed for the extraction of silver and copper from the Q.A coins minted during the World War II. Nickel Sulphate and Nickel Silver (an alloy of Cu, Ni, and Zn) are obtained as by-products.

The process of recovery of nickel sulphate and nickel silver has been developed in the departmental laboratory.

This Silver Refinery has been engaged for the design, layout etc., of a Silver Refinery now under construction by the Hindusthan Photo Films Ltd., at Ootacamond.

The capital outlay on the Silver Refinery is about Rs. 1·44 crores.

The total number of persons employed is 481. Some of the departments of the Refinery work in three shifts round the clock.

*General Manager*, V. J. Joshi.

## INDIA TOURISM TRANSPORT UNDERTAKING LTD.

Thapar House, Janpath, New Delhi.

India Tourism Transport Undertaking has been registered with an authorised capital of Rs. 19 lakhs. This Undertaking would run tourist taxis in cities of Delhi, Bombay, Calcutta, Madras and Agra and will operate tourist coaches in Delhi and from Delhi to neighbouring cities such as Agra, Jaipur.

## THE INDIAN DRUGS AND PHARMACEUTICALS LTD.

National Insurance Buildings,

5, Parliament Street, New Delhi.

(Under the Ministry of Petroleum and Chemicals)

The Indian Drugs and Pharmceuticals Ltd. was incorporated in April, 1961 for the establishment and management of Drugs and Surgical Instruments Plants in the public sector with the Soviet collaboration.

The Government of the U.S.S.R. has agreed to make available to the Government of India credit of about Rs. 9·5 crores to cover the cost of designing work to be executed by the Soviet side, the cost of equipment and machinery to be imported from the Soviet Union, the expenses connected with the deputation of Soviet specialists for erection and commissioning of the plants and expenses to be incurred on the training of Indian specialists in the Soviet Union.

The authorised capital of the company is Rs. 20 crores. When in full production, the following three plants are expected to provide employment to over 6,000 workers of skilled and semi-skilled categories.

The location and a brief description of the production programme of each project is given below :—

1. *Antibiotics Project at Rishikesh (Uttar Pradesh)*: Estimated to cost Rs. 22 crores. An annual production of 300 tonnes of antibiotics as penicillin, streptomycin, dihydrostreptomycin, nistatin, tetracycline, chlorotetracycline and oxytetracycline is planned for this project.

2. *Synthetic Drugs Project at Hyderabad*: Estimated to cost Rs. 20 crores. The proposed annual production programme includes 850 tonnes of synthetic drugs such as sulphadimidine, sulphaguanidine, sulphanilamide, phenacetin, vitamin B, frolic acid etc., and 4,560 tons of intermediate chemicals required for the production of finished drugs.

3. *Surgical Instruments Plant at Madras*: The total annual output of Surgical instruments would be about 2.5 million pieces of instruments. Estimated to cost Rs. 5 crores.

These plants are at various stages of implementation.

*Chairman & Managing Director :* R. R. Bahl.

## INDIAN OIL CORPORATION LIMITED

*Regd. Office :* Clarke Road, Bombay-34.

The Indian Oil Corporation came into existence on Sept. 1, 1964 when it took over the entire business of the erstwhile Indian Refineries Ltd. The Company now comprises three divisions *viz.* Marketing Division, Refineries Division and the Pipelines Division. The Pipelines Division of the Corporation came into existence with effect from March 11, 1965 ; prior to this it was a part of the Refineries Division.

Indian Oil Corporation, Refineries Division, Link House, Mathura Road, New Delhi came into existence on Sept. 1, 1964, when it took over the entire business of the erstwhile Indian Refineries Ltd. which was incorporated on Aug. 22, 1958 in New Delhi. The Company is responsible for the construction and management of the three Government owned Refineries at Gauhati in Assam, Barauni in Bihar and Koyali in Gujarat.

Indian Oil Corporation, Pipelines Division, Link House, Mathura Road, New Delhi, is responsible for the construction of Gauhati—Siligur Pipelines and Haldia-Barauni-Kanpur Pipelines.

*Chairman :* P. A. Gopalakrishnan, I.C.S.

## INDIAN RARE EARTHS LIMITED

Udyogamandal P.O.
(Alwaye, Kerala)

This factory is now entirely owned by the Government of India.

The subscribed capital is Rs. one crore.

The factory started production in July 1952. The Plant now processes 3,000 tons of Monazite per annum. The main products are Cerium Compounds, *viz.*, Mixed Rare Earths Chloride, Mixed Rare Earths Carbonate and Crude Cerium Hydroxide. Cerium Oxide, Rare Earths Floride and Cerium Naphthenate are also manufactured in small quantities. Trisodium Phosphate is obtained as a by-product.

The Cerium Compounds are exported for use in the manufacture of Misch Metal, Nodular Cast Iron Alloys for Jet Engines, Pyrophoric alloys, Enamelling of Cast Iron and Steel, Polishing of Optical Glass, Tinting of Optical Glass, Lenses for aerial photography cameras, Tanning of leather, Carbon for arc lamps, etc.

The Trisodium Phosphate has multiple uses and is being used in textile, paper and other mills and industries for dyeing, bleaching, softening of industrial water, in boilers and for general cleaning purposes in mills, factories, hospitals, homes, etc.

The Company also operates the Thorium Plant of the Government of India at Bombay where Thorium Compounds are manufactured from raw material obtained at the Alwaye Plant.

Thorium Compounds are sold by the Company on behalf of the Department of Atomic Energy, Government of India.

The Company made a profit of Rs. 16,89,235 in 1963-64 as against a profit of Rs. 11,15,953 during the previous year.

The Company earned foreign exchange worth Rs. 52 lakhs during the year by the sale of rare earths chloride abroad.

*Managing Director*, G. Rajagopal Menon.

*Manager, Alwaye Establishment*, K. V. N. Nayar. *Chief Accounts Officer*, N. D. Hansotia. *Works Manager*, C. M. Mani.

*Regd. Office :* Army & Navy Bldg., 148, Mahatma Gandhi Road, Bombay 1.

## INDIAN TELEPHONE INDUSTRIES LIMITED

(Under the Ministry of Communications)

(Dooravani Nagar, Bangalore 16, Mysore State)
Railway Station : Krishnarajapuram
(Southern Railway)

*Tel. Address :* "Phonindustry."
*Telephone :* 75111 (7 lines).

*Regional Offices, Sales & Service :* "Advent", Foreshore Road, Bombay 1 ; 22 Chittaranjan Avenue, United India Life Assurance Bldgs., Calcutta 13 ; 12-B, Netaji Subbash Marg, Daryaganj, Delhi 6 ; Flat No. 4-A, Agurchand Mansions, No. 35, Mount Road, Madras 2.

Established in 1948 at Bangalore as a Departmental Concern. Subsequently, converted into a Private Limited concern in 1950.

*Directors :* S. Lall (*Chairman*) ; L. C. Jain ; S. K. Kanjilal ; C. P. Vasudevan ; Brig. B. J. Shahaney ; R. L. Kirloskar ; Kulwani Rai ; D. P. Mandelia ; Eugune Van Dyek ; T. Shamanna, I.A.S., S. D. Nargolwala, I.C.S., U. Shankar (*Managing Director*), N. V. Shenoi (*General Manger*), P. K. Verghese (*Joint General Manager*), A. A. Krishnan, I.A. & A.S. (*Financial & Accounting Manager*), B. S. Kulkarni (*Works Manager*), S. Sankara Raman (*Transmission Works Manager*), H. J. Mirchandani (*Chief Engineer, Research*), D. V. M'Rao (*Secretary*).

CAPITAL : Authorised : Rs. 5,00,00,000. Issued, Subscribed & Paid-up : Rs. 4,43,00,000. (Government of India holding 80·98 per cent of the shares, Government of Mysore holding 7·05 per cent, Automatic Telephone & Electric Co. of England 3·91 per cent and the balance of 8·06 per cent by the International Standard Electric Corporation of U.S.A.).

The factory manufactures all kinds of telecommunication equipment including the following :

*All types of Telephones :* Auto, CB, Magneto, Portable Switching Telephones for Internal & External Systems etc., Ampliphones, Loud Speaking Telephones, Secrecy Telephones ; 10 Way Intercommunication System, Duophones ; Main Automatic Exchanges (Strowger type) ; Private Automatic Exchanges, Small Automatic Exchanges, Rural Automatic Exchanges (ranging from 10 lines to 600 lines) ; Private Automatic Branch Exchanges : 6 lines and above.

*Transmission Equipment :* 12 Channel Open Wire Carrier Systems ; 12 Channel Cable Carrier Systems ; 8 Channel Carrier Telephone Systems ; 8 Channel Carrier Repeaters ; Stackable 3 Channel Carrier System ; Repeater Attenuators ; D. B. Meters ; V. F. Repeaters ; Jack Panels ; Channel Terminating Bays ; Watching Transformers—Indoor and Outdoor patterns ; Speech plus DX, 3DX and 4DX ; By Pass Filters ; 900 Cycles Oscillator ; 4th Channel Equipment ; Inband Signalling Units ; Channel Displacer and Restorer ; Loading Coils ; Attenuators ; Frequency Modulated VFT Equipment 3 Channel to 24 Channel ; Special Apparatus Bays for VFT ; VF Amplifiers ; 6 Seconds Pulse Generators ; Repeating Coils ; Terminal equipments for Railway Control ; Way Station equipment for Railway Control ; Trainwire and Block Ball equipment for Railway Control ; Block Filters for Railway Control ; Speech Conversion Sets for Railway Control ; 4W/2W Junction equipments ; 2W/1W Junction equipments ; 2W/4W Junction equipments ; A.C. Telegraph equipment ; V.F. equipment for Railway Control ; Filters of various types ; Signalling Regenerative Repeaters ; and 1620 Cycles Oscillators.

*Miscellaneous :* Switchboards for blind operators ; Master Clocks ; Process Timers ; Fan condensers ; Flasher Units for Automobiles ; Supervisory Remote Control for AC/DC Traction ; and Miniature Receivers for hearing aids.

During 1964-65, sales of the company exceeded Rs. 10 crores.

### Production (1964-65).

The factory has produced during 1964-65 amongst others, 1,55,304 Telephones, and 1,34,610 Exchange Lines, which include main automatic exchanges, small automatic exchanges, private automatic branch exchanges, etc. On the transmission side, equipment worth Rs. 233 lakhs were produced during 1964-65.

ITI has put on its production line a new telephone instrument named 'Priyadarshini' smaller in size, lighter in weight, more elegant, with a knob at the botton to control the volume.

Apart from the tele-communication equipment, the factory is equipped for producing all types of light turned parts, die-castings, paper insulated condensers, silver mica capacitors. The surplus capacity for the production of such items is being devoted to meet the requirements of other industries both in the public and private sectors. The manufacture of road signalling equipment has also been taken up by the factory since 1958.

An Agreement has been entered into with Messrs. International Standard Electric Corporation of New York, U.S.A. and Bell Telephone Manufacturing Company of Antwerp, Belgium, for undertaking the manufacture of Crossbar type (Pentaconta) of Switching Equipment in Indian Telephone Industries at Bangalore. About 5,000 lines of Crossbar type of equipment have been scheduled to be supplied by the middle of 1965-66.

It has been estimated that the company's production has enabled the country to save over Rs. 2·5 crores of foreign exchange yearly and it is hoped that this figure will go up in the years to come.

The company is also paying considerable attention for the export trade for marketing its products in foreign countries thereby contributing its share in earning the vital foreign exchange needed by the country. Equipment worth Rs. 7·5 lakhs were supplied to Ceylon, Nepal, Kuwait, Malaysia, Sudan, Burma, Iraq, Somali Republic, Pakistan, Saigon, Belgium and Bhutan during 1964-65.

A suggestion scheme was introduced in the I.T.I. for encouraging initiative and new ideas among workers. As many as 89 valuable suggestions were accepted and a sum of Rs. 1,495 was granted as rewards to the employees.

## INSTRUMENTATION LTD.

(Ministry of Industry & Supply)
Annexe, Circuit House
Kota (Rajasthan)

Instrumentation Limited is a private company, registered in Jaipur (Rajasthan) on March 21, 1964 with its headquarters at Kota. The authorised capital of the company is Rs. 7 crores divided into 70,000 equity shares of Rs. 1,000 each. The company is responsible for the establishment of Precision Instruments Plant at Kota and Mechanical Instruments Plant at Palghat. The Kota plant will manufacture electro-magnetic and electronic instruments whereas the Palghat plant is being designed for

the production of mechanical, hydraulic and pneumatic instruments. The production programme of the two plants are designed to be complementary so as to supply complete systems of indicating, recording and controlling devices for industries. Both these plants are being put up with the technical and financial assistance extended by the Soviet Union.

The projects are in a preliminary stage of implementation. The construction work at the Kota plant site has commenced. The annual output of this plant will be about Rs. 11·5 crores when it achieves full production. The Palghat plant is expected to produce about Rs. 8 crores worth of instruments annually.

*Board of Directors :* S. S. Kumar (*Chairman*); S. S. Jagota, M. K. Mehta, Dr. P. S. Gill, M. M. Mehta, C. Balasubramaniam, A. R. Ravi Varma (*General Manager*).

## INTEGRAL COACH FACTORY

Perambur, Madras.

(Under the Ministry of Railways)

The Integral Coach Factory at Perambur, a suburb of Madras, is one of the largest Coach Building Units in the world.

Construction started in the latter half of 1952 and took about three years to be completed. The construction of the factory was done in collaboration with Messrs. Swiss Car and Elevator Manufacturing Corporation Ltd., Schlieren, Zurich, Switzerland. The first coach was turned out on October 2, 1955.

The thousandth coach rolled out on January 22, 1960.

The type of coaches manufactured in the factory, known as integral coaches is of a modern light weight design incorporating anti-telescopic properties in the event of an accident.

The factory was to turn out 350 coach shells per year by 1960. However as the following table will show, the target was achieved very much earlier and production has been increasing constantly.

| Period | Outturn |
|---|---|
| April 1956–March 1957 .. .. | 88 |
| April 1957–March 1958 .. .. | 222 |
| April 1958–March 1959 .. .. | 381 |
| April 1959–March 1960 .. .. | 447 |
| April 1960–March 1961 .. .. | 583 |
| April 1961–March 1962 .. .. | 598 |
| April 1962–March 1963 .. .. | 600 |
| April 1963–March 1964 .. .. | 605 |
| April 1964–March 1965 .. .. | 632 |

Upto end of March 1965, 4,168 shells have been manufactured out of which 2,318 have been furnished in the factory itself.

The factory was producing only third class coaches and has now begun to manufacture third-class-cum-luggage and brake-vans, third class sleeper coaches, first class coaches, electrical multiple units, trailers first class for metre-gauge and motor coaches. A prototype twin diesel railcar was also manufactured and handed over to Southern Railway.

*Furnishing :* The original intention was that the Integral Coach Factory would produce only shells and the railway workshops shall furnish them. Later on, it was decided to furnish the coaches there itself. A separate furnishing unit, costing Rs. 3·69 crores was inaugurated on Oct. 2, 1962. The unit is now furnishing all the shells that are being turned out from the Shell Division.

*Cost of the Coach :* With increased outturn and improvement in the skill and technical know-how of the staff, the cost of production of coaches has been systematically reduced. The latest cost of production of a third class shell is only about Rs. 70,000 as against Rs. 1,86,000 in 1955. This cost is very much lower than its ex-works price at Switzerland of Rs. 107,000. Out of Rs. 1,10,000 worth of material required for a third class furnished coach, about Rs. 25,000 worth, mainly steel, is imported. Formerly materials worth Rs. 40,000 were being imported.

*Amenities :* A Colony of about 1,000 quarters has been provided to accommodate the essential staff with modern amenities such as Elementary and High Schools, Children's Park, a Recreation Club, a Co-operative Store, Post Office, Shopping Centre, Dispensary and an open air theatre for the cultural recreational activities of employees. The main hospital is about 1½ miles from the colony. All Railway staff and their families are given free medical aid.

There is a Welfare Organisation to look after the welfare of the employees, a staff council for suggesting improvements in working conditions and production methods. Staff members who give valuable suggestions are awarded. Every encouragement is given to the staff for participating in sports and games. The factory is very prominent in sporting activities of the south, particularly in foot-ball, hockey and volley ball.

The total number of employees on the rolls is 9,997 (March, 1965).

*General Manager :* I. Hydari; *Financial Adviser and Chief Accounts Officer :* D. Sandilya; *Chief Mechanical Engineer :* R. D. Nadirshaw; *Dy. Chief Mechanical Engineer (Shell) :* K. C. Bansal; *Dy. Chief Mechanical Engineer (Fur.)* P. V. Ramamurthy; *Dy. Chief Mechanical Engineer (Designs) :* U. A. Kamath; *Dy. Controller of Stores :* Sudershan Lall; *Dy. Chief Electrical Engineer :* S. Sarath; *Secretary to General Manager :* R. Narasimhan.

## KOLAR GOLD MINING UNDERTAKINGS

Kolar Gold Fields, Mysore State

Established : 1880. Formerly a British company, the mines were nationalised by the Government of Mysore in 1956. They were taken over by the Government of India on 1st Dec. 1962. It is under the administrative control of the Department of Economic Affairs, Ministry of Finance, Government of India. The mines working at present are : Mysore/Champion Reef Amalgamated Mine and Nundydroog Mine.

Capital Investment (fixed) : Rs. 301·49 lakhs.

No. of workmen : about 14,000.

The gold production during 1964-65 was 38,46,104 grammes. As from 1-12-1962, being the date of take over by the Central Government, the gold is valued at IMF rate of Rs. 53·58 per 10 grammes. On this basis, the value of gold produced (45,99,432 grammes) for the 16 months period Dec. 1962 to March 1964 was Rs. 247·97 lakhs.

The Undertakings' development schemes during the Third Plan period will involve Rs. 150 lakhs.

*Management :* The management of the Undertakings is vested in the Board of Management constituted by the Government of India of which the Joint Secretary, Ministry of Finance, Dept. of Economic Affairs, Govt. of India, is the Chairman.

*Managing Director :* M. H. Parthasarathy, I.A.S.

*Secretary,* K. S. Nair.

*Consulting Engineers :* John Taylor & Sons.

## MACHINE-TOOL PROTOTYPE FACTORY, AMBERNATH

(Under the Ministry of Defence)

The Machine-tool Prototype Factory at Ambernath near Bombay was set up in 1953 by the Ministry of Defence, Government of India, under the Director-General, Ordnance Factories. It was a pioneer project to design and develop ordnance weapons as well as machine tools.

Since its inception the factory has established production of several types of precision machine tools of its own design, and supplied these to various Government establishments and industry. The planning for bulk production of truck and tractor components for Shaktiman was undertaken in 1958. This is now the main production activity of the factory.

To overcome the shortage of skilled artisans necessary for the production of armaments, a Training School has been attached to M.P.F. since its inception. The school helps to meet the requirements of other ordnance factories also.

## MAZAGON DOCK LIMITED

Mazagon, Bombay 10.

(Under the Ministry of Defence)

On 14th May 1960, one of the biggest British Marine and Industrial ventures in this country became a National Undertaking when Mazagon Dock Ltd. was acquired by the Central Government. Situated at Bombay in the State of Maharashtra, the Mazagon Dock is Western India's leading Ship-Repairing and Ship-Building concern. Its history can be traced to 18th century when the first dry dock was completed at Mazagon.

Mazagon Dock is fully equipped to carry out all types of major repairs to Passenger Ships, Tankers and Cargo Ships and maintains a round the clock, 7 days-a-week repair service. During the year 1964-65 Mazagon Dock repaired a total of 540 ships. The number of vessels under foreign flag handled during the year was approximately 316. The yard is now being modernized and expanded at an estimated cost of Rs. four crores.

Mazagon Dock Limited has three dry docks—Ritchie, Mogul and Mazagon.

| Name of Dock | Extreme Length | Length on Keel Blocks | Breadth at Altars | Depth of water at S.M.H.W. |
|---|---|---|---|---|
| RITCHIE .. .. .. | 495′ | 466′ | 62′-7″ | 16′ |
| MOGUL .. .. .. .. | 424′ | 406′-9″ | 58′ | 14′ |
| MAZAGON .. .. .. | 152′ | 126′-3″ | 34′ | 7′ |

Mazagon Dock Limited employs about 1,000 workers. The Supervisory Staffs number about 115.

Besides repairs, Mazagon Dock also builds ships. It has four building berths—two open and two covered. During 1964-65, Mazagon Dock delivered one sullage barge, three steam tugs, one police launch, one cargo-cum-passenger vessel, one motor launch and 660 Assault Boats for the army.

Mazagon Dock has plans to convert the Kasara Basin in its North Yard into an impounded wet basin to provide alongside berths for ships. These berths can be used for repairing ships, as also for fitting out new ones.

Although repairing and building of ships are the major activities of Mazagon Dock, it also undertakes steel fabrication work, ferrous and non-ferrous foundry work, steel forgings, electrical and automobile work, all types of timber construction and general engineering work. These are done with exactitude under fully qualified supervisors.

The Mazagon Dock has been the first organization to build Burshane gas tanks of ten ton capacity. The Company also manufactures, both horizontal and vertical MAZDOCK Crude Oil Cold Starting Engines with horse power ranging between six and twenty.

The Company runs an Apprentice School and has a scholarship scheme under which children of employees getting a monthly salary below Rs. 400 are given monetary aid to help them attend colleges. The Company subsidizes the Workers' Cooperative Canteen too.

Mazagon Dock made a profit of Rs. 14·46 lakhs for the year 1963-64, after charging depreciation of Rs. 3·88 lakhs, Rs. 6·73 lakhs bonus to employees, Rs. 1·37 lakhs for gratuities and Rs. ten lakhs for taxation. The total turnover of the Company during this year was Rs. 438·31 lakhs. The company earned foreign exchange of Rs. 88 lakhs by repairing foreign ships. The increase in ship-building activity has helped save valuable foreign exchange for the nation.

In April 1962, Mazagon Dock was entrusted with the reponsibility of reactivating and working the shipyard known as Estaleiros Navais de Goa at Vasco da Gama (Goa). The Company continues to employ all workers of the old yard. It has completed incomplete civil engineering works, procured plant and machinery to provide working capital and has equipped the yard to carry out repairs to ore-carrying barges and other similar craft.

*Managing Director:* Rear-Admiral S. M. Nanda.

## NAHAN FOUNDRY LTD.

(Nahan, Sirmur District, Himachal Pradesh).

This was started in 1875 and has been continuously expanded.

The authorised capital is Rs. one crore and the paid-up capital Rs. 40 lakhs. The number of persons employed is about 600 at Nahan and about 150 in the agencies.

Production consists of improved type of cane crushers, bullock as well as power driven, centrifugal pumps; improved types of ploughs; cornsheller machines; harrows; and other miscellaneous items. The Foundry undertakes quality casting work for P & T. DG S & D, Public Health and Railways. Manufacture of electric Motors from ½ H.P. to 20 H.P. of ISI certification mark has been taken up.

Casting during 1963-64 was 2,803 tonnes. During the year 293 electric motors of various sizes were also manufactured.

It is managed as a private limited company (which took over on Jan. 1, 1953) with the President and his nominees holding all the shares. The affairs are looked after by a Board of Directors appointed by the President of India and is under the administrative control of the Ministry of Industry. It is a pioneer industry in northern India for the manufacture of cane crushers and "Sultan" is a speciality all over India.

*General Manager*, S. K. Caroli; *Managers:* P. K. Somanadhan and V. S. Aggarwal.

## NATIONAL INSTRUMENTS LTD.

(1/1, Raja Subodh Mullick Road, Jadavpur, Calcutta 32).

Total investment Rs. 1·44 crores. Value of production and repair for 1964-65 Rs. 98·31 lakhs. Number of persons employed 1,273.

Sales and miscellaneous income rose from Rs. 79·99 lakhs in 1962-63 to Rs. 101·57 lakhs in 1964-65. The expected profit of the company for 1964-65 was about Rs. 15 lakhs, after charging depreciation but before income tax.

This is a Government of India Undertaking under the Ministry of Industry and Supply manufacturing and repairing scientific, surveying, [illegible] and medical diagnostic instruments and appliances.

The principal products of the Undertaking are surveying instruments such as Theodolites and Levels of sorts, Prismatic Compasses etc., drawing office equipments such as Drafting Machines, Pantagraphs etc., measuring instruments such as Profile Projectors, Pressure and Vacuum Gauges, Thermometers, Hydrometers and a host of other items. Productions of Clinical Thermometer, Microscope and Optic Theodolite have been established in collaboration with some Japanese and Hungarian firms respectively.

The Ophthalmic Glass Project now under construction at Durgapur is expected to be completed by 1967. When in full production, this unit will produce 300 tons of Ophthalmic Glass and 10 million Ophthalmic lenses per annum.

Besides its own training scheme, the Company has provided training facilities to the various categories of trainees under the Central as well as State Government Training Schemes and the training scheme under the Apprenticeship Act.

The development programme of this company is fashioned to serve as a nucleus in future for the manufacture of scientific and precision instruments, which are at present imported.

The following instruments are under development: Sphygmomanometer; Ophthalmoscope; Thickness measuring gauge of various range; Pressure gauges of various range and type; Microscopes of various models and magnification.

*Managing Director*, N. Majumder, B.Sc. (Cal.), M.Sc. (Tech.) (Manch.), A.M.C.T. (Manch.).

*Dy. General Manager:* K. S. Rajagopalan.

## NEYVELI LIGNITE CORPORATION LTD.

(Ministry of Mines & Fuel, Government of India)
Neyveli 1.

This is a Rs. 141 crore project.

Preliminary investigations of the extensive lignite deposits which occur at Neyveli in the South Arcot District of Madras were undertaken first by the Geological Survey of India and then by the Madras Government. The administrative control of the project was taken over by the Central Govt. with effect from 1965.

These preliminary investigations, including large-scale pumping tests, having proved the feasibility of economic mining and utilisation of the Neyveli lignite, the Government accepted, in principle, the execution of the Integrated Lignite Project and sanctioned the mining part of the Project. The cost of the mining scheme is estimated at about Rs. 30 crores, including its share of the cost of the Township and the common services.

The Integrated Project now envisages the mining of 5·5 million tonnes of lignite per annum to be utilised for:

(*a*) production of 4,00,000 kW of power in a thermal power station using lignite as fuel;

(*b*) production of 1,52,000 tonnes of urea with a nitrogen content of 70,000 tonnes per annum; and

(*c*) manufacture of 7,10,000 tonnes of raw lignite briquettes per annum to be processed in a low temperature carbonising plant to yield 380,000 tonnes of carbonised briquettes per annum for use as domestic and industrial fuel, 1,29,000 tonnes of char fines, 37,000 tonnes of tar, 20,100 tonnes of middle oil, 5,900 tonnes of kerosene, 300 tonnes of light oil, 1,340 tonnes of carbolic acid, 1,400 tonnes of polyvalent phenols, 580 tonnes of ortho cresol, 1,340 tonnes of M.P. cresol and 585 tonnes of xylenols; and

(*d*) production of 6,000 tonnes of washed white clay.

### Mining Scheme

A detailed mine plan for the development and production phases of the mine submitted by the technical consultants was sanctioned by the Govt. The scheme was inaugurated by the late Prime Minister Mr. Nehru on May 20, 1957. Messrs. Powell Duffryn Technical Services Ltd. were appointed as consultants for the Mining Scheme in 1957 for a period of 3½ years.

All the conventional equipment and the specialised mining machinery were received at the site of the project and commissioned. In the initial stages the annual production was estimated at 3·5 million tonnes. The ultimate target is 6.3. million tonnes per year.

The total quantity of overburden removed till the end of March, 1965 was 32·5 million cubic metres. During 1964-65, the quantity of lignite raised was 1·6 million tonnes.

### Thermal Power Station Scheme

The Central Water and Power Commission drew up the Project Report for the 250 MW. Thermal Power Station, the most important constituent scheme in the Integrated Lignite Project. This Scheme is one of the schemes financed from the credit offered by the U.S.S.R. in respect of which an agreement was signed in Delhi in 1957. The estimated cost of the scheme is Rs. 29 crores. The power station now has five units of 50,000 kW each under the first stage of development. The first unit of the Thermal Power Station went on stream in May 1962. The fifth and the last unit under the first stage was commissioned in April 1964.

The Power Station is to be expanded from 2,50,000 kW to 4,00,000 kW by adding in the first phase of expansion a 50,000 kW unit and a 1,00,000 kW unit, to the existing station. The second phase of expansion envisages addition of two more units of 1,00,000 kW each. The ultimate installed capacity of this power station will thus be 6,00,000 kW.

Upto the end of March, 1965 this power station has generated 2,722 million kW hours of power of which 2,156 million kW hours have been pumped into the Madras State Electricity Grid.

### Fertilizer Scheme

With the collaboration of Messrs. Pintsch Bamag and Messrs. Linde of West Germany and Messrs. Ansaldo of Italy, the Fertilizer Scheme is attaining the stage of fruition. The total capital cost of the scheme has been estimated at Rs. 36 crores inclusive of its share of the cost of the Township and the common services. It is expected to start full production by Feb. 1966.

The Urea plant at Neyveli will be the biggest of its kind in the world and the first to gasify lignite to produce urea—a chemical fertiliser with 46 per cent nitrogen content.

### Briquetting and Carbonising

Tests conducted on bulk samples of Neyveli lignite in West German laboratories have established that the lignite is of a high quality, capable of yielding satisfactory briquettes, both raw and carbonised on a commercial scale. Further tests on a pilot plant scale were conducted at Neyveli with the help of pilot plant equipment, received under the T.C.M. aid, for determining the optimum conditions under which the lignite should be briquetted and carbonised. Based on the results of the tests, a Project Report was prepared. The briquetting and carbonisation scheme costing Rs. 28 crores including its share of the cost of the township and common services was sanctioned in March 1961 and contracts for the supply and erection of the plant were given to a consortium of West German firms Buckan Wolf, Lurgi and Siemens. This plant was expected to go into full production in Dec. 1965.

Production of carbonised briquettes at high temperature with as little volatile matter as possible for use in the reduction of low grade iron ores in Salem has been successfully proved by large scale tests on Neyveli lignite in East Germany.

*Clay Washing Scheme:* China clay of very good quality occurs immediately above the lignite seam. A Clay Washing Plant with an annual capacity of 6,000 tonnes has been established at

a cost of Rs. 14·00 lakhs. The plant was commissioned for commercial production in 1961.

A new township consisting of 31 blocks with all modern amenities, is almost complete to accommodate offices, factories, staff and workers of the different units of the Integrated Project. By the end of May, 1965, over 9,000 quarters had been completed. Further work is in progress.

Besides this, there are also about 1,400 quarters in the temporary colony.

One full time senior labour welfare officer and three full time labour welfare officers have been appointed to look after the interests of the workers. There is also an Amenities Officer to look after the amenities of the residents. A Public Relations Dept. is also functioning.

The Corporation has opened two high schools, 4 integrated schools, 8 elementary schools and 2 kindergarten schools for the benefit of the children of its employees. There is a dispensary and maternity centre in the Township besides a project hospital in the temporary colony. A 158 bedded hospital with all modern equipment has been opened.

A library and clubs for men and women are functioning in the Township besides an auditorium, a cinema theatre and a dairy farm.

The ownership, management and administration of the Neyveli lignite project has been entrusted to a Government of India-owned private limited company, Neyveli Lignite Corporation Ltd., which started functioning on 6th December 1956 and has its registered office at Neyveli 1, South Arcot District.

*Chairman*. K. N. Subbaraman.

## OPTICAL GLASS

Central Glass and Ceramic Research Institute, Calcutta 32.

Being the key material of a wide range of observation instruments employed in modern defence, the processes for the manufacture of optical glass are closely preserved secrets of about half a dozen countries of the world. Towards the middle of 1956, when no satisfactory basis for technical collaboration with foreign manufacturing firms could be worked out by the Government, the Planning Commission assigned the task of producing optical glass to the Central Glass and Ceramic Research Institute, P.O. Jadavpur University, Calcutta 32.

It went into production in Aug. 1960 and the major types of optical glass required in the country have already been produced and are on regular sale to consumers. The Ministry of Defence, who are the principal consumers, have undertaken inspection of optical glass produced and one of their units is located in the premises of the plant.

The country has been relieved of its dependence on imports for a vitally strategic material and it has been achieved without the association of any foreign manufacturing firm.

## PYRITES AND CHEMICALS DEVELOPMENT CO., LTD.

Established on March 22, 1960. Registered Office : N-5, South Extension, Part I, Ring Road, New Delhi-3. Branch Offices : Amjhore, P.O. Banjari, Dist. Shahabad, Bihar ; K D Flats, Sindri, Dhanbad Dist.

Authorised Capital : Rs. 5 crores.

*Objects :* Raising, assembling and transporting of pyrites ore in such areas in India and elsewhere as the company may from time to time determine for sale or use and the manufacture of sulphur, sulphuric acid or other products requiring such ores.

*Activities :* (I) Exploitation and Mining Programme of pyrites ore.

### Reserves

The Amjhore pyrites occurs as a sedimentary bed within the Bigaigarh Shales of Vindhyan Formations. The deposit is a bed of almost pure massive iron pyrites. The thickness of the bed is barely 0·76 metre. The sulphur content in the raw ore is 33 per cent to 42 per cent. Detailed geological study and intensive exploitations were undertaken to ascertain the extent and quality of iron pyrites in Shahabad District, Bihar. Exploratory drilling was done for more than 15,000 feet and to supplement the results of drilling operations, exploratory pits and development headings were driven. The total reserves and grade of ore (proved and probable) in about 48 square miles of pyrites bearing ground area, are estimated to be 384 million tonnes.

### Mining Programme

Nowhere in India a thin bed like the one at Amjhore has ever been mined. A mining programme for an annual production of 2·4 lakh tons of pryites from Amjohre mines has been planned and action initiated to procure necessary machinery and equipment. The company expects to commence developing operations in 1965.

For beneficiation of pyrites, results of research work are very encouraging. There appears to be no serious difficulty in up-grading the ore to improve the sulphur content to 46 per cent or over.

### Sulphuric Acid

The company plans to set up a 400 tons per day capacity pyrites based sulphuric acid plant at Sindri to meet the requirements of Sindri Fertilizer Plant, Bihar State Superphosphate Factory and other potential consumers in that area.

### Sulphur

Efforts are being made to locate a suitable process for the extraction of elemental sulphur from Amjohre pyrites in consultation with various firms of repute in the world. A programme of research and development work with Amjhore pyrites has also been undertaken in India to evolve a process for the production of sulphur.

*Directors :* N. N. Kashyap (*Chairman*), S. Sahay (*Managing Director*), S. Samaddar, R. S. Gupta, S. N. Sahgal, R. T. Sinha, Bazle Karim, K. B. Rao, V. G. Gopal, Dr. G. P. Kane, Dr. K. S. Chari and Dr. M. D. Parekh.

## SURGICAL INSTRUMENTS FACTORY

Nundambakkam (Madras)

Establishment of a surgical instrument factory at Nundambakkam through the National Industrial Development Corporation with the Soviet collaboration has been taken up by the Government of India.

This is expected to produce 2·5 million pieces of surgical instruments of about 150 varieties annually.

## RAJASTHAN ATOMIC POWER PROJECT

Work on first unit (200 MW) of R.A.P.P. has commenced, and the construction of temporary facilities like offices, workshop, stores, power supply, temporary colony etc. has been completed. Orders for major equipment and contract for main civil works have been awarded and excavation is in progress.

The Planning Commission have approved expansion of the station by installation of a similar second unit.

The first unit of the station is expected to be in commercial operation by 1969.

## TARAPUR ATOMIC POWER STATION

The work on India's first atomic power station at Tarapur on the west coast of India, is now in full swing and the 380 MWE station is expected to be on full power operation by the end of 1967. The cost of power from this station will be cheaper than that of thermal power in this region. The station will consist of two reactors of the boiling water type, and is being built by the General Electric Company of the U.S.A. under a turn-key contract .

OTHER STATIONS : The Planning Commission has approved the proposal to build a third atomic power station of 4,00,000 kilowatts at Kalpakkam in Madras State. The proposal is now under the consideration of the Government (June 1965).

## WASHERIES

It has been estimated that by the end of the Third Five Year Plan the requirement of coal by the steel plants as charged to the coke ovens will be of the order of 11·32 million tonnes. Out of this, about 6·50 million tonnes will be required in terms of washed coal and the balance of 4·82 million tonnes will be met partly in the shape of superior grades of Jharia raw coals and partly by the blendable coals.

The washed coal requirement of 6·50 million tonnes is equivalent to about 9·90 million tonnes of raw coal. All this coal will be washed in the existing as well as the projected washeries.

The existing washeries are : Jamadoba and West Bokaro belonging to the Tatas with a capacity to wash 1·4 million tonnes and 0·43 million tonne of raw coal respectively ; the Lodna washery which supplies to the Indian Iron and Steel Co. has an input capacity of 0·40 million tonnes, the Durgapur washery which is an integral part of the Durgapur steel plant, with a capacity of 1·5 million tonnes of raw coal and the Kargali Washery of the National Coal Development Corporation which can handle about 2 million tonnes of raw coal at present.

In addition, HSL has set up 3 washeries at Dugda, Bhojudiah and Patherdih. (for details see under Hindustan Steel Ltd.).

During the Third Plan period the National Coal Development Corporation will set up washeries at Kathara, Gidih (Karanpura) and Sawang, with an input capacity of 3, 2·84, and 0·75 million tonnes of raw coal per annum respectively and expand the capacity of the existing Kargali washery to 2·72 million tonnes.

# STATE-OWNED OR STATE-AIDED

## ANDHRA PRADESH

### THE ANDHRA PAPER MILLS

(Rajahmundry).

The capital investment is Rs. 29 lakhs and production capacity is 10 tons a day. It is now under the management of a joint stock company from July 1964 managed by a Board of Directors. A scheme to increase the present production capacity of the Mills from 10 to 60 tons of paper is under way. The production of the mills is now confined mostly to unbleached, kraft papers and it is proposed to produce white writing/printing papers and wrapping paper, after implementation of the expansion scheme. An agreement has also been entered into with Messrs. Empacel, Paris for the supply of plant and machineries under the French Credit on deferred payment terms. Foreign machinery worth Rs. two crores had been received.

### ANDHRA PRADESH MINING CORPORATION

It was set up in 1962 as a wholly State-owned undertaking for systematic prospecting of various minerals in A.P. .Is engaged in the exploitation of iron-ores in the Krishna and Kurnool districts and Barytes in Khammam apart from high grade limestone in Kurnool district. It has also schemes for exploiting other minerals also.

A pilot mining project for asbestos and china clay, quartz mining and lime calcination projects are also proposed to be implemented by the Corporation. In collaboration with the private sector, the Corporation proposes to establish a

cement factory near Bonakaller and a company has been formed for the purpose.

### GOVERNMENT CERAMIC FACTORY
(Gudur, Nellore Dist.).

The Government Ceramic Factory, Gudur, has been producing sanitaryware and crockeryware only, till 1959. A scheme for expansion of the Government Ceramic Factory, Gudur was included in the Second Five Year Plan at a total cost of Rs. 12·60 lakhs, which was implemented by 1959. The production in the Government Ceramic Factory, Gudur has been doubled after its implementation. Production of high and low tension electrical insulators has also been commenced as an additional line of production to meet the requirements of the Government Electricity Department and the public from 1960.

The production of the factory was 5·43 lakh kilograms in 1963-64. During the Fourth Plan, it is proposed to expand the existing plant with foreign collaboration by 500 tonnes per annum.

### HYDERABAD TANNERIES LTD.
(Hyderabad).

Andhra Pradesh is India's largest single producer of hides, producing about 2 mil. cow hides, 1·3 mil. buffalo hides, 2·3 mil. sheep-skins and 1·5 mil. goat-skins, accounting for ⅛ of India's production. An Advisory Leather Board has been constituted for the development of leather industry.

While the value of raw hide is about Rs. 5 crores, the value of finished leather is of the order of Rs. 8·7 crores. The State Government has ordered registration of two Apex societies for development of leather in Hyderabad and Vijayawada.

A sum of Rs. 21·02 lakhs has been provided for development of leather industries during 1965-66.

### NIZAM SUGAR FACTORY

The Nizam Sugar Factory, a Govt. company with a paid-up capital of Rs. 146 lakhs, is the largest single sugar producing unit in the country. Its production was 59,900 tons in 1964. The factory's crushing capacity is 4,200 tons of sugarcane per day.

### PRAGA TOOLS CORPORATION
(Hyderabad).

The authorised capital is Rs. 1·35 crores. The State Govt. holds nearly 35 per cent of the Share Capital of the Company. The Union Government have a major share in the company and have also granted a long-term loan of Rs. 20 lakhs bearing interest at six per cent per annum. These funds are utilised to finance the company's expansion programme which was progressing, and production of C.V.A. drill chucks and tools cutter grinders was expected to commence shortly (May 1965). The company made a profit of Rs. ten lakhs during 1963-64.

It produces machine tools and accessories, precision tools, automobile parts, diesel parts, railway duplicates and accessories.

*Managing Director*, A. M. Kelkar.

### SINGARENI COLLIERIES

Coal is mined in the State by the Singareni Collieries Co. Ltd. from the coal fields at Kothagudium, Yellandu and Tandur. The company has a paid-up share capital of Rs. 400 lakhs subscribed by the Govt. of India and the State Govt. in the ratio of 40 : 60 respectively. On the average the company employs over 21,000 labourers. The collieries propose to raise their production of coal from 30 lakh tonnes at the end of the Second Plan to 61 lakh tonnes at the end of the Third Plan. The Company requires Rs. 25·83 crores for its expansion programme during 1961-66. The company made a profit of Rs 50·90 lakhs during 1963-64.

An agreement was signed with a Rumanian Company for an 18-megawatt thermal plant costing Rs. 1·18 crores to be commissioned by 1965-66.

### SYNTHETIC DRUGS PROJECT
Sanatnagar.

*(See under Indian Drugs and Pharmaceuticals Ltd.).*

Civil works on the Rs. 20-crore project are well under way on the 700-acre site.

## ASSAM

### ASEB METER WORKS
Short Round Road, Shillong.

A Rs. 60 lakh factory, an Assam State Electricity Board enterprise, for the manufacture of single phase house service meters and poly-phase meters, went into production in Jan. 1962.

The factory assembled 30,004 single phase meters in 1963-64. It is expected that the factory will start independent manufacture of meters by the end of 1965 with the target of 1,20,000 single phase and 18,000 poly-phase meters annually.

It has an employment potentiality of 400 persons. Besides meeting the entire requirements of the State, it will be able to supply considerable number of meters to other parts of the country.

### ASSAM GAS COMPANY LTD.
Shillong (Assam).

Authorised capital: Rs. 2 crores; paid-up capital: Rs. 51,88,900.

*Aims and objects :* Utilization of natural gas from the oil fields of Messrs. Oil India Limited at Naharkatiya and Moran in the district of Lakhimpur, as feed stock for petrochemical industries and as industrial and domestic fuels.

*Present activity :* Construction of a 14" diameter pipeline was completed to supply 18 million cubic feet of gas per day to the Thermal Power Station of Assam State Electricity Board at Namrup for generation of 69 MW of electric power and 8 million cubic feet of gas per day to the fertilizer factory of the Fertilizer Corporation of India for the manufacture of 1,00,000 tons of ammonium sulphate and 55,000 tons of urea.

*Future programme :* Setting up Petrochemical Industries and construction of a gas pipeline net work in the Lakhimpur district for distribution of gas to tea gardens, industrial units and for domestic use. if feasible.

### GOVERNMENT SHELLAC FACTORY
(Chaparmukh, Nowgong).

The factory was started in 1954 as a welfare measure for the Mikir tribesmen growing lac. The capital outlay is Rs. 2·5 lakhs. It handles 2,000 maunds of raw lac a year and provides work for 30 labourers with five on the establishment side. The target is 8,000 maunds a year.

## BIHAR

### BIHAR STATE INSULATOR FACTORY
(Near Ranchi).

The construction of High Tension Insulator Factory at Ranchi at a cost of Rs. 1·35 crores has been completed. This factory has been set up with Czechoslovak Technical collaboration. The factory designs and lay-out are among the most modern in the world. The factory has started production and is manufacturing transmission line insulators upto 132 kV and Bushings and Post insulators upto 32 kV, besides L.T. Pin, Shackle, Guy and Telephone insulators. When in full production it will save foreign exchange to the extent of Rs. 35 lakhs annually as high tension insulators are being mostly imported at present.

It is planned to double this factory and also undertake manufacture of quality malleable hardwares for the insulators by the end of the Third Plan. The factory will eventually provide employment to nearly 800 people when the extension stage is completed. A number of quarters for the employees of this factory have also been constructed with well laid out master-plan providing for open areas, play grounds, parks and shopping centres, so that the employees can enjoy all modern amenities.

### BIHAR STATE SUPERPHOSPHATE FACTORY
P.O. Sindri Institute, Dist. Dhanbad (Bihar).

The factory went into production in April 1958.

Present capacity of production: Single superphosphate — 18,000 tons per annum.

Installed capacity of plants: (*i*) 240 tons superphosphate per day; (*ii*) 25 tons of 100 per cent sulphuric acid per day. Total investment: Rs. 65 lakhs. No. of workers employed: About 180.

The unit has been transferred to the Bihar State Industrial Corporation Ltd. from 1961.

The Government of India have sanctioned a scheme of putting a 400-ton per day sulphuric acid plant from pyrites, near this factory. This acid plant will be under a new company called Pyrites and Chemicals Development Co., Ltd. Hundred tons sulphuric acid per day will be supplied to this factory by the above campany with the result that by the middle of 1966, this factory will be producing 72,000 tons of superphosphate per year, which will meet the requirement of Bihar State.

At present the factory produces between 20,000 and 25.000 tons of superphosphate a year by buying acid from outside.

*Works Manager*, M. S. Lakhmana, B.Sc., B.Sc. (Tech.).

## GUJARAT

### THE BHAVNAGAR PUBLIC DAIRY LTD.
Bhavnagar (Gujarat).

This State Government Undertaking was commissioned in 1957. It draws supplies of milk from producers co-operative societies within 30 miles radius. Apart from bottled milk, the dairy also manufactures practically all major by-products including ice-cream, on a small scale.

It handles about 5,000 litres of milk per day processed through a 220 gallons per hour pasteurising plant. 99 per cent of the share capital is invested by the State Government.

*Manager :* H. C. Mehta.

## JAMMU & KASHMIR

### COUNCIL OF SCIENTIFIC AND INDUSTRIAL RESEARCH
### DRUG RESEARCH LABORATORIES, RAJ BAGH, SRINAGAR.

The laboratory was started in 1956. Total investment is Rs. 6·30 lakhs and the number of persons employed is 74. The present production and the sales effected are valued at Rs. seven lakhs and Rs. eight lakhs respectively.

*Manager :* O. N. Channa.

### DRUG RESEARCH LABORATORIES
(Factories & Farms)
(CSIR)
(Jammu, Srinagar).

Belladonna concentrated extracts, Belladonna consumer goods, Belladonna plaster etc. Pyrethrum extract and cedarwood oil.

### GOVERNMENT SILK WEAVING FACTORY
(Raj Bagh, Srinagar).

It is the largest powerloom factory for the production of pure silk fabrics in India. The factory was started in 1938-39 with 33 looms and 1,872 spindles. It is now equipped with 124 looms and an up-to-date Throwing Plant of 6,000 spindles equipped for dyeing and printing by blocks.

Total investment: Rs. 34·27 lakhs. The factory provides employment on an average for 600 workers per day. No raw silk is produced in the factory. It produces only fabrics on an average 3·75 lakh metres per year.

### GOVERNMENT WOOLLEN MILLS
(Srinagar, Kashmir).

The mill was started in 1934-35 and purchased by the Govt. from a private firm in 1950. The total investment is Rs. 38·50 lakhs. The number of persons employed is 600. The average monthly production on the basis of 1962-63 working is — cloth 2,31,000 yards and yarn 4,54,000 lbs.

## KERALA

### COCHIN REFINERIES LTD.
(*Regd. Office:* Ravi Vihar, Kalathiparambil Road, Ernakulam-6, Kerala).

Incorporated as a public limited company on Sept. 6, 1963.

*Capital:* Authorised Rs. 15 crores; Paid-up Rs. 7 crores.

The company has been established under an agreement entered into by the Government of India with Messrs. Philips Petroleum Company of the State of Delaware, U.S.A. and Messrs. Duncan Brothers & Co. Ltd., Calcutta with the main object of constructing a complete modern petroleum refinery near Cochin in South India, with a design capacity to refine initially 50,000 barrels of crude oil each stream day and with an excess built in capacity upto 70,000 barrels a day.

The company has entered into a refinery construction contract with Messrs. Phillips Petroleum International Corporation, Panama and a technical service agreement with Messrs. Phillips Petroleum Company of Delaware, U.S.A. The refinery is expected to go on stream by Jan. 1966.

*Board of Directors:* N. N. Kashyap (*Chairman*); John W. Loy (*Managing Director*); Stanley Learned (Alternate — N. B. Vakil); S. S. Shiralkar; S. K. Guha; N. M. Patnaik; R. P. Goenka; K. P. K. Menon; Smt. A. K. Nafeesath Beevi.

### GOVERNMENT OIL FACTORY
(Kozhikode).

The Government Oil Factory was established in 1940 with a view to meeting the growing demands of the Defence Forces in India for Vitamin 'A & D' products. Regular production was started in 1943. The factory now produces various vitamin products such as Seagold blended shark liver oil, Adamin liquid high potency Vitamin Oil, adamin capsules, Stayfit liquid, Stayfit capsules and Veterinary Vitamin oil such as Univax and Trivax, etc. using up-to-date equipment and testing apparatus.

The capital investment as on 31st March 1965 was Rs. 4·2 lakhs and annual turnover Rs. 10·5 lakhs.

Net profit in 1964-65 amounted to Rs. 1·25 lakhs.

### KERALA GOVERNMENT CERAMICS
Kundara, Quilon.

Established in 1957 by the Kerala State Government as a State Owned industry for the production of superior porcelain crockery and electrical porcelain goods such as L.T. Insulators of all types with an electrical double tunnel kiln and other modern machinery. The latest type electric double tunnel kiln has been installed in the factory. The factory is situated near Kundara Railway Station.

Capital investment as on 31st March 1965 was Rs. 50 lakhs. Annual turnover is about Rs. 18 lakhs. Number of labourers 500.

### THE KERALA PREMO PIPE FACTORY LIMITED
Chavara (P.O.), Quilon District.

*Registered Office:* Kaudiar, Trivandrum 3.

This factory is a Kerala Government undertaking registered as a Joint Stock Concern on 12-9-1961. The capital outlay is Rs. 50 lakhs. In this factory prestressed high and low pressure concrete pipes and R.C.C. spun pipes are manufactured for water supply, drainage and irrigation. This factory is the only one of its kind in India. High pressure pipes can be designed and manufactured for any test pressure. The production capacity of the factory at present is 20 nos. prestressed concrete pipes and 300 nos. R.C.C. spun pipes per day.

The factory employs about 250 persons both skilled and unskilled and the office staff consists of 25 persons.

Another section for the manufacture of mosaic tiles and prestressed transmission poles is under consideration.

*Managing Director:* K. R. Warrier.

### KERALA SOAPS & OILS LTD.
(Hydrogenation Factory Division)
Calicut-5.

The work on the Factory was started in 1949 and completed in 1953 and incurred an expenditure of Rs. 18 lakhs. The factory is equipped with the most modern machinery. The production capacity of the plant is 10 tons of vanaspathi and 5 tons of refined oil per day. Regular production of refined oil and vanaspathi started in March 1958. This is the only hydrogenation factory in India in the public sector.

Nearly 60 persons are employed in this factory. The factory manufactures and markets Sudha Vanaspathi, Vimala Refined Oil and Hardened oil. This is owned by the Government of Kerala.

The Government has amalgamated this Factory with the Kerala Soap Institute and the Government Shark Liver Oil Factory under the "Kerala Soaps & Oils Ltd."

### KERALA SOAPS AND OILS LTD.
(Soap Institute Division)
Calicut-11.

Regular operation in this institute began in the year 1923. The institute manufactures several varieties of toilet soaps including the Kerala Sandalwood, Willingdon, Vep, Rose soaps etc. as also Wash-well and other varieties of bar soaps. The work of training of students in soap making is also undertaken.

The capital investment alone comes to about Rs. 16,00,000.

The capacity of the factory is about 450 tons per annum. But it is now being increased to 700 tons. The Works Manager is in immediate charge of the Institute. The General Manager, Kerala Soaps & Oils Ltd., Calicut-5 has an overall control. Agents have been appointed in almost all parts of India.

Turnover in 1964-65 was Rs. 17,00,000.

This Institute is a Division of the Joint Stock Company namely Kerala Soaps & Oils Ltd., Calicut-5 formed since Feb. 24, 1964.

*General Manager:* U. S. Kini.

### PALLATHRA BRICKS & TILES LTD.
P.O. Thirunallore, Shertallay.

Authorised Capital: Rs. 1,00,00,000; Issued Capital Rs. 11,00.000; Date of commencement November 15, 1958.

The first factory of the company has been completed and it was commissioned on May 11, 1963.

The object of the Company is to produce and distribute sand lime bricks, a new architectural brick of high strength and finish. The designed capacity of the factory is 44,000 bricks per working day of 16 hours.

The total employment potential is 200 workmen.

Provision for six more units to be started in the following centres *viz.* Kozhikode, Cannanore, Trichur, Punnapra near Alleppey, Quilon, Kottayam (with laterite powder) in Kerala involving a total cost of Rs. 98 lakhs is proposed to be made in the very near future.

### SRI KERALA VARMA AYURVEDIC CO-OPERATIVE PHARMACY & STORES LTD. NO. 4318.
Trichur.

The pharmacy and stores started functioning from March 1, 1959 on co-operative basis. They are the sole agents for the distribution of ayurvedic medicines to all the Government hospitals and dispensaries under the Department of Indigenous Medicine, Kerala State. Costly raw materials are obtained direct from Assam, Kashmir, Nepal and other places of origin. The medicines are being supplied to the departmental institutions as well as to the public through the sales depots of this concern at Trivandrum, Quilon, Alleppey, Kottayam, Ernakulam, Trichur, Palghat, Kozhikode and Cannanore.

The pharmacy now manufactures Kashaya choornams on a very large scale for the use of the Departmental institutions.

### TRACO CABLE COMPANY
Irimpanam, Ernakulam.

The Traco Cable Company Limited, Ernakulam, was incorporated in February, 1960 as a public limited company at Ernakulam. One of the main objects of the company is to carry on business as manufacturers and dealers in all kinds of wires and cables.

The company became a Government company under Section 617 of the Companies Act, with the Government of Kerala holding more than 75 per cent shares.

The Authorised Capital is Rs. 1,00,00,000 divided into 2,50,000 preference shares of Rs. 10 each and 7,50,000 equity shares of Rs. 10 each. A sum of Rs. 40,00,000 in equity shares has already been subscribed and paid up.

The company is managed by a Board of Directors.

The company has secured technical collaboration of Kelsey Engineering Ltd., North Vancouver, Canada.

The collaborators besides furnishing the company with the complete engineering design would also supply complete technical assistance and the latest know-how at all stages of manufacture.

The factory is located at Irimpanam, Ernakulam District, about 10 miles from the Cochin Port. The company has purchased 45 acres of land for the establishment of the factory. It has the advantage of having both road and backwater communication facilities.

The present licensed capacity is 36 million core yards. It proposes to manufacture both copper and aluminium wires and cables using new insulating materials and adopting the latest techniques.

The company is manufacturing P.V.C. insulated P.V.C. or rubber sheathed steel wire armoured and P.V.C. sheathed cables upto 50 sq. mm. in addition to ordinary P.V.C. cables both singled and multicore.

By installing the high productivity U.S. machines, the company expects to produce cables of high quality at most competitive international prices. The company hopes to export a major portion of its products.

### TRAVANCORE PLYWOOD INDUSTRIES
Punalur.

This is a factory started as a Public Company with Government support. Finally in 1947, Government bought all the shares of the company and became sole proprietor. The capital investment in buildings and machinery, etc. upto 1961 was about Rs. 10 lakhs. The factory now mainly produces commercial and tea chest plywood panels. The installed capacity of the machinery for the production of plywood is 3 million s.ft. of 4 m.m. plywood in single shift per year. It is also licensed to produce half a million sq. ft. of commercial plywood per annum. Besides, 50,000 sets of battens are also being

produced annually. The soft wood logs required for the manufacture of plywood are being delivered to the factory by the Forest Department. The plywood panels now produced in the factory find ready sales.

Annual turnover is about Rs. 12 lakhs and the capital investment as on 31st March 1964 was Rs. 15 lakhs. Net profit during 1963–64 amounted to Rs. 1 75 lakhs. The factory employs 120 daily rated workers and about 46 staff members and officers.

The concern is expected to be converted into a joint stock company in the immediate future.

*Gen. Manager*, T. J. Abraham.

### TRIVANDRUM RUBBER WORKS

(Chackai, Trivandrum 7).

(A Kerala State Undertaking).

Trivandrum Rubber Works Ltd. is a Kerala Government owned Company under which the former Travancore Rubber Works, Kerala Government Cycle Rim Factory and Kerala Cycles are now working as units. The Company is in the nature of a private Limited Company and the whole shares of the Company are held by the Government of Kerala. The Company has come into being with an authorised capital of Rs. 75 lakhs on 24-2-1964. At present there are 410 employees working in the three units of the Company.

The main products of the company are Rubber goods such as Cycle Tyres and Cycle Tubes, Hoses of all kinds, Latex goods, foams cushions etc., Cycle Rims and Cycles under the name Kerala Cycles. The Company is now exporting Cycle Rims to East African and other African countries.

Under the Third Five Year Plan a scheme for the modernisation and expansion of the Rubber Works is under implementation.

### TRIVANDRUM SPINNING MILLS LTD.

Balaramapuram.

A spinning mill, claimed to be the first in the public sector in India, was declared open on March 15, 1962, about ten miles from Trivandrum.

This mill which was started as a public sector undertaking was taken over by a Government Company formed for this purpose.

The mill has an installed capacity of 18,000 spindles and an expansion programme by installing another 7,000 spindles, is in progress.

### TRIVANDRUM TITANIUM PRODUCTS LTD.

Kochu Veli, Trivandrum-7 (Kerala)

A public limited company in which the Government of Kerala holds majority interest.

The factory is the only unit in India producing Titanium Dioxide pigments, an important intermediate for paint and many other consumer products. Started regular production in 1951 with a production capacity of 5 tonnes, but the production has since been stepped up to 18 M. tons per day.

Total capital investment: About Rs. two crores; annual turnover Rs. 180 lakhs; employment potential: over 600 persons. Schemes for further expansion are under active consideration (March 1965).

*Managing Director:* K. B. Warrier, I.A.S.

## MADHYA PRADESH

### MADHYA PRADESH LAGHU UDYOG NIGAM LIMITED

60, Baxi-Bagh, Post Box No. 86, Indore

*Gram:* 'LAGHUDYOG'.

Registered on 28th December 1961 with the main object of promoting the interest of the small-scale industries and helping their speedy development in the State. Started functioning from 1st February 1962 with an authorised capital of Rs. 20 lakhs and paid-up capital of Rs. 3 lakhs which has subsequently been fully paid up.

The Nigam has taken up the following activities:—(1) Procurement of raw-materials. It has started raw material depots at all the Divisional Headquarters of the State; (2) Marketing of goods produced by the small-scale industries; (3) Arranging supply of machines on hire-purchase in rural project area; (4) Construction of industrial estates and rural work sheds; and (5) It runs seven small industries on a commercial basis.

*Board of Directors:*

S. B. Lal, I.A.S. (*Chairman*): R. N. Gandhi, K. N. Dube, T M. Harkhawat, N. M. Bordia (*Managing Director*).

### THE NATIONAL NEWSPRINT AND PAPER MILLS LIMITED

(Nepanagar, Nimar Dist., Madhya Pradesh).

The mills are situated on the main Bombay-Itarsi-Delhi line about 27 miles from Khandwa and 17 miles from Burhanpur.

The Company is a limited concern with a share capital of Rs. five crores. Of the shares 51 per cent are held by the Union Government and 34 per cent by the Madhya Pradesh Government. The balance shares are held by shareholders from the public numbering about 17,000.

Newsprint started production from cent per cent indigenous raw materials from 29th December 1955. The rated capacity of the plants is 30,000 tons yearly which was attained in Dec. 1962. The production during 1963-64 was 30,078 tonnes as against 26,515 tonnes in 1962-63. The total revenue from sales during 1963-64 was Rs. 318·08 lakhs. The Project has cost about six crores of rupees. The company made a net profit of Rs. 50·90 lakhs during 1963-64.

There are 1,351 workers working on monthly salary. When the expansion programmes are completed at a cost of Rs. eight crores, production would be raised to 75,000 tons a year.

There are ten members on the Board of Directors including the Chairman and the Managing Director.

*Chairman, Board of Directors*, Sir A. Ramaswami Mudaliar.

*Managing Director*, P. S. Kothari. *Deputy General Manager and Secretary*, P. L. Singhania.

## MADRAS

### WOOL PROCESSING CENTRE

Vinnamangalam, Minnur Post (Madras).

The Wool Processing Centre, a joint venture of the Governments of Madras and Mysore is processing tannery wool/hairs, bristles to meet the requirements of drugget, carpet and felt manufacturers of India and abroad. The production capacity is 750 tonnes per year.

The unit has been functioning since 1960 and is controlled by the Director of Industries & Commerce, Madras.

*Officer-in-charge:* T. V. Veeraswamy, B.Sc. (Text).

## MAHARASHTRA

### MANGANESE ORE (INDIA) LTD.

3, Mount Road-Extension, Nagpur.

Manganese Ore (India) Limited was formed by an agreement dated June 1962 between the President of India and the Central Provinces Manganese Ore Company Limited, a company incorporated in U.K. Manganese mines in Nagpur, Bhandara and Balaghat districts except Dongri Buzurg which were previously being worked by the Central Provinces Manganese Ore Co. Ltd. were transferred to Manganese Ore (India) Ltd. and the company started its operation from July 1, 1962.

Authorised capital: Rs. six crores (March 1964); subscribed capital: Rs. 2,15,45,100 (March 1964). The Government of India together with the State Governments of Maharashtra and Madhya Pradesh hold 51 per cent of the issued capital and 49 per cent of the shares have been allotted to the Central Provinces Manganese Ore Co. Ltd.

The total number of workers employed by the Company at different mines is 15,947.

The output and sales of manganese ore during 1963-64 were 2,27,783 tons and 1,47,374 tons respectively.

*Managing Director:* R. W. A. Hansel.

## MYSORE

### THE GOVERNMENT CENTRAL INDUSTRIAL WORKSHOP

(Mysore Road, Bangalore 26).

Established : 1897.

Capital invested as on March 31, 1965: Rs. 46·18 lakhs.

No. of persons employed : 350.

Annual outturn : Rs. 22·18 lakhs.

The workshop was shifted to its new premises at Mysore Road on June 27, 1959. The expansion scheme including the construction of buildings and purchase of machinery has been implemented at a cost of Rs. 22 lakhs. The workshop is engaged in general engineering works such as manufacture of trusses, pistons, ferrous and non-ferrous castings, structurals, line materials and construction machinery including concrete mixers, wheel barrows, hand carts, tar boilers etc. In addition, prosposals are under way for progressively manufacturing road rollers.

Proposals are afoot to increase the annual outturn to Rs. 30 lakhs.

### GOVERNMENT ELECTRIC FACTORY

(Mysore Road, Bangalore).

Established : 1939.

Capital invested : 80 lakhs.

No. of persons employed : 960.

Annual outturn : Rs. 60 lakhs.

*Main products:* Transformers in sizes upto 1,000 kv A and voltages upto 33 KV to an aggregate of 100,000 KV A per annum.

### NEW GOVT. ELECTRIC FACTORY

Byappanahally, Bangalore.

Investment — 530 lakhs.

Employment potential—3,500.

*Main products :—*

(*i*) Manufacture of transformers in sizes upto 20,000 KV A and voltages upto 132 KV to an aggregate of 600,000 KV A per annum per single shift.

(*ii*) *Motors:* From fractional H.P. motors upto 1,500 H.P. for voltage rating upto 6·6 KV. The aggregate output will be 4,00,000 H.P. per annum, per single shift.

(*iii*) *Switchgear:* Motor starters, switches, circuit breakers upto 11 KV, switchboards, distribution boards, H.R.C. fuses etc., of the value of about Rs. 85,00,000 per annum per single shift.

It has been decided to convert the project into a company with the name of NGEF Limited with an authorised share capital of Rs. 5 crores and issued capital of Rs. 4 crores. To begin with the Mysore Government will pay upto 80 per cent of the issued capital. The balance of investment already made by the Government will be treated as loan. AEG of West Germany and the International Finance Corporation, Washington, will participate in the share capital.

### GOVERNMENT PORCELAIN FACTORY

(Science Institute, Bangalore).

Established : 1932

No. of persons employed: 1,200.

Annual outturn : Rs. 120 lakhs.

In view of the heavy demands on the capacity of the factory, its capacity of 2,500 tons per annum licensed in 1956 has been expanded to 3,600 tons in 1963 and steps are in progress to expand it to 5,000 tons. The factory is working in

collaboration with Messrs. NGK Insulators Ltd., of Japan who are the biggest producers of the best porcelain in the world. The production of the GPF is produced and tested by the same rigorous methods and guaranteed for the same performance as NGK Insulators of the corresponding categories. The present range of products is upto 132 KV according to the collaboration agreement of 1954. A fresh agreement is under negotiation to expand the range of products upto 220 KV which is expected to meet all the requirements of the country till the end of the fourth plan period, with rare exceptions of short lengths of 380 or 400 KV lines for which imported insulators would be more economical than setting up expensive machinery on a permanent basis at such an early stage.

## GOVERNMENT SANDALWOOD OIL FACTORIES

(Mysore South & Shimoga Town).

Established : Mysore 1917 and Shimoga 1944.

Capital : Rs. 60,70,000 (1963-64).

Number of persons employed : 330/

1963-64 outturn : 81,521 Kgs. of sandalwood oil valued at Rs. 1,21,35,517.

The expansion of the Shimoga Factory is over.

The scheme to equip the Sandalwood Oil Factory at Mysore with two new boilers is being implemented.

## GOVERNMENT SOAP FACTORY

Post Box No. 1031, Bangalore-12.
Established : 1918.

Capital invested : Rs. 57 lakhs.

No. of persons employed : 290.

Annual outturn : Rs. 1·25 crores.

The factory produces 2,000 tons of soap per annum. It also produces high class toilet soaps, household and laundry soaps, industrial soaps, toilet articles etc and C.P. Glycerine. Mysore Sandal Soap is their popular toilet soap.

## THE HUTTI GOLD MINES CO. LTD.

Hutti P.O. (*Via* Raichur-Deccan).

A company was floated in 1947, until when the operations were wholly financed by the then Government of Hyderabad. Production was commenced in 1948 and has steadily increased since that date. Current production is at the rate of 10,000 tons of ore treated with a recovery of 77,000 grammes of gold per month.

In 1955 plans were drawn up for an exploratory development programme, to be followed by an expansion programme, under the II and III Five Year Plans, for the production and treatment of 1,000 tons a day, which will put the mines on a profitable large scale basis. Production at the expanded rate is scheduled to commence early in 1967, when 3,10,000 tons of ore will be treated per annum for a recovery of about 1,930 kg. of gold.

## MAHABOOB SHAHI GULBARGA MILLS CO. LTD.

Gulbarga (Mysore State).

The mill was registered in July 1883 and was re-registered in Aug. 1888. The authorised share capital at present is Rs. 1·25 crores and subscribed capital is Rs. 71·2 lakhs. The mill became a Government company in 1962, as a result of the Government acquiring 51 per cent of the share capital.

The company employs a labour force of about 3,000. Its installed capacity is 35,140 spindles and 606 looms with dyeing, bleaching and finishing sections. The mill produces coarse and medium cloth.

*Managing Director :* C. S. Seshadri, I.A.S.;
*Secretary :* B. Lakshmana Rao.

## THE MYSORE CHROME TANNING CO. LTD.

Mysore Road, Bangalore-26.

The Mysore chrome Tanning Co. Ltd., Bangalore, originally known as the Mysore Tannery, is a pioneer chrome tanning company in South India. More than 52 per cent of the company's share capital is held by the Government of Mysore.

The company manufactures all kinds of chrome upper leathers, B.T. sole leathers, besides manufacturing leather goods such as ammunition boots for police and defence departments, air travel bags, document cases, suit cases, ladies hand bags, industrial leathers, washers for hydro-electric, turbines, safety belts and straps for hot line workers etc.

*Managing Director :* D. R. Gunduraj, B.A., B.Com., LL.B.

*Secretary :* S. Krishnappa, B.Com., B.L.

## THE MYSORE IRON AND STEEL LIMITED

(Bhadravathi, Shimoga Dist., Mysore State).

This Mysore State Government Project for the establishment of the Iron Industry was worked out during the years 1914-18 and this basic industrial enterprise started operations in January 1923. The Mysore Government has constituted this Works into a Corporation on the lines of a Private Limited Company, with effect from 1st April 1962.

The Company produces pig iron, cast iron pipes, plate sleepers, general foundry castings, merchant steel sections, steel castings, portland cement, slag cement, ferro-silicon, ferro-manganese and acetic acid. The turnover amounts to over Rs. seven crores per annum. The total sales during the year 1964-65 amounted to Rs. 10·30 crores.

The present annual output of several products is (in tonnes) ; Pig Iron 85,000 ; Mild Steel Sections 30,000; Balling hoops and thin rods 11,000 ; Cast Iron Pipes 26,500 ; Ferro-Silicon 20,000 ; Cast Iron Plate Sleepers 15,000 ; Cast Iron Castings 5,000 ; Steel Castings 2,000 ; Acetic Acid 270.

The Company has a well equipped Structural Shop for fabrication of steel structures, the annual capacity being 2,500 tonnes.

*Expansion Schemes :* Expansion of the existing Steel Plant by installing L.D. Steel converters and additional Rolling Mills to step up the production of Mild Steel to one lakh tons per annum is under implementation. The Government of India have approved the scheme for conversion of the Common Steel Expansion into an Alloy and Special steel Plant with a capacity of 77,000 tons of finished Special Steels at a cost of Rs. 10·71 crores in collaboration with Messrs. Bohler & Company of Austria in respect of know-how, patent rights etc. It is expected to reach an annual capacity of 80,000 tons to 2,00,000 tons by installing additional electric furnaces.

Total No. of employees : 9,772.

*Chairman :* K. Mallappa, B A., B.L., Minister for Industries and Commerce, Government of Mysore. *Vice-Chairman and Managing Director :* M. D. Shivananjappa, I.A.S. *General Manager :* T. Krishnappa, M.Sc., M.Met. *General Manager (P & D) :* B. Sheshadri Sharma, B.E. *Secretary :* K. Marulappa, M.A.

## MYSORE GOVERNMENT SILK WEAVING FACTORY

(Mysore).

Established : 1932.

Capital invested : Rs. 25·69 lakhs, as at the end of March 1964.

Number of persons employed : 258.

Annual outturn : Rs. 22 lakhs.

This factory is engaged in the manufacture of high grade 100 per cent re-reeled pure silk fabrics such as Crepe-de-chine, Georgettes, Satins, Sarees, Kerchieves, ties and other ladies wear.

New varieties such as Tom-tom, Fireplay, Navrang, Champion, Rainbow, Taffetta fabrics Scarves and Raw Silk fabrics etc., are also manufactured.

The factory has an expansion scheme costing Rs. 8·00 lakhs during the III Five Year Plan. For modernising the factory, import licence is under the consideration of Government of India (March 1965).

## MYSORE IMPLEMENTS FACTORY

(Hassan).

Established : 1939.

Capital invested : Rs. 30 lakhs.

No. of persons employed : 270.

Annual outturn : Rs. 30 lakhs.

The factory has been mechanised for mass production of agricultural estate and horticultural implements and tools like mumties, pick axes, sledge hammers, shovels, crowbars, sheet metalware, light structurals, etc. to meet the increasing demand from several Govt. departments and private consumers. A network of agencies are functioning throughout the country.

*General Manager :* S. K. Kempaiah.

## RADIO & ELECTRICALS MFG. CO. LTD.

Mysore Road, Bangalore-18.

The company was incorporated in 1946 with the name "Mysore Airmec Ltd." with a capital of Rs. 25 lakhs. The name of Radio & Electricals Mfg. Co. Ltd. (popularly known as Remco) was adopted in 1949. The present authorised capital is Rs. one crore and subscribed capital is Rs. 50,78,242. Sixty per cent of the paid-up capital is held by the Government of Mysore and the remaining forty per cent by the public.

The company's business operations began with the sale of imported radio receivers and was followed by manufacturing activities for the production of radio receivers, electronic components, plastic insulated wires and cables, electricity meters and water meters. Among the components produced in Remco are (1) all metal parts (2) mains transformers (3) audio transformers (4) I. F. transformers (5) coils (6) wave change switches (7) paper capacities and (8) electrolytic capacitors. The production of band switches in technical collaboration with Messrs. A. B. Metal Products Ltd., U.K. commenced in May 1958. The principal electronic equipment manufactured in Remco are (1) domestic radio receivers (2) community receivers and (3) inter-communication sets. Besides these, a large variety of test equipment utilising electronic circuits have also been designed and built by Remco mostly for its own use. The production of transistorised radio receivers has been started recently (April 1965).

The manufacture of Polyvinyl chloride covered wires and cables for use in low tension circuits was commenced in 1948. The production of single phase electricity meters was commenced in 1952 in technical collaboration with Messrs. Tokyo Shibaura Electric Co. Ltd., Japan. The production of electricity meters has registered a rapid rise from 200 meters per day in 1952 to 1,000 meters per day at present. There are over 1·87 million of Remco meters in service in various parts of the country. The company has been sanctioned a capacity of 2,00,000 single-phase electricity meters and 48,000 polyphase electricity meters per annum. The company is also producing polyphase electricity meters.

Remco commenced manufacture of multi-jet inferential type water meters in technical collaboration with Messrs. Aquametro Water Meter Works Ltd., Switzerland in 1956.

## TUNGABHADRA STEEL PRODUCTS LTD.

Tungabhadra Dam P.O. (Bellary Dist., Mysore).

This company was founded on April 1, 1960 with an authorised capital of Rs. 2 crores and a subscribed capital of Rs. 50 lakhs divided into 5,000 equity shares of Rs. 1,000 each. The entire subscribed capital is contributed in equal shares by the Governments of Andhra Pradesh and Mysore.

*Production :* Steel structures including gates, hoists and transmission towers 4,000 tons per annum ; penstocks 3,000 tons ; grey iron castings 500 tons ; cranes worth Rs. 18 to 24 lakhs per annum.

A galvanising plant with a capacity of 3,000 tons per annum is under installation and will be commissioned shortly (April 1965). The company has its own design branch, grey iron foundry, rubber seal section, X-ray and photographic section.

It has entered into a collaboration agreement with Messrs. Est. Neyrpic, Grenoble, France for the designing and fabrication of hydraulic gates. It has plans for securing the collaboration of some other foreign firms and expanding its lines of production.

The Board of Directors of the company comprises eight members, four of whom are nominated by the Govt. of Mysore and four by Andhra Pradesh.

*Chairman :* A. Krishnaswamy ; *Managing Director :* I. P. Mallappa ; *General Manager :* N. A. Sirsi : *Secretary :* G. K. Channaraj Urs.

## ORISSA

### CUTTACK IRON & STEEL PRODUCTS LTD.

Industrial Estate, Cuttack-3 (Orissa)

The company is a pilot project of the Government of Orissa. The share holders of the company comprise the Governor of Orissa (holding major shares) and a private entrepreneur.

The company manufactures fabricated steel goods. It undertakes all types of fabrication work. Its products can be divided into three categories : (1) Heavy Goods (trusses, transmission towers etc.), (2) Semi-Heavy Goods (window grill, W.I. gate, collapsible gate, garage gate electric cross-arms, wheel barrow, scraper etc.) (3) Light Goods (novelty goods like table tray, flower stand, garden chair and other types of furniture and office equipment like file tray, file rack etc.).

*Managing Director :* A. K. Bhuyan.

### ORISSA BOARD MILLS LTD.

P.O. Jagatpur (Dist. Cuttack, Orissa).

(Regd. Office : Meria Bazar, Cuttack-1).

This is a pilot project company of the Government of Orissa. The mills are equipped with cylinder-mould machine and a jet ventilated dryer imported from West Germany. It produces monolithic quality straw boards and mill boards from 16 oz. to 48 oz.

*Managing Director :* S. Raut Roy.

### ROURKELA FABRICATIONS LTD.

Industrial Area, Rourkela-4.

Authorised capital : Rs. 5 lakhs. The factory was established in 1959 for the manufacture of quality steel window, angle roof trusses, purlins, all steel screw gear shutters, falling shutters and for any type of structurals heavy, medium and light.

Turn-over for 1964-65 : Rs. 9·5 lakhs.

*Managing Director :* Babubhai Patel; *Secretary-Residential Engineer :* A. N. Patel, B.E., A.M.I.E.

## UTTAR PRADESH

### GOVERNMENT CEMENT FACTORY

Churk, Mirzapur, U.P.

The Government Cement Factory was established at Churk in Mirzapur District at an initial cost of Rs. 4·68 crores. The factory went into production in September 1954. Its installed capacity is 700 tons per day.

The expansion of the project at an expenditure of Rs. 2·98 crores has been completed and the expanded plant went into production from January 1963. The rated capacity of the expanded plant is now 1,400 tonnes per day as against the initial capacity of 700 tonnes per day. Production during 1964-65 was 4,10,793 tonnes of cement.

In the factory, 1,783 persons are working and 1,685 persons are working in the quarries of the factory.

### GOVERNMENT PRECISION INSTRUMENTS FACTORY

Lucknow, P. Box 153, U.P.

The factory was established in 1950 at Lucknow for the manufacture of water meters, microscopes and other precision instruments. Now the factory is in the final phase of its expansion. Its present production includes watermeters of 15 mm, 10 mm and 25 mm sizes, microscopes-research and scholar-microscopes bullet comparison and pressure gauges of 4" and 6" dial size with minimum pressure gauge of 0–100 lbs/in², 0–200 lbs/in² and 0 600 lbs/in² respectively.

The Research-cum-design centre established in the premises of G.P.I.F. for carrying out research and experimentation in the manufacture of precision and scientific instruments has already started functioning.

The work for the establishment of a separate factory for the manufacture of optical instruments which was proposed to be established in the Third Plan is in progress.

### THE INDIAN TURPENTINE & ROSIN CO. LTD.

P.O. Clutterbuckganj, Bareilly (U.P.)

Authorised capital : Rs. 12,00,000 ; subscribed capital : Rs. 9,00,000.

The Government have handed over their Turpentine and Rosin Factory in Clutterbuckganj in U.P. to this company. From crude resin, the company manufactures turpentine and rosin. The gum of pine trees, the main raw material, is being obtained from the Kumaon and Tehri forests of U.P.

*General Manager :* Kuber Nath, I.A.F.C.

## WEST BENGAL

### THE KALYANI SPINNING MILLS LTD.

P.O. Kalyani, Dist. Nadia (West Bengal).

Authorised capital : Rs. 250 lakhs ; paid-up capital : Rs. 140 lakhs. The Government of West Bengal has originally advanced a sum of Rs. 70 39 lakhs to the mill out of which a sum of Rs. 32·65 lakhs has been repaid.

The mill has an installed capacity of 50,160 spindles.

The annual production capacity of the mill is approximately 24 lakh lbs. of yarn.

The present employment potential of the mill is 1,212.

During the Third Plan, the mill has undertaken the establishment of its second unit at Habra with an installed capacity of 25,000 spindles and expansion of its existing unit at Kalyani by another 25,000 spindles for hosiery yarn.

During 1963-64, the mill has earned a net profit of Rs. 26,94,959.

*Chairman :* K. N. Mookerjee ; *Managing Director :* R. R. Chatterjee.

# PORTS

ALLOTMENT under First Five-Year Plan : major ports : Rs. 25·70 crores ; minor : Rs. 2·41 crores. Allotment under the Second Plan : major ports : Rs. 37·6 crores ; minor ports : Rs. 5·00 crores. Third Plan allotment for major and minor ports : Rs. 75 crores and Rs. 6·5 crores respectively.

There are seven major ports in India, 22 intermediate ports and 143 working minor ports. It is proposed to develop Mangalore and Tuticorin as major ports during the Third Plan.

Technically a major port is one which is capable of taking in ocean-going steamers with a registered tonnage of 4,000 or more and berth them along wharves.

The seven major ports are:

Bombay, Calcutta, Cochin, Kandla, Madras, Mormugao and Visakhapatnam.

The intermediate ports and the minor ports are distributed as follows State-wise :

MYSORE : There are two intermediate ports Karwar and Mangalore) and 19 minor ports.

MADRAS : There are three intermediate ports (Cuddalore, Nagapattinam and Tuticorin) and seven minor ports.

MAHARASHTRA : There are two intermediate ports (Ratnagiri and Redi) and 47 minor ports.

GUJARAT : There are 10 intermediate ports (Okha, Porbander, Bhavnagar, Navlakhi, Bedi, Veraval, Broach, Mandvi, Sikka and Surat) and 40 minor ports.

Kerala : There are two intermediate ports (Alleppey and Kozhikode) and nine minor ports.

ORISSA : There are one intermediate port (Paradip) and one minor port. (For details see article on Orissa State).

ANDHRA PRADESH : There are two intermediate ports (Masulipatam and Kakinada) and five minor ports.

PONDICHERRY : There is one minor port of Pondicherry only.

ANDAMAN & NICOBAR ISLANDS : There are 15 minor ports.

All the seven major ports are administered by Port Trusts which are statutory bodies.

The intermediate and minor ports are administered by State Governments.

**The National Harbour Board :** The Board which was set up in 1950 to advise the Central Government on matters of general policy relating to port management and development including their effects on industry, commerce, shipping, railways etc. so as to ensure integrated consideration of all important port matters, has been meeting once in every year. The last meeting was held in Oct., 1964 at Mormugao, Goa.

### FIVE-YEAR PLANS

The capacity achieved at the end of the Second Plan was about 38 million tons as detailed below (in million tons) :

Calcutta 12·16 ; Bombay 14·50 ; Madras 3·20 ; Cochin 3·25 ; Visakhapatnam 3·50 ; Kandla 1·60.

The overall cost of the physical programme relating to major ports included in the Third Five Year Plan is about Rs. 175 crores including

Rs. 30 crores for the development of a satellite dock system to Calcutta at Haldia, Rs. 14 crores for the development of Tuticorin into a major port and Rs. 15 crores for the development of Mangalore into a major port. But the financial ceiling for expenditure to be incurred during the Third Five Year Plan is Rs. 75 crores.

The capacity of the major ports is expected to be about 60 million tons by the end of Third Plan which includes the capacity of Paradeep Port which will be ready by the middle of 1966.

This does not take into account the additional capacity that will be generated by the establishment of a satellite port at Haldia and the development of Tuticorin and Mangalore as major ports.

FOREIGN EXCHANGE FOR MAJOR PORTS: The total foreign exchange requirement for the development of major ports during the Third Five Year Plan is about Rs. 65 crores.

An amount of Rs. 33·48 crores, has been obtained in the shape of foreign aid from World Bank loans (Rs. 2,230 lakhs), International Development Association credit (Rs. 714 lakhs), West German credit (Rs. 4 lakhs), yen credit (Rs. 22 lakhs), U.K. credit (Rs. 14 lakhs), Yugoslav credit (Rs. 40 lakhs) and Dutch commercial credit (Rs. 90 lakhs).

It is proposed to negotiate with the World Bank for a loan of about Rs. 14 crores to cover the foreign exchange requirements of the Haldia dock system. As regards the balance also, as far as possible, credit sources available from time to time will be made use of.

**Major Ports:** The expenditure incurred during the Second Plan period was about Rs. 45 crores. The anticipated expenditure during the Third Plan is about Rs. 91 crores. Important projects for modernization and augmentation of facilities at major ports so far completed: (*i*) Development of two berths in the King George's Dock, Calcutta Port into Cargo berths, one berth into an oil berth and another into a mechanical ore berth; The river training works at Fulta Point; (*ii*) A marine oil terminal at Butcher Island, Bombay Port; (*iii*) A new passenger station, a new marshalling yard, a new ore berth and a new coal berth with facilities for mechanical handling at the Madras Port. A new Administrative Office building for the Madras Port Trust has also been constructed and occupied in June 1960. The reconstructed South Quay II has been put into commission; the new Suction Dredger "Cauvery" has been received and put into commission. Twelve diesel locomotives ordered from Canada under the Colombo Plan have been received; (*iv*) One coal berth at Cochin; (*v*) Acquisition of several items of plant, equipment and floating craft at the various ports especially dredgers for Calcutta Port; (*vi*) Diversion of the Railway Line (Budge Budge section) at Calcutta Port; (*vii*) Reconstruction of eleven out of the twelve transit sheds at Prince's & Victoria Docks at Bombay Port.

The schemes relating to major ports are making satisfactory progress.

(*i*) *Calcutta Port:* The work relating to the development of "B" Berth, K. G. Dock into a general Cargo Berth and conversion of "C" Berth into an Oil Berth has been completed. All the twelve berths in Dock No. 1, Kidderpore Docks, have been reconditioned. Two floating cranes, one of 30-ton and the other of 60-ton, have been acquired. A new bucket dredger "Ajoy" and a new suction dredger "Churni" have been commissioned. The reconditioning of the existing dredger "Gunga" has been completed. The building of a new tea warehouse has been completed. Orders have been placed for a new dredger to replace 'Balari' which will be used for estuarian dredging. Two new pilot vessels, one grab dredger and two additional copper barges have been ordered.

Considerable progress has been made in the detailed planning of the various facilities to be provided at the new docks at Haldia. Land acquisition is in progress. The tenders for all the major items have been prepared. An application has been made to the World Bank for a loan to cover the foreign exchange requirements of Haldia Dock System estimated at Rs. 14 crores.

(*ii*) *Bombay Port:* Contract has been awarded for the execution of dock expansion scheme estimated to cost Rs. 13 crores. A major portion of the dredging of the entrance channel to the Bombay Harbour has been completed.

CRUISER-DOCK: The newly-built Cruiser Graving Dock at the Naval Dockyard, Bombay, was inaugurated on January 9, 1962.

One of the most modern docks of its type and size in the East, this dry-dock is the first major project of the Naval Dockyard Expansion Scheme to be brought into use. With a length of about 700 feet, a width of 100 feet and a depth of 50½ feet below the ground level, it will be capable of dry-docking the Navy's cruisers and other large ships. With its small extension it can also accommodate the new aircraft-carrier acquired by the Navy. Every type of modern facilities required by ships undergoing repair in the dock is provided for here.

This cruiser-dock forms only a portion of the Expansion Scheme of the Naval Dockyard.

The cruiser-dock, now ready for service, is equipped with the latest machinery to supply electric power, compressed air and fresh and salt water to the ships undergoing repair therein.

The Pir Pau oil jetty in Bombay is being modernised at a cost of Rs. 23 lakhs to help the movement of products from the Trombay oil refineries to storage installation at Sewri. The scheme is part of the Rs. 10 crore project to develop the oil terminal at Butcher Island.

The major item in the improvement programme relates to flushing and boosting facilities at the jetty. The flushing pumps to be installed have been so designed as to serve also as boosters to replace the existing steam and diesel mechanism.

(*iii*) *Madras Port:* The six-berth wet dock known as "Jawahar Dock" has been commissioned. A scheme for the installation of a new plant for mechanical handling of iron ore costing about Rs. 2·50 crores is under active consideration.

(*iv*) *Visakhapatnam Port:* The programme for Vishakapatnam port provides for the completion of four additional berths — two berths for export of ore and two for general cargo, a lighterage wharf and the installation of an iron ore handling plant at the ore berths. The scheme estimated to cost Rs. 7 crores is in progress. The facilities were expected to be completed by Oct. 1965.

(*v*) *Cochin Port:* The construction of the four berths in the Ernakulam channel has been completed. All the berths have been put into commission. The construction of a new oil jetty is in progress.

(*vi*) *Kandla Port:* The fifth cargo berth has been completed. The work relating to the sixth berth has been postponed for the present. A new dredger has been acquired.

(*vii*) *Mangalore and Tuticorin Ports:* Work relating to the development of these ports into major port is making satisfactory progress. Detailed designs are being chalked out. Meanwhile, preliminaries such as land acquisition, approach roads, staff quarters, etc. have been taken in hand.

(*viii*) *Haldia Port:* The preliminaries relating to the setting up of a satellite port at Haldia have been completed. Land acquisition costing about Rs. 2 crores, has been sanctioned. The final project report is being drawn up. The construction of a new oil jetty has been sanctioned and contract has been awarded. It is expected to be completed by June, 1967.

(*ix*) *Mormugao Port:* A comprehensive project for expansion of facilities at Mormugao Port to handle iron-ore in bulk is under active consideration. Meanwhile, a dredger has been acquired.

(*x*) *Paradeep Port:* The work relating to Paradeep Port has been taken over by the Central Government from the Orissa State with effect from June 1, 1965. The work of this port is expected to be completed by the end of this year. This is an all-weather, deep-sea port built at a cost of Rs. 20 crores. The harbour can accommodate 60,000-ton ships.

**Minor Ports:** For the development of non-major ports there was a provision of Rs. 5 crores in the Second Five Year Plan.

The capacity achieved by the minor ports at the end of the Second Plan was of the order of six million tons. It is expected that at the end of the Third Plan, the minor ports will be able to handle traffic of about 9 million tons.

A provision of Rs. 6·5 crores against the physical programme of Rs. 11·09 crores has been made for the development of minor ports in the Third Plan.

## LIGHTHOUSES

Lighthouses are divided into general and local according to the utility of a particular lighthouse to navigation. The superintendence and management of general lighthouses is vested in the Union Government while the local lighthouses are managed by local lighthouse authorities such as State Governments, Port Trusts, etc.

A statutory body—the Central Advisory Committee for Lighthouses has been appointed under the Indian Lighthouses Act, to advise the Union Government on matters connected with the erection, additions, alterations, improvements, etc. of lighthouses. The composition of the committee is as follows: Minister for Transport (*Chairman*); *Members:* Nautical Adviser to the Govt. of India (*ex-officio*); Chief Hydrographer to the Govt. of India (*ex-officio*); Financial Adviser, Ministry of Transport (*ex-officio*); Dy. Secretary in charge of Department of Lighthouses and Lightships, Ministry of Transport (*ex-officio*); H. M. Desai, Manager, Scindia Steam Navigation Co. Ltd., Bombay; D. Hogg of Messrs. Macneill and Barry Ltd., New Delhi; T. M. Goculdas, C/o Messrs. Scindia Steam Navigation Co. Ltd., Bombay; J. C. Anand, Operations Manager, Jayanti Shipping Co. Ltd., Bombay; Govind H. Seth, Managing Director, Shipping Corporation of India, Bombay; D. M. Parekh, Bombay; K. Agathiappan, South Arcot Dt., Madras; P. R. Ramakrishnan, Member, Lok Sabha, New Delhi; Sudhir Ghosh, Member, Rajya Sabha, New Delhi; Director-General of Lighthouses and Lightships (*ex-officio*).

There are 269 lighthouses, 7 lightvessels, 156 lightbuoys, 236 unlighted buoys, 233 beacons, 7 fog signals, 5 M. F. radio beacons, 2 harbour radars, 1 Decca navigator chain, 299 land marks and 716 other marks, making a total of 1,931 aids to navigation strewn over the coastline of approximately 4,340 miles including Andaman, Nicobar, Laccadive and Minicoy Islands.

**Third Five Year Plan:** The Third Five-Year Plan envisages the improvement of aids to navigation at an estimated cost of Rs. 600 lakhs. A summary of the programme under the Third Five-Year Plan is given below† :—Construction of lighthouses, towers, ancillary buildings, 150; Purchase and installation of optical equipment, apparatus and machinery, 30; Establishment of M.F. and V.H.F. Radio Station, 6; Installation of sound signals, 2; Purchase and installation of electric power generator equipment and machinery, 25; Purchase and establishment of lightships, 5; Purchase of ships, tender lifeboats, motor launches, etc., 20; Purchase and establishment of buoys and other floating aids, 100.

During the Second Plan 76 new lights and other aids to navigation including radio beacons, V.H.F. R/T sets, lighted and unlighted buoys, had already been established. In addition, 3 motor boats and a small lighthouse tender have been acquired.

**Programme for the year 1965-66:** (*i*) Establishment of new aids to navigation at: Minicoy Island, Tapti, Savai Bet, Lushington Shoals, Gopalpur, Short Island, Chandrabagha, Landfall Island, Car Nicobar Islands, Sir Hugh Rose Island, Androth Island, Diu Head, False Devi

† Figures in Rs. lakhs.

Point, Mangalore, Pudimadaka, Trivandrum, Narsapur, Cape Comorin, Fog Signal at Okha, Fog Signal at Khanderi, Parson Point (Great Nicobar), Perseverance Point (Andamans) and Manner's Strait (Andamans).

(*ii*) Improvement of Lighthouses at: Nagapatnam, Vengurla Point and Piram Island.

(*iii*) Provision of Lightvessels for Lushington Shoals and Perigee Rocks.

(*iv*) Provision of Buoys at: Pamban Pass (unlighted), Sikka Port (lightbuoys), Gurur Shoal (lightbuoys), Goos and Siri Reefs (lighted), Lushington Shoal (lightbuoy) and Wreck Marking Buoys.

(*v*) (*a*) Purchase of two motor launches for Andaman and Nicobar group of Islands; (*b*) Purchase of motor launches for Piram and Khanderi Islands Lighthouses and sailing craft for Navinal.

(*vi*) Purchase of VHF sets for Saugor Island, False Point, Khanderi Island and Diu Head Lighthouses.

**Progress of work during 1964-65:** Capital and development works which were started in the previous year have been progressing satisfactorily. The following major works have been completed:—

(1) New lighthouse towers at Savai Bet, Veraval and Tapti; (2) Foundations for the lighthouse tower at Sir Hugh Rose Island; (3) Fog Signal Baffle at Veraval; (4) Installation of Radio Beacons at Saugor Island (West Bengal) and Vengurla Rocks (Maharashtra); (5) Installation of new optical equipment as Jakhau and Ratnagiri; (6) Exhibition of new lights at Chhachi and Jakhau (Gujarat), Rajapur Bay and Rajapuri Point (Maharashtra); (7) Commissioning into service of a new Radar at Saugor Island (West Bengal); (8) Installation of electronic equipment for the Decca Chain on the east coast of India; (9) Commissioning of Decca Navigator chain on the West Coast of India.

**Other Important Works in Progress:** Construction of lighthouses at Piram Island, Diu Head (Gujarat); Vengurla Point (Maharashtra); Chandrabagha and Gopalpur (Orissa); Dariapur, Cape Comorin, Nagapatnam (Madras); Narsapur (Andhra); Car Nicobar, Landfall and Sir Hugh Rose (A. and N. group of Islands); Androth Island (L.M.A. Island); Installation of new optical and fog signal equipment at Mithivirdhi and Veraval (Gujarat).

**Navigational aids in the Minor Ports of Mysore State:** At the instance of the Mysore State Government, the Central Lighthouse Department has undertaken the work of providing additional navigational aids at the ports of Karwar, Bhatkal, Malpe, Honovar, Belikeri and Coondapur at an estimated cost of Rs. 40 lakhs. The work is in progress (May 1965).

**Lighthouse Workshops:** The Lighthouse Workshops at Bombay, Madras, Calcutta and Jamnagar continued to attend to the defects and repair works at the various lighthouses. Besides carrying out the usual maintenance work, the workshop at Madras is engaged in the manufacture of flashers and lanterns required for the night navigation in Sikka and Visakhapatnam Ports. At present lanterns and flashers required for the provision of navigational aids in Brahmaputra River and Sunderbans Region are being manufactured in the workshop at Madras.

With the special types of equipment being introduced to provide better navigation facilities to the mariners, the lighthouse personnel are required to have a good knowledge of the modern and complicated equipment. A departmental training centre has, therefore, been established at Calcutta where intensive course of studies and practical training in the operation of the navigational aids are imparted to the lighthouse personnel.

An up-to-date optical laboratory has been set up at Calcutta, for conducting research and experiments. A new equipment invented by this Department has made it possible to produce 4,00,000 candelas with an occulting character.

The revenues of the Department of Lighthouses and Lightships are derived by levy of light-dues on steamships and sailing vessels. The present rates of light-dues are 50 P. per ton on steamships and 6 P. per ton on sailing vessel.

*General:* The navigational aids provided by this Department have been functioning very efficiently. The landfall lights established so far (May 1965) vary in beam candlepower between 1,00,000 to 1,00,00,000 candelas.

## MAJOR PORTS

| Ports | Receipts for 1963-64 | Expenditure for 1963-64 | No. of passengers embarked | No. of passengers disembarked | Imports in tonnes, 1963-64 | Exports in tonnes, 1963-64 | Weight of cargo in tonnes, handled in 1963-64 |

**Bombay:** The Port of Bombay has three wet docks—Prince's Dock, Victoria Dock and Alexandra Dock, and two dry docks, Merewether Dock and Hughes Dock. Trans-oceanic passenger traffic is mostly dealt with at the Ballard Pier. Coastal and Harbour Passenger traffic is dealt with at the Ferry Wharf. There are along the harbour front a number of bunders or open wharves and basins where the traffic carried by sailing vessels is handled.

The more important depots are the Grain Depot, the Cotton Depot and the Manganese Ore Depot. There is now a Marine Oil Terminal at Butcher Island within the Bombay Harbour for the speedy discharge and loading of oil.

The Port maintains its own railway system.

The dock expansion scheme of the Bombay Port Trust provides for four new deep berths in the Alexandra dock basin and three medium-deep berths among the harbour wall.

The east arm of the Alexandra dock basin will be extended by about 1,180 feet to provide for the four new deep-water berths therein.

The reclamation will provide an additional dock area of 37,100 square yards and new transit sheds will result in an increase of 1,73,000 square feet of storage space.

Five modern transit sheds will be constructed in the Alexandra dock, two at the extended berths and three along the harbour wall.

The scheme, estimated to cost Rs. 13·25 crores, is expected to be completed in about four years time and will result in an addition of 1·5 to 2 million tonnes to the existing dock capacity.

The Bombay Port Trust has also undertaken another scheme to extend the Ballard Pier southwards by 750 feet to provide a second passenger berth at the mole station, equipped with modern passenger terminal buildings.

The Port Trust is administered by a Chairman appointed by the Government and a Board of 24 Trustees.

*Chairman:* L. M. Nadkarni, I.C.S.

*General Manager:* P. R. Subramanian.

*Secretary:* S. D. Chittar.

**Calcutta:** There are two docks Kidderpore Docks and King George's Docks. There are five dry docks two in King George's Docks and three in Kidderpore Docks.

There are nine jetties with a total length of 4,735 feet of which only five namely Nos. 2, 3, 7, 8 and 9 are available for ocean-going steamers.

Anchorages are available at Saugor Roads, Haldia, Kalpi, Diamond Harbour, Royapur, Ulubaria, Buj Buj and Garden Reach of which Royapur, Ulubaria, Buj Buj and Garden Reach are available only for deep laden vessels outward bound or in emergency. The other anchorages are used by ships on passage to and from the Port.

There are petroleum wharves at Budge Budge about 14 miles below the entrances to the docks.

There are two tea warehouses, a grain and seeds depot at Kantapukur, two sheds at Jhinjerapul, A and B sheds at Kidderpore, the Fairlie, Clive, Canning and Strand Warehouses situated close to the Calcutta jetties.

Kidderpore Dock No. 2 has six coaling berths and there is one at Garden Reach Jetty.

The port can handle a sea-borne traffic of nearly 11 millions a year without congestion or delay.

The chief exports from Calcutta are coal, tea, sugar, gunnies, bone and bone-meal, bunker oil, iron and steel manufactures, lac, scrap, ores and mica. The principal imports are salt, food-grains and flour, sulphur, tinplate, machinery, petroleum, iron and steel, metals other than iron and steel, lubricating oil, cement, soda, timber, fertilisers, bricks, chemicals, oils, railway material.

Facilities exist for lightening food ships and topping up outward bound ships by using barges at Haldia Anchorage which is about 56½ miles downstream, during the fair weather season—November to February.

Communication between the various points in the Docks and jetties is maintained by the Commissioner's Railway.

The Port is administered by a Port Commission with jurisdiction under the Calcutta Port Act from Budge Budge to Konnagar.

*Chairman:* B. B. Ghosh.

*Dy. Chairman:* S. K. Ghosh.

*Secretary:* T. R. Raghupati.

**Cochin:** The Port of Cochin is open for deep water traffic in the worst monsoons and provides a splendid anchorage at all times of the year. Any ship drawing upto 30 ft. draft can enter the port even in the roughest weather.

The Cochin Harbour Railway is connected with the Broad Gauge and Metre Gauge systems of the Southern Railway. Inside the Harbour there are 12 stream berths, 2 coal berths, 8 wharf berths, 1 Boat Train Pier Jetty with facilities for discharging and loading bunker oil and two tanker berths. One of the twelve stream berths is a swinging berth capable of accommodating vessels upto 650 ft. overall in length and 28 ft. draft. The tanker berths in the Ernakulam Channel provide facilities to discharge oil direct to the shore installations. The two deep water wharves can accommodate at a time each four vessels of 450 ft. in length.

The number of vessels excluding sailing vessels, which entered the port during 1963-64 was 1,356 with a tonnage of 46·50 lakhs against 1,330 vessels with a tonnage of 44·80 lakh the previous year. Sailing vessels, which visited the port, numbered 113 with a tonnage of 13,000 against 131 with a tounage of about 16,000 the previous year.

The principal imports are foodgrains, mineral oils, coal, cashewnuts, hardware, chemicals and manure. The principal exports are coir and coir products, tea, rubber, cashew kernels, coconuts, spices and ores.

*Chairman :* K. P. K. Menon, I.A.S.

**Kandla :** The major port of Kandla now has the following main facilities :—

A Cargo Jetty with (*a*) 2,700 ft. of quayage and designed depth of 32 ft. of water alongside at L.W.O.S.T. to accommodate four large size ships or five liberty type ocean-going vessels ; (*b*) Three single storeyed transit sheds, each 450 ft. long and 140 ft. wide, having a floor area of 62,000 sq. ft. each and with a total storage capacity of about 15,000 tons of cargo ; (*c*) Broad Wharves served with three dual gauge (BG & MG) railway lines and roads ; (*d*) 21 electric quay cranes, the most modern type, of 3 tons, 6 tons and 10 tons capacities with 80 ft. each ; (*e*) Spacious open stacking grounds served with railway and road sidings ; (*f*) Four double storeyed Warehouses, each with a floor area of 1,16,678 sq. ft. and storage capacity of 15,000 tons, with overbridge connections to the roofs of the transit sheds, and provided with modern cargo lifts, chutes and loading platforms ; (*g*) 'Grinnel' automatic sprinkler and fire alarm system has been provided in one warehouse as a measure for protection against fire, for the storage of cotton cargo in the warehouse ; (*h*) The construction of an additional 1,125 ft. of quay, designed for a depth of 32 ft. of water at L.W.O.S.T. has been completed except for the work of dredging alongside. This additional quay will be put into operation after the requisite dredging alongside has been done.

Three circular steel tanks of a total capacity of 650 tons for the storage of vegetable oils.

Fumigation arrangements for cotton to handle 1,000 bales per day.

Six Mooring Buoy berths consisting of 3 general cargo, one salt, one explosive and (one deep draft, mooring for vessels upto 36 ft. draft) for vessels to load or discharge cargo in stream by lighters.

An oil berth capable of taking oil tankers upto 16,000 tons dead weight, with two pipe lines of 16" and 12" diameters and a Booster Pumping Station connected with the oil installations situated 7 miles away.

A tidal basin 500′ × 300′ for lighters and sailing vessels provided with two transit sheds having 30,000 sq. ft. total floor area, stacking platforms, 4 quay cranes—two of three tonnes and one each of six and ten tonnes and a gantry crane of 60 tons capacity for handling heavy lifts. The Bunder is well served with railway tracks and roads.

A fishing jetty for fishing crafts and trawlers with a crane is ready.

DK-168 type Vac-u-vators for discharge of food-grains in bulk.

A floating dry dock capable of taking vessels upto 200 ft. length and 30 ft. wide for carrying out repairs.

The port is equipped with the latest version of a harbour radar having a range of 20 miles with V. H. F. radio telephones and a coastal wireless station with 400 miles range.

This port has purchased a new steam driven, twin screw stern well and side suction, pipe trailing cutter, suction, hopper 'Dredger' from Messrs. I. H. C. Holland for the maintenance dredging in the Harbour and approaches.

One fire float in addition to the shore fire fighting facilities has been added to the fleet of vessels maintained by the Kandla Port.

Two most modern passenger jetties for ferry services.

Separate sheds for dangerous and inflammable goods are provided at 700 ft. away from the warehouses.

A large stacking area covering 15¼ acres for stacking the iron ore and served by Railway sidings.

The port is connected to its hinterland at present by means of metre gauge, *via* Deesa-Palanpur and broad gauge rail link to Ahmedabad is under construction.

The construction of the National Highway connecting Kandla to Ahmedabad is in progress.

The establishment of a Free Trade Zone at Kandla has been approved by the Government of India and the opening ceremony was performed in March, 1965.

The structure of port charges presents a very favourable picture.

For statistical details on revenue, etc., see table on Major Ports.

The chief imports are mineral oil, foodgrains, maize, chemicals, fertilizers and machinery whereas the principal items of export are iron ore, zinc concentrate, iron scrap, salt, ethyl alcohol, cotton, bones and bone meals.

The Port has handled 2·3 million tonnes of cargo during 1964–65. It is expected to handle 3 million tonnes of cargo per annum when fifth berth and third pipeline are commissioned and broad gauge line is ready.

346 ships and tankers have called during 1964–65.

*Chairman :* N. C. Patel.

*Secretary :* Dr. R. P. Bhargava.

**Madras :** There is accommodation for 21 vessels inside the harbour, 3 at Moorings and 18 at Quays besides the Petrol Berth at which dangerous petroleum is discharged. The depth at moorings and quay berths ranges from 7·9 metres to 9·6 metres.

The chief imports are coal, foodgrains, mineral oils, metals, timber, textiles, machinery, hardware, paper including old newspapers, dyeing and tanning substances, chemical manures, asphalt, chemicals, cotton, etc.

Ores, piecegoods, hides and skins (raw and tanned), onions, raw tobacco, twist and yarn, mica, etc. form the principal exports.

Three oil tanks have been erected for storage of vegetable oil in bulk and three other tanks for the storage of molasses in bulk have als been installed by private shipping companies a t their cost.

The affairs of the Port are administered by a Board of Trustees.

*Chairman :* T. K. Palaniappan, I.A.S.

*Secretary :* T. K. Parameswaran Nambiar, B.A.

**Vishakapatnam :** Ships drawing upto 33 ft. and having a length of up to 635 ft. can enter the harbour at all times of the year.

The harbour now provides the following facilities :

The inner harbour consists of a turning basin, four quay berths of a total length of 2,300 feet long and equipped with portal electric cranes, transit sheds, and railway lines, both behind and on the quay-side of the transit sheds and three concrete jetty and wharf berths for coal and oil. Besides, there are six mooring berths which are served by a fleet of lighters owned and operated by the port authorities and shallow water channels with timber jetties for lightering work. The quay berths No. 1 and 2 are specially equipped and reserved for the expeditious handling of manganese and iron ore, ferro-manganese and pig iron : on an average, approximately 3,000 tons are loaded in a day.

A 1,200 ft. long quay berth, capable of accommodating two oil tankers simultaneously has been constructed to provide the necessary Port and Harbour facilities for the Caltex Oil Refinery at Vishakapatnam which is in full operation.

A Dry Dock 450 ft. long and 60·5 ft. wide with a depth of 18¼ ft. below low water has been in use at the Port for the docking of vessels.

The Port has floating cranes capable of dealing with heavy lifts up to 60-ton capacity.

A port trust has been constituted for the port in pursuance of the Major Port Trusts Act, 1963. The Port Trust is administered by a Chairman appointed by the Government of India.

*Chairman.*—C. R. Reddy. *Secretary.*—T. S. Narasimhan.

# FISHERIES

INDIA produces about 0·89 million tons of marine fish out of a total fish production of 1·3 million tons, which is only a quarter of the country's requirements, estimated at about 4 million tons annually.

The average catch is about 2,500 lbs. per man per year.

The annual per capita availability of fish in India is estimated to be 3·4 lbs. as against 16 lbs. in Ceylon, 70 lbs. in Burma and 90 lbs. in Japan.

The fishing industry in India offers employment to about a million persons and contributes annually over Rs. 60 crores towards the national income. About 27,000 tons of fish products, consisting mostly of dry, dry-salted and wet-salted fish, are annually exported to neighbouring countries. The Third Plan target is to export Rs. 18 crores worth of fishery products per annum by 1966.

About 73,400 fishing craft are estimated to be employed.

As a result of the Third Five Year Plan programme for which a provision of Rs. 290 million is made an increase of 0·4 million tonnes in production of fish and doubling of exports is expected.

Fish production in India during 1963 and 1964 had been high. Sea fish landings were about 6·5 and 8·6 lakh tonnes respectively. Marketable surplus of inland catches, including estuarine tracts, was about 3·9 lakh tons. These together with subsistence fishing in inland water and small ponds have placed the total fish yield in India well over 11 lakh tons.

Experiments in mechanisation of fishing are being conducted since 1948 with the help and assistance received from Norway, U.S.A. and F.A.O.

Some of the steps taken by Government to improve fish production are mechanisation of fishing craft, training centres for fishermen, cold storage facilities, formation of deep-sea fishing stations and research at the four main central stations, *viz.*, Central Inland Fisheries Station, Calcutta, Central Marine Fisheries Research Station, Mandapam, Deep-sea Fishing Station, Bombay and the Central Fisheries Technological Research Station, Cochin.

Today more than 2,400 mechanised boats are operating on Indian coastline. In Bombay the local types of boats are being mechanised. New designs have been evolved for boats in Madras, Kerala and Andhra States. Experiment in improved types of fishing with small power craft are also in progress.

Cold storage facilities exist in Bombay, Mangalore, Calicut, Cochin, Quilon, Trivandrum, Madras and Calcutta. Additional plants are being installed in many other places. Some of these plants have been provided under T.C.M. and Norwegian aid programmes.

The Central Board of Fisheries approved of the fisheries development and research programmes of the Central and State Governments for the Third Five-Year Plan and laid stress on the promotion of export trade in fish and fish products. An Expert Committee for higher fisheries training programme was also set up. The Committee recommended the establishment of a Central Institute of Fisheries Education for training District Fisheries Development Officers and operatives and lower grade administrative staff. The institute will be initially housed in the Institute of Science, Bombay. An *ad hoc* Fisheries Enquiry Committee examined the present status of mechanised fishing with a view to recommending suitable measures for meeting the requirements of the fishing industry.

The Central Board of Fisheries has recommended the formation of an Indian Fisheries Corporation in the public sector to sponsor large-scale integrated projects, primarily with a view to stepping up export trade in fish and fishery products.

## PRODUCTION

Production is shown in the table below. About two-thirds of the catch are marine-fishes.

'000 tonnes

| Year | Marine | Inland | Total |
|---|---|---|---|
| 1957 .. .. | 875 | 358 | 1,233 |
| 1958 .. .. | 755 | 309 | 1,064 |
| 1959 .. .. | 584 | 239 | 823 |
| 1960 .. .. | 878 | 282 | 1,160 |
| 1961 .. .. | 684 | 277 | 961 |
| 1962 .. .. | 644 | 330 | 974 |
| 1963 .. .. | 655 | 390 | 1,046 |
| 1964 .. .. | 860 | 455 | 1,315 |

The following is a list of the names of fishes showing within brackets their production in metric tons in 1963 and 1964 respectively :

Elasmobranchs (42,977 ; 34,863) ; Eels (8,685, 2,255) ; Cat Fish (17,567 ; 22,730) ; Chirocentrus (7,645 ; 7,565) ; Oil Sardine (63,647 ; 2,74,409) ; Other Sardine (27,173 ; 40,318) ; Hilsa Ilisha (2,754 ; 3,441) ; Other Hilsa (5,312 ; 6,519) ; Anchoveilla (28,672 ; 25,199) ; Thrissocles (5,704 ; 6,619) ; Other Clupeids (14,485 ; 16,752) ; Harpodon Nepereus (91,870 ; 81,342) ; Saurus (660 ; 1,545) ; Hemihamphus and Belone (3,443 ; 1,527) ; Flying Fish (962 ; 920) ; Perches (8,597 ; 12,559) ; Red Mullets (2,395 ; 5,027) ; Polynemids (4,389 ; 2,155) ; Sciaenids (22,570 ; 25,198) ; Ribbon Fish (16,452 ; 25,897) ; Caranx (17,513 ; 26,930) ; Chorinemus (3,195 ; 2,448) ; Coryphaena & Elacate (195 ; 345) ; Trachinotus (14 ; 115) ; Leiognathus (17,748 ; 28,301) ; Gazza (85 ; 35) ; Lactarius ; (8,654 ; 6,508) ; Pomfrets (17,256 ; 19,583) ; Mackerel (76,980 ; 23,975) ; Seer Fish (9,116 ; 11,165) ; Sphyraena (1,258 ; 1,663) ; Mugil (1,505 ; 2,916) ; Bregmaceros (5,407 ; 3,721) ; Soles (8,381 ; 6,146) ; Penaccid Prawns (41,071 ; 63,441) ; Non-penaccid prawns (40,522 ; 31,506) ; Other Crustaceans (2,061 ; 4,565) ; Cephalopods (260 ; 463) ; Miscellaneous (23,408 ; 24,445) ; Total Marine (6,55,484 ; 8,60,336) ; Total Inland (3,90,425 ; 4,55,273) ; Grand Total (10,45,909 ; 13,15,609).

The total landing of marine fish by State is shown below (where available) :

*(In metric tons)*

| | 1963 | 1964 |
|---|---|---|
| Bengal & Orissa .. | 11,176 | 10,642 |
| Andhra .. .. | 64,193 | 71,727 |
| Madras (including Pondicherry) .. | 1,09,602 | 1,31,309 |
| Kerala .. .. | 2,03,242 | 3,17,974 |
| Mysore .. .. | 39,176 | 1,04,218 |
| Maharashtra .. .. | 1,24,587 | 1,30,603 |
| Gujarat .. .. | 1,02,040 | 92,882 |
| Goa .. .. .. | — | 643 |
| Andaman (South) .. | 159 | 148 |
| Minicoy & Laccadive Islands .. .. | 589 | 190 |
| Trawlers .. .. | — | — |
| Total .. | 6,55,484 | 8,60,336 |

## LANDINGS 1963

Landings in Madras, Maharashtra and Mysore showed slight decreases. Other maritime States and Andaman & Nicobar Islands showed improvement in catch. The catches of 1964 however showed slight fall from 1963 in Bengal, Orissa, Gujarat and in the two group of Islands, but the overall catches were higher by over two lakh tons. For more details see under separate state headings in this article.

*Landings by varieties :* Oil sardine fishery in 1963 was poor in Kerala and Mysore while it failed in South Maharashtra compared to the exceptionally good fishery in 1962, the short fall in total landings amounting to about 11,700 tons ; the landings of 1964 were however phenomenal being more than thrice of 1962. Considerable increase was noticed in the landings of other sardines and Anchoviella in Kerala and Madras, though the landings of the latter had a slight fall in 1964. Mackerel fishery was successful in 1963 compared to 1962, in Kerala, Mysore, South Maharashtra, though it fell steeply in 1964 to less than a third of 1963. There was significant increase in carnax landings in Kerala & Madras which augmented the total catches in 1963, which was further improved by over 9,000 tons in 1964. There was all-round decline in the landings of trennis (tuna) in 1962 ; but it registered enhanced yield in the following years, and in 1963 by better catches in Kerala, Madras and Minicoy Islands. Prawn (penaccid) catches though less in 1963 (due to decline in catches in Kerala, Mysore & Maharashtra) rose by about 20,000 tons in 1964. On the other hand other prawns (nai penaccid) landings were better in 1963 due to better fishery in Maharashtra and Gujarat than in the precious year, though it fell sharply to less than those of 1962 in 1964. Landings of sciaenids fell in 1963 (due to decrease in catches in all maritime states except Bengal, Orissa and Kerala) though it slightly recovered in 1964. Pomfrets fishery declined considerably in 1963 in spite of the better fishery in Gujarat, even though it made a slight improvement in 1964.

About 44 per cent of the landings of 1963 were made during the last quarter of the year. In Orissa, Bengal, Andhra and Madras the bulk of the landings were made in the last quarter of the year.

The value of fish exported during 1964 (Jan.-Nov.) was Rs. 6·14 crores against Rs. 5·45 crores in the corresponding period in 1963. In the fishing trade, during 1962-63, 10,862 met. tons of fish and fish preparations valued at Rs. 40·8 million were exported and 31,528 met. tons valued at Rs. 61·6 million were imported.

## RESEARCH

Research in Fisheries is carried out primarily under the aegis of the main central stations given below.

*Central Inland Fisheries Research Institute, Barrackpore :* Studies on inland fisheries resources and fish culture were intensified. Work in connection with the establishment of well-designed and sufficiently large fish farms for conducting experiments in fresh and brackish-water fish culture, was initiated. A number of spawning grounds of Hilsa and other commercially important fishes of the Ganga, Hooghly and Narbada rivers were demarcated. Intensive fish tagging experiments conducted during the year yielded valuable information about the migration of fishes. The problem of providing fish passes in dams and barrages was given special attention. Field work on induced breeding of major carps was continued.

*Central Marine Fisheries Research Institute, Mandapam, Madras State :* Further progress was made in the investigations on the commercially important marine fishes and detailed statistics of marine fish landings were collected and analysed. The racial composition of mackerel stocks and the age determination of the oil sardine received special attention. Studies on the catches and size composition indicated that the variations in the strength of year classes may cause fluctuations in the oil sardine fisheries. Studies to estimate the primary production in the seas were carried out at Calicut, Tuticorin and Mandapam. The programme of marine biological and oceanographical studies on the West Coast, launched in co-operation with the Indo-Norwegian Project, made further progress. A new Research Unit was opened for the Andaman and Nicobar Islands at Port Blair.

*Central Fisheries Technological Research Station, Kerala State :* The Processing Wing of the Central Fisheries Technological Research Station concentrated its studies on the development of new and improved methods of fish processing and fixation of suitable standards for preserved

fishery products. The Quality Control Section of the Station rendered advice to the industry on the improvement of the quality of export products. The operation of the pilot plant with the experimental tunnel dryer has made available valuable data for the design and construction of commercial dryers. The Craft and Gear Wing of the Station completed the design studies on fishing vessels required for the Government of India fleet for the Third Plan. A training course in boat building was conducted during the year. The installation of pilot fish meal plant at Bombay was completed and it has now started demonstration work.

*Off-shore Fishing :* The work of the deep sea fishing stations with its 23 boats was orientated in connection with other Central Fishery Research Institute for effective exploration and exploitation of the fishing potential in the off-shore waters. The station also provided facilities for imparting training to other fishing agencies including private. The exploratory fishing vessels operated from Veraval, Bombay, Mangalore, Cochin, Tuticorin and Vishakapatnam and landed 727 tons of fish valued at Rs. 2½ lakhs during the nine months of 1964. The quick freezing plant, cold storage and ice factory, run by the Deep Sea Fishing Station, Bombay was transferred to the Govt. of Maharashtra.

The Guiarat Government is setting up a marine biological research station at Okha at a cost of about Rs. 3·5 millions to deal with the problem of fishery biology, oceanography and marine biology with the help of UNESCO and other foreign institutions.

The Central and State Governments took progressive measures for developing fish industry and increasing fish production. The schemes formulated by the maritime States for the development of marine fisheries, lay emphasis on the mechanisation of fishing craft. There are over 2,750 mechanised boats at present in the country against 1,500 at the end of the Second Plan period. An FAO naval architect continued his work for evolving new designs of fishing boats. The Government of India's fleet of fishing vessels continued their operations along the Indian coast and a number of private parties have also taken to power fishing and have introduced mechanised fishing on a large scale, especially on the Kerala coast. Construction of fishing harbours is under way in Madras and Gujarat, while lay-out plans for harbours in Maharashtra, Mysore, Kerala, Andhra Pradesh and Orissa have been completed. Considerable importance is also being attached to the development of inland fisheries resources in the various States. The fish culture programme progressed satisfactorily all over the country and the production of quality fish and fish seed registered a marked increase. Measures have been taken to popularise the exotic common carp, which breeds rapidly in confined waters.

*Marketing :* For the improvement of fish marketing, six refrigerated railway vans are running—two at Palasa (Orissa)-Calcutta route, two in Calicut-Madras and two in Vijayawada-Howrah. Three more such vans are under construction. These vans have highlighted the need for more such vans not only on these routes but on others as well. Arrangements are, therefore, being made for the construction of six more refrigerated vans.

Through the efforts of the Gujarat Fishermen's Central Co-operative Association, which is transporting fish from Gujarat to Delhi and selling it in the city, marketing of marine fish in Delhi has developed. Steps have also been taken to promote the export of fish and fishery products and to improve their quality. A special Export Promotion Scheme started functioning during the year. Further, a tin-plate subsidy scheme for the fish canning industry was also introduced with effect from 1st Sept., 1961. Loans were advanced to Fisheries Co-operatives in Gujarat and Maharashtra States for fishery development schemes.

A Central Fisheries Corporation has been set up with headquarters at Calcutta. This has been registered as a Govt. company with an authorised capital of Rs. 5 crores. It will initially engage in marketing fish in Calcutta City, subsequently extending its activities to the whole country.

*Training :* The first two-year course for training district fishery officers in all aspects of fisheries, both marine and inland, was started during the year at the Central Institute of Fisheries Education at Bombay. The ten-month course of training at the Central Inland Fisheries Station has been revised and expanded and 25 trainees were undergoing training during 1964-65.

For training fishermen there are centres at Satpati near Bombay, Veraval in Saurashtra, Cochin in Kerala and Tuticorin in Madras. New training centres are being opened at Mangalore in Mysore State and at Kakinada in Andhra Pradesh. At these centres batches of 20 candidates are admitted for 6 months training.

The Central Deep Sea Fishing Station at Bombay gives training in modern fishing methods.

The Central Institute of Fishery Education, Bombay turned out two batches of trainees. The third and fourth batch of trainees 25 and 27 respectively are under training. The operative Training Institute, Cochin is training 28 master fisherman and 17 engine drivers. The Marine Products Training Centre, Mangalore (started with Japanese collaboration) provides training in canning, freezing, microbiology etc. A batch of 29 was trained and another 27 are undergoing training there.

Local fishermen numbering 140 were trained in mechanised fishing and Indian instructors and fishermen continued to receive training in powered fishing on board the I.N.P. Fishing Fleet at Cochin. 36 candidates including two from S. E. Asian countries completed their inland fisheries training course conducted at the Calcutta station.

*Foreign Aid :* The FAO, TCM and the Indo-Norwegian Project continued to render assistance in the overall development of the fisheries programme and in the implementation of specific projects of both the Central and State Governments. The administration of the Project hitherto vested with the Kerala Government has been handed over to the Government of India since April 1963 and the headquarters shifted from Neendakara to Ernakulam.

The activities of the project has been extended to Mandapam in Madras. The research vessel R/V Varuna conducted 21 research cruises during 1964 while the nine fishing vessels of the project landed 598 tons of fish valued at Rs. 82,000.

The F.A.O., T.C.M. and Indo-Norwegian Foundation continued to give valuable technical assistance. One harbour specialist continued work in connection with the development of fishing harbours in the States of Maharashtra, Kerala, Madras and Mysore under the Expanded Technical Assistance Programme of F.A.O. Two fisheries engineers worked on the Madras, Malabar, Kanara and Kathiawar coasts, on the introduction of new types of fishing gear, use of mechanised aids and the training of fishermen in their use. Services of 4 master fishermen were also obtained from Japan. Under the Indo-Norwegian Project, 90 boats of improved types were built and a new 25 ft. boat was designed. A fish marketing expert was engaged in formulating fish marketing schemes in co-operation with the States on a national basis.

The construction of the fishing harbours at Veraval, Kakinada, Nagapattinam and Vishakapatanam is nearing completion. Construction of such harbours at Porbunder, Umbergaon, Karwar and Bhatkal is in progress. Two F. A. O. experts, a harbour specialist and harbour economist are drawing up schemes for pre-investment survey. An Indian engineer has been trained under FAO assistance.

## THIRD PLAN

The main objective of Fishery programme in the Third Plan is increased production so that adequate animal protein diet becomes available to the population and also sufficient fish for export trade. The fishermen's condition is also to be improved. An amount of Rs. 29 crores has been allotted for the purpose.

The Third Plan includes proposals for the development of more than 50,000 acres of water area, merely as demonstration fish farm.

Another 1,500 acres of estuarine water together with 1,500 to 2,000 acres of marshy and fallow lands, which are to be reclaimed, are to be used for pisciculture.

During the Third Plan it was proposed to introduce 4,000 new mechanised fishing boats. Out of this, 1,200 have been so far mechanised and during 1964-65 it was proposed to bring under mechanisation about 1,600 more fishing boats. There are 2,750 mechanised boats at present.

*Research :* New investigations on oceanic fisheries, oceanographic studies, high altitude fisheries, fresh water prawns, backwater fisheries etc. will be taken up in Marine, Inland and Deep Sea C.R.S. Experimental and exploratory fishing also will be undertaken. Research on fishing requisites and crafts, and processing, preservation and utilisation of fish will be intensified in the Central Institute of Fishery Technology, Cochin. The investigations of State Fishery Departments on local problems will be intensified.

All India Fisheries Research Institute has been reconstituted to make it more broad-based than hitherto. The Central Institute for Inland and Marine (Barrackpore and Mandapam separately) are actively engaged in research for increasing fish production. New vessels of fish (like grass carp and silvercarp) have been successfully cultured in the country and made to breed by hormone treatment.

*Education :* The total requirement of personnel to run different development projects is about 2,100, out of which the district fisheries officers and other technical officers will number about 300 and 500 respectively. Training for officers of the level of District Fisheries Officers is provided at the Central Institute of Fisheries Education in Bombay. The requirements of the Technical Officers will be met by the expanded activities provided at the Central Inland Fisheries Station, Barrackpore, and the Inland Fisheries Sub-station, Kaushalya Ganga, Bhubaneswar in Orissa, and in the off-shore fishing stations. An Institute for training operatives in fisheries at various levels has been established at Cochin. Universities will be provided adequate facilities to train research and technological personnel for research institutions.

**Inland Fisheries :**

*Demonstration :* Demonstration programme for using 50,000 acres of inland waters, 1,500 acres of estuarine areas and 2,000 acres of marshy lands in different States is also included.

During 1961-63 five demonstration farms have been established and a scheme for intensive fish production in 600 Development Blocks in the country has been drawn up.

*Stocking :* 1,200 million fry and finger-lings including those in river valley projects.

*Reclamation and Conservation :* Reclamation of fisheries by cleaning trees, boulders and other obstructions for establishment of nurseries and conserving fish to full maturity.

*Agencies :* In the organisation level, panchayat and other local bodies will take increasing interest in the development of fish ponds and other inland waters.

*Marine Fisheries :*

Expanded exploratory fishing programme by the establishment of additional units at Veraval, Mangalore, Paradip and Port Blair.

Operate 35 large vessels and provide landing facilities for fishing at 16 ports. Survey and other preliminary arrangements made at about 9 ports during the first two years of the Third Plan. Construction of fishing harbour at Veraval

(Gujarat) initiated in Second Plan is completed. The construction of fishing jetties at Mangalore, Kakinada, Nagapattinam and Vishakapatnam is nearing completion.

Against the proposal for 12 additional fishing vessels, orders have been placed only for one and proposed to obtain three more during 1963-64.

72 ice and cold storage plants are to be set up in different States to facilitate movement of fish to canning centres. Out of this only six have been set up during the first two years of the Third Plan. Freezing and canning units are to be established in coastal districts of Western India, especially in Gujarat, Mysore and Kerala. About 20 new refrigerated rail wagons are to be introduced on the main routes. Arrangements have been completed only for three.

As a result of 3rd Five Year Plan, the production of fish is expected to increase from 1·4 million tons to 18 million tons and export of fish may go up from about 60 million rupees to double of it. Rs. 290 million have been allotted for fishery development in the 3rd Five Year Plan.

*Co-operatives :* At present there are 2,100 fishery co-operatives with a total membership of about 0·22 million mainly in Andhra, Gujarat, Kerala, Madras and Maharashtra, though some exist also in Assam, Bihar, Mysore and Orissa. Revitalising of the existing co-operatives and their further development and linking up with marketing and processing co-operatives, through detailed working programmes, so as to save fishermen from exploitation of middlemen and from indebtedness and to increase production, are some of the main objectives.

The Plan provides Rs. 10 million as loan assistance to Fishery Co-operatives. Loans amounting to Rs. 4·3 million have already been issued to co-operatives in several states.

*Fishery Extension :* The eight fishery extension units conducted various short term training courses for 1,956 personnel from C. D. Blocks. The units conducted also surveys for location of fish seed collection centres and assisted States in the construction of fish farms. Improved methods of inland fish farming were demonstrated and fish farmers were assisted in tackling specific problems. By improved breeding technique 131 lakh sperms were produced at these centres and one of them evolved also an improved method for transporting live fish. The extension units carried out audio-visual education at important State centres.

## ANDHRA PRADESH

Andhra Pradesh has a coast-line of about 600 miles. The continental shelf extends to 20 miles on an average with a fishable area of 12,000 sq. miles. There are 350 fishing villages in seven marine districts of A.P. with 1,80,000 fi-hermen having 20,000 boats and 61,000 fishing gear.

The fish production of the State is estimated at 1,58,000 metric tons of marine fish and 84,500 metric tons of inland fish annually. Fisheries contributed more than Rs. 13·2 crores during 1961-62 to the State income.

The training of 25 fishermen of the 22nd batch was commenced from August 1964 in the Fisheries Training Institute. The Institute has now been upgraded and a post-graduate diploma course in Fisheries was expected to be started from the academic year 1965-66 with a strength of 20 students.

So far (April 1965) 254 mechanised boats have been constructed. Of these, 91 mechanised boats have been distributed to fishermen. For 1965-66, an amount of Rs. 8·34 lakhs has been provided in the Budget for the construction of mechanised boats.

*Marketing :* Fish is being exported to Orissa and West Bengal. By the export of fish to West Bengal, there is substantial saving in foreign exchange expenditure due to import of fish from Pakistan.

*Fisheries Extension :* To intensify the development of fisheries in Block areas and also to increase the revenue of the Panchayat Samities and Panchayats of the State, a scheme has been started in 30 selected Blocks placing Rs. 15,000 at the disposal of each of the Blocks. The three pilot project blocks sanctioned in 1959 have been converted into extension blocks with effect from Nov. 1, 1963.

*Deep Water Netting :* During 1963-64, nine deep water netting units were in operation in various reservoirs in the State and the total catches upto Jan. 1964 were 0·70 lakh kg. of fish.

*Cooperatives :* There are 472 fishermen cooperative societies with a membership of 49,643 and a share capital of Rs. 5,43,237 including six Marketing and 2 Apex Central Societies.

*Transport :* 14 vans and two carrier boats are run by the Department in order to transport fish from catch landing centres to markets in the various parts of the State. Till the end of Jan. 1964, 3,345 tons of fish had been transported by 23,588 fishermen, realising an amount of Rs. 0·33 lakhs towards hire charges.

*Third Plan :* Fisheries secured Rs. 106 lakhs out of the total Plan investment of the State. In view of the development shown under fisheries during the first and second years of the Plan, the ceiling was increased to Rs. 1·31 crores and the number of schemes also increased to 33. The total expenditure for the first three years of the Plan will be Rs. 70·57 lakhs and the balance available for the remaining two years of the Third Plan.

## GUJARAT

Gujarat has a coast line of over 1,000 miles extending from Lakhpat in the north to Umbergaon in the south. It has a total fishable area of 25,000 sq. miles including the Gulf of Kutch and Gulf of Cambay.

There are 51 important fishing ports and about 174 other small roadsteads and fishing hamlets. No. of fishermen 1·5 lakhs; no. of active fishermen 30,000 ; no. of fishing vessels used in estuarine, coastal and offshore fishing : about 4,100 ranging from 1 to 15 tons. Total capital invested in fishing boats, engines, fishing gear and other accessories by fishermen and their co-operative societies amounts to Rs. 2·5 crores.

Total landings in 1964–65: 85,000 lakh metric tonnes worth Rs. 2·63 crores. Local consumption in the State: 10.000 tons. Balance is exported to Bombay, Delhi, Calcutta, Ceylon, Burma, Mauritius and Singapore. Value of fish exported to foreign countries : Rs. 10 lakhs.

More important landings of the State on the basis of value : Bombay ducks Rs. 1·08 crores; Pomfret Rs. 60 lakhs ; Indian Salmon and Jew fishes Rs. 13 lakhs; Prawns and shrimps Rs. 13 lakhs ; Perches and Hilsa Rs. 16 lakhs ; Shell fishes including pearls, chanks, cuttle bones, window pane oysters (Rs. 1·5 lakhs every year) and other marine sea shells Rs. 53 lakhs. Other miscellaneous fishes include sharks and rays, mullets, cat fish, coilia, etc. accounting for Rs. 30 lakhs. The State also produces about Rs. 3·5 lakhs worth of fish isinglass for export to England and Rs. 3 lakhs worth of fish fertilizer and 1 lakh lbs. of shark liver.

Important fishing ports: Bifurcated Surat District : Umbergaon. Dawan, Bilimora, Navsari, Borsi. Umarsadi. Kolak. Bulsar, Bhadeli-Jagalala, Kosumba, Surat ; Broach District : Broach, Bhadbhut, Kavi, Sarod ; Amreli District : Madhvad, Kotda Velan ; Junagadh Dist. : Veraval, Porbunder, Mangrol, Navibunder, Chorwad, Jaleshwar, Hirakot, Sutrapada, Dhamlej, Navabunder, Rajpara ; Bhavnagar Dist. : Jaffrabad. Bhavnagar, Ghogha ; Jamnagar Dist. : Okha, Bedi, Salaya, Sikka, Jodiya ; Rajkot Dist. : Naviakhi, Maliya ; Kutch Dist. : Cherovari, Lakhpat, Jakhau, Modhwa, Kandla, Kharirohar, Tuna, Rampara, Luni, Sekhdia, Mundra.

Inland pisciculture is confined to the districts of Baroda, Kaira, Panchmahals, Mehsana, Sabarkantha, Banaskantha, Broach, Surat and Dangs. There are 2,300 fishermen engaged in inland fisheries. Twelve lakhs of fish seed of major carps were collected from rivers like the Narmada, the Tapti etc. and supplied to the pisciculturists during 1963-64. Two fish farms and five fish nurseries have been established.

Per capita production of food : 2·8 metric tonnes a year. Per capita earning Rs. 875 a year.

No. of ice factories 83 ; ice production 1,021 tonnes a day ; no. of cold storages available 11 ; no. of mechanised boats : 995 ( June, 1964 ). Quantity of nylon supplied (1963-64) : 82,000 lbs. Two Fisheries Staff Training Centres at Ahmedabad train 68 candidates per year ; service stations 2 ; fisheries schools : one each at Baroda, Bhadbhut, Umarsadi and Kolak ; Cultural centres 15 ; shark liver oil extraction centres 4 ; fish meal plant : one at Jaffrabad ; Govt. of India institutions in the State : Marine Fish Research Sub-stations at Kandla and Veraval ; Survey Centre at Veraval ; Offshore Fishing sub-station at Veraval ; Central Institute of Fisheries Technology at Veraval.

### Third Plan Achievement

A fish meal plant provided in the Second Plan, is now ready at Jaffrabad. Veraval fishing harbour development at a cost of Rs. 50 lakhs was taken up and is nearing completion while a Rs. 7 lakh plan for development of Kutch fishing harbour has been completed. A canning plant is being operated by a cooperative association for canning Shrimps and other fishes. Canned Shrimps are exported to foreign countries.

The Gujarat Fisheries Central Co-operative Association Ltd., formed in the Second Plan, has constructed one cold storage, procured one freezing plant, constructed one fish godown, one boat building yard and one nylon twisting-cum-net making factory at Ahmedabad. Annual production : 1,00,000 lbs. of twine and 25.000 lbs. of netting. Total cost of the plant : Rs. 9 lakhs.

The State has 83 co-operative societies with about 13,200 members.

The Third Plan envisages an expenditure of Rs. 1·6 crores (Rs. 40 lakhs in South Gujarat area, Rs. 68 lakhs in Saurashtra and Kutch area and Rs. 21 lakhs Statewise). The fish production will be augmented by another 40.000 tons every year by 1965-66 valued at Rs. 1·6 crores.

A research wing has been opened in the Directorate to conduct research on the offshore fisheries. Three research vessels have started operating from 1961–62. A Marine Biological Research Station at Okha at a total cost of Rs. 14·39 lakhs has been sanctioned and the construction started early in 1964. A Technological Research Unit has been established at Jaffrabad for the improvement of processing Bombay Ducks.

## KERALA STATE

Kerala State, the smallest maritime State in India with 590 kms. of sea coast, contributes to a little over 30 per cent of the total seafish landed in India. Oil Sardine (Sardinella longiceps) and the Indian mackerel (Rastrelliger canagurta), the two most important shoaling fishes of the west coast contribute to the major fishery of the coast, the third important constituent being prawns. The fishing equipment consist of nearly 13,000 big and small non-mechanised canoes, over 8,000 catamarans besides nearly 1,000 mechanised boats using over 50,000 fishing gears of different types and sizes, thousands of hooks and lines, besides many mechanised boats.

The estimated landing of all fish in the State is about 3,65,382·7 m. tonnes of which 5,882·7 m tonnes are contributed by inland water fishes the rest being sea fishes. This quantity is valued at about Rs. 6,65,97,300 of which Rs. 37,96,400 is from inland fisheries. About 70 per cent of the people are estimated to be fish eaters. At the most only 55 per cent of the total production is consumed as fresh fish, 26 per cent as dried and

the rest is converted as fish manure or fish meal. The important items of fishery exports are frozen, canned and dried fish. The total quantity of fishery products exported during 1964-65 was about 9,742·1 m. tonnes valued at Rs. 5,04,35,551. This includes nearly 2,417 m. tonnes of dried prawn and prawn powder exported to countries like Burma, Singapore and Hongkong and 6,143 m. tonnes of frozen prawns and lobster tails to U.S.A., France, Holland and other foreign countries.

The total quantity of frozen frog legs and canned fish products exported for the year 1964-65 was 1,090-4 m. tonnes valued at Rs. 77,88,137.

Along the coast there are 67 fish curing yards, some of which are provided with sanitary fish curing sheds, and salt is issued at a subsidised rate.

There are four Fishermen Training Centres at Cannanore, Ernakulam, Vizhinjom near Trivandrum and Beypore to train able bodied fishermen in the use of mechanised fishing crafts and modern fishing equipment. Mechanised boats, Nylon and Fishing hooks, etc. are distributed at concessional rates through the Fishermen Co-operative Societies. A new approach to the reorganization of the whole industry on co-operative lines has been introduced by which the producers in the industry are organised into primary producers' societies, and 15 to 20 such units of continguous area are combined into a marketing unit. All the marketing units are combined into one marketing federation. The scheme is being introduced in stages from the southern region to the north. As many as 241 Fishermen Primary Co-op. Societies have already been organised. Trained fishermen are given capital and equipment to start co-operative fishing with mechanised units through these Co-operative Societies. There are six Regional Marketing Societies at Kozhikode, Vypeen, Neendakara, Karunagappally, Anjengo and Vizhinjom at present. When sufficient number of Regional Marketing Organisations have been set up, a State Apex Federation will be formed to act as a liaison between the government on one hand and marketing and primary societies on the other.

The Indo-Norwegian Fisheries Project, engaged in the exploitation of the Fisheries resources of the sea off Kerala, shifted its Headquarters to Ernakulam from Neendakara near Quilon and the activities at Neendakara consisting of the Boat Building Yard, Ice Factory, Cold Storage and freezing plant etc. were taken over by State Fisheries Department. According to the third supplementary agreement between the Government of India, U.N.O. and the Government of Norway, the Government of India has taken over the control of the project and the activities of the Indo-Norwegian Project have been extended to Mysore and Madras States also. Cannanore is selected as the centre of operation in this State to be developed by the Indo-Norwegian Project and the implementation of the schemes have been started. The programme of activity at Cannanore consists of establishing a fishermen training centre, a boat building yard and a freezing plant and the construction of a fishing harbour at Mopla Bay.

There are 48 private companies engaged in the processing and export of fishery products in the State.

There are seven cold storage plants in the public sector working at Vizhinjom, Trivandrum, Neendakara, Kayamkulam, Mattancherry, Blangad and Calicut. In addition to four Government freezing plants, there are eleven private freezing plants also.

There are four fisheries research stations in the State engaged in the research of marine, estuarine and fresh water fisheries. In addition to this, there are two research stations sponsored by the I.C.A.R. to conduct research on lime shell and prawns. There is a Fisheries Technological Station at Calicut conducting research on fisheries by-products and other technological aspects. The Fisheries Technological Station at Calicut manufactures fish meal, fish manure and semi-dried prawns as well.

There are four brackish water fish farms, one fresh water fish farm, 14 rural fisheries demonstration centres and eight major reservoir fishery centres.

The administration of the Fishery schools has been transferred to the State Education Department with effect from April 1, 1965.

*Third Five Year Plan :* The financial outlay set apart for fisheries development in the State during the Third Plan is Rs. 4·5 crores.

## MADRAS

Madras State, with a coast line of 1,000 kilometres and with about 7·57 lakh acres of inland waters, is rich in fisheries resources. There are four marine biological stations at Ennore, Krusadai Island, Tuticorin and Cape Comorin ; two Technological Stations at Tuticorin and Cape Comorin and a Fresh-water Biological Hydrological station at Bhavanisagar.

There are 308 coastal fishing villages with a total fishing population of 2,70,160. These fisherfolk possess about 5,100 boats, 23,620 catamarans, and 3 lakhs of fishing nets. The estimated landings of marine fish in 1963-64 were about 1,53,605·7 m. tonnes valued at Rs. 1,629·96 lakhs. The catches comprised mostly of Sardine, Cat-fishes, Sharks, Skates, Rays, Mackerels, Silver bellies.

There are about 50,500 inland fisherfolk possessing about 20.400 tackles. The estimated landings of inland fish from the various inland waters in 1963-64 were about 93,278 m. tonnes valued at Rs. 466 lakhs and consisting of Carps and Tilapia.

With a view to stepping up production of fry and fingerlings and to meet the growing demand of fish seed for stocking induced breeding of common carp (Bangkok strain) has been taken under a special scheme. These induced spawning centres have begun to function at Bhavanisagar, Amaravati, Mettur, Sathanur, Thanjavur, Poondi, Manimuthar and Vaigai Dam. The spawn produced in these centres are reared in departmental fish nurseries and distributed to the panchayats.

Twenty fish curing yards are maintined by the Government wherein good quality salt is supplied to fishermen at subsidised rates for curing fish under the technical supervision of fisheries departmental staff. There are five ice plant-cum-cold storages at Tuticorin, Cuddalore, Bhavanisagar, Neelankarai and Mettur Dam and two cold storages at Ennore and Nagercoil with a total production capacity of 14 tons and 500 lbs. of ice per day and 37 tons storage facilities.

There are 177 inland and 221 marine fishermen co-operative societies with about 43,000 members on their rolls with a paid-up share capital of Rs. 4·55 lakhs. They issue small loans to the members during the off season ; and also inculcate the spirit of thrift and co-operation among the fisherfolk. Long term and medium term loans extending over a period of 10 years and 5 years respectively are issued to these societies by Government for enabling their members to redeem themselves of their prior debts and to undertake fish marketing themselves. Co-operative fish marketing unions are also functioning at Ennore, Pulicat, Neelankarai, Cuddalore, Nagapattinam and Tiruchendur.

Through exploratory fishing operations, the fisheries department has located rich deep sea fishing grounds off Pulicat, Ennore, Madras, Cuddalore, Nagapattinam, Pamban, Tuticorin and Cape Comorin and the fishery is being exploited by private fishermen of the State. About 300 mechanised boats have already been distributed to fishermen co-operatives and groups of fishermen together with nylon fishing nets. To further survey the fishing grounds, three inshore stations are functioning at Madras, Cuddalore and Rameswaram. These stations are provided with mechanised fishing vessels and modern types of gear.

The pearl and chank fisheries of the Gulf of Mannar are State monopolies, and yield a substantial revenue besides supporting a large population of divers. During 1963-64, 3,55,573 full sized, 71,600 formed and 28,698 undersized chanks were fished.

Schools have been opened for fisherchildren. Fisheries science plays a large part in their curriculum. The children are taught handicrafts like coir rope making, mat weaving, net making, etc. Books, pencils and stationery articles are given free to these children.

An aquarium is located at Madras and tropical fishes like Gold Fish, Black Mollies, Sword Tails, Guppies, Tetra, Blue Gourami, Jewelfish, Fire mouths and food fishes like Catla, Labeo, Gourami, Murrels, Chanos, Etroplus, Eels, etc. are kept. Most important fish farms are at Mettur, Poondi, Chetput, Vellore Fort, Bhavanisagar, Chingleput, Krishnagiri, Sathanur, Vaigai, Amaravati and Manimuthar. All the departmental and provincialised tanks in the State are intensively stocked with quick growing fishes every year. For rearing fish fry and fingerlings in Panchayats, fish nursery schemes have been started. So far (April 1965), 200 nurseries have been constructed in 144 Panchayat Unions which are selected for this scheme. The biological station at Ennore supplies biological specimens to various educational institutions throughout the country.

In addition to being an important source of food supply, rich in proteins and albuminoids, food fishes play an important part in the manufacture of several bye-products. They are fish-oil (body oil and liver oil), shagreen, isinglass, fish glue, fish meal (guano), fish fin soup, pearl essence, fish manure, etc. During 1963-64, 5,438 kgs. of fish manure, 4,500 kgs. of fish meal, 1,274 kgs. of sea weed compost manure, 339 kgs. of skate liver oil and 1,645 kgs. of shark liver oil were produced by the Fisheries Department of the State.

Under the Third Five-Year Plan, 16 schemes with a total outlay of Rs. 222 lakhs are being implemented.

Receipts of department for 1963-64: Rs. 18,45,524. Expenditure : Rs. 73,24,239.

The designation of the department is: Government Fisheries Department, Madras.

## MAHARASHTRA

Maharashtra State has a sea board of more than 750 km. extending from Reddi (District Ratnagiri) in the south to Zai (Dist. Thana) in the north. The Inland Fisheries extend to Bhandara District in the East, a crowflight distance of over 805 km. The total number of fishing villages along the coast is estimated at over 250.

*Marine Fisheries :* Important varieties of sea fish caught along the coastline : Saranga (White Pomfret) ; Halva (Black Pomfret) ; Ghol (Jew fish) ; Dara (Giant Threadfin) ; Ravas (Indian Salmon) ; Kuppa (Tuna) ; Surmai (Seer fish) ; Boi (Mullet) ; Bombil (Bombay duck) ; Bangda (Mackerel) ; Mushi (Sharks) ; Wam (Eels).

Estimated marine fish production during 1963-64 : about 1·5 lakh metric tons.

Price per metric ton of fish : Rs. 385. The total value of marine fish caught during 1963-64 : Rs. 5·7 crores.

The number and names of the more important fishing villages and of the fishing grounds :

*Greater Bombay :* Lower Colaba, Worli, Danda, Versova ; *Thana District :* Bassein, Arnala, Uttan, Edwan, Usarni, Satpati, Navapur, Utcheli, Nagaon, Dativare ; *Kolaba District :* Karanja, Versoli, Alibag, Theronda, Revdanda, Murud, Bharadkhol ; *Ratnagiri District :* Burondi, Dabhol, Jaigad, Ratnagiri, Vijaydurg, Jaitapur, Malvan, Deobag, Vengurla.

The total number of fishing vessels is 9,000 of which 1,605 are mechanised.

The estimated population of fishermen : About 2 lakhs.

*Trawler Fishing :* Two pairs of medium size trawlers have now completed survey of fishing grounds of approximately 6,441 sq. km. between Vengurla and Murud. The survey programme is continued.

The Government of India's Deep Sea Fishing Station operates trawlers in Bombay waters. The vessels landed 1,255 tonnes of fish during 1963-64.

*Transport facilities :* A fish transport truck is being operated by the department for transport of fish from landing sites to marketing centres.

Upto the end of March, 1965, loans amounting to Rs. 5·65 lakhs and subsidies amounting to Rs. 1·55 lakhs were disbursed to 20 co-operative societies of fishermen for purchase of 22 transport trucks.

Nineteen carrier launches operated in the private sector, transported 1,988 tonnes of fish from Ratnagiri and Kannara districts to Bombay.

**The facilities available for curing, storage and refrigeration, co-operative marketing are :**

**Several ice factories in the city and also at important fishing centres along the coast.**

**Annually, some addition to the available cold storage space is being made by extension to the existing plants and establishment of new plants.**

**A seven-ton ice plant and 30-ton cold storage** were erected by the State Government at a cost of about Rs. 1,32,000 and handed over to the Satpati Fishermen's Sarvodaya Co-operative Society for operation. The Society has also been allotted by the Government, refrigeration equipment to increase the seven ton ice making capacity of its existing plant to ten ton and a four ton quick freezing plant and refrigeration equipment for a fish storage, ice storage and quick frozen fish storage received under the T. C. M Programme of the American Government. The quick freezing plant has started functioning. The work of installation of machinery is in progress. One eleven-ton plant with 30-ton cold storage received under the T.C.M. Programme has been allotted to the Versova Machhimar Vividha Karyakari Sahakari Society Ltd. The factory has been put into commission.

The State Government has taken over from the Government of India, for operation and expansion, the quick freezing plant, cold storage and ice factory at Sassoon Dock, with effect from May 1, 1965. The factory, at present, has a capacity of 12 tonnes of ice per day, store 40 tonnes of fish in the cold storage and freeze 6 tonnes of fish.

The establishment of ice factories and a cold storage plant at Ratnagiri and Alibag has been sanctioned. The factory will go into production soon (May 1965). Another plant will be established by the Government at Alibag (Kolaba Dist.) during the Third Five Year Plan period.

**The department has given two-thirds as loan and one-third as subsidy for establishing a 2-ton ice and 10-ton cold storage plant to Sindhudurg Macchimar Sahakari Society, Malvan. The factory has been put into commission.**

**A twine and net making plant received under T.C.M. Programme of the American Government has been allotted to Maharashtra Rajya Machhimar Sahakari Sanstha on loan basis. A loan of Rs. 4,58,000 has been given to the said Sanstha for erection of the said plant. The plant is in operation since Feb. 1964.**

*Marketing facilities :* Apart from the various retail fish and meat markets, the Bombay Municipal Corporation has provided a separate wholesale fish market known as Mahatma Gandhi Phule Market.

In the fish section space is provided for 250 retailers. Due to increased fish trade, the present wholesale market is found to be inadequate. The Corporation has, therefore, planned construction of a new wholesale fish market at Palton Road.

Marketing facilities have also been provided at Kankavli, and Malvan in Ratnagiri District. At other places, fish is sold in composite markets.

*Fish stalls :* In order to provide quality fresh fish to public, the department has established eight model fish stalls in the city.

A Fish & Chips stall has also been opened in the compound of Taraporevala Aquarium, Bombay to popularise unpopular varieties of fish like Dhoma, Sharks, Eels which are in less favour with gentry.

## GOVERNMENT HELP

**Loans of Rs. 103·72 lakhs and subsidies of Rs. 67·91 lakhs have been granted for mechanisation of fishing crafts till the year ending 1963-64. The number of mechanised fishing vessels has stepped up from 1,530 in 1962-63 to 1,605 during 1963-64.**

**Loans to the extent of Rs. 53·94 lakhs have been granted till the year 1963-64 to individual fishermen and Co-operative Societies of fishermen for purchase of boats, nets and other fishing accessories.**

Total financial assistance, so far (May 1965) made available to the fishing industry amounts to Rs. 178·82 lakhs as loans and Rs. 112·24 lakhs as subsidy.

The Government have sanctioned a scheme for the grant of subsidy to fishermen in Maharashtra State, for purchase of fishery requisites such as nylon hemp-twine, fish hooks, cotton twine and sail cloth. So far (May 1965) subsidies amounting to Rs. 18 lakhs have been granted by the Government since the inception of the scheme in 1959-60.

*Service stations :* One service station has been established at Satpati in Thana District to afford facilities to the fishermen owning mechanical vessels. One mobile service station has also been established at Ratnagiri to afford facilities to the fishermen and near about villages.

*Fishermen's Co-operative Societies :* There are about 246 fishermen's co-operative societies having 41,958 members with paid up capital of Rs. 9,59,000, engaged in the marketing of dry and fresh fish produced by the affiliated societies and member fishermen.

The main activities of these societies are : affording credit facilities to the members, supply of fishery requisites, running fair price shops for food grains, transport and processing of fish and fishing in rivers, tanks and sea.

**Government efforts in educating fishermen :—**

Seven fisheries schools have been established in **important fishing centres, imparting special training in net making, boat repairing, fish preserving, etc. Ratnagiri District 4, Thana District 1, Kolaba District 2.**

A fishery high school was established at Satpati.

Annual expenditure on these schools : About Rs. 1,31,500.

The Department of Fisheries has also a scheme to train fisher-youths in the operation of power vessels as mechanics and navigators. Under the scheme, facilities are made available to train 40 candidates annually in the technique of improved methods of fishing. The centres are situated at Versova, B.S.D. and at Ratnagiri. The duration of each course is six months, the scheme which was initially sanctioned for three years has been continued for the Second and Third Plans. Each candidate is paid a monthly stipend of Rs. 50 and food allowance of Rs. 10. Upto Dec. 1964, 302 candidates have been trained at Versova and 58 candidates at Ratnagiri training centre.

**Besides, the State Government have started a new three months' training course to train fisher-youths in handling and operation of marine engines. The trainees are paid a stipend of Rs. 40 per month each. Upto Sept. 1964, 241 candidates were trained under the three months' training course.**

**Public aquaria : The State Government maintains the Taraporevala Aquarium along the Marine Drive, Bombay. The exhibits include both fresh water and marine forms,** found along the coast of the State. Attached to the Aquarium is the Marine Biological Research Station where facilities are available to research students for M.Sc. and Ph.D. degrees. The institute is affiliated to the University of Bombay.

**A unit of technical staff consisting of a Senior Scientific Officer, Research Officer, Asst. Research Officer, Biologist and Biochemist, has been provided at the Marine Biological Research Station, Bombay, to intensify research.** Research is undertaken on different problems of aquatic biology with special reference to fisheries. Provision to run sea water and fresh water aeration and a research vessel with complete hydro-biological equipment make this station a complete institute for experimental research.

**A Marine Biological Research Station has** also been established at Ratnagiri. Construction work on providing an aquarium with facilities for circulation of sea water, fresh water and aeration has been taken in hand.

## FRESH WATER FISHERIES

Efforts are made to import quick growing varieties of baby fish in the State such as Catla (*Catla catla*), Rohu (*Labeo rohita*) and Mrigal (*Cirrhina mrigala*) from West Bengal, for their release in long seasonal perennial waters in the State in larger numbers every year. Large irrigation reservoirs also are being stocked with these varieties so that they may thrive and breed there in course of time. In 1964-65, as many as 98,00,000 number of carp fry, imported from West Bengal were stocked in different sheets of water.

To overcome difficulties regarding adequate supply of carp fry, experiments are being conducted to induce the major carps to spawn in confined waters. Progressive number of carp fry obtained every year by this method will gradually tend towards self-sufficiency in the matter of carp fry for piscicultural purposes in the State.

In the year 1964-65, 85,00,000 spawn were produced as a result of induced spawning experiments.

Collection of local baby fish for stocking is attempted at several places around Kolhapur, Bhandara, etc., and efforts are made in all directions to boost up these less developed fisheries.

The total production of fish from tanks and reservoirs stocked by the department with carp fry imported from West Bengal, and the rivers, was 1,10,28,000 kg. valued at Rs. 82,71,000 during 1963-64.

The fish market constructed by the Nagpur Municipal Corporation, with Government assistance is functioning satisfactorily.

## FISH PRODUCTS

A Fisheries Technological Laboratory has been established at Sassoon Dock, for conducting research on development of new fish products, improvement of tradional products and handling and processing of fish. The Laboratory also operates commercial schemes of manufacture and sale of shark liver oil products, fish meal and fish glue. For this a factory wing fully equipped with modern equipment such as a boiler, Titan shark liver oil extraction unit, centrifuges, filter presses, filling machines and homogenisers etc. is created. An up-to-date analytical laboratory handles testing of the commercial products of the technological laboratory. Analytical service is also extended to traders, exporters and producers of various fishery products. The laboratory is also authorised by the Government of India for testing samples under compulsory preshipment quality control scheme for the fish and fish products.

**In 1964-65 the commercial schemes recorded a sale of Rs. 18,36,366. The output of neat shark liver oil was 5,358 litres with an average**

vitamin 'A' content of 10,000 I.U./g. This was equivalent to 4,80,000 litres of dilute shark liver oil I.P. The output of fish meal was 536 metric tons.

Based on the research work carried out at the laboratory, a full fledged fruit canning plant was established at Malvan (Ratnagiri Dist.) in Oct., 1964. The initial production capacity is one lakh cans per year. Similarly, a small canning unit is established at the laboratory for pilot plant studies on the development of canned fish paste derived from ... popular varieties of fish.

### THIRD FIVE-YEAR PLAN

The Third Five Year Plan includes 26 different schemes with the total outlay to the extent of Rs. 178·32 lakhs (net). With the different projects in Third Five Year Plan, it is envisaged to increase fish production from marine fisheries to 2·1 lakh tons as against the fish production of 1·7 lakh tons at the end of Second Plan period. Additional production from fresh water fisheries is expected to rise to 12,000 tons by the end of Third Five-Year Plan.

*Fresh water fisheries* will receive further impetus in view of the larger inland fishery resources being now available in the regions of Vidarbha and Marathwada. A special unit for collection of fry has been proposed in the Plan.

*Marketing, preservation and transport* have also been assigned important place in the department's plan. In order to impress on the local bodies the need to maintain adequate facilities for fish marketing, a provision is made for grant of loans to such bodies for construction of well planned fish markets. The Government has approved a scheme for allotment of motor-trucks on loan-cum-subsidy basis to the Fishermen's Cooperative Societies in order to facilitate quick transport of fish from landing centre to marketing places.

The Government assistance has been granted to fishermen's societies for purchase of 21 transport trucks during the Third Plan period. An ice factory has been established at Ratnagiri to afford preservation facilities to the fishermen in the nearby villages. A fish cannery has been established at Malvan. Miscellaneous schemes as research both biological and technological are also making good progress.

In order to afford educational facilities to the fisher-children, High Schools and other training facilities have also similarly been provided in the Plan.

### FISH CURING YARDS

The Department continued to maintain 21 F. C. Ys in the Ratnagiri District. The work of effective improvement at the F.C.Ys were accomplished during the Second Plan at a cost of Rs. 80,000.

The transactions at the yards in Ratnagiri District during 1963-64 were as follows : Quantity of fish let in for curing—5,336 m. tons. Quantity of salt issued—1,459 m. tons. Quantity of cured fish removed—4,057 m. tons.

The total budget allotment for the department for the year 1963–64 was Rs. 82,99,130 and the total receipts were Rs. 24,89,000.

The designation of the department is: Office of the Director of Fisheries, Maharashtra State, Bombay.

## MYSORE

*Inland Fisheries :* There are about 30,000 minor tanks, 2,700 major tanks, 17 reservoirs and about 3,800 miles of rivers in the State.

Inland Fisheries development is extended to all over the State and more and more inland fishery resources are being exploited.

*Artificial Fish Breeding Centres :* Tungabhadra fish farm, Hessarghatta fish farm, Neerasagar fish farm, Vanivilas Sagar fish farm.

There are 20 fish farms in the State covering an area of 50 acres.

Induced breeding of quick growing varieties of food fishes by pituitary hormone injections has been taken up in different fish farms, so as to meet the increased fish seed requirements of the State. An Inland Fisheries Research Station has been started at Bangalore with field laboratories at important inland centres.

The estimated fish production at present from the inland resources is nearly 35,000 metric tons and the revenue in the form of direct realisation from exploitation of fisheries, through the sale of fishery rights, issue of licences, etc., is about Rs. 1,31,570.

Acreage of inland waters in the State is 10,20,000 (approximate). Inland fishermen population is estimated at 6,00,000.

*Marine Fisheries :* Mysore State has 200 miles of coast line on the Arabian Sea. All along this sea coast, there are many fishing villages, the most important of them being Karwar, Ankola, Kumta, Honnawar, Bhatkal, Majali, Bingi, Chendia, Gangolli, Malpe, Udiyawar, Bokapatnam and Mangalore.

More than 40 varieties of sea fishes are landed out of which the most important are Sardine, Mackerel, Seer and Sharks and Prawns. The total fish production on Mysore coast is over 20 per cent of India's marine fish production.

Thus, the marine fisheries confined to North and South Kanara can be regarded as one of the richest regions in India.

Value of fish exploited :—

Quantity of fish in metric tons and the approximate value :—North Kanara : 73,358 ; Rs. 2·81 crores ; South Kanara : 42,225 ; Rs. 2·21 crores.

There are about 20,000 fishermen actively engaged in fishing, about 6,500 boats and about 37,000 nets. The number dependent on the fishing industry is estimated at over 1,00,000.

Average catch per fisherman per annum on Mysore coast : 5·75 tons.

Capital value of the industry together for North and South Kanara districts is estimated at Rs. 2·5 crores.

No. of fish curing yards :—North Kanara: 15 ; South Kanara : 15.

The total Third Plan outlay is Rs. 130 lakhs.

The number of mechanised boats has been increased from 64 in 1961-62 to 191 in 1964-65. The number of fishermen trained has increased from 80 in 1961-62 to 140 in 1964-65. Steps were taken to provide increased facilities for preservation and processing. 30 fish curing yards on the coast continued to stock and supply salt suitable for fish curing.

The Government is considering as to how far supply of salt could be subsidised. The re-introduction of this subsidy is under the consideration of the Government (Aug. 1965).

During the Third Plan, the activities of the Indo-Norwegian Project were extended to Karwar. Under this project, work on providing harbour facilities, training of fishermen, boat construction and setting up of processing facilities have been taken up and the works are making good progress (Aug. 1965). At the Marine Products Processing Training Centre, Mangalore, training of technicians in fish (food) processing technology has been taken up. The first batch of 29 students completed their training during 1964-65 and the second batch is undergoing training (Aug. 1965).

The strength of the training centre at Mangalore was increased and a second training centre was opened at Karwar. Under the Special Development Programme, two more training centres are proposed at Gangolly and Honnavar.

*Co-operatives :* There were 105 co-operative societies during 1964-65 as against 70 at the end of the Second Plan. During 1964-65, a sum of Rs. 5·85 lakhs was given as loan to fishermen.

*Inland Fisheries :* During the Second Plan inland fisheries development was progressively extended to all the districts in the State. A plan for intensive production and distribution of fish seed has been put into operation.

The Government of India has approved five schemes under the Special Development Programme (Erash Programme) at a total cost of Rs. 62·38 lakhs.

## ORISSA

Kinds of sea-fish caught : Pomfrets, Mackerel, Ribbon fish, Silver bellies, Sardine, Sharks, Rays, White Baits, Bombay Ducks, Cat-fishes, Threadfins, Perches, Jew-fishes, Sur-fishes as well as Prawns. Kinds of estuarine fish caught : Sharks, Shads, Catfishes, Threadfins, Perches, Mullets, Jew-fishes, Prawns and Crabs.

Annual production of Shark Liver Oil : 1950-51 (3,000 lb.) ; 1951-52 (6,730 lb.) ; 1952-53 (7,658 lb.) ; 1953-54 (10,718 lb.) ; 1954-55 (6,587 lb.) ; 1955-56 (11,681 lb.) ; 1956-57 (5,123 lb.) ; 1957-58 (10,361·75 lb.) ; 1958-59 (15,041 lb.) ; 1959-60 (12,860 lb.) ; 1960-61 (5,068 lbs.) ; 1961-62 (3,322 lbs.) ; 1962-63 (6,459 lbs.).

Important marine fishing centres : Patisonapur, Marcondi, Gopalpur, Prayagi, Aryapalli, Arkhakuda, Puri Paradeep, Kirtania and Chandipur.

Important estuarine fishing centres : Sonapur and Surla (Bahuda estuary), Damodarpur and Gajpatinagar (Rusikulya estuary), Rambha, Kespur, Balugaon, Kuguri, Gangadharpur, Kaluparaghat, Bhusandpur and Satpara (Chilka Zone), Astarang (Devi estuary), Kujang and Kukitola (Mahanadi estuary), Chandanipal and Chandbali (Dhamra and Baitarani estuaries) and Kirtania (Subarnarekha estuary).

Important inland fishing centres : Ansupa lake, Russelkonda reservoir, Hirakud reservoir, Kausalyagang, Surada reservoir and Mandira dam reservoir.

Number of fish curing yards run by the fishermen's own co-operative stores : 6. Number of ice factories which cater to preservation of fish for transport to Calcutta and elsewhere : 8 including two departmental flake ice plants. Co-operative marketing has developed in the Chilka area. The annual volume of trade ranges between Rs. 25 and Rs. 40 lakhs.

The demand is approximately 100 times more than the supply.

The Orissa Fisheries Development Corporation Limited, is taking up deep-sea fishing from 1965-66. Commercially the State Government is continuing off shore fishing and pilot power fishing operations with small boats since the Second Plan Period on a semi-commercial basis. There are no fishermen's schools, but fishermen are being trained by State Fisheries in inland piscicultural activities in five demonstration fish farms. A Marine By-Products Factory under the Third Plan has been established at Majhidiha and has started production of can products, fish meal and frozen fish and all the different plants will be completed by Third Plan period.

There is a small experimental aquarium attached to the Fisheries Department in Cuttack and marine aquarium is being proposed for Puri.

A fresh water biological station has been established at Kausalyagang, District Puri. Field researches carried out at Kiakani (Puri), Kothpal (Mayurbhanj), Dighi (Balasore), Narasagar (Angul), Humari (Ganjam) and 20 other fish farms. Field research on marine fish farming is carried out at Khiragachamadeli.

Major experimental farms in the State : Cuttack fish farm ; Puri fish farm ; Chowdwar fish farm ; one model fish farm at Laxmisagar in Puri District. Sonepur ; Sambalpur ; Balasore, Bolangir and Bhavanipatna. Co-operative marketing has developed at Jeypore (Koraput), Kathpal (Mayurbhanj), Kanjia-Kiakani (Barang), Amearda (Mayurbhanj). One composite fish seed centre at Bomlei (Sambalpur) under T. & R. W. Scheme and another at Jeypore (Koraput)

under the Third Five Year Plan have been established for additional production of fry by induced breeding.

Research has been completed on the manufacture of agar and hydrolysed protein and production of biscuits and tablets from concentrated fish protein has started in laboratory scale. Applied research is being continued on breeding of carps, life history of mullets, reclamation technique for swamps, improved craft and gear, freezing of fish, canning of prawn, cultural practices in fish rearing, on the suitability of new types of fishing gears in coastal and estuarine waters, improvement of indigenous marine fishing gears with synthetic twines. Culture and biology of Mugil cephalus Linn in brackish water and culture of Gracilaria keeping quality of shark liver oil of different potencies are under varying period of storage. Research has been taken up on electrical fishing gear and induced breeding of estuarine fish.

Third Plan provision is Rs. 224 lakhs.

**Income from Fisheries Department ranges between Rs. 2·5 and 3 lakhs per annum which does not include rent for water areas.**

Budget allotment: 1965-66: Rs. 57,61,100; Special Development Programme (1965-66): Rs. 82·65 lakhs.

## WEST BENGAL

Kinds of sea fish caught: Pomfret, Bhetki, Mackerel, Prawn, Topsi, Hilsa, Chanda, Bhola, Bombay Duck, Ribbon, Shark, Rays, Rock Cod, Skate, Eel, Cat fish, Phasa, etc.

Total quantity of fish caught in 1964-65: 53,000 tonnes (based on international production only).

Total value of the sea fish caught in 1963-64: Rs. 8,40,000.

Price per Kg. of different kinds of fish in March 1964.

| Varieties | Maximum | Minimum | Average |
|---|---|---|---|
| | Rs. P. | Rs. P. | Rs. P. |
| Carps .. | 4·00 | 2·54 | 3·27 |
| Hilsa .. | 3·50 | 2·40 | 2·95 |
| Bhetki .. | 3·25 | 2·50 | 2·88 |
| Mullets .. | 3·25 | 2·50 | 2·88 |
| Butter .. | 2·74 | 1·50 | 2·12 |
| Lobster .. | 4·60† | 3·42† | 4·01† |
| Shrimps .. | 1·25 | 1·00 | 1·13 |
| Prawn .. | 3·00 | 0·67 | 1·84 |
| Live fish .. | 5·33 | 3·34 | 4·34 |
| Misc. .. | 2·00 | 0·67 | 1·34 |

† Figures for 1963.

Approximate strength of the fishing population: About one lakh (1961) plus two per cent increase per year.

Potential demand for fish in the local market: 5,92,000 metric tonnes (the State as a whole).

Gear used: Grill net, Drift net, Drag net, Fixed net, Herring trawl etc.

There are demonstration fish farms in private parties' tanks in each thana of the State.

Ancillary industries like liver oil, gelatin, glue, fish-meal, and their production: One scheme for production of shark liver oil, fish-meal, processed fish and utilisation of other fish by-products is operated at Contai coast.

Production of fish bye-products during 1964-65:

Shark Liver Oil 2,376 litres; Fish Meal 42,150 kg.; Fish Fertilizer 286 kg.; Fish Food Manure 5,025 kg.; Shark Flesh Dried 87 kg.; Poultry Food 1,500 kg.; Fish Biscuits 4 kg.; Dried Shark Fin 23½ kg.; Dried Shrimps 228 kg.; Dried Precooked Prawn 7 kg.; Fresh Fish 377 kg.; Dry Bombay Duck 205 kg.; Processed Bombay Duck 368 kg.

The above products include only productions from Government fish technological stations at Junput, Contai, Midnapore and Freserganj, 24 Parganas.

Extent to which production meets the demand: 20 per cent.

Approximate Revenue from fisheries during 1964-65: Rs. 17·16 crores.

Budget allotment for the Department for 1965-66: Rs. 1,08,40,000.

### RESEARCH

There is one Freshwater Fisheries Research Station at Kalyani. There is one Technological Research Station at Junpat for production and standardisation of various fish bye-products and fish curing yards both at Junpat and at Fragergunge. Brackish Water Experimental Fish Farm at Junput, Hill-Stream Fisheries Research Station at Kalimpong and a number of Fish Seed Farms in a number of districts.

The designation of the Fisheries Department: Directorate of Fisheries, West Bengal under the administrative control of Fisheries Department.

# RESEARCH

RESEARCH in pure science is carried out mainly in the universities, scientific surveys of the Government, and in some research institutes such as the Tata Institute of Fundamental Research. The Council of Scientific & Industrial Research (C.S.I.R.) and the Department of Atomic Energy provide facilities for fundamental or basic research in their laboratories and institutes, and also sponsor such research in universities and research institutions all over the country.

Research in applied science and for industrial development is done mainly under the auspices of the C.S.I.R., the Co-operative Industrial Research Associations, institutes functioning under various Ministries and the laboratories attached to a few industrial concerns.

The Shri Ram Institute for Industrial Research, Delhi, undertakes, on a 'non-profit' basis, researches on projects sponsored by industrial concerns, groups of companies, individuals and Government agencies.

Research in engineering subjects is undertaken in some of the C.S.I.R. laboratories and institutes, the Indian Institute of Science, Bangalore, Central and State Hydraulic Engineering Research Stations, higher technological institutions, like the Indian Institute of Technology, Kharagpur, and in a few engineering colleges, such as the College of Engineering and Technology, Jadavpur.

The Council of Scientific & Industrial Research, also sponsors engineering research in various institutions through its research committees.

Agricultural research is looked after by the Indian Council of Agricultural Research, New Delhi, The Indian Agricultural Research Institute, New Delhi, and the various Central Committees for agricultural commodities like the Indian Central Cotton Committee, Indian Central Jute Committee, etc. and the research institutes functioning under the Ministry of Food and Agriculture. (See article on Agriculture.)

The Indián Veterinary Research Institute, Izatnagar (U.P.) is concerned with veterinary diseases. The National Dairy Research Institute at Karnal in the Punjab works on dairy research.

Research in forestry and forest products is undertaken by the Forest Research Institute and Colleges at Dehra Dun.

Medical research is carried out under the auspices of the Indian Council of Medical Research. institutes functioning under the Ministry of Health, and the Council of Scientific and Industrial Research.

Research in the humanities—literature, language, the arts, etc.—is done at individual institutions scattered throughout the country.

Research in social problems such as social tensions, social welfare and labour welfare is conducted as part of their work at many universities.

About 275 research journals (English) are published in India. These cover a wide range of subjects, grouped as follows: General science, 31; Engineering, including civil, electrical, telecommunication and aeronautical, 31; Chemistry, including biochemistry, chemical technology, plastics, paint, oils and fats, soap, and food, 21; Agriculture, including forestry, 35; and Medical sciences, 64.

The Third Plan outlays for the development in Scientific and Technological Research under different categories are as follows (Rs. crores):-
Council of Scientific and Industrial Research (incl. field experiments) and Ministry of Scientific Research and Cultural Affairs 35·00; Department of Atomic Energy 35·00; Agricultural Research 26·40; Medical Research 3·50; Research under other Central Ministries (other than Defence). 30·89 Total 130·00.

The National Research Council of Canada has offered about 150 post-doctorate fellowships for 1964-65 for fundamental research in science and engineering.

### SCIENTIFIC SOCIETIES

The National Institute of Sciences of India, New Delhi, established in 1955, is the scientific Academy recognised by the Government of India. Besides this, there are two other general science Academies with national scope, viz. the Indian Academy of Sciences, Bangalore and the National Academy of Sciences, Allahabad.

The oldest learned society in India is the Asiatic Society of Bengal, founded in 1874.

From it originated the Indian Science Congress Association which held its first annual meeting in 1914.

The other Scientific bodies are:

Indian Association for the Cultivation of Science, Jadavpur, Calcutta-13; Aeronautical Society of India, Talkatora Road, New Delhi; Agricultural & Horticultural Society of India, Calcutta; Agri-Horticultural Society of Madras, St. George Cathedral Road, Madras; All India Astrological and Astronomical Society, Jyotish Samarat Bhavan, 50/2 Dharmtala Street, Calcutta; All India Veterinary Association, 23, First Street, Vidyodaya East, T'Nagar, Madras 17; Anatomical Society of India, 1, Park Street, Calcutta-16; Anthropological Society of Bombay, 136, Apollo Street, Bombay; Aquarist Society of India, 251. D. Naoroji Road, Bombay; Architectural Society of India, Bombay; Asiatic Society, 1, Park Street, Calcutta; Assam Science Society, Department of Physics, Gauhati University, Jalukbari, Assam; Association of Applied Physicists, Calcutta University, 92. Upper Circular Road, Calcutta; Association of Building Technicians, 1/11, Mukar Nallamuthu Street,

Madras 1; Association of Engineers, 24, Netaji Subhas Road, Calcutta 1; Association of Microbiologists of India, 1, Park Street, Calcutta-16; Association of Pediatricians of India, Back-Bay View, New Queen's Road, Bombay-4; Association of Physicians of India, 'Dreamlands', New Queen's Road, Bombay-4; Association of Principals of Technical Institutions (India), C/o Delhi Polytechnic, Delhi-6; Bangiya Bigyan Parishad, 294/2/1, Upper Circular Road, Calcutta-9; Bharata Ganita Parishad, Lucknow University, Lucknow; Bihar Academy of Agricultural Sciences, Sabour P.O., Bhagalpur, Bihar; Biological Society of Assam, Cotton College, Gauhati; Bombay Medical Council, Swadeshi Mills Estate, Tata Road, New Queen's Road, Bombay-4; Bombay Natural History Society, 114, Apollo Street, Bombay; Bombay Sanitary Association, Princess Street, Bombay; Bombay Society of Model Engineers. Noble Chambers, (Rooms 23 and 24), Parsi Bazar Street, Bombay; Bombay State Horticultural Development Association, College of Agriculture, Poona-5; Bombay Textile And Engineering Association, Opposite Railway Station, 343 Grant Road, Bombay 7; Botanical Society of Bengal, 93/1, Upper Circular Road. Calcutta-9; Calcutta Geographical Society, Calcutta; Calcutta Mathematical Society, 92, Upper Circular Road, Calcutta; Calcutta Statistical Association, Asutosh Building, Calcutta-12; Cardiological Society of India, 67, Dharmatala Street, Calcutta-13; Christian Science Society, Chowringhee Mansion, Block B, 30 Chowringhee Road, Calcutta-26; Concrete Association of India, C/o A.C.C., 121, Mama Parmanand Road, Bombay; Congress of Theoretical & Applied Mechanics, Kharagpur; Current Science Association, Hebbal P.O., Bangalore-6; Electrochemical Society, Indian Institute of Science, Bangalore-12; Engineering Association of India, India Exchange, Calcutta 1; Engineering Association of Northern India, G.T. Road, Batala, Dist. Gurdaspur, Punjab; Entomological Society of India, Indian Agricultural Research Institute, New Delhi; Essential Oil Association of India, C/o Harcourt Butler Technological Institute, Kanpur; Ethnographic and Folk Culture Society, Lucknow University, Lucknow; Eugenical Society, 89, Girgaon Road, Bombay; F.A.C.T. Technical Society, Udyogmandal P.O., Alwaye, Kerala; Fertilizer Association of India, 85, Sunder Nagar, New Delhi; Geographical Society of India, Senate House, Calcutta University, Calcutta; Geological Institute, 27, Chowringhee Road, Calcutta; Geological, Mining & Metallurgical Society of India, Presidency College, Calcutta 12; Gujarat Research Society, Samsodhan Sadan, South Avenue, Bombay 52; Helminthological Society of India, 1, Park Street, Calcutta-16; Horticultural Society of India, C/o Indian Agricultural Research Institute. New Delhi; Indian Association of Dermatologists and Venereologists, 1, Nagindas Mansions, Opera House T.T., Bombay 4; Indian Astronomical Association, 8, Anand Parbhat, New Delhi-5: Indian Botanical Society, Department of Botany, Banaras Hindu University, Banaras; Indian Botanical Society, C/o Institute of Science, Mayo Road, Bombay; Indian Botanical Society, University Botany Laboratory, Madras-5; Indian Botanical Society. Mysore Road, Bangalore City; Indian Cancer Society, Tata Memorial Hospital, Parel, Bombay-12; Indian Ceramic Society, Central Glass and Ceramic Research Institute, Jadavpur, Calcutta 32; Indian Chemical Society (Bombay Branch), St. Xavier's College, Bombay-1; Indian Chemical Society, 92 Upper Circular Road, Calcutta; Indian Council of Geographers, 1, Park Street, Calcutta-16; Indian Dairy Science Association, Hosur Road, Bangalore-1; Indian Ecological Society, 1, Park Street, Calcutta-16; Indian Institute of Architects, Prospect Chambers Annexe, D. Naoroji Road, Bombay 1; Indian Institute of Chemical Engineers, Jadavpur University, Calcutta 32; Indian Institute of Metals, 31, Chowringhee Road, Calcutta 16; Indian Institution of Chemical Engineers, C/o A.C. College of Technology, Saidapet P.O., Guindy, Madras; Indian Jute Mills Association, 17, Taratola Road, Calcutta; Indian Leather Technologists' Association, Mercantile Building, Lalbazar, Calcutta-1; Indian Mathematical Society, 2, Bhaskarapuram, Mylapore, Madras-4; Indian Medical Association, Shri Nivas, S. V. Patel Road, Bombay-4; Indian Medical Association, 23, Samavaya Mansions, Corporation Place, Calcutta-13; Indian Metallurgical Association, 20, Strand Road, Calcutta-1; Indian Meteorological Society, New Delhi; Indian National Society of Soil Mechanics & Foundation Engineering, New Delhi; Indian Pharmaceutical Association, Kalam Kutir, 3rd floor, 213-219, Frere Road, Fort, Bombay-1; Indian Pharmaceutical Congress Association, 14, Ganesh Chaudhury Avenue, Calcutta 13; Indian Physical Society, 210, Bow Bazar Street, Calcutta-32; Indian Physiological Society, Calcutta; Indian Phytopathological Society, Pusa Institute Buildings, New Delhi 12; Indian Psychiatric Society, Central Mental Hospital, Yervada, Poona; Indian Research Fund Association, Kurnool Indian Society for Agricultural Statistics, C/o I.C.A.R. (Statistical Wing), Library Avenue (Pusa), New Delhi 12; Indian Society of Agronomy, Indian Agricultural Research Institute, New Delhi 12; Indian Society of Engineers, 12, Netaji Subhas Road, Calcutta; Indian Society of Genetics & Plant Breeding, Indian Agricultural Research Institute, P.O. Pusa, New Delhi; Indian Society for Quality Control, Calcutta; Indian Society of Soil Science, Indian Agricultural Research Institute, New Delhi-12; Indian Society of Theoretical and Applied Mechanics, Indian Institute of Technology, Kharagpur; Institute of Consulting Engineers, 9 Hastings Street, Calcutta-1; Institute of Industrial Engineers (India), C/o Hindusthan Levers Ltd., Bombay; Institution of Chemists, Medical College, Calcutta; Institution of Engineers, 8, Gokhale Road, Calcutta 20; Institution of Engineers (India), Muthra Road, Delhi; Institution of Military Engineers, New Delhi; Institution of Surveyors, New Delhi; Institution of Telecommunication Engineers, Post Box No. 481, New Delhi; International Society of Plant Morphologists, University of Delhi, Delhi; Maharashtra Association for the Cultivation of Science, Servants of India Society Bldgs., Poona 4; Mechanical Engineers' Association, Janmabhoomi Chambers, 29, Fort Street, Bombay 1; Mining, Geological & Metallurgical Institute of India, 29, Chowringhee, Calcutta; Mysore Geologists' Association, Mysore Geological Department, Bangalore-1; Mysore Horticultural Society, Lal Baugh, Bangalore-2; National Society of India for Malaria and other Mosquito Borne Diseases, 22, Alipur Road, Delhi; Neurological Society of India, 534, Sandhurst Bridge, Bombay 7; Obstetrics & Gynaecology Society of North India, Benjamin Road, Ludhiana, Punjab; Oil Technologists' Association (India), H. B. Technological Institute, Kanpur; Palaeobotanical Society of India, 53, University Road, Lucknow; Pharmaceutical Society, Saugar University, Saugar; Physiological Society of India, 92, Acharya Prafulla Chandra Road, Calcutta; Psychoanalytical Society, Calcutta; Quality Control Association, C/o S.K.S.J. Tech. Institute, Bangalore 1; Radio and Electronics Society of India, Fateh Manzil, Opera House, Bombay 4; Rajasthan Academy of Sciences, Pilani, Rajasthan; Royal Agri-Horticultural Society of India, 1, Alipore Road, Calcutta; Society of Biological Chemists, Indian Institute of Science. Bangalore 12; Society for Corrosions and Coatings Technology, Calcutta; Society of Electronics Engineers, Electronics Research & Development Establishment, P O. Box No. 103, Bangalore 1; Society of Experimental Medical Science (India), P. 10, C.I.T Road, Calcutta 14; Society of Student Metallurgists, Bengal Engineering College, Sibpur, Howrah; Soil Conservation Society of India, Hazaribagh, Bihar; South Indian Horticultural Assocn., Lawley Road P.O., Coimbatore; Students' Literary & Scientific Society, Nowroji Seth Street, Thakurdwar, Bombay-2; Sugar Technologists' Association of India, Nawabganj, Kanpur; Textile Association, 'Santosh,' 72A, Shivaji Park, Bombay 28; Tropical Diet Research Society, 1/6, Fakir Chakrabarty Lane, Calcutta 6; Vijnan Parishad, Bank Road, Allahabad; Vijnana Prachara Nilayam, Kottapeta, East Godavari Dist., Andhra Pradesh; Zoological Society of India, C/o Zoological Survey of India, 34, Chittaranjan Avenue, Calcutta 12.

## COUNCIL OF SCIENTIFIC & INDUSTRIAL RESEARCH

Scientific research under State auspices in India is carried out mainly through the Council of Scientific & Industrial Research and the various National Laboratories or research institutes set up under its control and in the Universities and research institutes aided by the Council The Council grants fellowships to qualified persons who wish to pursue science as a career and disseminates scientific knowledge and information. It has also the responsibility of administering the "Pool for temporary placement of well-qualified Indian scientists and technologists returning from abroad." It maintains a National Register of Scientific & Technical Personnel in the country.

The proposed International Scientific Collaboration Bureau at C.S.I.R. headquarters will carry out regular assessment studies on scientific and technological developments in various developing countries. It will initiate and establish bilateral collaboration between C.S.I.R. and parallel scientific and technological organisations in other countries, especially in developing nations.

The Regional Foundry Station to be set up by the National Metallurgical Laboratory at Agra is the fifth of its kind in India. Three foundry stations set up by the Laboratory are already functioning one each at Batala in Punjab, Howrah and Madras.

## SCIENTIFIC RESEARCH

The policy of the Government of India with regard to science and scientific research was formulated in a resolution of March 4, 1958, and laid as a statement on the table of both Houses of Parliament on March 13, 1958.

The aims of this policy are: (*i*) to foster, promote, and sustain, by all appropriate means, the cultivation of science and scientific research in all its aspects—pure, applied, and educational; (*ii*) to ensure an adequate supply, within the country, of research scientists of the highest quality, and to recognise their work as an important component of the strength of the nation; (*iii*) to encourage and initiate, with all possible speed, programmes for the training of scientific and technical personnel, on a scale adequate to fulfil the country's need in science and education, agriculture and industry, and defence; (*iv*) to ensure that the creative talent of men and women is encouraged and finds full scope in scientific activity; (*v*) to encourage individual initiative for the acquisition and dissemination of knowledge, and for the discovery of new knowledge, in an atmosphere of academic freedom; and (*vi*) in general, to secure for the people of the country all the benefits that can accrue from the acquisition and application of scientific knowledge.

### National Research Development Corporation

(See under All India Corporations).

## NATIONAL LABORATORIES

There are 34 national laboratories functioning under the Council of Scientific and Industrial Research.

The names of the laboratories and institutes with their locations in italics, set up by CSIR at various centres in the country and the functions entrusted to them are as follows:

*National Physical Laboratory, New Delhi*:—Research in problems relating to Physics, both fundamental and applied. Maintenance of Standards Testing facilities are also available.

*National Chemical Laboratory, Poona*:—Fundamental and applied research covering the whole field of chemistry for which other specialised institutes have not been set up. The National Collection of Type Cultures is housed in the Laboratory.

*Central Fuel Research Institute, Jealgora (Bihar)*:—Fundamental and applied research on fuels — solid, liquid and gaseous. Physical

and Chemical surveys of Indian coals are conducted through seven coal survey stations under the Institute.

*Central Glass and Ceramic Research Institute, Jadavpur :*—Research on different aspects of glass and ceramics, pottery, porcelain, refractories and enamels ; development of processes for manufacture of glass and ceramic articles ; standardisation of raw materials used in the ceramic industry.

*Central Food Technological Research Institute, Mysore :*—Food processing and conservation of food, food engineering and all aspects of fruit technology. Regional Fruit and Vegetable Preservation Stations at Trichur, Nagpur, Bombay and Lucknow have been recently established.

*National Metallurgical Laboratory, Jamshedpur :*— Fundamental & applied metallurgical research.

*Central Drug Research Institute, Lucknow :*— All aspects of drug research including evaluation & standardisation of crude drugs, discovery of substitutes for pharmacopoical drugs and plants, pharmaceutical and synthetic chemicals, biochemistry and biophysics, infection, immunisation, pharmacology, chemotherapy & experimental medicine.

*Central Road Research Institute, New Delhi :*— Research on road materials, testing of road materials and road surfaces.

*Central Electro-Chemical Research Institute, Karaikudi (Madras) :* Research on different aspects of electro-chemistry, including electrometallurgy, electro-deposition and allied problems.

*Central Leather Research Institute, Madras :*— Fundamental and applied aspects of leather technology.

*Central Building Research Institute, Roorkee :*— Engineering and structural aspects of building and human comforts in relation to buildings.

*Central Electronics Engineering Research Institute, Pilani (Rajasthan) :*—Design and construction of electronic equipment and components and test equipment.

*National Botanic Gardens, Lucknow :*—Collection & large-scale cultivation of economic and medicinal plants of industrial importance.

*Central Salt & Marine Chemical Research Institute, Bhavnagar :* Investigation of production of pure salts, reduction in cost of production ; economic utilisation of by-products of salt manufactures, development of new methods and technique for the recovery, production & utilization of various marine & allied chemicals.

*Central Mining Research Station, Dhanbad :*— Research in methods of mining, safety in mines and mine machinery.

*Regional Research Institute, Hyderabad :*— Research in problems relating to the industries and raw materials of the region.

*Indian Institute for Biochemistry & Experimental Medicine, Calcutta :*— Research in various aspects of biochemistry as applied to medicine, Bacteriology, etc.

*Birla Industrial & Technological Museum, Calcutta :*— A museum to depict scientific and technological advancement.

*Regional Research Laboratory, Jammu-Tawi (Jammu & Kashmir) :*—Research in problems relating to the industries and raw materials of the region & research specially directed to medicinal plants of the Himalayas (Kashmir Region).

*Central Mechanical Engineering Research Institute, Durgapur (W. Bengal) :*—Research in Mechanical Engineering in all its aspects.

*Central Public Health Engineering Research Institute, Nagpur :*—Research in all aspects of public health engineering and co-ordination of work of all interested agencies in this field in the country. A number of Field Centres and Units at various places have also been established by the Instt.

*National Aeronautical Laboratory, Bangalore :* Scientific investigations of the problems of flight with a view to their practical application to the design, construction and operation of aircraft in India.

*Regional Research Laboratory, Jorhat :*—Research problems relating to more efficient utilisation and better conservation of important national resources of Assam and surrounding areas with a view to aiding the industrial development of the region.

*Regional Research Laboratory, Bhubaneswar :*— Identification and exploration of problems of the region, bringing projects of potential local application to the attention of local industries and providing assistance to associated local industries in the testing of their products and quality control.

*Central Indian Medicinal Plants Organisation, 4, Sapru Marg, Lucknow :*—Co-ordination of activities in the development of cultivation and utilisation of medicinal plants and to develop the vegetable drug resources of the country.

*Central Scientific Instruments Organisation, Chandigarh :*—Promotion and development of indigenous manufacture of scientific instruments for teaching, research and industry.

*Indian Institute of Petroleum, Dehra Dun :*— Research in petroleum refining and processing of natural gas, petro-chemicals, etc., and providing facilities for the training of personnel for oil and petroleum industries.

*National Geophysical Research Institute, Hyderabad :*—Gravitational, magnetic, electrical and seismic surveys for understanding the crustal structure of India and also study and improvement of methods and techniques of exploration.

*Visvesvaraya Industrial & Technological Museum, Bangalore :*—A museum to depict scientific & technological advancement.

*Indian Programme for International Indian Ocean Expedition, New Delhi :* Research programme with special emphasis on investigations on India's coastal waters, includes physical and chemical oceanography, marine biology and fisheries, meteorology and marine geophysics. An Indian Ocean Biological Centre has been set up at Ernakulam with UNESCO assistance and an International Meteorological Centre at Bombay with U.N. Special Fund assistance has been set up. The setting up of Mafatlal Scientific & Technological Museum at Bombay and a National Biological Laboratory has been approved by the C.S.I.R.

*Design and Engineering :*—The unit undertakes process design, complete industrial plant design and project engineering work for processes evolved at the national laboratories.

*Survey and Planning :* This unit carries out studies through surveys and otherwise, on the efforts and output in research by different research organisations in India, as well as the social and industrial impacts of research. The unit also serves as an operational research unit to evolve techniques and apply them in industry. The unit has carried out studies on Government expenditure on scientific research, trends in expenditure in national laboratories and development of scientific societies in India.

*Defence Co-ordination :* Soon after the national emergency was declared, the Council set up a Defence Co-ordination Unit to study defence requirements of strategic items, identify the problems and initiate research and development work on them and, if necessary, set up pilot-plant production for such items in the laboratories.

*Scientific and Technical Personnel :* The National Register Unit of the Council acts as a manpower research organisation and a clearing house of information regarding availability and utilisation of Indian scientific and technical personnel in India and abroad. The unit helps evolve scientific personnel policy, recruitment, assessment of use and wastage of manpower and manpower planning.

The Council operates a scientific pool scheme to provide employment assistance and temporary placement to highly qualified scientists and technologists, particularly those returning from abroad, until they secure suitable employment. As many as 1,139 candidates were selected to the pool in 1964, bringing the total number to 3,258 since the inception of the pool. The number of Pool Officers in position as on Jan. 1, 1965 was 562.

The collection and dissemination of information regarding not only research but also industrial matters in general and the publication of scientific memoirs and journals are among the functions of the Council.

The Publication and Information Directorate of the Council publishes journals, monographs, technical reports, literature surveys and a fortnightly CSIR news. Seven journals have been published by the Directorate.

A major publication of the Directorate is the Dictionary of Indian Raw Materials and Industrial Products published under the title *"Wealth of India"*. It is published in two series, one dealing with raw materials (plant, animal and mineral resources of India) and the other with industrial products.

A monthly science journal entitled *"Science Reporter"* is brought out from 1964. Intended to serve as an interpreter between the scientists and the intelligentsia, it carries news on scientific and technological developments in India and abroad.

*Documentation :* The Indian National Scientific Documentation Centre (INSDOC), New Delhi, established with technical assistance from UNESCO, provides a complete range of documentation services to individuals and institutions all over the country. On specific requests, it procures copies of scientific documents, compiles bibliographies, supplies technical information, makes micro films or photo copies of customers' documents and provides translations into English of articles published in various foreign languages.

*Sponsored Research :* Through a liberal system of grants-in-aid, scientists in other technical institutes, industrial laboratories and universities are enabled to pursue fundamental and applied research and develop their own special fields. There are, at present, more than 660 such schemes in progress at more than 100 centres. Apart from the practical results achieved, the schemes provide opportunities of training for young research workers and develop centres of independent research. Junior and senior fellowships tenable in the universities as well as in national laboratories are also being awarded to talented young persons, besides financial aid to retired scientists. The number of *ad-hoc* fellowships awarded in 1964 was 1,549.

*Co-operative Research Associations :* Co-operative research associations in different industrial fields are being assisted in their capital and recurring expenditure and by way of technical advice, preparation of plans and procurement of experts and materials. Ten such associations now functioning are catering to the textiles, rubber, silk, art silk and paint, plywood, wool, tea and cement industries. Similar associations are in the process of being formed for foundry, automobile, radio and electronic industries.

*Liaison & Extension Services :* Active Industrial Liaison & Information Units have been set up in most of the National Laboratories to make direct contact with the industry, trade associations and users of research to identify the problems of industry and formulate them into research projects for the laboratories.

The unit at the Headquarters, Research Co-ordination, Industrial Liaison and Extension Services Unit supplements the efforts of Laboratory in research utilisation by maintaining day to day contact with various government agencies responsible for research development and planning such as Planning Commission, Department of Technical Development, Ministry of Industry, etc. This unit also maintains a system of research intelligence so that information on research in all institutes, is available at hand in

*Note :* See under "Government Industrial Undertakings" for a note on "Tarapur Atomic Power Station"

the Central Office. The extension service provided by this unit includes dissemination of information on processes developed in the laboratories which might be of interest to rural and suburban development.

## NUCLEAR RESEARCH AND ATOMIC ENERGY

Pioneering work in this field was done by the Tata Institute of Fundamental Research, Bombay, established in 1945.

This Institute has since been recognised as the National Centre for advanced study and fundamental research in nuclear physics and mathematics and consists of a school of physics and a school of mathematics with a staff of 300.

The Institute is the largest centre for cosmic ray research in India and has made notable contributions to the theory of elementary particles. Its nuclear emulsion group for the study of elementary particles is probably the second largest in the world and has made outstanding contributions. The Institute also houses, as a national facility, an advanced and modern computer CDC 3600-160A. It also has a IMeV Cascade Generator.

During the years preceding the establishment of the Atomic Energy Commission, the Institute built up a group of scientists trained in nuclear physics. These scientists were readily available for some of the early projects of the Commission when it was set up in 1948.

Two other important institutions conducting research in nuclear physics are the Saha Institute of Nuclear Physics, Calcutta and the Physical Research Laboratory, Ahmedabad.

Considerable fundamental research in nuclear science and cosmic rays is also being conducted at various universities and research institutions all over India with financial assistance from the Department of Atomic Energy. During 1964-65 a sum of Rs. nine lakhs was sanctioned as assistance.

The development and control of atomic energy in India is regulated by the Atomic Energy Act (Act No. 33 of 1962) and the Department of Atomic Energy handles all business of the Government of India relating to atomic energy and functions of the Central Government under the Act.

The Atomic Energy Commission which assumed authority on June 23, 1958, is responsible for (*a*) formulating the policy of the Department of Atomic Energy, (*b*) preparing the budget of the Department for each financial year and getting it approved by the Government, and (*c*) implementing Government's policy in all matters concerning atomic energy.

The Commission's programme envisages that India should be able to produce all the basic materials required for the production of atomic energy, promote its use in agriculture, biology, industry, research and medicine, prepare a long-range plan for the generation of electric power and set up one or more power stations.

The scientific and technical work of the Department is carried out by the Atomic Minerals Division and the Atomic Energy Establishment at Trombay near Bombay.

Some of the more important functions of the Atomic Minerals Division are: (*a*) geological survey for and development of atomic minerals, (*b*) geographical survey, (*c*) geochemical survey, (*d*) mineral technology, (*e*) drilling, (*f*) mining, (*g*) stockpiling, (*h*) conservation of minerals and (*i*) technical assistance and training.

### Trombay Establishment

The Atomic Energy Establishment, Trombay, is India's principal centre for research and development in the field of atomic energy. Located about 15 miles from Bombay, and employing over 7,500 persons of whom 1,650 are professional staff, the Establishment is by far the largest scientific centre in the country.

The work of the Establishment is organised under six major groups, *viz.* Physics, Engineering, Electronics, Metallurgy, Biology and Administration. Each group is under the charge of a Director and comprises two or more divisions.

There are three reactors at the Establishment —Apsara, CIR and Zerlina (for details see under "Government Industrial Undertakings").

To ensure a steady supply of trained scientific and technical personnel, the Establishment started a training programme in 1957 under which 150 young graduates and engineers are recruited annually from the universities and given specialised training for a year to fit them for work in India's atomic energy programme.

After successful completion of training the trainees are absorbed in various divisions of the establishment

**APSARA Reactor:** Completed 8½ years of operation in Dec. 1964, with a record in power output of 2·23 million kilowatt hours during 1964. (See under "Government Industrial Undertakings.")

**CANADA-INDIA Reactor:** India's second research reactor is the Rs. 10 crore (£7·5 million) Canada-India Reactor, under the Colombo Plan. Work on this project was taken up in Feb. 1956 and the reactor attained criticality on July 10, 1960. (See under "Government Industrial Undertakings.")

**ZERLINA:** Zerlina, a zero energy reactor for lattice investigations and new assemblies, reached criticality on January 14, 1961.

For more details see the article "Government Industrial Undertakings."

For particulars on Thorium Plant, Uranium Metal Plant, Radio-chemistry Laboratory, Isotope Laboratory, Fuel Element Fabrication Facility, Heavy Water Plant, Heavy Water Reconcentration Plant, Plutonium Plant, Uranium ore Mill, Electronic Instruments, Graphite Shop and Central Workshop. See article "Atomic Reactors" in the "Government Industrial Undertakings."

**Research Facilities:** The research facilities available in the Trombay Establishment are such that advanced research, both fundamental and applied, in several scientific fields can be undertaken. Besides the reactors mentioned already, the following principal facilities exist: (1) A 5·5 MeV Van de Graaff accelerator at Trombay, (2) Mass spectrometers, (3) A 200 kV electron diffraction camera fabricated in the Establishment, (4) A slow chopper built in the Establishment, (5) A mechanical monochrometer built in the Establishment, (6) Crystal spectrometers and a double crystal spectrometer, (7) Spectrometers built in Establishment; Spectrometers including double beam and vacuum grating ones, (8) Plasma Torch built at Trombay, (9) Cloud chambers, (10) Magnetometers, (11) Various types of electronic instruments, (12) Various instruments used in chemical analysis such as fluorimeters, polarometers, spectrophotometers, colorimeters, etc.

**Production Facilities:** With the object of exploiting fully the indigenous raw materials for the speedy and successful implementation of its programme, the Commission has already set up a number of plants, while others are in the process of being set up. They are:

**Rare Earth Plant:** This plant which was set up in 1952 is now owned by the Government of India. Its capacity for processing 1,800 tons of monazite has been increased to 3,000 tons annually. It produces rare earths (chiefly cerium) compounds and a cake containing thorium and uranium. Trisodium phosphate, a detergent, obtained as a by-product, has a good market. The rare earths compounds (mixed rare earths chloride, carbonate and hydroxide) are sold in the world market. Small amounts of naphthenate, fluoride and oxide of cerium are also produced.

**Mineral Sand Industry:** A company called Travancore Minerals (Private) Ltd., was registered in October 1956 to exploit the rich mineral deposits of Kerala State, with the participation of the Government of India and Kerala Government on an equal basis and the company started its operation in May 1957. The Government Minerals Concern, Manavalakurichi, owned and managed by Madras Government, was merged with this company in January 1959 and the Madras Government was taken as a shareholder.

The main mineral exploited is ilmenite, which is mostly exported. Other minerals are rutile, monazite, zircon and sillimanite. A detailed and systematic survey and prospecting of the mineral deposits in the sea bed and the present mining areas is being arranged by the Atomic Minerals Division to assess the total available deposits.

## OTHER RESEARCH BODIES

There is a whole host of research organizations (besides the ones mentioned above) engaged in scientific research of one sort or another.

The Geological Survey of India in Calcutta maps out the mineral resources of the country. The Indian Bureau of Mines and the Mineral Information Bureau at Delhi help in the prospecting and working of minerals.

The Oil and Natural Gas Commission is responsible for the prospecting and exploitation of mineral oil resources.

A Central Institute of Petroleum is being set up at Dehra Dun.

Cartographic work is in progress under the National Atlas Organization in Calcutta.

The Survey of India with its headquarters at Dehra Dun is engaged in large-scale mapping of river basins and in the preparation of topographical maps.

The Botanical and Zoological Surveys both in Calcutta conduct systematic surveys of the animal and plant resources of the country.

The Meteorological Departments of the Government of India at Delhi and Poona are concerned with meteorological, climatological, hydrometeorological and snow surveys.

The Department of Anthropology in Calcutta is concerned with ethnographic surveys and a variety of other studies in anthropology.

The Indian Association for the Cultivation of Science in Calcutta is engaged in physical and chemical research, both in its theoretical and applied aspects.

Research in radio physics and electronics is in progress at the Indian Institute of Radio Physics and Electronics in Calcutta, while research in cosmic rays and theoretical physics is carried on at the Physics Research Laboratory in Ahmedabad.

The Bose Research Institute in Calcutta conducts research in physics, chemistry, zoology and plant breeding.

The Birbal Sahani Institute at Lucknow carries on research in plant fossils.

The Institute of Mathematical Sciences at Madras carries on research in mathematics, applied mathematics, theoretical physics.

## ENGINEERING RESEARCH

The Indian Standards Institution at New Delhi lays down specifications for materials, tools and products.

Among engineering institutions providing facilities for research the following may be mentioned:

All India Institute of Hygiene and Public Health, Calcutta: Sanitary engineering.

Central Building Research Institute, Roorkee (U.P.): Building engineering, prestressed concrete engineering, etc.

Central Electronics Engineering Research Institute, Pilani (Rajasthan): Electronics and telecommunication engineering.

Central Mechanical Engineering Research Institute, Durgapur (W. Bengal): Mechanical engineering.

Central Public Health Engineering Research Institute, Nagpur: Public Health and sanitary engineering.

Central Road Research Institute, New Delhi: Road engineering.

Concrete Research Laboratory, Chepauk, Madras : Structural engineering.

Indian Institute of Science, Bangalore : Aeronautical engineering, internal combustion engines, and power, hydraulic and electrical communication engineering.

National Aeronautical Laboratory, Bangalore : Aeronautical engineering.

Indian School of Mines and Applied Geology, Dhanbad : Mining engineering.

M. S. University, Baroda : Civil, mechanical and telecommunication engineering.

P.S.G. & Sons Charities College, Coimbatore : Civil, mechanical and electrical engineering.

Government College of Technology, Coimbatore : Heat engineering, hydraulic engineering, soil mechanics.

Indian Institute of Technology, Kharagpur : Mechanical engineering.

Madras Institute of Technology, Madras : Aeronautical and automobile engineering and soil mechanics.

University College of Science and Technology, University of Calcutta : Heat and illumination engineering.

A number of Ministries and Departments of the Government of India have development and research sections in engineering.

The Indian Agricultural Research Institute, New Delhi has a Division of Agricultural Engineering which is concerned with agricultural equipment.

The Ministry of Communications has a Research and Development Directorate which sees to the specifications, certification and manufacture of aircraft and aircraft material.

The Ministry has a Telecommunications Research Centre in Delhi.

The Technological Development Wing of the Ministry of Industries offers advice on engineering equipment in general and more especially on machine tools and internal combustion engines.

The Central Board of Irrigation and Power conducts eleven research stations the chief of which are in Poona, Amritsar and Poondi (Madras State). The one at Khadakvasla near Poona is the most important. It conducts research in hydraulic engineering, soil mechanics, concrete materials and navigation.

The All India Radio has a research unit of its own in New Delhi.

The Railway Board has centres in Lucknow, Lonavla and Chittaranjan to investigate problems connected with railways.

Research projects connected with roads, bridges, ports, harbours are taken up for investigation by the Roads Organization under the Ministry of Transport.

It may be added that two Power Engineering Research Organizations in Bangalore and Bhopal, are being set up with the assistance of the U.N. Special Project Fund with UNESCO acting as the executive agency.

## MEDICAL RESEARCH

Medical Research is conducted chiefly under the auspices of the Indian Council of Medical Research, New Delhi. The Council also grants research fellowships. There is a Scientific Advisory Board which deals with technical questions and publishes reports of research carried on under the auspices of the Council.

The Council spent over Rs. 52·50 lakhs on research in 1963-64. In 1964-65 the expenditure was expected to exceed Rs. 73 lakhs.

The more prominent research institutions in medicine are :

School of Tropical Medicine, Calcutta: Diseases peculiar to tropical climate.

All India Institute of Hygiene and Public Health, Calcutta: Preventive and social medicine.

Indian Cancer Research Centre, Bombay : Cancer

Vallabhbhai Patel Chest Institute, Delhi : Tuberculosis and diseases of chest.

Central Leprosy Teaching and Research Institute, Tirumani (Chingleput): Leprosy.

Haffkine Institute, Bombay : Plague, malaria, virus diseases, nutrition. It also manufactures vaccines and sera.

Central Research Institute, Kasauli: Microbiology, biochemistry, serology.

Pasteur Institute, Coonoor : Rabies, influenza, tropical eosinophilia, anti-venom serum, serological reactions.

King Institute of Preventive Medicine, Guindy, Madras: Vaccines, specially against smallpox and therapeutic sera.

Bengal Immunity Research Institute, Calcutta (Private): Prevention, control and cure of disease, and anti-malarial drugs.

Central Drug Research Laboratory, Calcutta: Biological and chemical assays of drugs. It also gives technical advice to drug manufacturing firms.

Drug Research Laboratory, Jammu : Research in medicinal plants. Has two farms. Promotes standardization of indigenous drugs.

Virus Research Centre, Poona : Virus-caused diseases.

Central Drug Research Institute, Lucknow : Work on drugs.

National Institute of Communicable Diseases, Delhi : Malaria.

Cholera Research Centre, Calcutta : To study various aspects of Cholera.

Nutrition Research Laboratories, Hyderabad : Nutrition and allied subjects.

Tuberculosis Chemotherapy Centre, Madras : Research on Tuberculosis.

The Indian Council of Medical Research initiates research in a large number of specific problems at medical colleges and hospitals in the country including the institutions mentioned above.

## RESEARCH IN HUMANITIES

Research in the humanities—literature, language, arts, etc.—is engaging the attention of individual institutions scattered throughout the country.

Anjuman-i-Islam Urdu Research Institute, D. Naoroji Road, Bombay1; Anthropological Society of Bombay, C/o K. R. Cama Oriental Research Institute, 136, Apollo Street, Bombay ; Bangiya Sahitya Parishad, 243-1, Upper Circular Road, Calcutta ; Bhandarkar Oriental Research Institute, Poona ; Bharatiya Itihasa Samshodhaka Mandal, Sadashiv Peth, Poona ; Bharatiya Vidya Bhawan, Chowpatty, Bombay ; B. J. Institute of Learning and Research, Bhadra, Ahmedabad ; B. M. Institute of Child Development, Pharmacy College, Navrangpura, Ahmedabad ; Bureau of Psychology, Allahabad ; D. A. Memorial Institute, C/o Bharatiya Itihasa Samshodhaka Mandal, Poona ; Deccan College of Post-Graduate and Research Institute, Poona ; Department of Anthropology, Indian Museum, 27, Chowringhee Road, Calcutta ; Department of Archaeology, Ministry of Education, New Delhi ; Department of Historical and Antiquarian Studies, Gauhati ; Dharmakosha Mandal (Vedic Research Institute), C/o Prajna Pathshala, Wai, District Satara ; Ganganath Jha Research Institute, Allahabad ; Gokhale Institute of Politics and Economics, Poona ; Gujarat Research Society, Bombay ; Hindi Vidya Pith, Deoghar, Bihar ; Indian Institute of Education, 11, Horniman Circle, Bombay ; Indian Institute of Philosophy, Amalner, Dt. Jalgaon, Maharashtra ; Kannada Research Institute, Dharwar ; Karnatak Research Society, Dharwar ; K. P. Jayaswal Research Institute, Patna ; K. R. Cama Oriental Institute, 136, Apollo Street, Bombay ; Kuppuswami Sashtri Research Institute, Mylapore, Madras ; Mandir Vidya Pith, Bhagalpur, Bihar ; Marathi Sanshodhan Mandal, Mumbai Marathi Granth-sangrahalaya, Thakurdwar, Bombay ; Mithila Institute of Post-Graduate Studies and Research in Sanskrit Learning, Darbhanga, Bihar ; Nalanda Pali Institute, P.O. Nalanda, Patna ; National Archives of India, Ministry of Education, New Delhi ; Oriental Research Institute, Mysore ; Rajasthan Vishva Vidya Peeth, Udaipur ; Rajwade Samshodhan Mandal, Dhulia, Maharashtra ; Scindia Research Institute, Ujjain ; Shri G. K. Institute of Rural Education, Gargoti, Kolhapur District ; Sheth Bholabhai Jeshingbhai Institute of Learning and Research, Bhadra, Ahmedabad ; Shri Farbes Gujarati Sabha, Bombay ; Tata Institute of Social Sciences, Chembur, Bombay ; The Asiatic Society, 1, Park Street, Calcutta ; Vachan Mantapa (Kannada Research Institute), Belgaum ; Venkateswara Research Institute, Tirupati ; Vaidika Samshodana Mandal, Tilak Memorial, Poona ; Vaishali Prakrit Institute, Muzaffarpur ; Vishveshwaranand Vedic Research Institute, Hoshiarpur, Punjab.

## ATOMIC MINERALS

The Atomic Minerals Division of the Department of Atomic Energy is charged with the tasks of conducting comprehensive geological surveys for the location of atomic minerals, development of mineral technology, drilling, mining, stock-piling and conservation of atomic minerals. The most important achievement of this Division has been the discovery of large uranium deposits in Bihar State and the location of thorium rich minerals on the Ranchi Plateau, also in Bihar.

More recent investigations in the Himalayas have led to the location of uranium deposits in the Kulu District (Punjab), Mahasu District (H.P.) and Chamoli District (U.P.) which are currently under investigation. India's total reserves of uranium are enough to sustain more than 90 million kilowatts of electricity generation.

Deposits of beryl and lithium ores have also been discovered.

The monazite deposits of the Indian seaboard are perhaps the largest in the world. Indian monazite contains 8 to 10 per cent $ThO_2$ and upto 0·3 per cent $U_3O_8$. Total reserves of monazite are estimated at around five million tons with $ThO_2$ content of 0·45 million tons and $U_3O_8$ content of 15,000 tons ; those of ilmenite are estimated at about 100 million tons inclusive of 65·32 million tons of measured reserves, the rest accounting for indicated and inferred reserves. Zircon reserves in Indian deposits are estimated at about 10 million tons of which 3·34 million tons are measured reserves and the rest are indicated and inferred reserves.

The Division also helps private parties, including universities and other institutions, interested in prospecting and mining atomic minerals by providing technical advice, lending G. M. counters, analysingsamples free of charge and by extending such other help as would promote and widen the field of exploration.

## SPACE RESEARCH

Thumba Equatorial Rocket Launching Station (TERLS) has been established near Trivandrum, Kerala, by the Indian National Committee for Space Research (INCOSPAR) of the Department of Atomic Energy. The rocket launching facility became operational on Nov. 21, 1963 when the first Nike-Apache Rocket carrying a Sodium Vapour Payload was fired.

With the co-operation of the United Nations and several other countries, India has launched successfully 27 experimental rockets in the past 18 months (May 1965). The launchings are intended to provide valuable data on the atmospheric conditions over the geomagnetic equatorial region.

India expressed at the U.N. in 1963 its interest in being the host State for an International Equatorial Sounding Rocket Launching Facility. In response to India's invitation, a scientific group visited Thumba on behalf of the U.N. in Jan. 1964 and had recommended U.N. sponsorship for the facility. The formal action by the General Assembly (U.N.) is awaited (June 1965).

There is a Space Communication Track Station at the Physical Research Laboratory, Ahmedabad.

# COTTAGE INDUSTRIES AND HANDICRAFTS

### Village and Small Industries

THIRD Plan : Rs. 264 crores.

According to the working definition adopted by the Government, small-scale industries include all industrial units with a capital investment not exceeding Rs. 5 lakhs irrespective of the number of persons employed. Financial assistance to small industries is given by the Government, State Financial Corporations and banking institutions including the State Bank of India. Recently, measures were taken to make this assistance more effective.

The data about employment are extremely meagre. It is, however, very roughly estimated that at least 24 million persons are gainfully employed in these industries classified as under :—

| Name of Industry | Persons employed in lakhs. |
|---|---|
| Textiles | 75 |
| Leather | 24 |
| Wood | 21 |
| Metals | 42 |
| Pottery, Ceramics, Tiles, Bricks, etc. | 20 |
| Vegetable Oils, Chemical Products, etc. | 10 |
| Food including Hand-pounding | 20 |
| Dress and Toilet | 11 |
| Miscellaneous including jewellery and toy making | 17 |
| TOTAL | 240 (Estimated) |

The main objectives of the development of small scale and village industries laid down in the Second Five Year Plan were (*i*) the avoidance as far as possible of further technological unemployment during the period of the Second Plan, (*ii*) provision of as large a measure of increased employment as possible through different village and small scale industries, and (*iii*) a pattern of development capable of laying the foundation of an essentially decentralised society and also for progressive economic development at a fairly rapid rate. Wherever a large-scale industry competes with a cottage industry, a common production programme should be evolved.

The programme may cover (*a*) reservation of spheres of production, (*b*) non-expansion of the capacity of a large-scale industry, (*c*) imposition of a cess on products of a large-scale industry, (*d*) arrangements for the supply of raw materials and (*e*) co-ordination for research, training, etc.

## PLAN ALLOCATIONS

The allocation for khadi and village industries during the First Plan amounted to Rs. 14·82 crores which worked out at 0·44 per cent of the total Plan provision. A sum of Rs. 84 crores (1·24 per cent of total Plan allocation) was allotted for khadi and village industries in the Second Plan. The allocation for khadi and village industries of Rs. 92·4 crores during the Third Plan works out at 0·78 per cent of the total allocation.

## THE KHADI AND VILLAGE INDUSTRIES COMMISSION

The Khadi and Village Industries Commission was created by an Act of Parliament (No. 61 of 1956) in 1956 for the development of khadi and village industries in the country. Established in April 1957 it took over the work of the All India Khadi and Village Industries Board, which had earlier been set up by the Government of India in 1953.

Members of the Commission: U. N. Dhebar (*Chairman*); K. Arunachalam (*Vice-Chairman*); Dhwaja Prasad Sahu; Dwarkanath V. Lele; Akshay Kumar Karan (*Member-Secretary*).

In matters relating to policy the Commission is advised by a statutory board called the Khadi and Village Industries Board. The Chairman, Vice-Chairman, Secretary and members of the Commission are *ex*-officio Chairman, Vice-Chairman, Secretary and members of the Board respectively.

## STATE KHADI AND VILLAGE INDUSTRIES BOARDS

Almost in every State a statutory State Khadi and Village Industries Board has been constituted by the State legislature concerned. The Khadi and Village Industries Commission places the funds at the disposal of the State Khadi and Village Industries Board which employ the same for the development of khadi and village industries in the State. A limited number of institutions are now directly financed by the Commission. In the States where there is no statutory board an advisory board constituted by the State Government concerned advises on the measures necessary for the implementation of the programme for khadi and village industries.

The functions of the Commission cover :

(*a*) planning and implementing the development programme for Khadi and Village Industries under its purview ; (*b*) arrangements for the supply of funds, raw-materials, technical guidance, improved implements and marketing facilities ; (*c*) organisation of co-operative societies and registered institutions ; (*d*) organisation of training ; and (*e*) promotion of technical research.

The following industries, as provided in the schedule of Industries included in the Act, come under the purview of the Commission : Khadi (traditional and Ambar), Processing of Cereals and Pulses, Village Oil, Village Leather, Cottage Match, Gur and Khandsari, Palm-Gur, Non-Edible Oils and Soap Manufacture, Handmade Paper, Bee-Keeping, Village Poultry, Fibre, Carpentry and Blacksmithy, manufacture and use of manure and Methane gas from cow-dung and other waste products, and lime manufacture.

The Khadi and Village Industries Commission provides financial assistance in the shape of grants and loans for the development of khadi and village industries.

The assistance is given in accordance with and at rates and on terms sanctioned by the Government of India in respect of each industry to the following:

(*a*) a State Government; (*b*) a board established under any law for the time being in force for the development of khadi and village industries; (*c*) a society registered under the Societies Registration Act, 1860 (21 of 1860) or under any other law for the time being in force in any State; (*d*) a cooperative society registered under the Cooperative Societies Act, 1912 (2 of 1912) or under any other law for the time being in force in any State ; (*e*) a gram or village *panchayat* established under any State law for the time being in force ; (*f*) an authority set up under any law for the time being in force relating to *bhoodan* or *gramdan* ; (*g*) a trust created for public purposes of a charitable or religious nature; (*h*) an individual or institution engaged in research in khadi and village industries, subject to the condition that a grant or subsdiy to an individual should not exceed Rs. 5,000 in any one case; and to an institution it should not exceed Rs. 50,000 in any one case. The ceiling of Rs. 5,000 for an individual and of Rs. 50,000 for an institution may, however, be exceeded with the prior approval of the Government; (*i*) any other individual, authority or body in accordance with the approved pattern and within the ceilings communicated by the Commission to the Government.

*Note* : 'Individual' means an artisan or any other worker undertaking activities falling under the purview of the Commission and for which grants and subsidies are given.

## INSTITUTIONAL PROGRESS

When the All India Khadi and Village Industries Board took up the work of organising the producers of khadi and village industries there were only 186 registered institutions and 2,250 cooperatives. Following the policy enunciated for the promotion of cooperatives for village industries the Commission actively assisted the growth of village industries cooperatives. By the end of 1963-64 there were 984 registered institutions and 17,575 cooperative societies for khadi and village industries.

### Production

The production of khadi (including silk, woollen and ambar rose from the value of Rs. 21·22 crores in 1962-63 to Rs. 22·34 crores in 1963-64.

The value of production of village industries articles in 1963-64 was Rs. 43·23 crores.

The following table shows the comparative details of production of khadi and village industries in 1962-63 and 1963-64.

| Industry | Unit or Value | 1962-63 | 1963-64 |
|---|---|---|---|
| Khadi | Value Rs. Crores | 21·22 | 22·34 |
| Processing of Cereals and Pulses | Lakh quintals | 10·21 | 7·02 |
| Village Oil | —do.— | 6·77 | 5·96 |
| Village Leather | Value Rs. lakhs | 144·16 | 226·51 |
| Cottage Match | Gross Boxes | 67,880 | 87,733 |
| Gur and Khandsari : | | | |
| Gur | Lakh quintals | 15·66 | 11·82 |
| Khandsari | —do.— | 0·54 | 0·06 |
| Palm Gur | —do.— | 6·04 | 8·43 |
| Non-edible oils and Soap | Lakh kilograms | 37·35 | 35·03 |
| Handmade Paper | Metric Tons | 1,511 | 1,612 |
| Beekeeping | Lakh kilograms | 5·62 | 7·14 |
| Village Pottery | Value Rs. Lakhs | 79·82 | 98·27 |
| Fibre | —do.— | 55·17 | 88·57 |
| Carpentry and Blacksmithy | —do.— | 2·97 | 5·33 |
| Lime | Lakh kilos | 3·21 | 5·48 |

### Sales

Sales of different khadi and village industries products increased from Rs. 51·56 crores in 1962-63 (Khadi Rs. 20·37 crores and village industries Rs. 31·19 crores) to Rs. 101·26 crores in 1963-64 (Khadi Rs. 22·58 crores and village industries Rs. 78·68 crores). The table below shows the rise in the value of sales in khadi and village industries between 1962-63 and 1963-64.

(Rs. lakhs)

| Industry | 1962-63 | 1963-64 |
|---|---|---|
| Khadi .. .. .. | 2,036·78 | 2,257·96 |
| Processing of Cereals and Pulses .. .. | 318·35 | 215·43 |
| Village Oil .. .. | 1,543·36 | 1,338·78 |
| Village Leather .. | 199·91 | 228·25 |
| Gur and Khandsari: | | |
| Gur .. .. | 783·00 | 945·60 |
| Khandsari .. | 54·00 | 6·00 |
| Non-edible oils and soap | 31·96 | 32·31 |
| Handmade Paper .. | 26·23 | 28·92 |
| Village Pottery .. | 68·59 | 95·46 |
| Fibre .. .. .. | 26·13 | 24·05 |
| Carpentry and Blacksmithy .. .. | 2·60 | 3·39 |
| Cottage Match .. | 2·94 | 4,899·70 |
| Palm Gur (Neera) .. | 39·43 | 21·34 |
| Beekeeping .. .. | 22·48 | 28·56 |

### Employment

By March 1964, work opportunities were created for about 16·25 lakh spinners, 1·50 lakh weavers and 81,000 other artisans under the khadi programme. Through the programmes for village industries, employment opportunities were provided for 6·62 lakh persons.

### Training

In all 5,80,632 persons were trained during the past eleven years under the aegis of the Khadi and Village Industries Commission. Of these 5,68,849 persons were trained in khadi and 11,783 persons in village industries. A further breakdown of the figures shows that 5,51,819 persons were trained under the ambar charkha scheme, while 17,030 persons were trained under the traditional charkha scheme. Since a decision was taken not to extend the ambar charkha programme further, pending the consolidation of gains made in earlier years, there has been some relaxation in that form of training.

### Research

Liberal grants have been made to promote research. The Commission's Central Research Institute for Village Industries at Wardha which is known as Jamnalal Bajaj Central Research Institute for Village Industries has been in the field for some time now. As a result of financial assistance by the Commission improved implements such as ambar belni, ambar charkha, dhunai modhia, improved ghanis and chakkis have been introduced opening out possibilities of raising the productivity and income of the persons employed.

### Traditional Khadi

The Commission disbursed Rs. 15·30 crores for the development of traditional khadi industry during 1963-64 as against Rs. 16·45 crores and Rs. 19·40 crores in 1961-62 and 1962-63 respectively.

*Production :* Production in 1962-63 was 337·15 lakh sq. mtrs. valued at Rs. 7·49 crores while in 1963-64 the figures were 364·10 lakh sq. mtrs. and Rs. 8·47 crores respectively.

## AMBAR CHARKHA PROGRAMME

During 1956-57, the Commission introduced the ambar charkha to produce better quality yarn. Since then the two schemes have been in operation side by side. Expenditure on the Ambar Charkha Programme, during the year 1963-64 was Rs. 149·90 lakhs of which Rs. 97·26 lakhs were grants and Rs. 52·64 lakhs were loans.

*Production :* During the year 1963-64 production of ambar cloth was 228·77 lakh sq. mtrs. against 265·51 lakh sq. mtrs. in 1962-63. The total production for the eight year period being 1,428·41 lakh sq. mtrs. as shown below :

| | | |
|---|---|---|
| 1956-57 .. .. | 15·60 | lakh sq. mtrs. |
| 1957-58 .. .. | 92·50 | ,, ,, ,, |
| 1958-59 .. .. | 199·52 | ,, ,, ,, |
| 1959-60 .. .. | 212·89 | ,, ,, ,, |
| 1960-61 .. .. | 194·43 | ,, ,, ,, |

| 1963-64 .. .. | 228·77 | ,, ,, ,, |
| Total .. .. | 1,428·41 | lakh sq. mtrs. |

The number of Ambar Vidyalayas for training instructors and carpenters was as follows: Andhra 7, Assam 1, Bihar 3, Bombay (Bilingual) 19, Delhi 3, Kerala 4, Madhya Pradesh 3, Madras 5, Mysore 6, Orissa 1, Punjab 9, Rajasthan 6, Uttar Pradesh 10, West Bengal 2, Total 79.

The number of instructors, carpenters, spinners and weavers trained during the year 1962-63 was 31,707 thus bringing their total for the seven year period (1956-63) to 5,42,808.

### Sales of Khadi

The retail sales of khadi increased from Rs. 20·37 crores in 1962-63 to Rs. 22·58 crores in 1963-64. Of the Rs. 22·58 crores, next to sales through Bhandars and Bhavans which accounted for the major share with Rs. 17·47 crores, sales to State Governments, artisans and Central Government departments were Rs. 2·03 crores, Rs. 1·70 crores and Rs. 1·09 crores respectively. Sales through agents were Rs. 0·29 crore. Except sales to Central Government departments and through agents, others have shown considerable improvement over that of the previous year.

### Employment in Khadi

During 1963-64 both the programmes together provided employment to 16·25 lakhs spinners (12·30 lakhs traditional and 3·95 lakhs ambar) 1·50 lakh weavers and 0·85 lakh other persons employed in ancillary activities. The corresponding figures for 1962-63 were 15·64 lakhs spinners (11·87 lakhs traditional and 3·95 lakhs ambar) 1·25 lakhs weavers and 0·85 lakh other persons.

## HANDLOOMS

The handloom industry has all along occupied an important position in the economic fabric of the country, securing continuous employment to the weaver and ensuring his moral and material prosperity. There are at present 3 million handlooms employing over 8 million people on the loom and the ancillary processes.

### Production

The main aim of the handloom development programme during the successive Plan periods was to bring about an expansion of handloom production through fuller employment of weavers and the introduction of improved techniques. The achievement at the end of the First Plan period was 4,500 million metres by the mills, 1,305 million metres by handlooms and 225 million metres by powerlooms totalling 6,030 million metres. The achievement at the end of the Second Plan was 4,622 million metres by mills and 2,333 million metres by handlooms and powerlooms. The requirements of cotton textiles in the Third Plan period have been estimated at 8,370 million metres, out of which 3,150 million metres have been allocated as the share of the decentralised sector—handlooms, powerlooms and Khadi. A target of 2,520 million metres has been fixed for this industry representing about 30 per cent of the total requirements. The estimated production of handloom and powerloom cloth works out to 2,369 million metres in 1961, 2,410 million metres in 1962, 2,874 million metres in 1963 and 2,778 million metres in 1964 (upto November).

### Handloom Co-operatives

The objective of developing the handloom industry mainly by co-operative endeavour has been repeated from Plan to Plan and may now be considered to be in the main plank in its development. The number of looms within the co-operative fold has increased from 6·82 lakhs in 1963 to over 13·64 lakhs now. On present indications, it may be expected that at the end of the Plan period, the total number of looms in the co-operative fold may roughly be around 14 lakhs or nearly 50 per cent of the known size of the industry. Similarly the number of societies has increased from 9,870 in 1957-58 to over 11,748 with 12·60 lakh weaver members at present. Under the Reserve Bank of India Scheme of Handloom Finance, the credit limits sanctioned have risen from Rs. 180·19 lakhs in 1957-58 to Rs. 561·03 lakhs in 1963-64 and Rs. 481·21 lakhs from April to December 1964—the credit limits have almost been trebled.

### Marketing

The All India Handloom Board has taken several steps for the marketing of handloom products. Assistance is given for the opening of sales depots by State and primary weavers' co-operative societies, for running mobile vans and push-carts, for opening of inter-State depots and for arranging retail sales in the interior places through a system of hawkers.

This has helped in the setting up of over 1,839 sales depots, 41 inter-State depots, 56 central depots and 39 mobile vans. Government have also provided a subsidy in the form of rebate at the rate of 5 paise in the rupee on retail sales and 3 paise in the rupee on wholesale sale of handloom cloth to mitigate to a certain extent the lag between the competitive capacity of the mill industry and the handloom industry.

Publicity and propaganda measures like holding of fashion shows, participation in exhibitions, release of press advertisements, bringing out brochures, pamphlets, folders, posters etc., setting up of show-rooms and kiosks at railway stations and airports, erection of hoardings, neon signs etc., screening of cinema slides, documentaries and observance of the Handloom Week have helped to focus public attention on the industry and to create handloom mindedness.

### Exports

Indian cotton handloom fabrics have considerable appeal in foreign markets because of their texture and artistic qualities. Exports were previously being made principally to countries where Indians had settled particularly in S. E. Asia like Burma, Ceylon, Singapore, Siam, Malaya and African States. In the past few years, however, Indian exports of handloom goods to these traditional markets have been affected adversely due to various reasons, such as the establishment of textile mills in some countries, the restrictions imposed by newly liberated countries to foster local industry and the competition from China, Japan and Hongkong. The Indian handloom industry has, therefore, to turn to new markets as well as to non-cotton handloom exports. An example of this development is the market built up in America for the 'Bleeding Madras' quality. In recent years, certain varieties such as furnishings, silk fabrics, tussar silk fabrics etc. have made a hit even in European markets. With a view to promoting exports further, various measures have been taken by Government: (*i*) The All India Handloom Fabrics Marketing Co-operative Society attends to exports in the traditional markets in the Far East, Near East, Ceylon & Africa. It maintains sales depots at some of the overseas centres. It has also appointed commercial travellers at important places to push up exports in the above markets. (*ii*) The Handicrafts and Handlooms Exports Corporation of India Ltd., is entrusted with the task of promoting exports to non-traditional markets

in Europe and America. (*iii*) A scheme of voluntary inspection and quality marking has been introduced in respect of handloom fabrics meant for export. This is compulsory in the case of 'Bleeding Madras'. (*iv*) Inclusion of specific quotas for handloom fabrics in bilateral trade agreements. (*v*) Evolution of suitable designs by the Weavers' Service Centres of the Handloom Board for fabrics meant for export. Exporters are taking full advantage of the designs produced. (*vi*) Participation in International Fairs by the H.H.E.C. to popularise handloom textiles. (*vii*) Setting up of an Export Promotion Council for handloom fabrics. The Council will start functioning shortly.

As a result of these measures, the exports of handloom fabrics (cotton fabrics of standard type) were of the order of Rs. 77·26 million during 1963 and Rs. 67·28 million in 1964 upto November. The value of handloom fabrics (Other varieties like Tussar, Silk, art silk etc.) exported amounted to Rs. 39·03 million during the period January/September 1964).

### Technical Improvements and Research

The handloom industry has made considerable strides in the direction of technical development. The effect of these improvements has been to increase production and reduce cost of production. It has also assisted in making the cloth more durable and attractive for the consumer. There has been improvement in the preparatory, weaving and post-weaving stages. Financial assistance is being given to weavers' co-operative societies for introduction of improved looms, jacquards, dobbies etc., and for setting up dye houses, finishing and calendering plants and pattern making factories. 487 dye houses have been set up in the various States and these enable the societies to get yarn dyed according to their requirements and at the same time to reduce the cost of dyeing. Six co-operative spinning mills have started working. Forty-three pattern making factories evolve new woven designs in different colour combinations and texture by the use of different kinds of yarn against the background of traditional production techniques.

The Handloom Board has set-up a net-work of Weavers' Service Centres at Bombay, Madras, Calcutta, New Delhi, Varanasi, Indore, Bangalore and a sub-unit at Kancheepuram, which are functioning as units where technical and marketing problems connected with the industry are examined, appropriate solutions found and these solutions communicated to the production units so as to enable them to put them into practical application. These centres have also a training course in the use of improved looms and advanced techniques of weaving, refresher courses in dyeing, finishing and pattern making. These centres have broken fresh ground in the field of designing for fabrics, in introducing improved weaving techniques and in quality dyeing and processing of handloom cloth. A number of designs and textural effects evolved by the centres have been successfully introduced on a commercial scale and have proved to be of great assistance to the industry both within the co-operative fold and outside. Particular mention may be made in this connection, of a number of textural effects with the use of different types of yarn such as wool/cotton, cotton/jute, cotton/matka, Tussar/matka, wool/matka, etc. on upholstery, furnishing and draping materials.

With a view to gearing up the technological efficiency of the handloom industry and to provide the necessary supervisory and skilled personnel needed for work connected with the development scheme for the industry all over the country, the Government of India have established two Institutes of Handloom Technology one at Varanasi and the other at Salem.

### Housing

Under the Housing Scheme for weavers, the construction of 7,806 houses had been sanctioned; of these 4,628 houses had been constructed and 1,892 houses were under various stages of construction.

## VILLAGE OIL

India is the second largest producer of oilseeds in the world and leads all other countries in respect of acreage under oilseeds.

Mills and ghanis are the two sectors in the oil industry in the country. According to one estimate included in the Report of the Oilseeds Crushing Industry Inquiry Committee (1956), the percentage of major oilseeds crushed in ghanis and those crushed in power mills is as follows :

| Seed | Ghanis (per cent) | Mills (per cent) |
|---|---|---|
| Groundnut .. .. | 20 | 80 |
| Sesamum .. .. | 83 | 17 |
| Rape and Mustard .. | 37 | 63 |
| Linseed .. .. .. | 30 | 70 |
| Castor-seed .. .. | * | 100 |

* (a small quantity is also crushed in ghanis)

According to an estimate of the oilseeds crushing Industry Inquiry Committee there are over 8,201 oil mills in the country. The number of ghanis in the country was 3,06,237 in 1956 according to the livestock census 1956.

The Village Oil Industry i.e. ghanis brought under its fold provided employment to 52,513 persons during the year 1962-63—31,958 full timers and 20,555 part timers, apart from employment provided by ghanis not brought under their fold.

During 1963-64, the expenditure incurred by the Commission for the development of the industry amounted to Rs. 150·97 lakhs thus bringing the total to Rs. 1,081·06 lakhs of which Rs. 282·05 lakhs constitute grants and Rs. 799·01 lakhs loans. Of this total expenditure Rs. 131·00 lakhs only were expended during the First Five Year Plan period while the balance of Rs. 532·49 lakhs was disbursed during the Second Plan period and the remaining during the 1st three years of the Third Plan.

There were 5,409 agencies operating various schemes under the Commission's purview of which 4,641 were co-operative organisations including 12 district co-operative federations and 3 apex bodies at the State level. With a view to distributing the improved ghanis and train telis 52 Ghani Manufacturing Workshops and 91 Model Ghani Centres were functioning during 1963-64 throughout the country. During the year the Commission was able to introduce 949 improved ghanis, thus bringing their total number to 20,807.

In the field of production there was considerable activity as the production of oil through the Registered Ghanis with the Commission, rose sharply. During 1962-63 the production of oil through the registered ghanis was 6·77 lakh qunitals valued at Rs. 1,628·53 lakhs and 10·58 lakh quintals of oil cake valued at Rs. 352·37 lakhs. During 1963-64, the production of oil through the registered ghanis was 5·96 lakh quintals valued at Rs. 1,454·83 lakhs and 9·05 lakh qunitals of oil cake valued at Rs. 335·79 lakhs. The industry proved employment to 27,567 full-timers and 16,985 part-timers during 1963-64.

Under the training programme the Commission trained 3,999 telis and 450 Mistris upto March 1964.

## PROCESSING OF CEREALS AND PULSES

In pursuance of the recommendations of the Rice Milling Committee, Government of India decided, in the year 1957, that licensing of all power driven rice mills should be introduced and a census of all such mills should be taken. They have further decided that no new mill should be allowed to be set up and no expansion of the existing capacity of the mills be permitted unless the State Government concerned is satisfied that it is necessary to do so for the purpose of ensuring adequate supplies and that, in such cases, the hand pounding industry is not affected. To ensure this, an Act was passed in May 1958 — The Rice Milling (Regulation) Act.

The Karve Committee recommended the imposition of an excise duty on the output of mills and the payment of a subsidy to hand-pounders to reduce the price differential between hand-processed and mill-processed rice. The production subsidy has been replaced by a management grant on a sliding scale for a period of five years.

During the year the Union Territories of Goa, Himachal Pradesh and Tripura were also covered by the scheme. The disbursement during the year was only Rs. 124·07 lakhs which is more than that of 1962-63, *i.e.* Rs. 113·74 lakhs. The total expenditure incurred by the end of 1963-64 was Rs. 693·46 lakhs of which Rs. 133·57 lakhs formed grants and Rs. 559·89 lakhs loans. Of the total expenditure only Rs. 21·01 lakhs were spent during the First Plan period.

Each year more and more areas are covered and organisations formed to implement the development programme. There were 2,043 co-operatives and 436 registered societies at the end of 1963-64 as against 1,826 co-operatives and 402 registered societies in 1962-63. To enable the artisans obtain higher production of better rice the Commission has introduced 1,085 chakkis, 70 dhenkis and 48 winnowing fans. Under the Atta Chakki scheme the Commission introduced 71,587 ball-bearings and 4,277 chakkis inclusive of bullock driven chakkis.

Under the production activity the achievement was 7·02 lakh quintals in 1963-64 compared with 10·22 lakh quintals in 1962-63. The industry provided employment to 53,557 people in 1963-64, out of whom 10,987 were full-timers and 42,570 were part-timers. During the year, the Central Training Centre at Nadiad trained 229 persons as compared to 272 in 1962-63.

## BEE-KEEPING INDUSTRY

With a view to organising and developing collection of honey on scientific lines the Commission distributes bee-hives on a subsidised basis, finances rearing and distribution of bee-colonies, collection and marketing of honey, organises co-operative societies and trains apiarists, fieldmen, farmers and others in the art of bee-keeping.

Rs. 23·88 lakhs were disbursed in 1963-64 thus bringing the total expenditure to Rs. 121·27 lakhs of which Rs. 105·56 lakhs formed grants, the remaining being loans. Of the total, Rs. 9.35 lakhs were spent in the First Plan period. During the year 1963-64, seven more Area Offices, 235 Sub-stations, were allotted. Therefore, at the end of the year, total allotment was 67 Area Offices, 1,328 Sub-stations and 85 Plantation apiaries. In addition to this, 38 Model Apiaries, 93 Commercial apiaries were allotted. 193 schools were also financed to introduce bee-keeping for the benefit of school-pupils. There were 96 institutions in the country responsible for the implementation of the programme.

Upto the end of 1963-64, 1,84,597 Bee-hives were distributed. Under the programme 7·14 lakh kgs. of honey was collected in 1963-64 as against 5·62 lakh kgs. collected in 1962-63 and the whole of it was marketed. During the year 1963-64, 57,198 farmers were benefited as against 53,877 only in the previous year. During the year 134 fieldmen were trained ; thus, over the period, 1,645 fieldmen and 56 apiarists received training.

## HAND-MADE PAPER INDUSTRY

The per capita consumption of paper has been rapidly increasing with the spread of literacy. The expansion of the mill-made paper industry is limited due to several factors, viz., non-availability of raw materials in large quantities at one place, difficulties of importing heavy intricate machinery, pulp and chemicals, transport difficulties etc. The hand-made paper

industry, as being developed by the Commission, aims at utilising easily available raw materials like fibres, old gunny bags, rags, straws, grasses, waste paper etc. The programme of development consists of assisting in the setting up of big, medium, small and school units.

During 1963-64 the Commission disbursed Rs. 20·30 lakhs for the development of handmade paper industry, thus bringing the total disbursement to Rs. 201·07 lakhs of which Rs. 85·07 lakhs were grants and the remaining Rs. 140·41 lakhs loans. The expenditure during the First Plan period amounted to Rs. 12·34 lakhs only while the operation of the programme during the eight-year period (1956-64) consumed Rs. 215·99 lakhs.

The financial disbursement to various types of units depends upon the capacity to produce paper. Upto the end of 1963-64, the Commission had allotted 12 big, 102 medium and 115 small units. In addition to this, 23 Home Units and 13 Jail units also have been allotted.

The production of paper rose from 1,511 metric tons in 1962-63 to 1,612 metric tons in 1963-64. The industry provided employment to 4,687 persons in 1963-64 as against 4,561 persons in the previous year. In 1963-64 194 persons were trained thus bringing the total number of persons trained so far to 1,347.

## NON-EDIBLE OILS AND SOAP

India possesses large quantities of a wide variety of non-edible oilseeds, *e.g.*, neem, karanja, maroti, dupa, castor, undi, etc. The oils extracted from these seeds are highly valued as industrial oils. These resources in vegetable are largely wasted through non-utilisation. The Commission, therefore, formulated a scheme to exploit these resources for the creation of wealth.

During the year the Commission financed the programme to the tune of Rs. 47·55 lakhs thus bringing the total expenditure to Rs. 419·25 lakhs of which Rs. 113·82 lakhs were grants and Rs. 305·43 lakhs loans. During the First Five Year Plan period Rs. 45.22 lakhs only were disbursed. As against this the development activities during the eight-year period (1956-64) consumed Rs. 98·43 lakhs as grants and Rs. 275·60 lakhs as loans.

The financial assistance extended to three types of non-edible and soap production units *i.e.* "A", "B", and "C" units, depend upon their production capacity. With a view to informing and educating school children in the method of production of soap on cottage basis the Commission introduced "D" units and attached them to schools.

Since 1958-59 the Commission has been emphasising the possibility of improving production of non-edible oils. To intensify efforts in this direction Oil Producing Units have been organised. At the end of 1963-64, the Commission had allotted 651 soap production units in addition to 160 school units.

The production of non-edible oil during the year 1963-64 was 2·78 lakh kgs. valued at Rs. 3·37 lakhs. The activity in the production of soap also registered a considerable expansion; the value of soap produced in 1963-64 was Rs. 57·88 lakhs as against Rs. 48·15 lakhs in 1962-63, the quantities being 35·03 lakh kgms. and 35·91 lakh kgms. respectively. The industry provided employment to 1,164 full-time workers and 1,07,429 part-time workers in 1963-64.

To ensure efficient working of the production units the Commission trained chemists and supervisors. In 1963-64 training was imparted to 112 artisans as against 119 in the previous year.

## PALM-GUR

In India, there are four varieties of sugar-yielding Palms—Date, Palmyra, Coconut and Sago. While the total number of tappable palms in the country, mostly Date and Palmyra, is estimated at over five crores, only about 60 lakh palms are being tapped for the manufacture of palm-gur.

The significance of the Palm-Gur Industry in India lies in the manufacture of gur and sugar from the sweet juice of palms, popularly known as *neera*, in providing seasonal employment on a large scale, and in its effects on subsidiary occupation as in the manufacture of products from palm leaf.

The Commission has established a Central Research-cum-Training Centre at Dahanu (Maharashtra). Research in the preservation of *neera*, better processing methods and improved implements is being carried on. A monthly journal "Tad-Gur Samachar" gives information about the industry and the results of research experiments.

For the development of the industry the Commission provided Rs. 126·40 lakhs during the year 1963-64, as against Rs. 90·94 lakhs during 1962-63. The expenditure of Rs. 126·40 lakhs in 1963-64 included loans of Rs. 93·02 lakhs given by the Commission for the formation of the cooperative societies. The total expenditure for the period ending with 1963-64, therefore, works out to Rs. 433·76 lakhs of which Rs. 208·76 lakhs formed grants and Rs. 225 lakhs loans. This includes Rs. 14·10 lakhs expended during the First Plan period.

The emphasis being on the organisation of cooperatives, their number has been showing steady progress from year to year. As against 3,307 cooperatives at the end of 1962-63 there were 3,326 in 1963-64, with a total membership of 3·59 lakhs. The cooperative societies of 11 States have formed their State level federations also.

During the year 1963-64, the Bharatiya Tad Gud Shilpa Bhavan trained 133 persons while in the States 1,224 persons received training. As against a production of 6·04 lakh quintals during 1962-63, the production in 1963-64 was 8·43 lakh quintals.

## GUR AND KHANDSARI

With a view to improving the quality of Gur, production of Khandsari and the efficiency of the farmers, the Commission has schemes to introduce improved equipment like crushers, centrifugals, pans, furnaces etc. The Commission also undertakes to train honorary workers and farmers in better methods of production with the help of improved equipment. The programme aims also at the organisation of co-operative societies to take up production and marketing of Gur and Khandsari and stocking and supplying of improved implements.

During 1963-64 the Commission financed the programme to the tune of Rs. 48·84 lakhs as against Rs. 41·47 lakhs in the previous year, bringing the total expenditure upto 1963-64 to Rs. 285·33 lakhs of which Rs. 121·49 lakhs were grants and Rs. 163·84 lakhs loans. Almost the whole of the expenditure on the industry was incurred during the eight-year period 1956-64 as during the First Plan period the expenditure was negligible *i.e.* Rs. 90,000 only as against Rs. 284·43 lakhs during the eight-year period.

At the end of 1963-64, there were 861 institutions implementing the schemes as against 745 only, the previous year. The Commission had distributed 19,901 cane crushers of which 504 were power-driven, the remaining being bullock driven, 810 centrifugals, 10,979 pans and had also introduced 14,502 other types of equipment during the period ending 1963-64. To train the farmers to undertake manufacture of Gur and Khandsari on improved lines, 564 honorary workers were trained during the year, thus bringing the total of such persons trained to 4,106.

The production of Gur during the year was 11·82 lakh quintals and the industry provided employment to 15,946 full-timers and 19,549 part-timers.

## VILLAGE LEATHER INDUSTRY

The processing of hides and skins and the manufacture of leather goods are traditional village industries.

The cottage sector of the leather industry is responsible for the bulk of its production in the country and employed as many as 6·5 lakh persons.

The object of the development programme of the Commission for the industry is the planned recovery and full utilisation of the various by-products of carcasses of dead animals so as to minimise waste and provide large-scale employment. There is a vast livestock population consisting of over 21·2 crores big animals and 9·52 crores sheep and goats.

The programme consists of the establishment of flaying centres, village model tanneries, glue manufacturing centres, and bone crushing units. Besides, small and big marketing depots are also aided to enable the leather workers market their products as well as to supply them with raw materials including hides and skins. With a view to training the artisans in improved methods of production, the Commission assists financially the organisation of production-cum-training centres for both tanners as well as flayers.

To assist the Commission there is an Advisory Committee consisting of representatives of the industry and trade.

During 1963-64, Rs. 50·49 lakhs were disbursed for the development of the industry thus bringing the total disbursement during the eight-year period (1956-64) to Rs. 363·75 lakhs of which Rs. 162·15 lakhs were grants and Rs. 201·60 lakhs loans. In addition to this, Rs. 31·79 lakh were disbursed during the First Plan period.

Upto the end of 1963-64 848 flaying centres, 828 village model tanneries, 392 bone-crushing units and 249 marketing depots were allotted. The Commission has also financed 16 training cum-production centres for imparting practical and theoretical training of which 12 are for tanning and 4 for flaying and carcass recovery. The village chamars have no proper tanning facilities. The Commission, therefore, finances the construction of new and repairs of old pits. Financial assistance for the construction of 1,820 new pits and repairing of 881 old pits was given during 1963-64 as against 1,575 new pits and 861 old pits during 1962-63.

During the year 69 and 109 personnel were trained in the art of tanning and flaying respectively. So far, the Commission has trained 809 personnel in the improved methods of tanning and 1,447 in flaying. The implementation of the development programme has resulted in considerable activity in production. As against the production of goods valued at Rs. 91·17 lakhs in 1961-62 and Rs. 144·16 lakhs in 1962-63, the production in 1963-64 was valued at Rs. 226·51 lakhs. During 1963-64 9,348 full-timers and 6,425 part-timers were employed in this industry.

## COTTAGE MATCH INDUSTRY

The match industry in India is classified into A, B, C and D classes according to the size and production capacity of the manufacturing units.

The programme of the Commission consists in the promotion of the 'D' class, licensed to produce a maximum of 25 gross boxes per day and capable of employing about 40 persons each.

The development programme aims at the utilisation of the bamboo resources of the country for the manufacture of matches and the elimination of the use of matchwood and timber which are becoming scarcer and also denude the country of its forest wealth to the detriment of the nation.

The programme also provides for training research and marketing schemes.

During the year 1963-64, the Commission wanted to concentrate mainly on consolidation work. It expended Rs. 4·67 lakhs during 1963-64 bringing the total expenditure for the development of this industry to Rs. 72·99 lakhs of which Rs. 19.82 lakhs were expended during the First Plan period.

As a result of the Commission's intensified effort to reorganise the scheme on modern lines, the production of cottage match boxes rose

from 67,880 gross boxes in 1962-63 to 87,733 gross boxes in 1963-64. During the year six persons were trained bringing the total to 1,038 over the period ending with 1963-64.

### VILLAGE POTTERY INDUSTRY

The Development programme for the industry is made up of schemes for the promotion of production of pottery goods of various types, marketing, research, central and regional training, organisation and promotion of co-operative societies, supply of improved equipment and improved furnaces.

The key note of the Commission's programme for the industry during the year was consolidation of the work started already. The disbursements for the year 1963-64 were Rs. 33·91 lakhs, thus bringing the total expenditure to Rs. 206·83 lakhs of which Rs. 72·72 lakhs formed grants and Rs. 33·34 lakhs loans. At the end of 1963-64 the Commission had financed 475 units.

The production activity for the pottery industry in 1963-64 registered a considerable rise, the value of goods produced being Rs. 98·27 lakhs as against Rs. 79·82 lakhs in 1962-63. Under the training programme the Central Institute at Khanpur trained 191 personnel during 1963-64, thus bringing the total number trained so far to 1,615.

### FIBRE INDUSTRY

With a view to utilizing various kinds of fibres like sisal, hemp, san-hemp, etc., which grow in abundance in villages, but remain mostly unprocessed, the Commission implements a development programme under which improved Charkhas are distributed, artisans are trained and model production centres are organised.

In 1963-64, Rs. 26·04 lakhs were disbursed thus bringing the total assistance under this scheme to Rs. 90·23 lakhs. At the end of 1963-64, 38 institutions throughout the country were operating 650 centres of various types out of which 109 were model centres, 475 training-cum-production, 143 hessian fibre spinning centres and 26 pilot centres. During 1963-64, 264 instructors and 7,972 artisans were trained.

### CARPENTRY AND BLACKSMITHY

The Commission has also been implementing development programme for the village carpentry and blacksmithy industry since 1957-58 and has disbursed so far Rs. 51·44 lakhs most of which was for the organization of training-cum-production centres.

### MANUFACTURE AND USE OF MANURE AND METHANE GAS FROM COW-DUNG AND OTHER WASTE PRODUCTS

This industry has been recently added to the list of industries which fall under the purview of the Commission. The programme of the industry is still in the formative stage and various problems and aspects of the industry are being studied with a view to evolving a co-ordinated plan. So far 43 gas plants have been working.

The Commission has established a special branch to advise the public in the matter of cow-dung gas-plants. The Commission has assisted 305 persons with blue prints and technical guidance for construction of gas plants. During the year 1963-64 the Commission disbursed 3 lakhs for building plants as against Rs. 2·14 lakhs in 1962-63.

### LIME MANUFACTURING INDUSTRY

This is another of the recent additions to the list of village industries falling under the purview of the Commission.

As against a disbursement of Rs. 2·61 lakhs in 1962-63, the Commission disbursed Rs. 6·36 lakhs in 1963-64 out of which Rs. 3·53 lakhs were grants and Rs. 5·44 lakhs were loans. The grant covered expenditure on training, production units and experiments, while the loans were towards share capital, working capital and for production units. The production of lime during the year amounted to Rs. 5·48 lakhs and the industry provided employment to 1,134 persons.

### INTEGRATED DEVELOPMENT PROGRAMME

The integrated development programme is the outcome of the naya morh or the oriented approach adopted by the Commission. It is implemented through organising the people in a block to survey the area, prepare an integrated plan for the development of the block for attaining regional self-sufficiency, primarily in khadi and village industries goods and incidentally also in other consumer goods.

By April 1964 within a period of three years since the introduction of this programme, the total number of ekais stood at 1,403. The number of village panchayats covered was 3,362 while the number of ekais in gramdan areas was 103 and in tribal areas 182. The number of districts covered by this programme was 179 and blocks covered 524 while the number of villages encompassed stood at 7,026 having a total population of 67·68 lakhs.

As against Rs. 10·79 lakhs disbursed in 1962-63, the disbursement in 1963-64 was Rs. 21·28 lakhs.

### PROGRAMME FOR HILL AND BORDER AREAS

The problem of developing the economy of the hill and border areas attained a degree of urgency following the Chinese aggression on the country. The main difficulties in the way of development of large-scale industries in these areas are their remoteness from the developed regions, their relative inaccessibility and the low educational and cultural level of the inhabitants. The introduction of khadi and village industries, on the other hand will immediately provide the people with gainful employment. Efforts are, therefore, being made by the Commission to introduce its programmes in these regions.

### PROGRAMME FOR WEAKER SECTIONS

Although the Commission's programmes would cover the weaker sections of the village community, it was found from experience that the people in the villages could not take full advantage of them because of their extreme poverty and social and economic backwardness. The Commission has, therefore, formulated a special programme for the welfare of the weaker sections of the community.

### WEAVING SUBSIDY SCHEME

The Khadi and Village Industries Commission introduced weaving subsidy scheme from 6th April 1964 under which the existing rebate on the sale price of khadi has been replaced by a system of providing facilities for free weaving of all handspun yarn.

The new scheme benefits the spinners who get khadi at the cost of cotton while the urban consumers continue to get khadi at the existing rate; the only difference is that the amount available as rebate on the present sale price will under the new scheme be deducted from the price at an earlier stage in the form of weaving subsidy.

### KHADI AND VILLAGE INDUSTRIES IN FOURTH PLAN

The work done so far for the development of khadi and village industries will be turned to good account in the Fourth Five Year Plan by launching a massive programme of development in order that a large number of persons who are presently unemployed and underemployed get absorbed. Part-time and full-time employment to over 51 lakh persons will as a result be created at the end of the Fourth Plan. Besides, the programme has the main object of ensuring an increase, through higher productivity, in the per capita income in the industries covered. Even in spinning on the traditional charkhas this is expected to be at least Rs. 100 per year, and in the case of the ambar charkha it would be Rs. 350, in some industries it may be as high as Rs. 1,000 and above.

#### Technical Improvement

The programmes for the development of various industries are based on certain assumptions of technical improvements effected in the tools and equipment. New equipment, tools and process have been developed and many others are in the process of experimentation. It is proposed to take advantage of all the available modern scientific knowledge and experience in improving progressively the productivity and income of artisans. A new and improved model of the ambar charkha is being devised which would enhance productivity and raise the level of income.

At the end of the Plan period, the total production of khadi is expected to be about 250 million yards valued at Rs. 50 crores. The total value of production under the various village industries is expected to rise to Rs. 240·78 crores.

The total employment generated by the end of the Fourth Plan is expected to amount to a little less than 52 lakh persons (part-time and full-time) as against about 24–25 lakhs expected to be employed by 1965-66. A substantial rise in the level of wages will also be achieved.

# HANDICRAFTS

(Also see articles on Cottage Industries and Small-Scale Industries).

About 12 lakh workers turn out over 150 crores of rupees worth handicrafts per year. Out of these goods worth about Rs. 30 crores are exported while the rest are absorbed in the home market.

The All-India Handicrafts Board* is the authority entrusted with the development of the handicrafts in India.

It was first constituted in November 1952. It was reconstituted in December 1954, in August 1957, in August 1960, in 1962 and again in 1965.

It studies the problems confronting the handicrafts industry and advises the government on the solution of these problems. The Board is also required to advise the government on grants and loans to be given to the state governments, private organisations and institutions for financing activities necessary for the development and improvement of handicrafts. It plans and formulates schemes for the development of handicrafts. The state governments are mainly responsible for the implementation of plans and schemes whereas the Board undertakes such developmental measures as are of national importance and of value to the over-all programme for development of handicrafts and common benefit to the States, *e.g.*, organisation of and participation in exhibitions and fairs of national importance, mobile exhibition covering several States, nation-wide publicity campaign, technological research and improvement, quality control, economic research and studies, design development on regional basis and specialised training. It also promotes the development of cooperatives and arranges credit. There is a Standing Committee of the Board for the expeditious examination of the schemes and programmes for development of handicrafts. It has set up 11 craft committees and specialised committees for marketing, cooperatives, quality control, design development, museum, exhibitions and a panel for economic research.

Most of the State Governments have undertaken schemes for quality marking of their handicrafts and also for conducting surveys of handicrafts in order to formulate specific programmes of development.

The estimated expenditure on the development of handicrafts during the Second Plan period was Rs. 4·8 crores. The Third Plan provides Rs. 6·1 crores on the schemes of States and Union Territories and Rs. 2·5 crores on the programmes of the Centre, bringing the total outlay on development of handicrafts to Rs. 8·6 crores.

Schemes to be undertaken during the next five years include market research, promotion of inter-state marketing, laying down standards and specifications, extension of training facilities in the management of emporia, salesmanship and display of improved techniques with particular emphasis on reducing cost of production.

Besides co-ordinated schemes for the expansion of exports in handicrafts, the Third Five Year Plan envisages orientation in production to meet the needs of customers in different income groups within the country and the promotion and development of rural crafts.

An Indian Handicrafts Development Corporation has been set up. This body organizes the production of handicrafts on a commercial basis specially to cater for orders from foreign markets. Surveys of foreign markets will be conducted and sales depots and selling agencies established.

The exports of handicrafts during the years 1961-62, 1962-63 and 1963-64 have been Rs. 19·35, Rs. 21·53 and Rs. 30·81 crores respectively against the target of Rs. 15·00, Rs. 16·00 and Rs. 25·50 crores. The Handicrafts Board has been running the Export Promotion Scheme for handicrafts which permits import by the exporters of certain specified raw-materials, machinery and tools against exports of different items of handicrafts.

In order to strengthen and coordinate the measures taken for promotion of handicrafts, the Board has set up Regional Exporters Associations at Delhi, Bombay, Madras and Calcutta and craft Associations for Zari and Carpets. The targets of exports for the years 1964-65 and 1965-66 have been fixed at Rs. 30·25 crores and Rs. 35·00 crores respectively.

The Corporation has set up four regional centres in India and two abroad. These centres are equipped with a complete range of representative samples of Indian handicrafts and provide a ready guide for intending buyers.

A sample room has already been set up at the head office of the Corporation at Delhi.

A list of the major handicrafts is given below:—

*Textiles :* Hand-printing and traditional dyeing of textiles, broacades, himroo, carpets and druggets, rugs, gabbas and namdas, embroidery (cotton silk, wool and zari) lace and lace work including nakki and gota making, shawls.

*Metalware :* Silver and gold ware, bidri filigree, brass and copper ware, bronze work.

*Ceramics :* Pottery and earthenware.

*Ivory :* Ivory carving.

*Papier-mache :* Papier-mache articles.

*Woodwork :* Wood-carving and inlay, lacquer work including nirmal work, decorative furniture.

*Stone-work :* Stone-carving including marble work and alabaster.

*Toys :* Dolls and toys other than mechanical toys.

*Leather :* Leather goods (artistic work).

*Horn :* Artistic articles.

*Bone :* Artistic articles.

*Cane :* Bamboo, etc. Articles made of cane, bamboo, willow, straw and grass including mats and pith crafts.

*Incense and perfumery :* Incense and perfumery of various types.

*Flax and Fibre :* Handicraft articles made of flax and fibre.

*Bangles & Beads:* Bangles and beads.

*Musical Instruments :* Musical instruments. The Sangita Vidyalaya in Madras gives training in music and the making of musical instruments.

*Conch-shell and semiprecious stones :* Articles made of conch-shell and semi-precious stones.

*Miscellaneous :* Miscellaneous traditional art objects such as Orissa, Mysore and Tanjore paintings, and handicraft products specially made for ceremonies, articles of worship and theatrical requisites such as costumes, masks, puppets, etc.

Steps taken to develop handicrafts include the establishment of design centres to revive traditional designs and create new ones and training centres to better techniques. Some of these are also production centres.

Mobile exhibitions are taken round the country and handicrafts weeks are held. There has been established handicrafts museum in New Delhi.

In the year 1963-64 the Govt. of India approved schemes to set up 58 centres for training in handicrafts. Grants totalling Rs. 7·52 lakhs were sanctioned for implementing 41 of these schemes.

Some of these centres are training-cum-production centres. A monthly stipend of Rs. 25 to Rs. 30 is provided. On completion of the training the trainees are encouraged to form cooperative societies with financial assistance from Government.

### Design Centres

The Board has four regional Design Development Centres at Delhi, Calcutta, Bangalore and Bombay to look after designing and development of the crafts in their region, survey requirements, provide training and maintain close collaboration with the State centres, marketing organisations, exporters etc. State design centres were established and are situated in Kashmir, U.P., Bihar, W. Bengal, Himachal Pradesh, Bhopal, Madras, Hyderabad, Orissa, Manipur, Tripura, Rajasthan, Punjab and Kerala.

976 designs were evolved in 1962-63 and 227 parties were assisted.

### Development of Co-operatives

The Board encourages formation of handicraft co-operatives and provides financial, technical and marketing facilities to them. Under financial assistance, the Board provides 75 per cent of the share capital and also 75 per cent of the working capital as loans at 2½ per cent interest payable in two years and ten years respectively. Besides, subsidy for supervisory staff for co-operatives is provided for four years on a sliding scale of 100, 75, 50 and 25 per cent basis.

The number of handicraft co-operatives increased from 1,000 in 1957-58 to nearly 2,000 in 1961-62. In addition 115 handicrafts emporia have also been set up to expand marketing activities.

In order to review and advise the Board on their programme for the development of handicraft co-operatives, the Board set up a Central Handicrafts Advisory Committee. State-level Co-operative Advisory Committees have also been set up in the States.

The Board has also started a training programme for the co-operative organisers for which trainees from Government Departments and co-operative organisations are selected for training. Up to April 1964, six such courses had been held and 119 persons trained.

Survey of associations of artisans, dealers and exporters has been completed by the Indian Co-operative Union on behalf of the Board. The recommendations on the survey have been circulated among the States for necessary action.

### Credit Facilities

One of the main functions of the Board is to see that adequate credit facilities are made available to the handicrafts industries and trade at different stages of its production, storage, distribution and sales.

Apart from the financing of emporia, handicrafts co-operatives and State schemes in different States by the Board, the Reserve Bank of India has agreed to cover handicraft industries under their guarantee scheme of small-scale industries against loans granted by commercial banks.

The State Bank of India also finances handicrafts under their Liberalised Loan Scheme. Loans are also given to handicrafts in different States from Block Loans Funds.

The new scheme for financing artisans, their co-operatives etc. through selected emporia against orders had been introduced through one emporia as an experimental measure during 1963-64 and thus credit has been linked with marketing.

A new scheme called Central Financing Agencies Scheme has been introduced in some States such as Maharashtra, Gujarat, Delhi, Madhya Pradesh, etc. Under this scheme co-operative banks sanction loans to handicrafts co-operatives at a concessional rate of 2½ per cent interest. The difference between their normal rate of interest and this concessional rate is being subsidised by the Central Government.

* Headquarters in New Delhi.

Apart from the foreign exchange banks and commercial banks, the Handicrafts and Handlooms Exports Corporation, a Government of India concern, sanctions loans to exporters against firms' orders.

**States Schemes—1962-63**

The Government of India has made a provision of Rs. 52·10 lakhs for central assistance to State Govts. for development of Handicrafts during 1962-63. Abstract showing important crafts covered through various categories is shown below (Statewise):—

*Andhra Pradesh :* Formation of co-operative societies for Kamdani & Zardozi work, Brassware & Bell metal work, studded Bangle making and Horn work were the important schemes proposed for implementation in 1961-62. Considerable amounts have been also disbursed for co-operative societies already set up for Himroo fabrics, Hyderabad; Bidri work, Hyderabad; Ivory & Horn, Secunderabad; Nirmal Toys & Arts, Nirmal; Asia Rumals; Musical Instruments, Jaggayyapet; Block printing & dyeing, Warangal; Salivahan decorative pottery, Hyderabad; and Veena making, Bobbili.

*Assam :* Cane & Bamboo production centres at Goalpara and Karimganj and decorative textile production centre at Garo Hills.

*Bihar :* Information is not available.

*Gujarat :* Quality marking of handicrafts products; State and Block rural craft museums; Training in screw-pine mat weaving at Deesa in Banaskantha District; Organisation of Handicrafts Co-operatives in different parts of the State; Establishment of Production-cum-common facility centre at Sankheda, papier-mache Articles at Rupayatam, Junagarh.

*Jammu & Kashmir :* Information is not available.

*Kerala :* Training & Production centres for coconut shell, papier-mache, screwpine and conch shell industries; Quality Control scheme; Development of Aranmula Metal Mirror, Kathakkali costumes and Kuftagari work.

*Maharashtra :* Information is not available.

*Madhya Pradesh :* Expansion of Delhi Museum; Establishment of common facility centre for papier-mache at Ujjain; Expansion of Rewa & Satna Emporia, and survey of Handicrafts.

*Madras :* Expansion of Mahabalipuram sculpture training centre; Upgrading of the School of Arts & Crafts; Training and production centre for clay toys at Kosarapet; Organisation of and assistance to co-operative societies for mat weavers, Shell Toy makers and cane workers.

*Mysore :* Rural crafts museums; quality marking schemes; Type study of Handicrafts; Export of Handicrafts and starting of common facility centres.

*Orissa :* Quality control of Handicrafts; Establishment of Handicrafts Emporium at Delhi and organisation of crafts co-operatives among the ex-trainees of the crafts schools.

*Punjab :* Training centres for (1) Carpet at Kandaghat and Amritsar; Drugget weaving at Panipat; (*ii*) Manufacturing artistic articles of copper, brass, brasswares & metal inlay work, Jagadhari and Phagwara; (*iii*) Lacquer work at Jullundur and Hoshiarpur; (*iv*) Horn making articles at Rohtak and Jullundur; Reorganisation of Cottage Industries Museum and Emporium, New Delhi; Central design and research centre at Chandigarh.

*Rajasthan :* Quality marking of (*i*) Prints at Jodhpur, Jaipur and Udaipur; (*ii*) Ivory articles at Jaipur and Jodhpur and (*iii*) Brassware at Jaipur. Design extension centres for (*i*) Cloth printing at Jodhpur, Barmer and Chittor, (*ii*) Druggets & Carpets at Jaipur; (*iii*) Lacquerware at Jaipur and Udaipur; (*iv*) Wooden Namdas at Tonk and (*v*) 20 development blocks.

*U.P. :* Organisation of 10 handicrafts co-operative societies; Ivory Inlay in wood and Tarakashi at Bareilly; Expansion of Central design centre at Lucknow; Manufacturing of papri wood articles at Tehri (Garhwal); Quality marking for (*i*) Zari Embroidery, Bareilly; (*ii*) Wood carving, Saharanpur; (*iii*) Marbleware of Agra and (*iv*) hand-print, Lucknow. Establishment of Credit Fund centres for Lacquerware, Amroha; wooden toys, Varanasi; Horn articles, Sambhal and Chikan Embroidery, Lucknow.

*W. Bengal :* Development of (*i*) Screen printing; (*ii*) Fancy leather goods; (*iii*) Toy making and artistic pottery; (*iv*) Non-ferrous metal industries (Training, production and servicing in Brass & Bell metal wares). Establishment of small crafts museums; supply of models and designs and technical assistance; and organisation and development of handicrafts co-operatives.

*Awards :* To bestow honour and encourage craftsmen, the Board has instituted National awards for Mastercraftsmen. In Jan. 1965, 14 persons received these awards from the President of India. These awards will carry a cash prize of Rs. 1,000 each, an inscribed brass plaque and a specially designed angavastram. These awards would be given every year during the "Republic Week" celebrations.

# FILM INDUSTRY*

The passing away of Prime Minister Nehru put to severe test the capacity of Films Division, in all its branches. The bunch of Nehru documentaries has been seen by a record number of audiences, all impressed and satisfied with what they saw, an experience rare to Films Division.

Other features of the year were greater use of State-made films for their respective regions and for an all-India showing, wider popularity of the documentaries at international film festivals and the holding of an International Film Festival in New Delhi.

**International Film Festival 1965 :** The Third International Film Festival of India was organised in New Delhi from 8th to 21st Jan. 1965, by the Ministry of Information & Broadcasting in co-operation with the Film Federation of India. Film Weeks were observed at suitable dates at Bombay, Calcutta and Madras to take advantage of the presence in India of leading cine-personalities and films of the world.

Although it was the first to be held in Asia, the Film Festival had been recognised by the International Film Producers' Association of Paris. The set of rules therefore were almost identical with those observed at the Cannes Festival. Special consideration was shown to the international character of the festival as could be seen from the following decisions: (*i*) Irrespective of films imported under bilateral agreements, an annual import of 30 feature films will be allowed under free quota system; (*ii*) Films that won awards at international major festivals, will be allowed to be imported.

In the festival in New Delhi, 30 nations besides the host (India) and the U.N., participated. Forty-four films (19 features and 25 short films) had entered the lists. In addition, 30 feature films and 12 short films of foreign origin were shown in the non-competitive section. Of the Indian productions, 13 feature films and 17 short films were exhibited. Films that were either for competition or for non-competitive exhibition, were exempt from the normal censorship regulations, although a high-powered previewing committee had seen them for suitability.

A special motive of a dancing peacock, our National Bird, was adopted on the design of the Awards of the Festival. Golden awards for the best feature and short films were given. There were prizes for best male and female actors. Special merit awards, two each for the feature and short films were also constituted.

A symposium every day was arranged for five days on—(*a*) Film as reflection of national life and culture; (*b*) Use of short film for education and publicity; (*c*) Indian films abroad and foreign films in India; (*d*) Acting for films and the star system; and (*e*) Children's films.

Twenty-seven delegates (11 from abroad and 16 from the host country) participated in the symposia. All the invitees were treated as State guests: 36 delegates (from 19 nations) and 32 dignitaries from the cine-world.

Selected films from the specially imported lot were shown at public theatres in the four principal capital cities and the collections (at normal rates) are expected to be Rs. 4 lakhs, although the total provision in the budget for the festival was Rs. 8 lakhs.

*Hindusthan Photo Films Manufacturing Co., Ltd., Ootacamund.* For the manufacture of cine, photographic and X-Ray films the Govt. of India established in Nov. 1960 this company in the public sector. (For more details, see under article "Government Industrial Undertakings").

Exclusive shows of documentaries and newsreels have now become a regular feature in some of the large cities where special theatres for the purpose are available. A nominal entrance fee (from 25 to 50 nP. per head) is charged and Bombay, Calcutta and Delhi, have been arranging these shows throughout the year now. Similar arrangements are likely to be extended to other towns and cities.

Here are some of the institutions in the film industry:

Indian Motion Picture Producers' Association, Indian Motion Picture Distributors' Association, Indian Documentary Producers' Association, Film Federation of India, all with headquarters in Bombay.

In the film industry, associations of workers have been formed:—

Film Journalists' Association, Cine-Costume and Make-up Artists' Association, Cine Musicians' Association, Character Artistes' Association, Western India Cinematographers' (Cameramen) Association, Cine Labs.' Association.

The Indian Motion Picture Producers' Association, Film Producers' Guild, Cine-Lab Association and others have formed a supreme Council of Film Producers. Steps are being taken to organise the industry and its various arms.

UNESCO has sponsored a study of Indian film heroes and the Institute of Social Sciences, Agra, has undertaken in co-operation with a group of International scientists, the study for which $20,000 have been sanctioned in the first instance.

Universities Film Council (with Mr. R. R. Diwakar as Chairman) has been established with the idea of making university students take intelligent interest in the films. It is proposed to have a society for each University which would arrange to show at least 16 films every year of outstanding and classical importance through the university societies.

* See also article "Awards & Prizes"

*The Film Institute*, has been set up at Poona for providing training in the technical aspects of film-making such as cinematography, sound engineering, editing, direction, art direction, make-up and costumes. The institute is located in the former Prabhat studios.

With 125 students under training under various courses, 62 have already won diplomas and they now occupy responsible posts in the industry.

The Institute has extensive grounds for outdoor shooting; a processing laboratory for its work and a well equipped studio. When not required for the use of the Institute, these facilities are made available to producers at nominal rent and this helps maintaining a close contact with the film industry. Under the Colombo Plan, two Nepali students were given facility for training in the Institute. More Afro-Asian countries are likely to take advantage of mastering the technique of using this important medium for mass communication.

The Institute has started construction of a boys' hostel and an adjoining building has been acquired for use as Girls' Hostel. There are three girls at present undergoing training.

(*See also under Poona District*).

The Department of Technical Education, Madras, has started a film institute in Madras for training technicians.

*Film Library :* Film classics are being collected together in what is to be the Film Library of India. At present 62 films have been so far secured, 10 each from U.K. and U.S.A., seven each from U.S.S.R. and France, 25 Indian and others. More films from other countries are being negotiated.

*National Film Archives :* Set up in February 1964, the National Film Archives are at present housed in the Film Institute, Poona, with 97 films acquired so far. Notable among the acquisitions is *Raja Harischandra*, the first Indian feature film by D. G. Phalke. Award winning films will be preserved in the Archives. An advisory body of 4 officials and 5 non-officials has been formed to guide the Government in the management of the Archives.

*Film Finance Corporation :* Established in the last week of March 1960, with the object of providing finance for the production of good quality films in the country. (*For more details see under article " All India Corporations "*).

*Children's Film Society :* This was started in 1955. Its object is to undertake, aid, sponsor films of special interest to children. It has its headquarters in Delhi and has branches in some States.

The Society produced 19 feature, 21 short and 184 language version films since its inception in 1955 up to March 31, 1965.

Production of the first colour puppet film in India entitled 'As you like it' is nearing completion (July 1965).

The rules of the Society were revised with effect from 30th May 1963. The revised rules provide for the constitution of a General Body, an Executive Council, a Production Committee and a Finance Committee.

The films for children are made in 35 mm also; nearly 2,100 shows claiming an audience of 836,000 were arranged during the year 1964. Those with 16 mm numbered 137 with an audience of 75,000. Some of the children's films produced recently were used for telecasting in Delhi and Nairobi while others were appreciated at the International Film Festival in Teheran.

Although a provision of Rs. 12 lakhs was made in the budget for 1964-65, the Society could not use the entire amount. It had received Rs. two lakhs as donations from other sources than Government. The revised estimate was therefore scaled down to Rs. 8·70 lakhs.

## FILMS DIVISION

With headquarters in Bombay, this branch of he Ministry of I & B, is the biggest producer of documentaries and news reels in South Asia. In addition to its own production, it buys some select films from State Governments and private producers so that a variety in its documentaries is maintained. Some of the State Governments have a film production unit of their own for news reels and documentaries to be shown within their own limits.

Films Division was responsible for producing 85 documentaries (165 reels) (including 16 documentaries—38 reels—obtained from outside producers) during 1964. Of these, some were for record purposes only while a few were for non-commercial release. When the President, Vice-President or the Prime Minister visits other countries or when dignitaries from outside visit India, films of their visits are made for record and presentation. Travelling vans show certain films to the rural population, not generally served by commercial cinema houses and there are some films for training purposes. State Governments too make some documentaries for their special audiences. If found suitable for an all-India coverage or even for limited exhibition in the region concerned, the Films Division obtains these for release.

Prime Minister Nehru's achievements, his "Last Journey" and functions connected with it, gave the Films Division an opportunity to compile more documentaries than one, for exhibiting the past glories of a dedicated life. These documentaries gave proof of the powerful hold of the film medium on people's mind.

Slowly, the Films Division is paying more and more attention to technical topics; naval aviation, Indian Ocean expedition, manufacture of optical glass, defence research and hockey are some of the out of the way subjects about which documentaries were produced during the year.

Every cinema is required under the terms of its licence to exhibit at each show not more than 2,000 feet of film approved by the authorities specified in the licence One newsreel or alternatively one documentary is released every week to all the cinema houses.

To non-profit making and charitable institutions such as schools, hospitals films are supplied free.

Films that are suitable for foreign exhibition are supplied to Indian missions abroad. A monthly overseas edition of newsreels is also sent out to certain places. They are also marketed abroad on a commercial basis. Besides, there are arrangements for televising them with certain foreign countries—England, Canada and Japan. The films also help to promote tourism as they are regularly exhibited through the Tourist Division of the Ministry of Transport.

*News Reels & Documentaries :* In the production of documentaries and news-reels, the Films Division naturally holds a leading position mainly because of the compulsory exhibition of these films all over the country.

Among the topics chosen for documentaries, Defence naturally dominates with 22 documentaries, 8 of them purchased from the Government of Maharashtra. Family Planning was a subject on which Films Division tried to focus the attention of the public. Fourteen documentaries provide an indication of the accent on production in various factories.

**Production by Films Division 1955-65**

| Year | Documentaries | | News Reels | Compilation News Reels | Total |
|---|---|---|---|---|---|
| | B & W | Color | | | |
| 1955–56 .. .. .. | 58 | 11 | 53 | 17 | 139 |

| Total .. .. | 764 | 139 | 533 | 134 | 1,570 |

*Films for Record :* The Films Division also makes certain documentaries for record only when dignitaries visit this country or when our President goes abroad. During 1963, 14 films (24 reels) were made for record. Dr. Radhakrishnan's visit to U.S.S.R., Ireland, Madurai and Rameswaram have been preserved in movie form. Foreign dignitaries on a visit to this country have been filmed in 14 reels, including the Royal trips of kings of Jordan and Laos, and of Presidents of Iraq and Sudan.

There are quite a few educational films among those that are not put on the commercial circuit. Four films of rural sanitation running into 9 reels altogether are suited for rural audiences. Nutritional progress of Orissa, cross breeding for improved yield of milk and fire fighting in villages are films that will be better appreciated in the countryside. In their production, the Films Division has shown how the motion picture can be made to serve educational purposes for the benefit of the illiterate masses.

Films produced by others and by other State units continued to be purchased by the Films Division for commercial exhibition over its own circuit. With the decentralised civil administration, each district has come into prominence and the peculiarities, artistic, industrial and agricultural and otherwise, were sought to be explained by means of a documentary film. Among the 23 films obtained from the Govt. of Maharashtra, there were some films highlighting the regional special features.

Similarly, eight films from the Government of West Bengal, eight documentaries and ten news reels from the Govt. of Gujarat, two films from Andhra Pradesh Government and one each from the Govts. of Uttar Pradesh and Madras, were obtained for release in the respective spheres.

**Mobile Publicity Units :** Seventy-nine mobile units maintained by the Field Publicity contacted about 230 lakh people during the year. Their trips provide contacts with the population of regions where no other agency reaches them.

On an average, each unit remains moving for 18 days; visits as many places and organises 25 film shows and as many meetings after or before the show. In chalking out the programme of tours, care is taken to conduct the tour on important fair and festival days of the region to contact maximum audiences. Supporting effort is given to various "camps", rallies and *shibirs* where the select audiences are available in a more receptive mood.

The Films Section of the Gandhi Memorial Fund has delegated all its work to the Films Division, for better results and more efficient distribution.

A full length documentary film on the biography of Mahatma Gandhi is under compilation as the repository of the Fund contains copies and originals of many shots relating to Gandhiji's activities, collected from all over the world.

Shorter documentaries of individual aspects of Gandhiji's activites are also planned from the material available. The Fund had secured the services of a British expert; but ultimately it was decided to get the work done through the Films Division. The Ministry of Information & Broadcasting is already committed to the publication of the complete works of Mahatma Gandhi and work on the films would also logically belong to the same Ministry.

### Films for non-commercial release

*Non-Commercial Exhibition:* Documentaries and news-reels produced by the Films Division have a great demand outside the regular cinema houses for non-commercial exhibition. Mobile vans of commercial and industrial concerns, as part of their propaganda for their products, resort to showing of films to draw audiences. They seem to be quite successful in this effort. While they popularise their respective products, documentaries and news-reels get incidental publicity. More than 8,400 prints were sold during the year 1964 and over 15,300 prints were supplied free to State Governments, educational and Plan Publicity centres.

The revenue and expenditure are as follows:

| Year | '000 Rs. | |
|---|---|---|
| | Revenue | Expenditure |
| 1958–59 .. .. | 33,72 | 75,00 |
| 1959–60 .. .. | 49,98 | 91,00 |
| 1960–61 .. .. | 50,82 | 89.06 |
| 1961-62 .. .. | 62,90 | 97,47 |
| 1962-63 .. .. | 66,10 | 106,00 |
| 1963–64 .. .. | 71,03 | 101.38 |
| 1964-65 .. .. | 77,67 | 104,22 |

### News-reels

For obtaining a country-wide coverage, Films Division has stationed 15 cameramen in all the state capitals and for international coverage it has exchange arrangements with 22 news-reel producers from abroad. A wide distribution of Indian news items is thus secured on television also. State Governments who have their own "news-reel" units for their own distribution arrangement occasionally supply material to the Union news-reels.

Like documentaries, news-reels also are being dubbed in English and 12 Indian languages as from the beginning of 1960, for obtaining more intensive penetration.

For the compulsory showing of approved films, the Films Division levies rental on cinemas at the following rate:

(i) From cinemas where the gross weekly collections are less than Rs. 500 @ Rs. 2½ per film per week;

(ii) From cinemas where the weekly gross collections excluding entertainment tax are Rs. 500 or more, 1 per cent of the collections per film per week.

Regular shows of documentaries and news-reels are arranged at the small theatre auditorium of the Films Division, Janpath, New Delhi, and Tarabai Hall, Marine Drive, Bombay, at the nominal charge of 25 P. per head per show.

Similar shows are being introduced in other cities as well as they will help make audiences documentary-minded.

Films dealing with Plan activities, are supplied to State Governments, social education units, railways, exhibition directorate, information centres and so on.

News items of current interest including significant events from foreign countries continued to be included in the newsreels. The news stories were received from 26 foreign newsreel organisations as part of the arrangement for free exchange of newsreel material.

## AWARDS

(See article 'Awards and Prizes')

The President's Gold Medal carries with it a cash award of Rs. 25,000 (Rs. 20,000 for the producer and Rs. 5,000 for the director). The 2nd best feature film gets a cash prize of Rs. 12,500 (Rs. 10,000 for the producer and Rs. 2,500 for the director). For the All-India Certificate of Merit for documentary, there is a cash prize of Rs. 2,500 (Rs. 2,000 to the producer and Rs. 500 to the director).

It has been decided to award a cash prize of Rs. 20,000 to the best feature film on the theme of unity during 1964.

The cash awards are mostly in National Plan Savings Certificates and Treasury Savings Deposit Certificates.

There are regional committees in Madras, Bombay and Calcutta which make a preliminary selection in the matter of feature films. These committees consist of persons who are qualified to judge. The final selection is made by the Government. In the matter of documentaries, educational films and children's films the selection is made solely by the Government.

The Ministry of Health instituted two cash prizes of Rs. 25,000 each to be given to the best all-India feature films on family planning (one produced in 1963 and the other in 1964) No. film was considered suitable for the cash prize.

*Film Festivals in India & U.S.S.R.* Nine Indian feature films were screened during the Indian Film Festival held in Moscow and four other cities of the U.S.S.R. Similarly, Soviet films were shown in India in Delhi and other four cities during February-March 1964.

The Filmfare awards are given on the basis of a readers' poll. (For more details see article "Awards and Prizes".)

## CENTRAL BOARD OF FILM CENSORS

The Board of Film Censors is a statutory body set up under the Cinematograph Act, 1952, for sanctioning films for public exhibition. Films certified as suitable for unrestricted public exhibition are granted 'U' certificates and those certified as suitable for public exhibition restricted to adults (persons who are over 18 years of age) are given 'A' certificates.

Under Section 5A(3) of the Cinematograph Act, 1952, the certificates issued by the Board are valid for a period of 10 years from the date of issue. Provision, however, exists for the issue of fresh certificates in respect of such films after the expiry of the 10 year period. Thirty-six films, in respect of which certificates were issued more than 10 years ago, were recertified by the Board during the period. Recertification was not certified in the case of any feature film.

The Board at present consists of a Chairman and nine non-official members who work part-time in an honorary capacity. The headquarters of the Board are at Bombay. There are regional offices in Bombay, Calcutta and Madras. The Regional Officers are assisted by Advisory Panels appointed by the Government. The Panels consist of educationists, doctors, social workers, lawyers.

Every film is scrutinized by the Examining Committee, and a certificate is given or refused, or given with cuts or modifications. There is an appeal to a Revising Committee presided over by the Chairman. There is also a final appeal from the decision of the Board to the Government of India.

### The Central Board of Film Censors, Bombay

The Central Board of Film Censors has during the past 14 years, 1951-64, certified 12,378 Indian and 27,565 foreign films.

In 1964, the Board examined 4,915 films, out of which 77 were refused certification. Films certified (U) for universal exhibition were 2,957 (foreign) and 1,926 (Indian) and those carrying (A) for Adults only were 228 foreign and 11 Indian. Those that were refused certification were all foreign, 39 features, 32 trailers and six others. Two shorts and six trailers were not given certification.

The total metres cut by censors during 1964 was 23,545.

Fresh certificates were issued for 391 films in respect of which certificates had been issued more than 10 years ago. Of these six were granted 'A' certificates.

Broadly speaking, the Censors see that there is no encouragement to vice, crime or that there is no offence against decency or morality, or that they do not promote disrespect for law and order or to a foreign country or people.

## 16 MM. FILMS

The use of the 16 mm. film for propaganda and publicity is realised by Governments, municipalities, and trade and industry.

The National Institute of Audio-Visual Education, Indraprastha Estate, New Delhi, has been doing excellent work with 16 mm films on a variety of topics. The Institute's Library is the single largest collection of 16 mm films, mainly for information and education and they are available at reasonable cost to any one in the country.

The Community Development Projects and the National Extension Service Blocks seem to be using the films as a regular part of their work. Obviously there is a considerable number of projectors in use throughout the country.

Many industrial houses maintain a regular stock of films for non-commercial use.

There are in addition 16 mm. projectors and small theatres for films suitable for non-theatrical audiences maintained by the British Information Services, the British Council and the U.S. Information Services through their regional offices.

In the Defence Forces, 16 mm. films have been extensively used for training and entertainment. There are Inspectors of Visual Education under Directors of Education in the States who do valuable service by using 16 mm. projectors and film strips.

One of the biggest single 16 mm. libraries of films in States is maintained by the Inspector of Visual Education in Bombay who makes the films available regularly to schools under him.

Most of the diplomatic missions and embassies in the Capital and Consulates in Bombay, Madras and Calcutta maintain a film section and arrange shows of special films.

The U.K. and U.S.A. representatives and the British Council maintain a special library of educational and informative films. These are available for exhibition free of charge.

Many international friendship societies too have libraries of 16 mm films. Notable among these are the Indo-Soviet Cultural Society and the Indo-Czech Cultural Society.

In fact 16 mm films on a variety of subjects are available from many countries in the world.

## EXPORT, IMPORT

The Film industry earns about Rs. 140 lakhs annually through export of films outside India. Excluding those in Pakistan, there are about 2,500 theatres available for the showing of Indian films in about 60 foreign countries where Indians live in some concentration and where Indian films are welcomed.

The main export market at present is Pakistan; but Indian exporters there are put to considerable difficulty. Ceylon, Malaysia, Burma, Indonesia, Cambodia, Thailand, Viet Nam, Aden, Persian Gulf Ports, Iran, Lebanon, British East Africa, British West Africa, Ghana, Tangiers, South Africa, British West Indies, Fiji, Mauritius, Dutch Guiana, U.K. and Hongkong are the other chief markets for Indian films.

The Indian Motion Pictures Export Corporation Ltd. was set up in Bombay on Sept. 19, 1963, to promote export of Indian Films. For more details see article "All India Corporations". The export earnings from films were: 1959: Rs. 154 lakhs; 1960: Rs. 176 lakhs; 1961: Rs. 163 lakhs; 1962: Rs. 142 lakhs; 1963: Rs. 167 lakhs.

*Exhibition abroad:* Special news reel compilations are made every month for use in 36 Indian missions abroad and copies of documentaries are in demand for regular exhibition in 81 missions. Many television authorities show considerable interest in Indian films and the documentaries/news-reels are frequently used by them through the Indian missions in their respective countries.

Shows of films on exchange basis are held in Sudan, Lebanon, Canada and Malaysia.

Ocean-going liners also want some Indian films for their regular exhibition programme.

India participates in important international film festivals from time to time by entering films and sending delegations where necessary.

Festivals of Indian films are organised in foreign countries when practicable. Selected films are also screened at exhibitions and trade fairs organised or participated in by India abroad. A souvenir on the film industry has been prepared. It is being distributed through our missions and at international film festivals.

An uptodate Catalogue of the Films Division's documentaries is available.

Arrangements are being made for the supply of articles through the trade missions for publication in foreign journals dealing with different aspects of our film industry. There is an exchange of films which is made in accordance with trade and cultural agreements concluded with foreign countries.

Import licences have been given to the film industry for putting up machinery for subtitling of films. Licence is given to the exporters for the import or release of raw film for export prints under the Export Promotion Scheme. Exporters are allowed to import raw films equal to 2 per cent of the F.O.B. value of export of feature films.

Apart from traditional importers of Indian films like Ceylon and Singapore, other countries importing films from India now include U.K., U.S.S.R., France, U.S.A. and Canada.

Imports of exposed cinematograph films have been fairly heavy. Until 1936-37 imports remained below 10·8 million feet, touched the peak at 26 million feet in 1938-39 and dropped to 6·9 million feet in 1942-43 owing to wartime conditions. In the post-war period imports recovered to 16·2 million in 1945-46 and thereafter have fluctuated between 17 million feet and 12 million feet.

Under the import control regulations, import of foreign films is subject to a monetary ceiling and distributors are authorised to remit up to 70 per cent. of the gross revenue.

## CINEMATOGRAPH ACT

The regulations of films for exhibition and of the cinemas take place under the Indian Cinematograph Act. The power of certifying films was until the amendment of the Act in 1949 vested in the State Governments. Since production was concentrated in the three States of Bombay (Bilingual), Bengal and Madras and imports also mainly took place through the three ports in those States, the first examination of films for certification was done mainly by the Boards at Bombay, Calcutta and Madras. The Act as amended in 1949 made a distinction between films considered suitable for exhibition to adults only and those suitable for general exhibition.

A Bill was passed in 1952 to amend the Act with a view to removing certain defects noticed in the course of actual administration. Under the original Act responsibility for deciding whether a film is or is not suitable for public exhibition was entrusted to the Central Board of Film Censors; but powers are vested in the Central Government to declare that any film already certified as uncertified and notice has to be given to the person who has been granted certificate to show cause why the film should not be uncertified. This delay is sought to be avoided by the amendment. Provision is also made in the amended Act making it obligatory on persons delivering a certified film to a distributor or exhibitor to transmit information and documents relating to the certificate which would enable punishment of the exhibitor if he shows the film with portions cut out by the Board before certification. The difficulties encountered in proceedings against persons for interpolation and exhibition of unauthorised scenes in certified films are sought to be countered. Enhancement of the penalty has also been suggested.

The Censorship Rules as amended provide for a deposit of a 35 mm. or 16 mm. version of the certified film or its shooting script as a condition precedent to the issue of a certificate. Such a certificate is valid for ten years from the date of issue and old films once censored have to be recensored if the previous certificate has been in effect for five years or more.

## PRODUCTION OF FEATURE FILMS

| | 1961 | 1962 | 1963 | 1964 |
|---|---|---|---|---|
| Hindi | 98 | 96 | 93 | 113† |
| Bengali | 36 | 38 | 39 | 34 |
| Tamil .. | 49 | 62 | 56 | 44 |
| Telugu .. | 55 | 48 | 46 | 41 |
| Marathi | 15 | 24 | 16 | 18 |
| Kanarese | 12 | 16 | 22 | 18 |
| Malayalam .. | 11 | 15 | 13 | 19 |
| Others .. | 27 | 21 | 20* | 17‡ |
| Total.. | 303 | 320 | 305 | 304 |

* Including three in English. † Including Urdu, Bhojpuri, Avadhi, Magadhi, Rajasthani. ‡ Includes one in English.

*Note:*—The figures of production of feature films have a minor discrepancy. Officials take every film that is certified by the Censors as "produced", during the period. The Industry however considers films that are *released* as produced. There is an inevitable lag between the certified and released films.

## CINEMAS IN INDIA

India is one of the major film producing countries in the world, ranking second after Japan. It is estimated that there are about 260 producing concerns, 1,180 distributing agencies and 5,289 cinema houses. The capital investment in production, exhibition and processing is estimated at Rs. 84 crores. About one lakh people are employed in the industry, 15,000 in studios, 50,000 in cinemas, 5,000 in processing laboratories and the rest in production, distribution and allied branches.

The number of studios and floors in the industry's three production centres are: Bombay 30 studios with 69 floors, Calcutta 11 studios with 30 floors and Madras 27 studios with 72 floors.

## IMPORT OF FILMS

| | Raw Films | | Exposed Films | |
|---|---|---|---|---|
| | Length (lakh metres). | Value (Rs. in lakhs). | Length (lakh metres). | Value (Rs. in lakhs). |
| 1958 .. .. .. .. | 653 | 164 | 34 | 32 |
| 1959 .. .. .. .. | 650 | 277 | 41 | 39 |
| 1960 .. .. .. .. | 827 | 194 | 51 | 38 |
| 1961 .. .. .. .. | 537 | 166 | 52 | 45 |
| 1962 .. .. .. .. | 722 | 177 | 56 | 44 |
| 1963 .. .. .. .. | 807 | 204 | 28 | 27 |

## IMPORT OF EQUIPMENT

(Rs. in lakhs).

| | 1959 | 1960 | 1961 | 1962 | 1963 |
|---|---|---|---|---|---|
| Cinema projecting apparatus, etc. .. | 24·32 | 32·43 | 34·52 | 33·08 | 31·03 |
| Sound recording apparatus, etc. .. | 2·17 | 1·41 | 3·76 | 2·95 | 2·09 |

# SERICULTURE AND SILK

NEXT to *handloom* and *khadi*, sericulture is the biggest village industry extending part or full employment to about 2·8 million people and generating income to the tune of Rs. 90 million in a year. Sericulture provides raw materials for India's traditional handlooms which consume over 90 per cent of raw silk output. Exports of pure silk fabrics fetched Rs. 21 million in foreign exchange in 1964. The target of pure silk exports during the Fourth Plan has been fixed at Rs.20 crores. Silk cultivation to-day upholds not only a cherished tradition, but also plays a vital role in India's economic planning.

A provision of Rs. 15 crores for the development of sericulture industry has been proposed for the Fourth Plan. The industry was allocated Rs. 7·03 crores in the Third Plan and Rs. 5 crores in the Second Plan.

The target fixed for the Fourth Plan is 31 lakh kgm. of silk of all varieties against the estimated production of 21·53 lakh kgm. at the end of the Third Plan.

Silk production is a five-tier process—mulberry cultivation, silkworm seed production, cocoon-raising, raw silk reeling and silk weaving. While the first two stages are integrated with agriculture, the latter two come under the industry sector. Sericulture which covers stages upto raw silk production is thus an important agro-industry. In 1964 silk production was 19·43 lakh kgm. against 19·00 lakh kgm. in 1963.

The three fundamental requirements so necessary for commercial cultivation of silk are suitable climate and soil, abundant growth of mulberry and availability of semi-agricultural labour. These primary conditions have always existed in Asia which produces over 90 per cent of world raw silk output. The main silk producing countries are Japan, China, southern fringe of Russia, India, Korea and Italy. Among these countries India, contributing only four per cent of world raw silk output, is the fourth largest producer. The most remarkable fact about India is that she has a rich flora and silk fauna abounding in four kinds of silk moths—mulberry, tasar, eri and muga.

India cultivates both univoltine and polyvoltine kinds of mulberry silk. The main univoltine silk producing State is Jammu and Kashmir in north producing over 5 per cent of total output; the polyvoltine zones are in south — Mysore which alone contributes above 74 per cent; and in east, West Bengal which has polyvoltine culture raising 20 per cent of total silk production. The indigenous non-mulberry — tasar, eri and muga — is spread in Assam, Bihar, Madhya Pradesh, Orissa and West Bengal. The total Indian raw silk production is about 1·943 million kgms. against the estimated domestic requirement of 2·0 million kgms.

Of the four species of mulberry grown in India — *Morus alba*, *Morus indica*, *Morus serrata* and *Morus laevigata* — *Morus indica* is the one which is widely cultivated. Among the major sericultural regions, Mysore and West Bengal raise bush mulberry and Jammu and Kashmir and Punjab cultivate it as tree. At present over 85,000 hectares are under bush and there are 34,58,000 mulberry trees. This food plant is cultivated on a variety of soils ranging from sandy-loam to alluvial soils. But the best soil is known to be the sandy-loam. CSB and the State sericulture departments are working towards evolving high-yielding economic varieties of mulberry that could solve the present problems of high cost and poor quality of mulberry production.

India has at present many indigenous races of the silkmoth Bombyx mori L., but except one, *Barapolu* of West Bengal, all others are polyvoltines which can be reared throughout the year. The Indian races are hardy and give suitable crops in the hot, humid months of summer but their commercial potentialities are extremely limited. It is noteworthy that CSIR, Mysore (CSB) has evolved a superior high yielding polyvoltine S.W. race which is under study and observation.

India has a unique heritage of non-mulberry silk culture. In the valleys and hill tops in Madhya Pradesh, Orissa, Bihar and Assam, some 1,00,000 of India's most backward families uphold their time-honoured tradition by obtaining silk from nature. The most important of the wild worms is undoubtedly tasar, or tussah, Antheraea mylitta, which spins cocoons on the trees. In recent years tasar fabrics are in good demand in America and Europe. The eriworm, *Philosamia ricini*, feeding on castor leaf is reared indoors in Assam, Bihar and West Bengal. The golden yellow muga silk is the product of a caterpillar known as *Antheraea assama* and is exclusively confined to Assam. The muga silk yarn is widely used for embroidery purposes. The total output of non-mulberry silk is about 4·77 lakh kgm. valued at over Rs. 31 million. The CSB and the State Governments are striving to develop this heritage by improving their food plants, building the seed organisation, setting up co-operatives and providing marketing facilities.

About 58 per cent of total mulberry silk production is reeled on indigenous crude appliance called *Charka*. The quality of silk produced on *Charka* is poor particularly with regard to evenness, cleanness, cohesion and winding properties. The crude appliances are being gradually replaced by the improved ones, cottage basins, which produce better quality of silk compared to the yarn reeled by *Charka*. Production of cottage basin silk in India is of the order of 27 per cent of the total production. Over 13 per cent of raw silk is reeled by the modern system of reeling filatures which utilises steam for heating water and electric power for reeling at uniform speed. There are at present 8,078 charkas, 3,817 cottage basins and 1,678 filature basins in operation. The filatures are located in the two main silk producing States of Mysore and Jammu and Kashmir.

There are at present two spun silk mills—one Government spun mill at Channapatna in Mysore State and the other—Assam Spun Silk Mills at Jagi Road near Gauhati.

Silk is cultivated in 12 out of 15 States and in three of ten Union Territories. Mulberry is raised mainly in three States of Mysore, West Bengal and Jammu and Kashmir which jointly contribute about 98 per cent of the total mulberry silk production. The rest of the States having a small mulberry production are Andhra Pradesh, Assam, Bihar, Kerala, Madhya Pradesh, Madras, Punjab and Uttar Pradesh and the Union Territories of Himachanal Pradesh and Manipur. The non-mulberry culture is confined to the eight States of Andhra Pradesh, Assam, Bihar, Madhya Pradesh, Maharashtra, Orissa, Uttar Pradesh and West Bengal and the Union Territories of Manipur and Tripura. Among the non-mulberry kinds, tasar is extensively grown in the dense forests of Bihar, Madhya Pradesh, and Orissa and, on a limited scale, in Andhra Pradesh, Tripura, West Bengal and Maharashtra. Sericulture is practised mainly in Assam claiming over 90 per cent of eri silk production and, on a minor basis, in Bihar, Orissa and West Bengal. The *muga* is exclusively reared within Assam. In some of the States sericulture has been extended in the recent years. Even among the three non-producing States, Maharashtra and Rajasthan have very recently taken to silk cultivation on experimental basis. The only exception is Gujarat which though a traditional silk weaving State has no sericultnre.

## SILK INDUSTRY IN STATES

The extent and nature of silk industry in each State is briefly as follows:

### Andhra Pradesh

Andhra Pradesh has a small production of both mulberry and eri silk but has a substantial potential for wild tasar. Mulberry silk industry is spread over the districts of Anantpur, Chittoor, Karimnagar, Visakhapatnam and Warangal and ericulture in Mahbubnagar and Kurnool and tasar in the forests flanking the river Godavri.

Introduced in recent years, mulberry silk cultivation is growing. The bulk of cocoons is, however, exported to Mysore. For development of mulberry, the State has at present 2 graft nurseries, 10 sericultural farms, 2 chawki units, one grainage and 2 reeling units. A silk throwing factory with 2,426 spindles is located at Peddapuram. Ericulture in the State has good prospects. Although about 8 lakh acres are under castor cultivation, only a limited percentage is used for silkworm rearing, the bulk being used for oilseed purposes. There are 2 eri seed farms and one propaganda station. Tasar cultivation is traditional with tribals deriving their livelihood therefrom. There are 5 tasar seed stations. The State has production of tasar silk to the tune of 400 kgms.

### Assam

Assam is the biggest non-mulberry State having an extensive ericulture, exclusive muga-culture and a little of mulberry silk production. The main silk-cultivating districts are Goalpara, Kamrup and Nowgong (in the Assam Valley) having silk fauna producing eri, muga and *pat* (mulberry). Sibsagar is the main area for mulberry production. Since there are no large-scale industries in this border State, silk cultivation plays a vital role in its economy. It is estimated that over 8·5 lakh people, mostly backward belonging to *Jago* or *Katoni* caste and a few Mohammedan families, derive their livelihood from silk cultivation.

Mulberry is raised as 'bush' and 'middlings' and rearing is done from November to March.

Assam's indigenous race is *Sarupat*, a multivoltine worm producing yellow, white and greenish-white cocoons. Silk is reeled on Bengal *ghai* type charka, mostly by rearers' families. It is estimated that about 5,000 families are engaged in mulberry cocoon cultivation.

Eri is cultivated indoors by the Animistic tribes living on the outskirts of the Assam Valley and to some extent by the people residing in the valley. The heavy rainfall and moist climate are suitable for rearing eriworms at altitude of 5,000 ft. The ericulture is practised in about 12 districts of Assam. The main crops are raised from September to November and February to March.

Eri worms are fed mainly on castor leaves. The eri silkworm is polyvoltine and gives four to five crops a year. The process of rearing is the same as that of mulberry worms. The worms suffer from several diseases among which flacherie takes heavy toll. The bulk of eri cocoons is handspun by crude *taklis* and recently by improved N. R. Das machine. Eri silk is unreelable, coarse and uneven. The entire production is consumed within the State.

The golden yellow silk, *muga*, is produced exclusively in Assam Valley. Muga culture is spread in some six districts, the most important being North Lakhimpur and Sibsagar. The muga silkworm, indigenous to Assam, is reared on trees. The muga worm is fed on the leaves of food plants, particularly on 'Som' and 'Soalu'. Five crops are taken in a year corresponding to different seasons — *katia* (autumn crops), *jarula* (winter crop), *jethua* (summer crop), *aherua* (early monsoon crop) and *bhadia* (late monsoon crop). The bulk of the cocoons used for reeling comes from the autumn crop which is considered the most suitable.

Another type of muga silk is "mezankor" silk which is noted for its durability, lustre and creamish-white colour. This "mezankori" variety of silk is produced by *muga* worms fed on the leaves of "mezankori" plant which grows wild on the hills of Assam. There are 11 silk farms, one mulberry grafts nursery, four mulberry silk

reeling units, 10 muga farms, 12 eri grainages and 27 cocoon growers' and reelers' cooperatives and one experimental tasar seed station. Reeling units are at Aijal, Gaurisagar and Shillong and the eri and muga production centres at Domta, Kamrup, Rana and Saulkuchi. Three cocoon marketing centres have been set up. There is also a well-equipped sericultural training institute and a research institute at Titabar. For utilisation of silk waste, the State Government has recently inaugurated a 3,000-spindle Assam Spun Silk Mills at Jagi Road.

### Jammu & Kashmir

Kashmir is considered as a prolific source for univoltine silk in India. The State Government took over the industry in 1869 and since then it has been a State monopoly. The department of sericulture was organised in 1897 and in the following years modern filatures were built in Jammu and Srinagar. The industry is mainly practised in the districts of Anantnag, Baramulla, Doda, Jammu, Raiasi and Udhampur. The annual production of raw silk is estimated at about 98,000 kgm. or about 7 per cent of the total mulberry silk output. The industry provides employment to about 3,60,000 persons. The Kashmir Valley located at the altitude of about 5,000 feet, has the most suitable climate for univoltine silkworm rearing.

There are also 32 mulberry nurseries — 18 in Jammu and 14 in Kashmir, and 4 basic graft nurseries — 2 in Jammu and 2 in Kashmir. In recent years two basic seed cocoon farms have been set up. Besides, there are two hibernation centres at Srinagar and Batote. The CSB has also established a Central Silkworm Seed Station in Srinagar for evolving suitable race of silkworms.

The entire cocoon output is reeled by filatures. The factory at Srinagar has three units, of which two are fitted with Italian type reeling machinery imported in 1925 and 1927. The installed capacity of both these units is 192 basins each. The third unit is, however, fitted with usual button-type machinery consisting of 200 basins manufactured locally in 1939. In Jammu, out of 169 basins, only 48 basins are Italian type and the rest are locally made. There are no *cottage basins* or *charkas* in the State.

The State Government have recently reconstituted the small-scale and cottage industries as a commercial undertaking "J. & K. Industries Limited" which includes sericulture and is being looked after by a Manager. A sericultural training school has been recently started at Srinagar.

### Kerala

Sericulture was extended to this State by bringing about 16 hectares of land under mulberry at Ambalavayal in Wynad in 1962, a colony of ex-military personnel. About 20 hectares are under private mulberry plantations and the rest is owned by the Government. The total cocoon yield is about 500 kgm.

### Madhya Pradesh

Madhya Pradesh is the leading tasar producing State. The tasar silkworm rearing districts are mainly Bilaspur, Raigarh and Surguja. Mulberry silk industry, practised on limited scale, has been renewed in recent years in the districts of Dhar and Indore. The industry provides employment for about 42,000 rural people.

Three crops are taken in a year — first is winter crop raised between December and February, second spring crop in March and April and third rainy crop in July and August. The univoltine variety of tasar silkworm known as *modia* is reared in July-August while the bivoltine variety called 'Ampatia' in August-September and December-January.

Among tasar cocoons, *modia* and *daba* cocoons are rich in silk content. Tasar silk waste is hand spun by means of a simple contrivance called "dehera takli" and "charka". There are nine mulberry silk farms, one grainage, one graft nursery and a reeling unit—eight tasar seed farms, two tasar training centres, six tasar cocoon markets, a tasar research unit and one reeling and spinning unit. The Central Silk Board established a Central Tasar Seed Supply Station at Lakha in 1964.

### Madras

The sericulture industry in Madras is at present confined to the districts of Coimbatore, Nilgiris, Salem and Tirunelveli. The industry provides employment to about 6,000 people. Mulberry is raised as 'bush'. The area under mulberry was 1,373 hectares by 1964. There are 11 mulberry graft nurseries, one basic seed farm, four Government silk farms, one Government grainage, two chawki units, one reeling unit, 25 basins, four cocoon markets, one gut section at Coonoor and a Sericultural Cooperative Society at Talvadi. Madras State at present produces about 3,000 kgms. of raw silk.

### Maharashtra

In Maharashtra Bhandara and Chanda districts, have traditional tasar culture ; the State has also taken up eri cultivation on experimental basis. Under the Second Plan, two schemes—one relating to training-cum-production centre for eri at Nasik and second for tasar development in Vidarbha—were executed. Under the Third Plan programme a third scheme has been sanctioned.

### Mysore

Mysore is now the biggest polyvoltine mulberry silk producing State in India contributing over three-fourths of the total mulberry silk production. The industry is concentrated in the districts of Bangalore, Kolar, Mandya, Mysore and Tumkur and to a small extent in Belgaum and Coorg. About five per cent of the total population of the State derives livelihood from silk cultivation. Recently the State Sericultural Department spotted the presence of tasar silkworm in the forests of Sirsi (North Kanara District) and a scheme for development of tasar industry was approved in 1964-65.

Mulberry is raised as bush, both in rain-fed and irrigated zones. There are about 77,000 hectares under mulberry cultivation. The yield of leaf per acre from rainfed plantations is about 1,800 kgms. and from irrigated areas about 3,600 kgms. per year. Nearly 5 to 6 crops are taken from irrigated plantations and 4 to 5 from rain-fed ones. There are four graft nurseries producing over eight lakh grafts of improved strains.

At present there is a silk rearing station at B. R. hills for preservation of stock races and their amelioration. Besides, there are basic seed farms — three for foreign races and three for polyvoltine local races. For production of industrial seed, the State has 47 grainages and over 600 licensed seed preparers. Seventy chawki rearing centres including 4 for demonstration purposes have been set-up.

Raw silk reeling is done by traditional *charkas*, recently by improved *cottage basins* and also by modern filatures. Mysore produces about 5,76,000 kgm. of *charka* silk (and 38,000 kgm. of dupion silk), over 3,63,000 kgm. of cottage basin and 1,03,000 kgm. of filature silk. The State has at present over 3,100 active *charkas*, 3,074 cottage basins and 936 filature basins (active). The quality of filature silk is superior to *charka* and fetches a premium of Rs. 10 to 12 per lb. in the market. Under a programme, the existing *charkas*, which produce very poor quality silk, are being replaced by cottage basins.

The bulk of raw silk output is marketed through Kothi merchants or middlemen. The Government has, however, organised since 1957 the Silk Marketing Co-operative Society in Bangalore, which has recently set up a branch at Nanjangud. There are 80 government cocoon markets established under Mysore Silkworm Seed Act in addition to a voluntary cocoon market at Ramnagaram. The State established four sericultural cooperatives. For utilisation of silkwaste, the State has recently reopened the Mysore Spun Silk Mills, which originally existed till its closure in 1958 under name of "Channapatna Spun Silk Mills". Besides, the State has a sericultural training school at Channapatna and a silk conditioning house in Bangalore. The Central Sericultural Research Institute and the A.I.S.T.I., Mysore are the central projects functioning at Mysore.

### Orissa

Orissa is a non-mulberry State having both traditional tasar and eri silk industries. Tasar culture is spread in the northern district of Keonjhar and to some extent in Mayurbhanj. Ericulture is concentrated in Cuttack district and extended through Bolangir, Ganjam, Koraput, Phulbani and Puri districts. The annual production of tasar silk is about 14,500 kgm. and eri 400 kgm. About 23,000 rural people depend for their bread on these two pursuits. The State has no mulberry culture.

The State has now three seed supply stations, two eri seed stations, one reeling and spinning centre, one research unit and 16 tasar rearers' cooperative societies. The Central tasar depot established during the 2nd Plan at Baripada to facilitate marketing has been replaced by a State Tasar Cooperative Society Ltd. (Apex) in 1963. During the 3rd Plan the existing station will be strengthened and more rearers' cooperatives will be formed.

### Punjab

Punjab has a century-old sericulture industry, although silk weaving dates to antiquity. The importance of Punjab silk is that after Kashmir it is the biggest zone producing univoltine silk. The industry is practised mainly in districts of Amritsar, Gurdaspur, Hoshiarpur and Kangra and to some extent in Ferozepur, Jullundur and Karnal. It provides employment to about 1,500 families. The State produces about 4,500 kgm. of charka silk.

Mulberry is raised as tree growing as high as 12 metres, mainly cultivated for their fruits and timber. Mulberry nurseries and demonstration farms have been set up under the Plan schemes. There are about 104,000 mulberry trees and 68 hectares under bush mulberry.

The silkworm seed requirement is to a great extent met by two grainages at Dalhousie and Palampur. A foreign race seed station is functioning at Nagrota. Several chawki rearing centres have come up in recent years. The entire cocoon output is reeled on 'charkas'. A demonstrational training centre has been opened in Dinanagar. For cocoon marketing, a society has been recently formed in Pathankot district. Under the Third Plan, efforts are made towards extension of mulberry area, augmenting seed production and improvement in all sectors of silk industry. A small unit of filature is under establishment in Dinanagar.

### Rajasthan

Tasar culture is just being introduced in this State in Shahbad area and a number of tribals practise tasar cultivation as a cottage industry. The State Government intends to establish a demonstration centre for spinning and weaving in this area.

### Uttar Pradesh

Mass rearings were taken up in the villages during 1953. Mulberry silk industry is practised in 6 districts of Dehra Dun, Etawah, Garhwal, Gorakhpur, Nainital and Saharanpur. Ericulture is carried on in two districts of Rampur and Deoria and tasar culture is found in Mirzapur district.

Mulberry is cultivated both as 'bush' and 'tree'. From over 5,00,000 mulberry trees growing in the State only about 40,000 are utilised for silkworm rearing, the large number being used for obtaining timber for sport goods. The area under bush mulberry comprising Government farms and private gardens is about 207 hectares. There are 13 mulberry farms and 7 graft nurseries.

Both univoltine and polyvoltine silkworm races are reared. 35 chawki rearing centres and four demonstration silk farms have been set up. For production of disease-free seed, there are three grainages, and for production of basic seed cocoons, four farms. The cocoons are purchased by the State department at fixed rates and sold to the Doon Valley Sericultural Society. Recently 35 rearers' cooperatives and an apex society have been organised in the State. A cooperative silk filature of 30 basins has been established in 1963. The annual production of raw silk in the State is 1,200 kg.

### West Bengal

At present mulberry culture is practised in the districts of Bankura, Birbhum, Darjeeling, Malda and Murshidabad. The State has also a small production of eri and tasar silk. The annual production of mulberry silk in the State is 2,88,600 kgm.

Mulberry is cultivated as 'bush'. There are about 6,300 hectares under mulberry. There are eight mulberry nurseries, and grainages and 21 aided grainages. The State has also four mulberry graft nurseries three in Malda and one in Murshidabad district. Three tasar seed stations with their sub-stations and three eri seed stations are functioning in the State.

West Bengal has made significant progress in the introduction of hybrid technique. The State has already got four fixed hybrids called *Nismo*, *Nistid*, *Ichot* and *Itan*, which give better yield than indigenous races. There is a foreign race seed station at Kalimpong and a hill nursery for raising F1 seed of foreign races at Matigara. Two chawki rearing centres have also been set up.

Raw silk reeling is done on native *charka*. Efforts are made to introduce cottage basins. A 100-basin filature is also being set up at Malda. Marketing of cocoons is done through middlemen as in the case of Mysore State. The State Government has recently set up a voluntary cocoon market at Jalalpur. The State has established two training institutes — one for sericulture at Berhampore and other for reeling at Peddie (Malda). Besides, the Central Government's Central Sericultural Research Station is also located at Berhampore. The silk conditioning house is stationed at Calcutta.

### Bihar

Bihar is predominantly a tasar-producing State, contributing about 40 per cent of India's total tasar silk production. It is also the biggest eri silk-cultivating State after Assam. Bihar has also a small mulberry silk production. Tasar cultivation is carried on in the districts of Hazaribagh, Santhal Parganas and Singhbhum, as also on small-scale in Dhanbad, Palamau and Ranchi. Castor cultivation is found extensively in the areas bounded by Ganges in districts of Bhagalpur, Champaran, Dharbhanga, Gaya, Monghyr, Muzaffarpur, Patna, Purnea and Saran ; but the agriculturists utilise only a portion of castor leaves for rearing purposes. Mulberry culture is confined to one district of Purnea only. About 100,000 people, it is estimated, derive their livelihood from silk cultivation.

Tasar cultivation is almost exclusively practised by *Adivasis*, *Santhals*, *Pahadias* and other scheduled tribes. Bihar produces over 80,000 kgm. of tasar raw silk annually. For development of tasar silk industry, the State Government has set up in recent years 13 tasar seed supply stations, 25 sub-stations, 10 training centres, four marketing centres and 15 co-operatives. There is also a silk institute in Bhagalpur. Under the Third Plan more such centres will be set up.

Eri silkworm rearing is essentially practised as a subsidiary occupation. The eri silk production is about 12,000 kgms. Eri silk is spun by *takli*, spinning wheels and improved pedal spinning machines. There are at present six eri seed supply stations and 28 demonstration units. There is also a research centre at Ranchi. Mulberry cultivation in Purnea is practised on the lines of adjoining areas in West Bengal. The output is over 1,400 kgm. which is sold mainly in Bhagalpur. There is one silk farm-cum-grainage.

The State recently reorganised the sericulture section into three divisions with an Assistant Director in charge of each division with a view to supervising the implementation of developmental programme. The Central Silk Board has established a central tasar research station at Ranchi in 1964.

## UNION TERRITORIES

### Himachal Pradesh

Producing about 400 kgm. of raw silk, Himachal Pradesh is a potential univoltine zone. Mulberry silk cultivation is at present confined mainly to two districts, Mandi and Sirmoor. Out of about 100,000 mulberry trees growing in the territory, only about 15,500 are used for silkworm rearing. The territory has 12 mulberry farms, five nurseries and two reeling demonstration-cum-training centres. A number of development schemes have been initiated with the object of fully exploiting the existing potential for sericulture industry.

### Manipur

Situated in the neighbourhood of Assam, Manipur has both mulberry and eri silk cultivation and a potential for muga culture. Manipur produces about 345 kgm. of mulberry and over 400 kgm. of non-mulberry silk. The Territory has 3 silk farms, and demonstration centres for eri and muga.

### Tripura

Sericulture has been recently introduced. During the Second Plan, two demonstration centres one for eri rearing and the other for tasar-rearing have been set up. Some 50 families have taken up silk cultivation as source of their livelihood.

## CENTRAL SILK BOARD

An apex body consolidating and coordinating the sericulture industry in States, is the Central Silk Board, set up in 1949 by the Government of India. CSB is a 'body corporate' charged with functions 'to promote development of silk industry by such measures as it thinks fit.' The measures include rendering financial and technical assistance, 'undertaking, assisting or encouraging scientific, technological and economic research', 'devising means for improvement of all sectors', collection of statistics and to advise the Central Government on all matters relating to the raw silk industry, including import and export of raw silk.

CSB membership represents all interests of the silk industry. Chairman and Vice-Chairman are appointed by Central Government. The Board, constituted every three years, is composed at present of 35 members — three Government officials nominated by the Central Government, six elected by Parliament, five nominated by Mysore, one by Madras, two by West Bengal, one by Jammu and Kashmir and one each by Assam, Bihar, Gujarat, Madhya Pradesh, Andhra and Uttar Pradesh, three nominated by the Central Government representing producers of raw silk in remaining States and further eight to represent interest of spun silk, silk throwing, twisting, silk weaving, labour and experts in sericulture.

*Liaison Offices :* In order to co-ordinate the developmental activities of silk industries in the States, the Board has recently strengthened its liaison offices by providing technical officers at Bangalore, New Delhi, Calcutta. A new liaison office has also been set up at Srinagar in 1965.

**CSB's main activities are :**

1. *Providing Funds for Silk Schemes :* CSB extends financial assistance in the form of either grant-in-aid or loan for execution of silk schemes by the State Governments. The annual plans prepared by the State Governments are discussed with their representatives by the Standing Committee every year. During the First Plan about Rs. 5·7 million were approved by CSB as grant-in-aid. Under the Second Plan, sericulture assumed importance. CSB approved assistance to the tune of Rs. 40 million for a comprehensive development programme of sericulture in States. For the Third Plan Rs. 70 million have been earmarked for sericulture development.

2. *Providing Technical Know-How :* CSB gives assistance for scientific and technical work undertaken by State's sericulture departments and helps them to secure technical personnel and guidance. The Board has so far sponsored visits of four sericultural experts from Japan and deputed 20 Indian sericulture officials to Japan and two to China. CSB also appoints experts' committees to help States to overcome major problems. In recent years, three very important committees were constituted —(1) Central Research Coordination Committee composed of eminent scientists drawn from various Research Institutes to coordinate sericulture research ; (2) Fact Finding Committee to examine working of filatures and (3) Non-Mulberry Sub-Committee to suggest measures for development of non-mulberry sector.

*Service Stations :* CSB has established two service stations — All India Sericultural Training Institute at Mysore for training personnel deputed by the State Governments and Central Silkworm Seed Station at Srinagar for production of basic seed. Besides, it has also taken over from the Government of Madras, the Hill Rearing Station at Coonoor (Nilgiri District) to function as a sub-station for the Central Silkworm Seed Station at Srinagar. The Board is also setting up a pilot centre in Himachal Pradesh for demonstrating application of modern methods and appliances.

In 1964, the Central Tasar Silkworm Seed Station was set up at Lakha (Madhya Pradesh) to cater to the needs of tasar States in regard to basic seed of tasar silkworm.

*Sericultural Research :* CSB has decided to centralise and coordinate sericultural research on Japanese model. A committee composed of eminent scientists was constituted in 1961. As per its recommendations, CSB has taken over regional research stations. It contemplates to set up 3 research stations for mulberry silk industry and 2 for non-mulberry industry. The stations will be further supported by several sub-stations under the administrative control of States. Under the research project the CSB has already taken over the Central Sericulture Research Institute, Mysore from the Government of Mysore in 1961 and has got technical control over the Central Sericultural Research Station, Berhampur (W.B.) established by the Central Government in early fifties. Besides, the Board has also set up a research cell for univoltine area at Dehra Dun.

The Board has taken over the Central Tasar Research Station, Ranchi.

The Board also renders financial and technical assistance to the Sericulture Research Institute, set up by the Government of Assam at Titabar for tackling the problems of eri and muga silk industries.

*Distribution of Imported Silk :* CSB advises Government of India on import policy. Raw silk is imported through agency of the State Trading Corporation and is distributed by the Board to actual manufacturers and exporters of pure silk fabrics.

*Export Promotion :* With effect from 1st July 1964, the exporters of mulberry and tasar silk fabrics, ready-made garments and made-up articles of raw silk of these varieties are permitted to import raw silk themselves against their entitlements. Under the Export Promotion Scheme for mulberry silk fabrics and ready-made garments and made-up articles of natural silk other than tasar silk, the total import entitlements allowed are equal to 75 per cent of the f.o.b. value of the fabrics garments made-up articles, subject to the maximum f.o.b. value of Rs. 15 per square metre of silk fabrics. From this an amount not exceeding 20 per cent of the f.o.b. value can be utilised for the import of coal-tar dyes and chemicals as are permitted to be imported under the Red Book, Machinery, Machinery parts and equipment and spare parts and accessories as may be approved by the Textile Commissioner, embellishments, buttons, sewing thread, interlining, man-made fibres or synthetic yarn. The remaining portion of the entitlements can be utilised for the import of raw silk, silkwaste, noil yarn or nep noil yarn. The incentive for tasar exports are allowed to the extent of 10 per cent of the f.o.b. value. Against this amount the import of the items mentioned below are permitted, viz., (1) Raw Silk, (2) Man-made fibre or synthetic yarn, (3) Coal-tar dyes and chemicals as permitted under the Red Book, Machinery parts and equipment and spare parts and accessories as may be approved by the Textile Commissioner.

With effect from 2nd January 1965, the Central Silk Board introduced two new schemes viz., Quality Inspection of Tasar Silk Fabrics and Stamping of "Centrosilk" Certification Trade Mark for pure silk fabrics. The former is compulsory. The tasar fabrics to be exported from the year 1965 will have to conform to minimum specifications prescribed with a view to ensuring a sound foundation for export trade in tasar fabrics. The latter one is purely voluntary. The main object of the scheme is to counter the unhealthy tendency of passing cheap substitute as pure silk, with a view to creating confidence in overseas buyers. The response to this scheme has been quite encouraging.

The export of pure silk fabrics has been steadily increasing in the non-traditional markets of Europe and America. Each year pure silk fabrics worth approximately Rs. 21 million are exported to over 50 countries of the world. The exports include sarees, brocades, scarves and piece-goods. Pure silk worth Rs. 138·51 lakhs was exported during 1964 as against exports of Rs. 151·82 lakhs during 1963. The export of tasar fabrics has risen remarkably particularly to the United States—from Rs. 0·3 million in 1958 to a little over Rs. six million in 1964. In 1964, 6·41 lakh metres of tasar silk fabrics worth Rs. 84·45 lakhs were exported. The tasar fabrics are exported under the Indo-American trade agreement. In 1964, silk production was 19·43 lakh kg. as against 19 lakh kg. in 1963.

*Protection to Sericulture Industry :* The Government of India have accepted the recommendation of the Tariff Commission that protection to the sericulture industry should be continued for a further period of three years up to the 31st of December 1966 at the existing rate of protective duty.

# TEXTILE INDUSTRY

THE cotton textile industry, which is the largest single industry in the country has made rapid strides during its existence of a century. India holds the third place among the countries of the world in its capacity for yarn and cloth based on mechanical equipment and stands second on the basis of cotton consumption

In addition to providing means of livelihood for nearly 10 million handloom weavers, the mill industry provides direct employment to nearly 900,000 workers.

The total number of mills in the country in January 1965 was 517, the number of spindles installed 15·31 million, of looms 205,468. The average number of workers employed daily in all shifts was 846,833 and the consumption of raw cotton (in bales of 180 Kg. each) was 550,647.

The capital invested is estimated at Rs. 137 crores, and the annual value of the output amounts to Rs. 430 crores.

Cotton fabrics of about 4,653 million metres were produced by the mills in 1964 and 3,066 million metres by the decentralised sector comprising handlooms and power-looms.

## THIRD FIVE-YEAR PLAN

The requirements of cotton textiles at the end of the Third Plan have been calculated on the assumption that 8,450 million yards of cloth will be needed for domestic consumption and 850 million yards for export. The figure for domestic consumption provides for an increase of about 20 per cent over the estimated level of demand in 1960-61 ; in other words it allows for an annual increase of 2 per cent in population and 2 per cent in per capita consumption.

Out of the total target for cotton cloth of 9,300 million yards, 3,500 million yards have been allocated as the share of the decentralised sector (handloom, powerloom and khadi). The production target allocated to the mill sector is 5,800 million yards as against the current level of output and estimated effective capacity of about 5,000 million yards. To achieve the additional production of 800 million yards in the mill sector, it is envisaged that about 25,000 automatic looms will have to be installed during the Third Plan.

On the basis of a cloth production target of 9,300 million yards, and taking into account also the yarn required for purposes other than cloth weaving, *e.g.* hosiery and newar, the yarn production target has been fixed at 2,250 million lb. To reach this target of 2,250 million lb. of yarn it will be necessary to increase the active spindleage of the mills to about 16·5 million as compared to 12·7 million at the end of the Second Plan. The addition that may be secured through the activisation of idle spindles as a result of modernisation programmes will ultimately determine the number of spindles required to be installed through new units and expansions. Out of the additional capacity for spindles and looms envisaged for installation during the Third Plan, it is proposed that a substantial proportion of the additional loomage shall be export-oriented.

### Automatic Looms

In December 1961, the Government of India announced its decision to license 10,000 automatic looms in units of 500 looms each as part of the programme for expanding the cotton textile industry during the Third Five-Year Plan period. The matching spindlage for a weaving unit of 500 looms was 25,000 spindles and the licences would be granted only to those who had surplus spinning capacity in any existing mill or who could secure their quota from the new spindles allotted to the States

Licences will be issued subject to a condition that 75 per cent of the cloth produced should be compulsorily exported. Bonds will have to be executed and bank guarantees have to be given for the fulfilment of the condition. The mills having automatic looms are expected to export at least 30 per cent of cloth produced on these looms. If the export performance falls short of this requirement, the mills are required to pay automatic loom surcharge to a certain extent.

The spinning mills are now permitted to instal upto 300 looms without any export obligation, subject to the discretion of the Textile Commissioner.

The estimated cost of 4 million spindles and 25,000 automatic looms—the additional equipment that is proposed to be acquired during the five-year period of the Third Plan—is Rs. 120 crores.

The following table gives details about the distribution of mills in India as in January 1965.

| State | No. of Mills in existence | Spindles installed | Looms installed | Average No. of workers employed daily in all shifts | Consumption of raw cotton (In bales of 180 kg.) |
|---|---|---|---|---|---|
| Andhra Pradesh .. .. | 19 | 2,89,152 | 1,235 | 14,596 | 13,764 |
| Assam .. .. .. | 2 | 22,600 | — | 1,009 | 1,020 |
| Bihar .. .. .. | 4 | 47,432 | 809 | 2,039 | 918 |
| Gujarat .. .. .. | 104 | 31,86,595 | 59,183 | 1,85,818 | 1,00,307 |
| (*a*) Ahmedabad City .. | 67 | 23,06,229 | 44,578 | 1,66,199 | 70,534 |
| (*b*) Rest of Gujarat .. | 37 | 8,80,366 | 14,605 | 49,619 | 29,773 |
| Kerala .. .. .. | 18 | 2,80,000 | 1,040 | 9,975 | 7,650 |
| Madhya Pradesh .. .. | 18 | 5,40,791 | 12,005 | 43,438 | 28,689 |

## PRODUCTION

The actual production of yarn and cloth by the mills sector is as follows :—

| Year | Yarn in 000 kg | Cloth in 000 metres | | | | | |
|---|---|---|---|---|---|---|---|
| | | Coarse | Medium B | Medium A | Fine | Superfine | Total |
| 1960.. .. | 7,87,959 | 6,44,254 | 15,89,706 | 18,97,106 | 2,09,421 | 2,75,719 | 46,16,206 |
| 1961.. .. | 8,62,294 | 7,90,162 | 15,27,564 | 19,86,345 | 1,79,325 | 2,18,046 | 47,01,442 |
| 1962.. .. | 8,59,563 | 7,60,778 | 14,03,866 | 19,46,346 | 1,96,660 | 2,52,604 | 45,60,254 |
| 1963.. .. | 8,92,574 | 8,09,750 | 13,20,991 | 18,07,914 | 2,04,257 | 2,79,945 | 44,22,857 |
| 1964.. .. | 9,64,819 | 8,68,474 | 14,75,272 | 18,07,974 | 1,95,035 | 3,06,754 | 46,53,509 |

The production of cotton yarn in million kilograms, cloth yarn in million metres, and Stock position — sold and unsold — in lakh bales from January to June 1965 are given in the following table :

| | Production | | Composite mills stock (lakh bales) | |
|---|---|---|---|---|
| | Million kilogram | Million metre | Sold | Unsold |
| January .. .. .. .. | 83 | 398 | 1·72 | 1·31 |
| February .. .. .. | 77 | 373 | 1·58 | 1·45 |
| March .. .. .. .. | 80 | 391 | 1·77 | 1·69 |
| April .. .. .. .. | 80 | 392 | 1·73 | 1·75 |
| May .. .. .. .. | 80 | 390 | 1·68 | 1·82 |
| June .. .. .. .. | 77 | 389 | 1·71 | 1·83 |

The total production of mill-made cloth in January-July 1965, touched 3,000 million yards showing an increase of 69 million yards over the output of 2,931 million yards in the first seven months of last year.

The total production of yarn in the first seven months of 1965 was 1,227 million pounds compared to 1,205 million pounds in the same period of 1964.

The total production of cotton cloth by all the sectors in India during 1964 was about 7,720 million metres. Of this the mill sector accounted for 4,654 million metres and the decentralised sector for 3,066 million metres.

The exports of cotton textiles produced by the mills in 1964 works out to 507 million metres fetching foreign exchange to the extent of 4,929 lakhs of rupees.

In the production of mill-made cloth, Maharashtra leads other States. Maharashtra accounted for about 1,634 million metres in 1964 out of a total output of 4,654 million metres.

The production figures for different States during the year 1964 are as follows : (Figures are in million metres):

Andhra Pradesh 32 ; Bihar 1 ; Gujarat 1,377 ; Kerala 20 ; Madhya Pradesh 393 ; Madras 146 ; Maharashtra 1,634 ; Mysore 88 ; Orissa 36 ; Punjab 75 ; Rajasthan 60 ; Uttar Pradesh 330 ; West Bengal 251 ; Delhi 162 ; Pondicherry 48 ; Total 4,654.

During 1964 the cotton consumption by mills was 62.37 lakh bales of 180 kg. each of which, Indian cotton accounted for 55·99 lakh bales and foreign cotton for 6.38 lakh bales.

The production of yarn during the year 1964 was 965 million kg.

Unsold stock of cloth with the mills at the end of 1964 was 224 million metres equivalent to about ten days production. The stock shows a rise from the level of 186 million metres at the end of 1963.

*Licensing :* As a part of the expansion programme of the cotton textile industry during the Third Plan Period, it has been decided to license the installation of 25,000 automatic looms. A start has been made with licensing 10,000 automatic looms in the first instance. Licences for these automatic looms were to be granted subject to the following terms and conditions :

(*i*) Licences were to be given in unit of 500 automatic looms each and only to those parties who have matching spinning capacity of 25,000 spindles.

(*ii*) The mills must accept an export obligation comprising 75 per cent of cloth.

(*iii*) The licensee shall be under an obligation to pay a penalty on shortfall in the export performance, which will be calculated at the rate of 10 P. per yard.

A press-note inviting applications was issued and applications received in response to it have been scrutinised. So far 15 allocations of 500 automatic looms each have been finalised for a total of 7.500 automatic looms in consultation with the State Governments. Allocation of the remaining automatic looms is under consideration.

*Third Shift Working :* The need for increased utilisation of the existing installed capacity as a means of ensuring greater production has been repeatedly impressed on the industry and it is somewhat gratifying that there has been a slow but steady increase in the number of spindles and looms worked in the second as well as in the third shifts. The daily average number of spindles worked in each of the 3 shifts during 1961 to 1964 are as shown in the table given below.

(In million)

| | 1st Shift | 2nd Shift | 3rd Shift |
|---|---|---|---|
| 1961 .. | 12·0 | 11·8 | 5·9 |
| 1962 .. | 12·4 | 12·2 | 8·0 |
| 1963 .. | 12·6 | 12·5 | 8·7 |
| 1964 .. | 13·2 | 13·2 | 10·1 |

So far as looms are concerned the shift-wise working is given in the table below :

Daily average number of looms worked in

| | 1st Shift | 2nd Shift | 3rd Shift |
|---|---|---|---|
| 1961 .. | 1,81,765 | 1,76,365 | 51,286 |
| 1962 .. | 1,80,429 | 1,75,021 | 51,906 |
| 1963 .. | 1,78,854 | 1,73,815 | 51,488 |
| 1964 .. | 1,85,108 | 1,80,885 | 61,859 |

A target of 78 lakh bales of cotton production under the 3rd Five Year Plan was recommended by the Cotton Forecast Sub-Committee of the Indian Central Cotton Committee.

## TEXTILE ENQUIRY COMMITTEE

The Report of the Committee was unanimous. It was signed on 15th July 1958 and submitted to the Government thereafter.

The composition of the Committee, the report as well as Government reaction are summarized in the 1959-60 edition of the Directory.

## N.I.D.C.'s WORKING GROUP FOR THE COTTON TEXTILE INDUSTRY

Several important proposals of the National Industrial Development Corporation's Working Group for the cotton textile industry, including the one calling for a "minimum level of modernisation of the industry," have been accepted by the Government, according to a resolution presented to Parliament on March 29, 1961.

The other proposals accepted by the Government include the establishment of five new units for the production of quality cloth for export; the setting up of a suitable machinery to help resolve problems of rationalisation and compulsory scrapping of units where "rehabilitation is not worth-while."

Headed by the then Textile Commissioner, Mr. D. S. Joshi, the Working Group, set up in August, 1959, by the N.I.D.C., comprised Mr. K. Thakersey, Mr. G. D. Somani, Mr. K. Sreenivasan, Mr. S. R. Vasavada, Mr. Ram Ratan Gupta, Mr. Trilokinath Sharma, Mr. N. Majumdar and Mr. K. R. Aravamuthan.

The cost of modernisation and rehabilitation in the textile industry in India is estimated to be about Rs. 180 crores according to the Working Group.

## CENTRAL WAGE BOARD

The first Central Wage Board for the cotton textile industry was set up in 1957 with Mr. Feroze Jeejeebhoy as Chairman.

The Government of India has appointed in August 1964, a second wage board for textile industry to consider further revision of the wage structure with headquarters in Hyderabad.

While making its recommendations, the Second Wage Board shall keep in view the following: (1) the recommendations of the First Wage Board ; (2) the principles of fair wages as set forth in report of the Committee on Fair Wages ; (3) the needs of the industry in a developing economy including the need for maintaining and promoting exports, (4) the various elements of labour costs (excepting bonus) apart from wages ; (5) the requirements of social justice ; (6) the need for adjusting wage differentials in such a manner as to provide incentive to workers for advancing their skill ; and (7) the desirability of extending the system of payment by results. In applying the system of payment by results, the Board shall keep in view the need for fixing a minimum (fall-back wage) and also to safeguard against over work and undue speed. The Board shall also consider the demands for the introduction of a gratuity scheme on an industry-wise basis.

The Board consists of : *Chairman :* K. Bhimasankaran ; *Members :* D. C. Kothari, Surottam P. Hatheesing (representing employers) ; G. Ramanujam, A. N. Buch (representing employees) ; Tulsidas Jadhav, M.P., and Prof. M. B. Desai (independent members).

The Government of India appointed a 30-member Committee in Aug. 1964 to ensure the quality of textiles and textile machinery produced in the country. The Committee, which is known as the Textiles Committee,* has been given wide statutory powers. Mr. R. G. Saraiya is the Chairman and the Textile Commissioner Vice-Chairman.

## COTTON

The statistical position of cotton in India during the season 1963-64 is summed up in the following table :—

(In lakh bales)

| | |
|---|---|
| Stocks carried over from the previous year .. .. | 15·88 |
| Actual production .. .. | 54·93 (Bales of 392 kg.) |
| Total import .. .. .. | 6·48 (180 kg.) |
| Total consumption :— | |
| Indian .. .. .. | 54·75 (180 kg.) |
| Foreign .. .. .. | 6·07 (180 kg.) |
| Total export .. .. | 2·75 (180 kg.) |

## HANDLOOM CLOTH

(*See under "Cottage Industries"*).

## AMBAR CHARKHA

(*See under "Cottage Industries"*).

## IMPORTS AND EXPORTS

The following table gives the sea-borne export trend of all cloth :—

| Year | Twist and Yarn | | Cloth | |
|---|---|---|---|---|
| | Million lbs. | Rs. in crores | Million yds. | Rs. in crores |
| 1958 (Jan. to Dec.) .. | 31·61 | 5·80 | 581·0 | 40·00 |
| 1959 ( Do. ) .. .. | 24·32 | 4·37 | 850·8 | 59·00 |
| 1960 ( Do. ) .. .. | 14·20 | 3·70 | 604·83 | 54·70 |
| 1961 ( Do. ) .. .. | 15·00 | 3·73 | 575·00 | 46·17 |
| 1962 ( Do. ) .. .. | 23·00 | 5·30 | 508·36 | 39·96 |
| 1963 ( Do. ) .. .. | 30·00 | 6·20 | 531·15 | 41·02 |
| 1964 ( Do. ) .. .. | 27·00 | 5·84 | 554·00 | 49·30 |

## EXPORT

There has been a continuous decline in our exports of cotton textiles. In fact, exports during 1962 were the lowest during the last ten years. The Cotton Textiles Consultative Board, at its meeting held on May 15, 1962 recommended that every mill should undertake to export 12½ per cent of its turnover of cloth and 3 per cent of the turnover of yarn with reference to the balance sheet of any year which ends on a date between June 30, 1961 and June 29, 1962. It also recommended that in order to ensure compliance, the Indian cotton and foreign cotton quotas of each mill should be reduced by 12½ per cent, such reduced quantity to be allocated to the mills only after their executing an appropriate export performance guarantee. This voluntary export obligation was accepted by the mill industry and the Indian Cotton Mills Federation has already taken steps towards implemenfting this decision. It is interesting to note that the export during 1963 aggregated 531 m. yards as against 551 m. yards in 1964 estimated.

Although all possible efforts are being made to boost our exports, we have to face many practical difficulties particularly as a result of the keen competition in the foreign markets from textile-producing countries like Japan and China. The import policies of foreign countries have also

* Upto the time of going to press (Nov. 1965) the Committee had not submitted its report.

become more and more restrictive. Until recently our exports have been mostly of coarse and medium varieties and the markets for these are somewhat limited. In spite of these discouraging factors, cotton textiles will continue to be one of our major foreign exchange earners and efforts to increase exports will continue to be made during the Third Plan period. As already indicated a decision has already been taken to license 25,000 automatic looms during the 3rd Five-Year Plan each allotment being for 500 looms with a definite export obligation. The intention is to equip these mills with the latest machinery and thus enable them to cater primarily for the export market.

### Export Promotion

*Export :* With a view to promoting the export of cotton textiles from India and in order to enable the mills, exporters, etc. to offer their goods at more competitive prices in the international markets, the exports incentive scheme for cotton textiles was introduced in October 1958.

The cotton textiles export incentive scheme envisages the offering of incentives by way of utilisation of certain portion of the export earnings of the manufacturing mills, exporters, printers, processors who export cloth and yarn etc., for the import of chemicals, dyes, wool tops, textile machinery and cotton. The import entitlement for dyes and chemicals is granted to all the categories *i.e.* manufacturers, exporters, processors, but import licences for machinery and cotton are granted only to the mills. The entitlements of cotton which are granted to exporters against export of readymade garments, hosiery fabrics and non-fabrics items, are to be surrendered to the Textile Commissioner on terms and conditions decided upon by him. Against the export of cloth, the incentives would vary according to the price per sq. metre of cloth exported.

Exports of cotton textiles to Afghanistan and other rupee payment countries are also covered by the cotton textiles export incentive scheme. It may be noted in this connection that imports under incentive licences may only be made from countries having special arrangement for payment in rupees. An exception to this is allowed in case of import of raw cotton and textile machinery which will be permitted either from rupee payment countries or from any other available source. Cotton textile exports which were worth Rs. 40 crores in 1962 increased to Rs. 48 crores in 1964.

*Cotton Textiles Export Promotion Council :* The Cotton Textiles Export Promotion Council is an autonomous body incorporated under the Companies Act. The Council is a non-profit making organisation and was set up in 1954 for the promotion of exports of mill-made cotton yarn and piece-goods, cotton manufactures and all hosiery and ready-made garments.

## EXCISE DUTIES

The existing rates of Excise Duty and other levies on mill-made cloth and yarn are as follows :

| Category | Excise Duty | Handloom Cess | Addl. Excise Duty | Yarn Compounded Duty | Total |
|---|---|---|---|---|---|
| | (Rates in P. per square metre) | | | | |
| Coarse | 1·0 | 1·9 | 3·6 | 2·2 | 8·7 |
| Lower Medium | 3·0 | 1·9 | 4·8 | 4·4 | 14·1 |
| Higher Medium | 5·0 | 1·9 | 4·8 | 5·5 | 17·2 |
| Fine | 16·0 | 1·9 | 9·6 | 7·2 | 34·7 |
| Superfine | 22·0 | 1·9 | 15·5 | 8·4 | 47·8 |
| Cotton Fabrics not otherwise specified | 44·5 | 1·9 | 15·5 | — | 63·2 |
| | (Rates in P. per kilogram) | | | | |
| Coarse Fents | 11.0 | — | 4·4 | 16·5 | 31·9 |
| Medium Fents | 11·0 | — | 4·4 | 33·0 | 48·4 |
| Fine Fents | 66·1 | — | 22·0 | 54·0 | 142·1 |
| Superfine Fents | 66.1 | — | 22·0 | 72·0 | 160·1 |

Processing Surcharges to be added to the above in appropriate cases.

| | |
|---|---|
| Bleached, Dyed or Printed | 5 P. to 10 P. per sq. metre |
| Mercerised or/and water proofed | 10 P. to 20 P. per sq. metre |
| Shrink-proofed or/and organdie processed or processed in any other manner | 20 P. to 30 P. per sq. metre |

In addition, there are additional excise duties levied as under : *Dhoties Additional Excise Duty (Penal Excise Duty):* The duty is leviable on the quantity of dhoties issued out of any mill or group of mills during any quarter, which is in excess of the permissible quota of that quarter. The rates of duty are as under :—

| | | |
|---|---|---|
| (*a*) Quantity which exceeds the permissible quota by less than | 12½% | at 14 P. per linear metre |
| (*b*) Quantity which exceeds the permissible quota by less than | 12½% & upto 25% | at 21 P. per linear metre |
| (*c*) Quantity which exceeds the permissible quota by less than | 25% & upto 50% | at 27 P. per linear metre |
| (*d*) Quantity which exceeds the permissible quota by less than | 50% | at 55 P. per linear metre |

## FIVE-YEAR PLANS

The following table summarises the programme of development of the whole industry as approved by the Planning Commission for the Five-Year Plans :—

| | Unit | 1952-53 | 1955-56 | 1960-61 | 1965-66 |
|---|---|---|---|---|---|
| *Rated Capacity of Mill industry* | | | | | |
| Spindles | No. | 11,175,283 | 12,051,299 | 13,621,209 | 17,621,209** |
| Yarn | m. lb. | 1,704·2 | 1,840 | 2,080 | 2,250 |
| Looms | No. | 195,849 | 202,901 | 2,20,901†† | 245,901* |
| Cloth | m. yd. | 4,778·7 | 4,950 | 5,444 | 5,800 |
| *Actual Output—* | | | | | |
| Yarn | m. lb. | 1,510 | 1,680 | 1,650 | — |
| Mill Cloth | m. yd. | 4,600 | 5,094 | 5,444 | — |
| Handloom Cloth | ,, | 1,300 | 1,753 | 3,000 to 3,500 | — |
| *Exports—* | | | | | |
| Yarn | m. lb. | — | — | — | — |
| Cloth | m. yd. | 1,000 | 873 | 1,000 | 850 |
| *Cotton Needed—* | m. bales | 4.5 | 4.9 | 6·1 | 7·0† |

* 25,000 automatic looms have been sanctioned for the Third Plan period.
† For cotton mills' consumption alone.
†† Including 18,000 automatic looms.
** While four million additional spindles have been sanctioned for the Third Plan, licences for three million spindles have been given for immediate release. The question of the balance of one million spindles was expected to be considered in the third year of the Plan.

# SHIPPING COMPANIES AND AIRWAYS

## SHIPPING COMPANIES

### AMERICAN EXPORT ISBRANDTSEN LINES INC. NEW YORK

*Agents :*—Lionel Edwards Ltd., 41, Nicol Road, B. Estate, Bombay ; Peirce Leslie & Co., Ltd., Beach Road, Alleppey ; Peirce Leslie & Co., Ltd., Ballard Road, Cochin ; Peirce Leslie (C) & Co., Ltd., Bunder Road, Mangalore ; Peirce Leslie & Co., Ltd., Kozhikode ; Peirce Leslie & Co., Ltd., Quilon ; The Bombay Co. # IRRIGATION

THE net area under irrigation in India during 1959-60 was 58·7 million acres and the gross area 67·7 million acres. The net sown area during 1959-60 was 326·99 million acres. The percentage of net irrigated area to the net sown area in the entire country was 18. This is the second largest irrigated area in any country of the world, the largest being in China.

The total capacity of India's canals is over 220,000 cusecs, and the canals are over 67,500 miles in length.

The total amount of annual flow of water in the Indian Union is 1,356 million acre feet. Of this only 76 million acre feet or 5·6 per cent are at present being used for irrigation purposes.

Rainfall in the country is as already mentioned unequal and in many areas uncertain. The distribution is as follows:

| Range | (in million acres) | Percentage |
|---|---|---|
| Area between 0–30 inches .. .. | 237·6 | 29·6 |
| Area between 30–50 inches .. .. | 339·2 | 42·0 |
| Area between 50–75 inches .. .. | 143·9 | 17·8 |
| 75 inches and above .. | 85·6 | 10·6 |
| Total area .. .. | 806·3 | 100·0 |

The annual rainfall varies from 5" (in parts of Rajasthan) to over 100" in the west coast areas. Most of it, however occurs during the four months of June-September, when many rivers are often in spate. On the other hand, about 30 per cent of the area gets less than 30" rainfall a year, necessitating irrigation measures.

The country can be broadly divided according to the rainfall into two zones of certain and uncertain rainfall. Generally speaking, rainfall is certain in Assam, Bengal, Konkan and Malabar and in the Narbada Valley. It is uncertain in large areas of Andhra, Maharashtra, Gujarat, Madras, Mysore, Orissa, Punjab, Rajasthan and Uttar Pradesh.

The total water resources of Indian rivers in terms of annual flow is estimated at 1,356 million acre feet of water, distributed as follows:—

1. Rivers (excluding the Indus system) falling into the Arabian Sea, 251·5; 2. Rivers (excluding Ganga and Brahmaputra systems) falling into the Bay of Bengal, 334·0; 3. Indus basin in India, 64·4; 4. Ganga System, 397·1; 5. Brahmaputra System, 309·0.

The total run off is about 1·87 million cubic ft. throughout the year.

The utilisation is given below:— (mln. acre ft.)

| System | Estimated average flow | UTILISATION upto 1951 | Addl. in 1st FYP. | Addl. in 2nd FYP. |
|---|---|---|---|---|
| Indus .. .. .. .. .. | 168 | 8·0 | 11 | 1·2 |
| Ganges .. .. .. .. .. | 400 | 38·0 | 21·5 | 14·5 |
| Brahmaputra .. .. .. .. | 300 | 2·3 | .. | .. |
| Mahanadi .. .. .. .. .. | 84 | 3·1 | 10·5 | 0·2 |
| Godavari .. .. .. .. .. | 84 | 12·0 | 1·0 | 1·5 |
| Krishna .. .. .. .. .. | 50 | 9·0 | 15·6 | 2·6 |
| Cauvery .. .. .. .. .. | 12 | 8·0 | 1·3 | 0·6 |
| Narbada .. .. .. .. .. | 32 | 0·2 | .. | 10·1 |
| Tapti .. .. .. .. .. | 17 | 0·2 | 0·7 | 3·5 |

Out of the water resources of 1,356 million acre feet, about 450 million acre feet are utilisable. About 88 million acres (6·5 per cent of total and 19·5 per cent of usable) were utilised by 1951. In the First and Second Five-Year Plans 11 and 13 per cent of the total water respectively were to be used. By the end of the Second Plan, about 120 mil. acre ft. (about 27 per cent of usable flow or 8·9 per cent of total annual flow) was utilised. An additional 40 mil. acres flow, bringing the proportion to about 36 per cent of the usable flow are likely to be used in Third Plan.

The latest available figures show that the irrigated area in the country is 70·0 million acres.

The total investment in irrigation and power projects during the First Plan was of the order of Rs. 615 crores.

The revised allocation under the Second Plan for irrigation and power was Rs. 860 crores (Centre 72 and States 788) and for minor irrigation Rs. 96 crores (Centre 3 and States 93).

The estimated cost of the multi-purpose, large and medium projects included in the 1st and 2nd Plans was Rs. 1,330 crores.

By the end of 1961, 202 Plan projects (6 major, 196 medium) had been completed.

The major and medium irrigation projects taken up in the 1st and 2nd Plan periods on completion and on full development would irrigate about 38·51 million acres and at the end of the 3rd Plan it is expected that 45·5 million acres would be brought under irrigation.

During Third Plan additional irrigation potential of about 13·8 mil. acres will be created from continuing schemes and 2·4 mil. acres from new schemes, totalling 16·2 mil. acres. The total utilisation in Third Plan is, however, expected to be 12·8 mil. acres (gross). The cost of irrigation and flood control programme during Third Plan is Rs. 6,610 million including Rs. 4,360 million for irrigation projects carried over from Second Plan, Rs. 1,640 million for new projects, Rs. 610 million for flood control, drainage, waterlogs and erosion etc.

Additional food production expected through major and minor irrigation works was as follows:

(In million tons):

First Plan: 2·01 and 2·88 respectively.

Second Plan: 3 and 1·9 respectively.

The programme for irrigation in the Third Plan involves an estimated outlay of Rs. 5,993·4 million. The outlay on flood control, drainage, anti-waterlogging and sea erosion measures will be Rs. 613·2 million. Out of this by the end of 1963-64 about Rs. 2,910·0 million have been utilised for irrigation against the Plan provision, i.e. about 49 per cent of the outlay is likely to be utilised in the first 3 years of the Third Plan. In the case of flood control the outlay during the same period (of 3 years of the Third Plan) is estimated at Rs. 460 million, *i.e.* 74 per cent of the Plan outlay.

It was estimated that by the end of the Third Plan an irrigation potential of 29·47 million acres (gross) could be created. The expectation is only 23·16 million acres with an anticipated shortfall of 6·31 million acres including 1·11 million acres shortfall carried forward from the Second Plan.

Major and medium irrigation schemes undertaken since First Plan have created a potential of 12·81 million acres upto the end of March 1962. The corresponding utilisation upto March 1963 was 10·60 million acres *i.e.* about 80 per cent of the potential.

## UTILISATION OF IRRIGATION POTENTIAL

The area irrigated from all sources at the beginning of the First Five Year Plan (1950–51) was 51·5 million acres, of which about 22 million acres were irrigated by major and medium irrigation projects. From major and medium irrigation projects an additional area of about 9·15 million acres was brought under irrigation during the First and Second Plan periods. About 13 million acres more are expected to receive irrigation during the Third Plan period. The pace of development of irrigation as compared to the creation of irrigation potentials may be seen from the table below:

| To end of | Potentiality | Utilisation (Million acres) | Percentage utilisation |
|---|---|---|---|
| 1955–56 (1st Plan period) .. | 0·4 | 3·00 | 46·9 |
| 1960–61 (2nd Plan period) .. | 12·56 | 8·79 | 70·0 |
| 1961–62 (1st year of the IIIrd Plan) .. | 13·63 | 9·68 | 71·0 |
| 1962–63 (2nd year of the IIIrd Plan) .. | 15·28 | 11·07 | 72·4 |

(In million acres)

| | First Plan | Second Plan | Third Plan |
|---|---|---|---|
| Potentiality .. | 6·5 | 11·6 | 19·64 |
| Utilisation .. | 3·1 | 7·9 | 15·41 |

Net area irrigated by categories of projects and benefits from them are tabulated at the beginning of F. Y. Plans I, II & III below.

(In million acres)

| Plan period | Major & Medium Projects | Minor Irrigation | Total |
|---|---|---|---|
| 1950–51 .. .. | 22·0 | 29·5 | 51·5 |
| 1955–56 .. .. | 24·9 | 31·3 | 56·2 |
| 1960–61 .. .. | 31·0 | 39·0 | 70·0 |
| 1965–66 .. .. (Target) | 42·5 | 47·5 | 90·0 |

IRRIGATION POTENTIAL REMAINING UNUSED

(In million acres)

| End of | Potentiality | Utilised | Unused. |
|---|---|---|---|
| 1955-56 .. .. | 6·5 | 3·1 | 3·4 |
| 1960-61 .. .. | 12·1 | 8·6 | 3·5 |

## THE PROJECTS

The following projects continued from the First Plan period.

Bhakra-Nangal (Punjab and Rajasthan), Damodar Valley (West Bengal and Bihar) Hirakud (Orissa), Chambal (Rajasthan and Madhya Pradesh), Tungabhadra (Andhra and Mysore), Mayurakshi (West Bengal), Bhadra (Mysore), Kosi (Bihar), Nagarjunasagar (Andhra), Kakrapara (Gujarat).

The following are the new projects :

*Andhra*—Vamsadhara and Pochampad; *Bihar*—Gandak and Sone Barrage Project; *Gujarat*—Ukal, Narmada, Bhadar, Mahi, Broach; *Jammu and Kashmir* — Lidder Canal; *Kerala*—Bhoothathankethu, Ikhidi Hydro-Electric; *Madhya Pradesh*—Tawa, Chandakeshar, Barna or Kolar, Upper Keri; *Madras*—New Kattalai, Parambikulam, Aliyar; *Maharashtra*—Vir, Mula, Girna; *Mysore*—Ghatprabha II, Kabini, Laxman Thirtha Upperkrishna, Malaprabha; *Orissa*—Salandi, Hirakhud and Mahanadi Delta; *Punjab*—Beas, Gurgaon Canal; *Pondicherry (also Madras)*—Vidur; *Rajasthan*—Banas; *U.P.*—Sarda Sagar II, Ramganga, Matatila; *West Bengal*—Kangsabati.

# MINOR IRRIGATION

Minor irrigation works are works that can be conceived and handled to a large extent by the local people themselves, and individually cost Rs. 10 lakhs or less.

Works like wells, pumping sets, Persian wheels are executed entirely by individual cultivators. Many other works like tanks, anicuts, and channels benefiting groups of cultivators are also executed by the cultivators themselves on a cooperative basis. Financial assistance from Government, mostly in the form of loan, is given for both categories of these works. Subsidy, subject to a maximum of 25 per cent of the total cost, is also given to encourage construction particularly in backward and unproven areas.

Minor irrigation schemes which require some specialised technical knowledge in surveys and execution are handled by the Departments concerned of the States. State Governments levy irrigation rates or cess on the areas benefited.

Minor irrigation schemes include construction of open wells, tanks and minor drainage schemes; embankments which are important from the point of view of food production and checking intrusion of salt water in coastal areas; restoration of old tanks, stream diversion schemes; and installation of pumping appliances and improvement of water supply from wells and storage dams. There are also such works as construction of kuhls in hilly areas, filter points in coastal alluvium and installation of improved lift appliances, Persian wheels and pumping sets on wells. Tubewells also form part of minor irrigation works.

During the First Five-Year Plan 9·5 million acres were reported to have been brought under minor irrigation against a target of 11·2 millions.

The target for increased food production was 2·38 million tons.

During the First Plan period the Government of India spent Rs. 46·52 crores as loans and Rs. 8·25 crores as subsidy for minor irrigation, in addition to Rs. 19 crores for tubewells and Rs. 7·34 crores on minor irrigation in Community Development and N.E.S. blocks.

The Second Plan achievement was as follows :—

| Item | Newly constructed/ installed. | Repaired/ Renovated. |
|---|---|---|
| 1. Tanks .. .. | .. | .. |
| 2. Wells .. .. | 2,00,000 | 40,000 |
| 3. Tubewells .. | 300 | .. |
| 4. Other works .. | .. | .. |
| 5. Persian Wheels, Rahats etc. (installed) .. .. | 20,000 | .. |
| 6. Pumps on rivers and channels installed .. .. | 50,000 | .. |

The target for the 2nd Five Year Plan was 9 million acres. The additional foodgrain production envisaged was 1·9 million tons. The target for the Second Five Year Plan as a whole was expected to be exceeded. The target for the Third Five Year Plan is tentatively fixed at 14·78 million acres. The entire allocation of Rs. 137 crores would also be fully utilized.

The allocation for minor irrigation was Rs. 92 crores. The rest of the provision of Rs. 45 crores was under the Community Development Programme.

The target for increased food grains was 1·9 million tons.

According to estimates an additional area of 1·7 million acres was likely to receive irrigation benefits during 1961-62, while the programme for 1962–63 envisaged the creation of irrigation potential of over 2·1 million acres. To achieve the target of Third Plan three regional minor irrigation conferences (comprising Southern, Northern and Western regions) were held in Oct. 1961. The conference recommended among others (1) need for surveys, (2) unified agency to deal with technical aspects and applied research on technique of minor irrigation and water use, (3) maintenance of Community Works through Panchayats. (4) need for the savings under agricultural production sector to be diverted to this programme and additional finance to be provided and (5) fuller utilisation of the already available irrigation facilities and maintenance of the existing ones.

Minor irrigation is one of the large investment programmes in the Third Plan accounting for about Rs. 300 crores.

As compared with the outlay of Rs. 50 crores in 1963-64 an outlay of Rs. 65 crores had been provided for minor irrigation during 1964-65. Against the Third Plan target of 12·8 million acres (Second Plan target: 9·0 million acres) the area benefited through minor irrigation works during the three years of the Third Plan was about 6·4 million acres. The achievement during 1964-65 was expected to be about 3·3 million acres making a total of 9·7 million acres.

Actual expenditure on minor irrigation during the first four years of the Third Plan is estimated to be Rs. 184 crores, against the total of Rs. 244·76 crores under the grow more food, cooperative and community development sectors.

The physical achievement assessed was about 9·7 million acres under grow more food and community development combined. The target for 1965-66 is 3·8 million acres at an expenditure of Rs. 70 crores. The achievement expected during the Third Plan was construction of, 450,000 new wells, repair of 60,000 old wells, deepening of 100,000 wells, installation of 240,000 electric and 80,000 Diesel Pump sets and 65,000 Persian wheels, 415 artesan tubewells, 12,000 private tubewells, 2,762 State tubewells and 2,500 filter point tubewells.

The target set for the Fourth Plan is to benefit 17 million acres with a combined total outlay of Rs. 771 crores. The targets tentatively placed are : sinking of 800,000 new wells, boring of 300,000 wells, deepening of 200,000 wells, installation of 500,000 electric pump sets, 175,000 diesel pump sets, and 75,000 Persian wheels. Besides, construction of 400 artesian tubewells, 50,000 private tubewells and 5,000 State tubewells and 300 filter point tubewells was envisaged.

## TANKS AND WELLS

A descriptive note on the above is given in the 1959-60 edition of this book.

Tank irrigation is very important in Andhra, Madras, Orissa and Uttar Pradesh where over 3·1, 2·0, 1·2 and 1·0 million acres respectively, are irrigated by tanks. Bengal, Mysore, Bihar, Gujarat and Maharashtra have over half a million acres under tank irrigation.

**Wells :** Wells are mainly of two types, i.e. surface or sub-surface. Unlike tanks, they can be constructed irrespective of topographical and geological limitations, provided sub-soil water is in reach.

Well irrigation commands over 5·9 million acres in Uttar Pradesh and 2·3 million in Punjab, Rajasthan, Gujarat and Maharashtra. It is also of considerable importance in Madras (where over 1 million acres are irrigated by wells), Andhra, Madhya Pradesh and Bihar.

Pumping sets of high efficiency have come into common use for water lifting and also for draining. The number of irrigation pumps in use increased from 107,355 in 1951 (*i.e.*, oil powered 82,218, and Electrically driven 25,137) to 177,034 (oil powered 122,230 and Electrically driven 54,804) by 1956. It rose 3,90,000 (230,000 by oil engines and 1,60,000 by electric pumps by 1961.

To encourage maintenance, a levy on the entire irrigable area is imposed in Madhya Pradesh, Madras, and Mysore :—

| Type | Cost per acre in Rs. |
|---|---|
| *a*) Lift irrigation by Mote (Leather Bucket) .. .. .. .. | 60·0 |
| *b*) Pump irrigation .. .. | 20·0 |
| *c*) Tubewell (per acre inch) .. | 1·8 |

### Tubewells

The tubewell programme included in the Third Plan provides for the construction of about 2,400 tubewells. As against the target of drilling 739 tubewells in 1961-62, only about 482 tubewells were completed with pumping sets upto March 1962.

By the end of Second Five Year Plan, the exploratory tubewell organisation drilled 379 bore-holes in 15 different States to assess the ground water potential. The number of bore-holes expected to be drilled during Third Plan period is 300 of which 120 at least will be successful. In this programme the hitherto untouched Bhabar Zone which extends all along the foot-hills of Himalayas from Jammu and Kashmir to Assam will also be tackled.

During the period 1961-64 the exploratory tubewell organisation drilled 188 bores out of which 64 proved successful. In addition 237 productive tubewells were constructed during the same period. The programme had to be curtailed and reorientated in 1964-65 as the organisation had to assist the Rajasthan Govt. in the construction of 250 tubewells in scarcity areas as a measure of famine relief by providing irrigation facilities. Drilling has been completed in 54 sites in Rajasthan of which 39 were successful. The organisation also drilled 38 productive tubewells in Gujarat (scarcity areas) of which 31 were successful and 40 in Bihar of which 39 were successful upto Dec. 1964.

Irrigation with these tubewells has developed satisfactorily and in most cases 75 per cent of

the potential has been utilised by the third year of operation.

In Uttar Pradesh alone the total value of increased agricultural production was worth over 45 crores of rupees in the years 1954-55 to 1956-57.

A tubewell irrigates about 400 acres while a surface well barely 5 acres. The capital cost of a tubewell is from Rs. 150 to Rs. 200 per acre as against Rs. 300 per acre for a surface well.

It is also particularly well-suited to areas of small holdings where the construction of wells raises difficult problems of finance.

## FLOOD CONTROL AND SOIL CONSERVATION

During 1964, flood recurred in various parts of Assam, Bihar, Rajasthan, U.P. and West Bengal due to river spate and in some parts of Andhra, Delhi and Punjab due to heavy rains. It affected an area of 4·68 mill. hectares (11·7 million acres) and 28,500 villages. Crops were damaged over an area of 2 million hectares (5·00 mill. acres) causing a loss of about Rs. 410 million, 0·241 million houses were damaged or destroyed and it took a toll of 639 human life and 3,846 heads of cattle. The total damage is estimated at about Rs. 480 million.

During the first two Plans loans and grants amounting to Rs. 553·3 million were given to the State Governments for flood control schemes. Against the original Third Five Year Plan provision of Rs. 610 million the outlay on the programme is to go up to Rs. 810 million. About 7 million acres had benefited from flood control schemes undertaken in the first two Plans and an additional 4·5 million acres are expected to be benefited in the Third Plan.

*Organisations :* 15 State Flood Control Boards assisted by their Technical Advisory Committees at the State level and four River Committees (viz. Ganga, Brahmaputra, Central India and N.-W. River Committees) are functioning in the country, their work being coordinated by the Central Flood Control Board. The Committee on Scientific Flood Forecasting set up in Dec. 1963 under Dr. K. R. Ramanathan submitted its report in Jan. 1965. Its main recommendations are : (1) Actual Flood Forecasting and Warning Board should be set up with Delhi as headquarters under the Ministry of Irrigation and Power and Flood Forecasting Centres and sub-centres should be set up at different locations in the country under the direct guidance of the Board (2) Some of the hydrological and hydrometeorological observations at different key points in each river basin should be termed as base stations, and be organised and maintained by a Central authority. (3) Important rain and river gauge stations (where observation will be of special value for flood forecasting) should be equipped with telemetring equipment and suitable instruments should be developed and manufactured in the country for the purpose. (4) Use of radar in flood forecasting should be tried and a beginning should be made with installations of two, in two catchments for measuring total precipitation falling from rain clouds. (5) A systematic attempt should be made to assemble, scrutinise and publish all post gauge, discharge and rainfall data in addition to current data.

Floods of 1964 have brought out the necessity for making studies of the affected areas for evolving suitable remedial measures :— (*a*) A committee has been set up for formulation of comprehensive plans for controlling floods in coastal areas of Andhra Pradesh in the districts of Krishna, Godavari and Guntur which are subjected to floods annually causing heavy damage to crops. (*b*) A study group has been set up for assessing the problem of erosion by Bramhaputra river in Assam and formulating remedial measures. (*c*) Committee set up for assessment of drainage problem in Gurgaon District (Punjab), Bharatpur District (Rajasthan) and other districts of U.P. and to suggest comprehensive drainage schemes (*d*) Committee set up for assessment of flood control problem in North Bihar and formulate flood control measures. (*e*) Committee set up to draw comprehensive plan for flood protection in Delhi and surrounding areas.

Since 1954 when the flood control programme was inaugurated on a coordinated basis, over 6,880 k.m. (4,300 miles) of embankments and 7,840 k.m. (4,900 miles.) of drainage channels have been constructed in different States affording protection to about four million hectares (ten million acres) of land. 80 town protection schemes have been taken up against floods/erosion and 4,300 villages have been raised above flood level. From 1954 up to March 1961 Rs. 629 million have been spent. During the Third Plan Rs. 481 million have been spent up to March 1964. During 1964-65 the expenditure was about Rs. 200·5 million. The approximate area benefited by flood control schemes completed every year is about 0·324 to 0·405 million hectares (0·8 to one million acre) on an average. The additional area to be protected at the end of the First Year of the Fourth Five Year Plan will be about one million hectares (2·5 million acres).

*Soil Erosion :* Problem of beach erosion in Kerala is serious. The outlay on the coast line protective programme of the State Government during the Third Plan will be about Rs. 43 million. American experts are studying the problem and a scheme for collection of basic data for evolution of corrective measures is being implemented. For soil conservation works in the catchments of 14 Rivers Valley projects (Kosi, Damodar Valley, Mayurakshi, Kangsabath, Hirakud, Madkud, Thungabhadra, Kamala, Ghod, Dantiwada, Bhakhra Nangal and Bhru in Jammu & Kashmir) Rs. 110 million had been provided. Out of the total catchment area of about 280,000 sq. kilometres (108,000 sq. miles) about 75,000 sq. kilometres (28,800 sq. miles) are in Nepal. Out of the rest lying in India an area of about 1,305 sq. k.m. (503 sq. miles) was covered by soil conservation measures costing Rs. 48 million during the first three years of the Third Plan.

## RIVER VALLEY PROJECTS

The major river valley projects are as follows:—

(1) Bhakra-Nangal Project, (2) Hirakud Project, (3) Damodar Valley Project, (4) Tungabhadra Project, (5) Kosi Project, (6) Chambal Project, (7) Nagarjunasagar Project, (8) Koyna Project, (9) Rihand Project, (10) Bhadra Reservoir Project, (11) Kakrapara Project, (12) Machkund Project, and (13) Mayurakshi Project.

Below we give notes on some individual projects.

**Bhadra Project (Mysore) :**—This is one of the biggest irrigation and multi-purpose projects undertaken by the State. The scheme includes the construction of a reservoir on the river Bhadra at Lakkavalli (Shimoga District) with a storage capacity of 63.035 million c.ft. to irrigate 2,44,663 acres of land in the dry taluks of Shimoga, Chitaldrug and Bellary districts and to generate electric power to the extent of 40,400 kW at the dam site. It consists of the construction of a 194 ft. high masonry dam, 1,445 ft. long. The reservoir submerges 27.802 acres and 28 villages. Two channels take off from the reservoir on each bank and the right bank channel has to be taken in a tunnel, 14,000 ft. in length, across the Ubrani Range of hills before it enters Sulekere valley which commands vast fertile lands in the talukas of Harihar and Davangere. This is perhaps the longest irrigation tunnel in India. The left bank channel has been serviced to irrigate 20,000 acres and the right bank channel 39,000 acres. The Anvery Branch channel has been serviced to irrigate 14,000 acres and Malebennur Branch channel 15,000 acres.

The tunnel works are completed.

The cost of the project is estimated at about Rs. 35·73 crores including the cost of power plant of about Rs. 380 lakhs. All works are expected to be completed by the end of Third Five Year Plan period. The project when completed will fetch an income of Rs. 101·29 lakhs from water rate and sale of power.

*Power Project :* Construction of the two power houses, erection of turbines in the left Bank Station and two river bed units were completed in 1963.

The installed capacity of the power station is 33,200 kW, comprising two units of 12,000 kW each in the river bed station, one unit of 2,000 kW in the left bank station and one unit of 7,200 kW in the right bank station. There is provision for the installation of an additional unit of 7,200 kW in the right bank station.

Work on the power project has been completed. The power generated here is mainly fed to the Mysore Iron and Steel Works at Bhadravathi and also loads on the 66 kW transmission line between the Bhadra Generating Station and Mysore.

**Bhakra-Nangal Project (Punjab) :** The Bhakra Nangal Project in Punjab is the biggest multipurpose river valley project in Asia and has the following main components :—(1) 740 feet high straight gravity concrete Dam at Bhakra, eight miles from Nangal, with two Power Houses at its base, one on each bank of the River. (2) A diversion Dam at Nangal-65 miles North of Chandigarh. (?) Forty miles long Hydel Channel from Nangal to Rupar with two low head Power Houses—Ganguwal and Kotla. (4) A widespread net work of transmission lines with series of Grid Sub-stations. (5) 108 miles of Bhakra main Canal and 2,790 miles long canal branches and distributaries spread over in two States—Punjab and Rajasthan.

The whole Project has been completed except the Right Bank Power House on which work is in full swing. The project was dedicated to the Nation by the late Prime Minister Jawaharlal Nehru on 22nd October, 1963.

The project is expected to irrigate about 10 million acres and build up an ultimate power potential of 12,04,000 kW. The States that will benefit are the Punjab, Rajasthan, Himachal Pradesh, Jammu and Kashmir and Delhi.

The Project will irrigate six mil. acres of new land and will improve 3·5 mil. acres of land already under irrigation, out of which 49,41,580 acres fall in Punjab and 9,20,000 acres in Rajasthan.

The Project started yielding rich dividend even before its completion. Irrigation started in July, 1954-55 when 9·1 lakh acres in the Punjab were irrigated. In the year 1957-58, 1958-59, 1959-60, 1960-61, 1961-62, 1962-63 and 1963-64 an area of 14·86, 17·12, 18·18, 16·70, 19·61, 23·21 and 25·59 lakh acres respectively was irrigated, as a result of which economic condition of people improved as also a considerable amount of revenue accrued to the Governments of Punjab and Rajasthan.

The total expenditure incurred till the end of Dec. 1964 was Rs. 171·61 crores against the sanctioned estimate of Rs. 175 crores. The Bhakra reservoir was filled to an elevation of 1,661·61 ft. during 1964 giving a usable storage 48·72 lakh acre feet of water.

The Nangal Dam, the Hydel Channel and the Bhakra Canal have already been completed. The first phase in the construction of Bhakra Dam to the height of 414 ft., was completed in Aug. 1958. Now the Dam is complete and has attained its final height of 740 feet above the deepest foundation. The total concrete placed was 5·4 mil. c. yds.

Of the four power houses of this Project, the Ganguwal and Kotla Power Houses, on the Nangal Hydel Channel with two generators of 24,000 kW each were commissioned in 1955 and 1956 respectively. A third generator of 29,000 kW. was added in each Power House in 1961 raising the total output of each power house to 77,000 kW.

Of the two power houses at the base of the Bhakra Dam the left power house with 5 units each of 90,000 kW. had been fully commissioned on 10th December, 1961. The electric power is

being transmitted at 2,20,000 volts—the highest voltage transmission line put up in India for the first time.

The commitments from this plant are Nangal Fertilizers : 1,60,000 kW.; Delhi : 60,000 kW.; Rajasthan : 22,000 kW.; Kashmir : 4,500 kW.

Work on the construction of Right Bank Power House is in full swing and its first generator will be commissioned in the first quarter of 1966. This Plant will have five units each of 1,20,000 kW. The power house is estimated to cost Rs. 27 crores. The ultimate installed capacity of the project will be 600 MW.

The Electricity Wing of the Bhakra Dam is in the charge of the Punjab State Electricity Board which came into being on January 31, 1959.

The increase in foodgrains as a result of the irrigation from the project is expected to be 8,50,000 tons a year. Other additional yields that will accrue from the project are : Sugarcane 15,00.000 tons, Cotton 6,00,000 bales and pulses and oilseeds 36,000 tons.

The Punjab and Rajasthan States are sharing the capital and all benefits (Power and Irrigation) in the ratio of 84·78 and 15·22 respectively.

A comprehensive agreement between Punjab and Rajasthan regarding the Bhakra Nangal Project exists.

**Damodar Valley Project (Bihar and West Bengal).**—The Damodar Valley Project which is one of the most important multi-purpose schemes in this country and is to benefit the States of Bihar and West Bengal, has as its main features the construction of (*a*) multi-purpose storage dams with hydro-electricity plants, (*b*) an irrigation project with a network of irrigation canals and distributaries measuring 1,550 miles including an 85-mile long irrigation-navigation canal, (*c*) thermal power stations and the associated transmission lines.

The ultimate benefits that will accrue from this scheme include (*a*) effective flood control of the Damodar River, (*b*) irrigation of 9,73,000 acres including 2,20,000 acres of old irrigated area in the kharif season and more than 50,000 acres in the rabi season resulting in an additional yield of rice and rabi crop and jute valued at Rs. 15 crores a year, (*c*) the generation of 9,79,000 kW of electric power, which will promote the growth of industry, lead to the electrification of railways, etc., (*d*) cheap transport facilities through the navigation canal carrying an annual traffic through the canal of coal, paddy etc. to the extent of nearly 2 million tons, (*e*) efficient drainage of about 700 sq. miles of waterlogged area in the lower valley in W. Bengal, (*f*) prevention of soil erosion by afforestation, (*g*) land reclamation and improvement, (*h*) antimalarial measures and public health promotion works, and (*i*) development of fishery, tourism, etc.

About 6·75 lakh acres of land in West Bengal have already been brought under irrigation.

Of the electric power generated 875,000 kW will be thermal and 104,000 kW will be hydro-electric.

The Bokaro Thermal Power Station was commissioned in 1953 with an installed capacity of 150,000 kW and with the completion of the fourth unit in 1960-61, it has a capacity of 225,000 kW.

The Konar Dam in the district of Hazaribagh was formally opened by the Prime Minister of India on October 15, 1955.

The Maithon Dam was opened by the Prime Minister on September 27, 1957 and the power station with all the units is in commercial operation.

The Maithon Dam, 162 feet high above the river bed, has been built on the Barakar River above its confluence with the Damodar. It consists of a main earth dam, 2,111 ft. long across the bed of the river, with concrete dam 1,189 ft. long including the spillway of 612 ft. on the diversion channel and a long stretch of earthen dykes on both the banks. The overall length of the dam is 15,892 ft.

It has an underground power station on the left bank, the installed capacity of which is 60,000 kW. The volume of water in the reservoir at design flood stage (el. 504) is 12,00,000 acre ft. and the submergence area at design flood stage (el. 504) is 28,400 acres.

The Panchet Hill Dam was inaugurated on December 6, 1959.

The Panchet dam has been built on the river Damodar about 3 miles above its confluence with the Barakar river. It consists of a main rolled earth dam, 134 ft. high, 7,215 ft. long with a gravity type concrete dam 1,215 ft. long including spillway and a long stretch of dykes on both sides. The overall length of the dam is 22,156 ft. The volume of water in the reservoir at design flood stage (el. 449) is 13,65,000 acre ft. and the submergence area at design flood stage (el. 449) is 41,200 acres.

This dam together with the other three dams provide irrigation for 9,73,000 acres of kharif and 55,000 acres of rabi crops and supply water to the industries of the region.

The Panchet Hill Power Station was put into commercial operation on Sept. 14, 1959.

This power house has an initial installed capacity of 40,000 kW.

Maithon and Panchet are the two key dams on which flood control and irrigation in the lower Damodar Valley will mainly depend.

The Durgapur Barrage was completed and was opened by the Vice-President of India on August 9, 1955. Irrigation water was made available in 1957-58. During the kharif seasons of 1961-62, 1962-63 and 1963-64 water was supplied to irrigate an area of 6·52, 6·25 and 6·39 lakh acres respectively. During 1963-64 an irrigational potential of 770,000 acres was created.

The D.V.C. power system supplied through an expanding network of transmission lines reaching right upto Calcutta 2,083 million units in 1961-62, 2,622 million units in 1962-63 and 2,804 million units in 1963-64. The beneficiaries of the D.V.C.'s power system include such well-known bodies as the Tata Iron & Steel Works, Jamshedpur, Indian Iron & Steel Company, Burnpur, the Locomotive Works, Chittaranjan, the Hindustan Cables, Calcutta Electric Supply Corporation, the Eastern Railway, the copper mines at Ghatsila and the coal fields at Jharia and Raniganj. State Electricity Boards of Bihar and West Bengal also receive bulk supply from D.V.C.

Work on the transmission system is actively in progress and upto 1964, 880 miles of 132 kV and 123 miles of 33 kV lines (excluding 8 miles sold out to Bihar State Electricity Board in April 1960) with most of their associated substations, have been completed.

In addition to the unfinished schemes carried over from the First Five Year Plan, the following additional schemes had been taken up during the Second Plan period :

(1) Expansion of the Bokaro Thermal Power Station by the addition of a 75,000 kW generating set, thus raising the ultimate capacity of generation to 225,000 kW (completed); (2) the construction of a second Thermal Power Station at Oyaria near Durgapur with an installed capacity (3 units) of 2,75,000 kW in the district of Burdwan was taken up and the station with its 2 units (capacity of 1,50,000 kW) is now under commercial operation ; (3) the construction of a third Thermal Power Station at Chandrapura in the district of Hazaribagh (Bihar) with a capacity of 375,000 kW. The first unit (1,25,000 kW) has already been commissioned. The second unit was expected to be commissioned by May 1965. (4) the necessary strengthening of the transmission system ; and (5) considerable expansion of various development works such as soil conservation, fishery and tourism.

In addition to the unfinished works carried over from the Second Five Year Plan, the following additional important schemes have been taken up for execution during the Third Five Year Plan period : (1) Extension of the Durgapur Thermal Power Station by a 1,25,000 kW Unit (in progress), (2) Extension of the Chandrapura Thermal Power Station by a 1,25,000 kW Unit (in progress), (3) Miscellaneous extension of the existing grid sub-stations and distributing lines, (4) 25 KV A.C. single phase power supply to Railways for track electrification, (5) Dam to store water for industrial and domestic purposes, (6) Extension and improvements (Barrage and Irrigation) and water courses.

First Plan outlay : Rs. 65·48 crores (excluding interest and working expenditure and receipts).

The estimated cost of the project including, the new schemes taken up during the period of the Third Five Year Plan was about Rs. 210·61 crores. The aggregate expenditure on the various projects upto the end of March 1964 worked out to about Rs. 176·08 crores.

*Budget*

Second Plan outlay : Rs. 60·00 crores.

Proposed Third Plan outlay : Rs. 83·43 crores.

Budget Estimates (1963-64) : Rs. 17,79·43 lakhs ; (1964-65) : Rs. 19,67·42 lakhs ; (1965-66) : Rs. 19,08·56 lakhs (net).

The additional supplies that will be made over in the next three years from the extensions of the capacities will be more than 2,426 million Kwh. and the demand will fully consume the capacity of the power-stations under construction at Chandrapura and Durgapur.

Power is consumed mostly by major industrial concerns, but the D.V.C. also helped considerably in urban and rural electrification.

A large number of collieries and small and medium scale industries also receive DVC power through the Distributing Licences and State Electricity Boards.

Soil Conservation Scheme of DVC includes mainly afforestation, soil survey works, soil conservation engineering, soil conservation demonstration in cultivator's fields, etc. About 70,000 acres of afforestation work have been completed upto March, 1964 (of which 16,000 acres by D.V.C. and 54,000 acres by the Govt. of Bihar).

The annual gross revenue from power during 1960-61, 1961-62, 1962-63 and 1963-64 was Rs. 7·69 crores, Rs. 10·39 crores, Rs. 13·15 crores and Rs. 15·10 crores respectively.

The D.V.C. Act was amended by an Act of Parliament on 24th Dec. 1957 in order that the Corporation may be constituted of part time members if necessary.

**Hirakud Dam Project (Orissa).**—This project is the biggest multipurpose River Valley Project on river Mahanadi which is the biggest river in Orissa State and is situated near Sambalpur. The main functions of the Project are flood control, irrigation and power. The construction of the project was taken up in two stages. The foundation (1st batch of concrete) was laid by late Sri Jawaharlal Nehru, the then Prime Minister of India, on 13th April, 1948 and the first stage of the project was inauguarated by him on 13th January, 1957. In the 1st Stage the Hirajkud Dam, Hirakud Canal system and Burla Power House were completed. The 2nd Stage of the project was started in 1957 and was inaugurated by Dr. A. N. Khosla, Governor of Orissa on 14th Sept. 1963. The Chiplima Power House was completed in the 2nd Stage.

The Hirakud Reservoir started functioning for flood control in the year 1957 and its task is to moderate all peak floods in its delta to a safe limit of 9 lakhs cusecs. The flood moderation is actually being done since 1957 and in the year 1964 the desired target of control has actually been attained.

The total culturable commandable area under Hirakud Irrigation in Sambalpur and Bolangir Districts is 3·8 lakhs of acres and the total annual irrigation potential is 6·00 lakh acres. The irrigation water was let out for the first time during September, 1956 and since then the

irrigation is gradually developing. Besides Hirakud irrigation, the Hirakud Dam Project, is also providing regulated supply for perennial irrigation of about 9 lakhs of acres in Mahanadi Delta in the districts of Cuttack and Puri.

The power is developed in two stages at Burla Power House (at the foot of the dam) and at Chiplima Power House, 16 miles down stream of the Dam. The Burla Power House has got 6 power units of total installed capacity of 198 M.W. and Chiplima Power House has 3 power units of total installed capacity of 72 M.W., the total installed capacity being 270 M.W. The first Hydro-Power Unit was commissioned in December, 1956 and the last one in September, 1963. The power potential is 120 M.W. at 100 per cent load factor. The project provides power to many industries and the rural areas of Orissa. The main industries are Aluminium at Hirakud, steel at Rourkela, Ferro Manganese at Joda, Cement at Rajgangpur, Paper at Brajarajnagar and Chowdwar, Textile at Chowdwar and many other industries.

**Mahi Scheme:** The revised estimated cost of the project has been worked out to be Rs. 417 lakhs. The scheme when completed is likely to irrigate 76,000 acres of land, against which 14,100 acres of land is expected to be irrigated by the end of the Third Plan period.

**Tungabhadra Project (Andhra, Mysore).**—This Project was originally sanctioned by the Governments of Madras and Hyderabad which had territorial jurisdiction over this area at that time, primarily as famine relief measure. Work on the Project was commenced in 1945 by the Governments of these two States.

It is now being executed by the Tungabhadra Board and the Governments of Andhra Pradesh and Mysore.

The Government of Mysore is solely in charge of the execution of the Project on the northern side of the Tungabhadra River.

On the southern side the Tungabhadra Board constituted under the directive of the President of the Indian Union, is in charge of all common works relating to Mysore State and Andhra Pradesh, and the respective States are in charge of other works in which only the concerned States are interested.

*Head Works:* The Tungabhadra Dam across the river Tungabhadra at Mallapuram in Bellary District (Mysore) is 8,006 feet long and 162 feet high at the deepest foundation and 116 feet high on an average above the river bed. The reservoir extends in an area of 146 square miles and has a capacity of nearly 3·1 million acre feet at the full reservoir level of 1633.

*Canals:* There is only one canal on the northern side. It takes off from the irrigation-cum-power sluices and is 127 miles in length. This will irrigate about 5,80,000 acres of land in Raichur District of Mysore State. The major portion of the canal has been completed. Works in respect of the remaining portion are expected to be completed by the end of 1965-66.

There are two canals on the southern side of the river—the Low Level Canal and the High Level Canal. The former is 217 miles in length and has already been completed. This canal, taking off from the right flank known as Power Canal for the first 14 miles and Low Level Canal thereafter, accommodates 2,500 cusecs of water for irrigation, feeds the canal power house at Hampi and irrigates lands thereafter in Mysore State and Andhra Pradesh. The net irrigable area under the Low Level Canal is 92,345 acres in Mysore and 1,48,725 acres in Andhra Pradesh.

The Govt. of India have sanctioned the execution of the High Level Canal in two stages. The first stage costing Rs. 13 crores has been taken up for execution and the works are in progress. They are expected to be completed by the end of 1966-67. It takes off from the High Level sluices of the dam at the right flank and will carry 2,300 cusecs of water when Stage I is completed and 4,000 cusecs of water ultimately. The length of the main canal will be about 122 miles. When the first stage of the canal is completed, it will irrigate 1,19,115 acres of land in Andhra Pradesh and 68,250 acres of land in Mysore; when the second stage is completed, an additional area of 1,32,685 acres of land will be brought under irrigation in Andhra Pradesh and similarly an additional 68,500 acres of land in Mysore.

*Hydro-Electric Scheme:* When completed the Hydro-Electric Scheme on the southern side will consist of two Power Houses with four generators in each power house, each of 9,000 kW capacity making an aggregate of 72,000 kW. The first station is near the Dam and the second at the end of the Power Canal.

The first and the second generators at the Dam power house were commissioned in January 1957 and May 1957 respectively, and the first and second generators at the Hampi Power house were commissioned in February and March 1958 respectively. The third and fourth generators at the Dam Power House were commissioned in February and June 1964 respectively. The remaining two generators at the Hampi Power House were commissioned in April and June 1964 respectively. The total installed capacity of the Tungabhadra Hydro-Electric scheme is at present 72 MW from the two power stations situated on the southern side.

On the northern side of the Project, it is proposed to have one power house near the Dam with 4 units of 9,000 kW capacity each and three more power houses on the canal. All the power houses taken together will generate 1,00,500 kW of power. The construction of power house at the Dam has been completed. Two units of 9,000 kW each have been commissioned. The third unit will be commissioned shortly. At the end of the Third Plan 27,000 kW of power will be generated against 18,000 kW of power that is being generated at present (May 1965).

*Expenditure:* The expenditure on the northern side of the river is being borne solely by the Government of Mysore.

The expenditure on the southern side for the works executed by the Tungabhadra Board, is tentatively being shared between the Governments of Andhra Pradesh and Mysore respectively in the following ratio: *Headworks and Low Level Canal* 5 : 4; *High Level Canal* 65 : 35; *Hydro-Electric Scheme* 80 : 20.

The expenditure in respect of works executed exclusively by the Governments of Andhra Pradesh and Mysore are being met by them only.

The expenditure on the development of fisheries in the Tungabhadra Reservoir is shared between the Governments of Mysore and Andhra Pradesh in the ratio of 13 : 5.

The cost of the sanctioned scheme is Rs. 90·67 crores, irrigation being Rs. 66·75 crores and power Rs. 23·92 crores.

*Benefits*: About 4·5 lakh acres of land have been brought under irrigation so far. In the same way, 99,000 kW of power is, at present, being produced and supplied to the consumers (May 1965).

The estimated cost of the entire project (northern and southern sides) when completed in all respects, is about Rs. 108 crores which ultimately add a total of about Rs. 20 crores per annum to the national wealth in the shape of food and commercial crops. It will bring 12·1 lakh acres of land under irrigation and generate 172·5 MW of power.

The programme of intensive stocking of fishes has been taken up in the reservoir. Exploitation will be done shortly by which time it is expected that the reservoir will become productive. The maximum yield of fish will be about 1,000 tons per year. For effective marketing of fishes a 5-ton capacity ice plant and a 10-ton capacity cold storage are under erection.

**Kosi Project (Bihar).**—This scheme estimated to cost Rs. 44·76 crores (since revised to Rs. Rs. 54·50 crores) was prepared by the Central Water & Power Commission in November 1953. Total expenditure on the project (old scheme) upto the end of Feb. 1965 was Rs. 54·51 crores. The kosi canal systems on the eastern and western sides of the river have been designed to provide annual irrigation to an area of about 26 lakh acres in the districts of Saharsa, Purnea, Darbhanga and Monghyr of Bihar and Saptari of Nepal.

The Project consists of three different units as follows:—

(*a*) Unit I—Kosi Barrage and Headworks: This is estimated to cost Rs. 23·62 crores. The barrage is to be constructed about 30 miles below Chatra in Nepal where the river debauches into the plains from the gorge. It consists of a main spillway 3,770 ft. long, with earth dams about 18,500 ft. long on both the flanks connected to two afflux bunds 8 miles each on either bank of the river. The functions of the barrage are (*i*) to arrest coarse silt and flatten the gradient of the river above, (*ii*) to provide for irrigation of 26·35 lakh acres and (*iii*) to develop power that is possible with the available head. (The earthquake safety factor adopted in the design of the Barrage is 0·15 g horizontal and 0·10 g vertical.)

The diversion of the river Kosi through the Kosi Barrage was successfully completed by the end of March 1963.

(*b*) Unit II—Flood Banks and Protective Measures: The estimated cost of this is Rs. 9·80 crores involving construction of 75 miles of embankment on the western side below barrage and 63 miles on the eastern side. Besides, a flood bank of 12 miles above the east afflux bund in continuation is also provided. The purpose is to restrict the flood waters between the embankments, thus preventing the usual spill, and also to stop further westward translation of the river Kosi.

(*c*) Unit III—Eastern Kosi Canal System: The canal system at an estimated cost of Rs. 21·07 crores is proposed to have an annual irrigation of 14·05 lakh acres in the districts of Purnea and Saharsa.

The system consists of a main canal, four branch canals and a number of distributaries.

A hydro-power scheme with an installed capacity of 20,000 kW is under execution and is scheduled to be completed by 1966-67. According to the agreement on the project, 50 per cent of the power to be generated has been earmarked for Nepal. Work in the civil portion was started in the later part of the last working season (1964-65) when the foundation designs were finalised.

The work on the project is being implemented by the Government of Bihar. The Central Government will render necessary technical assistance.

The eastern and western embankments have been completed and 6·5 lakh acres have been rendered flood free. 48 per cent of the earthwork involved in the construction of the embankments was done through public co-operation agencies organised by the Bharat Sewak Samaj.

The construction of the Barrage has been completed in all respects. The Kosi river has been diverted through the Barrage.

Earthwork in Kosi canals has been completed to the tune of 93 per cent (March 1965). The work of rehabilitating 304 villages having a population of 114,000 lying in between the two Kosi embankments, is in progress. A sum of Rs. 2·13 crores has been allotted for the rehabilitation of people to be shifted from villages lying in between the two flood embankments.

Figures showing the economic development in the Kosi area: The net area sown per village in Supaul, in Nirmali and in the Kosi area as a whole increased from 619·26 acres, 940·14 acres and 798·09 acres in 1954-55 to 709·02, 946·67 and 840·90 acres respectively in 1955-56. Paddy output increased from Rs. 6,106·60, Rs. 51,024·09, Rs. 28,565·35 per village in Supaul, Nirmali and in the Kosi area as a whole to Rs. 10,171·28, Rs. 109,524·03 and Rs. 59,847·65 respectively in 1955-56.

(*d*) **Chatra Canal System:** As part of India's Aid to Nepal the Chatra Canal Project has been taken up. The canal will take off at 30 miles upstream of Kosi Barrage and will irrigate annually 2·12 lakh acres in the Morang and Saptari districts of Nepal. This scheme will cost about Rs. 6·50 crores. Earth work and construction of canal structures are in progress (May 1965). This scheme, when completed, would yield an additional produce of nine lakh maunds per year valued at Rs. 85 lakhs.

Schemes to extend irrigation facilities to an area of 3·97 lakh acres between the Kosi river and the original command of Eastern Canal system has been taken up at an estimated cost of Rs. 685·75 lakhs including the cost of village channels, sixty-five per cent of the work has been completed, so far.

Excavation of branch and sub-branch canals have been taken up in full swing and structures are in progress. In Western canal work has been started. This is estimated to cost Rs. 1,967 lakhs including the cost of village channels.

Schemes to extend the Eastern and Western Kosi embankments, a length of 16 miles and 2½ miles respectively, have been taken up.

The extension of western embankment has already been completed. 90 per cent of earth work in the extension of eastern embankment has been done, rendering another 37,000 acres flood-free.

The final solution of Kosi lies in the construction of dams in the hilly reach of the river. Investigations are in progress to locate a dam near Kothar across the Kosi in Nepal, about one mile from Chatra, being put up to control the river as also to generate 10 lakh kW of hydro-electric power.

**Rihand Dam and Power House (U.P.).—** (See Under Uttar Pradesh)

**Rajasthan Canal:**
**(For details see under Rajasthan State.)**

**Nagarjunasagar Project (Andhra Pradesh).—** The project is situated near Nandikonda village in Miryalguda Taluk of Nalgonda district. The Nagarjunasagar Control Board was constituted in Oct. 1955 to give concrete shape to the project. The foundation stone of the project was laid on Dec. 10, 1955 by the then Prime Minister.

The project comprises the construction of a gravity type masonry dam—the tallest and largest masonry dam in the world—two irrigation canals on either side of the river and a power house with 8 generating units each with 50,000 kW. installed capacity. The main dam, when completed, will be 404 ft. high (ultimate stage), 360 ft. wide at the base and about a mile long. It will be flanked on either side by compacted earth dams. Each flanking dam will also be about a mile long. A 28-ft. roadway will run on the top of the dam linking the flanks over the central spillway. Eight penstocks, 16 ft. in diameter will be installed in the dam.

*First phase:* The first phase (now in execution) of the project is expected to irrigate 21·50 lakh acres, partly for paddy and sugarcane and partly for cotton, groundnut, maize, jowar and other millets. The quantity of foodgrains production anticipated is eight lakh tons per annum under the first phase of the scheme and 12 lakh tons in the ultimate phase. 45 villages in all will get submerged by the water-spread of the Nagarjunasagar reservoir and about 4,033 families displaced.

The number of persons employed is 30,000. Labour Welfare Officers have been appointed to look after the needs of the labour and assist them in securing the labour law benefits.

*Nagarjunasagar Dam:* The dam, when completed, will impound the waters of the Krishna in a 110 sq. mile man-made lake, the biggest in India and the third largest in the world. The ultimate storage capacity of the reservoir is estimated at about 9·3 million acre feet of water, thus dwarfing the Bhakra reservoir of 7·4 million acre feet of capacity.

*Nagarjunasagar Right Canal:* Under the first phase of the project (now in execution) the right canal will run to a length of 127 miles. It will take off from the right flank of the dam. The right canals will irrigate about 11·20 lakh acres, benefiting large tracts of land in Guntur, Nellore and Kurnool. In the ultimate phase, the canal will extend to a length of 276 miles.

*Nagarjunasagar left canal:* Under the first phase of the project (now in execution) the Left Main Canal will run to a length of 111 miles. It will take off from a head sluice located in the foreshore of the reservoir about 8 miles away from the main river gorge. The canal will irrigate about 8·80 lakh acres. In the ultimate stage it will extend to a length of 140 miles in Nalgonda and Khammam districts serving the needs of Miryalguda and Huzurnagar taluks of Nalgonda district, Khammam taluk of Khammam district and Nandigama, Tiruvur, Nuzvid and Gannavaram taluks of Krishna district.

The cost of the project is estimated to be Rs. 139·53 crores. The project is making steady progress. 72 per cent of the masonry and concrete has already been laid while the excavation of main canals on either side has been completed to the extent of nearly 42 per cent. The excavation of branches and distributaries is also in good progress. Schemes for development of ayacut have also been taken up for early realization of irrigation benefits.

**Chambal Project:** (For details see under Rajasthan).

**Narmada Project.**—The project estimated to cost a little over Rs. 200 crores, when completed, will generate 1,100 MW power, provide irrigation facilities to 20 lakh acres of land and reclaim seven lakh acres of the arid area of Kutch. (*For more details see under Gujarat State*).

**Tawa Project:**—The Tawa River Multi-purpose Project is located in the Hoshangabad district. The project envisages construction of a composite dam 5,315 ft. long across the Tawa river, a tributary of Narmada River. Out of a length of 5,315 ft., 1,000·5 ft. will be of masonry and 4,314·5 ft. of earth dam. The dam will have two canal systems on the right and left banks of Tawa river stretching 33 miles and 90 miles respectively. The estimated cost of the project is Rs. 27·10 crores. The project after completion is designed to irrigate 7·5 lakh (6 lakhs acres on the left and 1·5 lakh acres on the right side) acres of land and generate 20,000 kW of power at 60 per cent load factor.

**Tikkerpara Dam** (See under Orissa State).

### GANDAK PROJECT

It is one of the major projects in which India and Nepal are collaborating as neighbours. Within India, it is an inter-State project in which Bihar and Uttar Pradesh are joining hands.

When completed, the project would annually irrigate 26·52 lakh acres of land in Saran, Champaran, Muzaffarpur and Darbhanga in Bihar State. Increase in yield of crops will be about 22 million maunds of which about twelve million maunds will be in food-crops and ten million maunds in cash crops. The value of the additional yield is estimated at about Rs. 210 million. In U.P. about 5·92 lakh acres of land will be irrigated annually. In Nepal, the project will provide irrigational facilities to an area of 1,43,900 acres and will yield additional agricultural produce valued at Rs. ten million.

The project has four main features:

1. A 2,437 feet long barrage with road bridge across the Gandak at Bhaisalol in Bihar. About half the length of the barrage will fall in Indian territory and the other half in Nepal.

2. Main western canal to irrigate 14·08 lakh acres of land in the Saran district of Bihar and about 8·31 lakh acres of land in the Gorakhpur and Deoria districts of U.P. A separate canal will also take off from the Western Bank to irrigate 40,400 acres of land in the Bhairwa district of western Nepal.

3. Main eastern canal to irrigate 17·54 lakh acres of land in the Champaran, Muzaffarpur and Darbhanga districts of Bihar and 1·04 lakh acres of land in Parsa, Bara and Ratuhat districts of Nepal.

4. One power house with an installed capacity of 15,000 kW at a suitable place on the main western canal in Nepal.

The Gandak Control Board has been set up to ensure efficient and economical execution of the project including all connected works in Bihar, U.P. and Nepal.

The project is estimated cost Rs. 52 crores of which the share of Bihar Government is estimated to be Rs. 36·56 crores and the balance that of the U.P. Government.

The expenditure incurred on the project up to the end of Dec. 1963 by the Govts. of Bihar and U.P. was about Rs. 6 crores and Rs. one crore respectively.

### NET AREA IRRIGATED BY SOURCES, 1962-63 @

The following table gives the figures in thousand acres:

| STATES AND TERRITORIES | CANALS | | | Tanks | Wells | Other sources | Total |
|---|---|---|---|---|---|---|---|
| | Govt. | Private | Total | | | | |

# POPULATION

*Note:*—Unless otherwise stated the following article is based on the 1961 census which is the latest.

Preparations for the 1961 Census began in July 1958. There were six stages in the census operations beginning with the checking of the boundaries of States and Union Territories and their constituents and ending with the actual census count which ended at sunrise on March 1, 1961. The count started on the morning of February 10, 1961.

India constitutes only 2·4 per cent of land of world surface but accounts about 15 per cent of the world's population. India's population is larger than the combined population of Africa and South America.

The 1961 census covered the whole country except portions of Jammu & Kashmir currently under the occupation of Pakistan and China. The 1951 census did not cover Jammu and Kashmir, N.E.F.A. and Nagaland.

The census closed on the evening of March 5 and the first results began to flow in on 6th March.

About a million persons were employed as census agency—both enumeration and supervisory—in about 800,000 blocks.

The population of India has registered an unprecedented increase of 21·5 per cent from 359 million in 1951 to 439 million in 1961 according to the 1961 census figures.

The increase is in excess of the upper limit of all the recent projections and is eight million more than the projected population of 431 million in 1961 on which the Third Plan is based.

The number of cities with a population of more than a million has gone up from five to six or seven, the number and the order of precedence varying with the definition adopted.

## URBAN DENSITY

Greater Bombay ranks first with 4·15 million and Calcutta second with 2·93 million, Delhi (including New Delhi, Shahdara and the Cantonment) third with 2·34 million, Madras fourth with 1·73 million, Hyderabad fifth with 1·25 million, and Ahmedabad sixth with 1·15 million.

If, however, the population of Calcutta (including 34 contiguous urban townships in a compact area of 164 sq. miles) is aggregated, "Greater Calcutta" ranks first with 5·55 million inhabitants. Similarly, "Metropolitan Bangalore" has a population of 1·21 million.

The density of population for the country works out to 370 per square mile as against 312 in 1951.

The highest urban density is to be found in Calcutta city (75,038). This compares with 22,293 per square mile in Greater Bombay and 55,208 in Madras.

The City-Sadar-Paharganj area of Delhi, however, has a density of 143,185 persons per sq. mile and the Karolbagh-Patel Nagar area of Delhi a density of 74,195. According to the final census reports these two areas "can be counted in the forefront of the world's highest density areas."

The highest increase in urban population during the last ten years has been recorded in Assam (116·69 per cent). Orissa comes next with 87·02 per cent, followed by Bihar, 49·08 per cent. Madhya Pradesh showed an increase of 47·76 per cent while Kerala 42·44 per cent.

## SEX RATIO

The sex ratio—the number of females per 1,000 males—is now 941 as compared with 946 in 1951. There has been a steady decline in this ratio since 1901.

Another odd feature is that the sex ratio is above unity in distinct bands of territory, especially, along the coast. The State-wise sex ratio is also appreciably lower north of latitude 22 degrees.

Literacy has registered a small increase from 16·6 per cent in 1951 to 23·7 per cent in 1961.

The test for literacy is satisfied if a person can both read and write with understanding.

## LITERACY RATE

The literacy rate is highest in Delhi, Kerala, the Andamans, Gujarat, Madras and Maharashtra in that order and lowest in Kashmir, Himachal Pradesh, Rajasthan, Madhya Pradesh, Uttar Pradesh, and Bihar in that order.

Female literacy continues to be far below male literacy, but again, oddly enough, the coastal belt generally exhibits a higher rate of female literacy than other areas.

Of the enumerated population (of 439 million), 82·16 per cent is rural and 17·84 per cent urban. This compares with 82·62 per cent and 17·38 per cent in 1951.

## INCREASE IN RATE OF SURVIVAL

The answer to the high population increase over the last four decades is not far to seek. In 1881 the Census Actuary computed a birth rate of 50·5 for Bombay, 47·9 for Bengal and 50·8 for Central Provinces and effective death rates of 42·5, 39·9 and 42·8 for the general population. He estimated expectation of life at birth at 23·67 for males and 25·58 for females (24·63 for general). In 1891, the rates did not show any marked change, the overall figures for India being a birth rate of 48·8 and a death rate of 39·6, expectation of life at birth for males being 24·59 and for females 25·54. In 1911 the birth rate for combined provinces was still estimated at 51·3 and the death rate at 43·1, while the expectation of life at birth had decreased to 22·59 for males and 23·31 for females from 23·63 and 23·96 respectively in 1901. In 1921, as a result of minor epidemics culminating in the great influenza epidemic of 1918, the birth and death rates stood very close to each other at 49·2 and 48·6. These rates diminished to 46·4, 45·2 and 39·9 for births 36·3, 31·2 and 27·4 for deaths in 1931, 1941 and 1951 respectively. The expectation of life at birth in 1931 was estimated at 26·91 for males and 26·56 for females; for 1951 the corresponding figures were 32·45 and 31·66. While closer estimates of birth and death rates for the decade 1951-61, must await detailed age tabulations, there are reasons to assume that the birth rate will be around 18 or still lower, for there is little doubt that the rate of natural increase has been steadily acclerating from year to year. Although the current infant mortality rate is still quite high the expectation of life at birth in 1961 would be a little more than 45. In other words, over the last decade, the expectation of life must have increased by more than a year every year.

### GROWTH OF POPULATION FROM 1901-1961

| Years | Persons | Percentage (Approx.) |
|---|---|---|
| 1901 .. | 236,281,245 | .. |
| 1911 .. | 252,122,410 | + 5·73 |
| 1921 .. | 251,352,261 | — 0·31 |
| 1931 .. | 279,015,498 | + 11·01 |
| 1941 .. | 318,701,012 | + 14·22 |
| 1951 .. | 361,129,622 | + 13·31 |
| 1961 .. | 439,235,082 | + 21·50 |

+denotes increase ; — denotes decrease.

* Excludes Goa, Daman and Diu.

**Rural and Urban Population:** The first figure shows rural population and the second urban: *States*: Andhra Pradesh 29,708,939; 5,274,508; Assam 10,959,744; 913,028; Bihar 42,541,690; 3,913,920; Gujarat 15,316,726; 5,316,624; Jammu & Kashmir 2,967,661; 593.315; Kerala 14.349,574; 2.554,141; Madhya Pradesh 27,745,174; 4,627,234; Madras 24,606,425; 8,990,528; Maharashtra 28,391,157; 11,162,561; Mysore 18,390,279; 5,266,493; Orissa 16,439,196; 1,109,650; Punjab 16,218,217; 4,088,595; Rajasthan 16,874,124; 3,281,478;

† A Soviet information department release says that since India's independence in 1947, her population has grown by 100 million and stood at 453,147,000 in 1962.

Uttar Pradesh 64,266,506; 9,479,895; West Bengal 26,385,437; 8,540,842.

**Territories** :—Andaman and Nicobar Islands 49,473; 14,075; Delhi 299,204; 2,359,408; Himachal Pradesh 1,287,216; 63,928; Laccadive, Minicoy and Amindivi Islands 24,108; —; Manipur 712,320; 67,717; Tripura 1,039,008; 102,997; Dadra and Nagar Haveli 57,963; —; Goa, Daman & Diu —; —; N.E.F.A. 336,558; —; Nagaland 350,043; 19,157; Pondicherry 280,082; 88,997; Sikkim 155,341; 6,848.

## RURAL AND URBAN POPULATION

It should be pointed out here that whether an area is urban or rural depends on a number of factors of which population is only one. Also these factors vary from State to State.

The rural and urban population grew as follows:

| | Percentage | |
|---|---|---|
| | Rural | Urban |
| 1921 .. .. .. .. .. .. .. .. .. .. | 88·6 | 11·4 |
| 1931 .. .. .. .. .. .. .. .. .. .. | 87·9 | 12·1 |
| 1941 .. .. .. .. .. .. .. .. .. .. | 86·1 | 13·9 |
| 1951 .. .. .. .. .. .. .. .. .. .. | 82·7 | 17·3 |
| 1961 .. .. .. .. .. .. .. .. .. .. | 82·16 | 17·84 |

### Area, Density, No. of Towns, Population, Sex Ratio by State

| States/Territories | Area in sq. miles | Population per sq. mile | No. of towns | Population | Females per 1,000 males in 1961 |
|---|---|---|---|---|---|
| Andhra Pradesh .. .. .. .. .. .. | 106,286 | 339 | 223 | 35,983,447 | 981 |
| Assam .. .. .. .. .. .. .. | 47,091 | 252 | 60 | 11,872,772 | 876 |
| Bihar .. .. .. .. .. .. .. | 67,196 | 691 | 153 | 46,455,610 | 994 |
| Gujarat .. .. .. .. .. .. .. | 72,245 | 286 | 181 | 20,633,350 | 940 |
| Jammu & Kashmir .. .. .. .. .. | .. | .. | 43 | 3,560,976 | 878 |
| Kerala .. .. .. .. .. .. .. | 15,002 | 1,127 | 92 | 16,903,715 | 1,022 |

(Ranaghat, 540 ; Sadar, 969) ; Purulia Dist. (2,408) ; 24 Parganas Dist. (Bangaon, 320 ; Barasat, 384 ; Barrackpur, 119 ; Basirhat, 818 ; Diamond Harbour, 1,262 ; Sadar, 1,107) ; West Dinajpur Dist. (Balurghat, 580 ; Islampur, 759 ; Raiganj, 865).

### Himachal Pradesh

District-wise names of Tehsils with area in square miles and population of each Tehsil respectively are as follows :

*Bilaspur Dist :* Bilaspur Sadar : 215 ; 79,043 ; Ghumarwin : 236 ; 79,501.

*Chamba Dist :* Chamba : 791 ; 69,034 ; Bhattiyat : 250 ; 48,089 ; Churah : 669 ; 56,118 ; Bharmour : 638 ; 5,582 ; Pangi : 787 ; 11,644.

*Kinnaur Dist :* Nichar, Kalpa, Pooh Sub-Divisions : 2,500 ; 40,640.

*Mahasu Dist :* Rampur : 853 ; 43,757 ; Jubbal : 105 ; 17,636 ; Arki : 156 ; 38,688 ; Chopal : 375 ; 40,384 ; Rohru : 580 ; 51,805 ; Kumharsain : 134 ; 23,822 ; Solan : 108 ; 34,938 ; Kusumpti : 151 ; 27,098 ; Theog : 163 ; 41,014 ; Suni : 93 ; 18,750 ; Kotkhai : 69,20,545.

*Mandi Dist :* Mandi Sadar : 202 ; 92,924 ; Joginder Nagar : 445 ; 68,412 ; Sarkaghat : 202 ; 84,360 ; Chachiot : 351 ; 57,518 ; Sunder Nagar : 168 ; 42,415 ; Karsog : 252 ; 37,978.

*Sirmur Dist :* Nahan : 214 ; 32,519 ; Paonta : 231 ; 61,336 ; Renuka : 380 ; 63,642 ; Pachhad : 316 ; 40,087.

### Manipur

Names of Districts with Sub-Divisions with area in square miles and population respectively within brackets of the latter are as follows :

Manipur Plains District (Bishenpur : 196 ; 79,031 ; Imphal West (including Imphal town) : 292 ; 2,99,863 ; Jiribam : 264 ; 18,143 ; Hills District (Mao : 982 ; 70,192 ; Tamenglong : 1,772 ; 36,554 ; Tengonpal ; 1,352 ; 27,651 ; Thonbal : 200 ; 1,35,133 ; Ukhrul : 1,832 ; 48,475 ; Churachandpur : 1,738 ; 63,276).

### Pondicherry

Area and Density of Population

Area : 186 square miles ; Total population : 3,69,083 (1961 census) ; 2,85,011 (1941 census) ; 3,17,253 (1948 census), Density of population : 1,984 per square mile.

Rural population : 2,80,094 (1,40,014 males, 1,40,080 females) ; Urban population : 88,989 (43,331 males, 45,558 females) ; Literacy : 35·67 per cent.

*Area and population by Communes :* Pondicherry : 113·4 sq. miles ; 2,58,590 ; Karaikal : 57·6 sq. miles ; 83,986 ; Mahe : 3·2 sq. miles ; 19,478 ; Yanam : 6·7 sq. miles ; 7,029.

*Estimated population :* 1966 : 4,14,335 ; 1971 : 4,67,612 ; 1976 : 5,26,959.

### Tripura

Names of the Sub-Divisions with area in square miles and population respectively are as follows :

Amarpur : 1,365 ; 56,289 ; Belonia : 1,020 ; 76,133 ; Dharmanagar : 662 ; 1,14,370 ; Kailasahar : 1,202 ; 1,04,247 ; Kamalpur : 622 ; 61,737 ; Khowai : 1,393 ; 1,29,935 ; Sabroom : 616 ; 43,361 ; Sadar : 1,559 ; 3,65,827 ; Sonamura : 531 ; 77,932 ; Udaipur : 637 ; 90,119.

The average birth rate, on the basis of incomplete data, was estimated to be about 34 per 1,000 in 1941–50, and apart from fluctuations usual for such a high figure, has not registered any serious decline during the last few years.

The estimated death rate shows a steady decline from 42·6 per 1,000 in 1901 to 27·4 in 1951 and 21·6 in 1961. Infant mortality has dropped from 232 in 1901 to 98 in 1960.

The expectation of life at birth has increased from 23 years in 1931 to 42 in 1961.

### Registered Foreigners in India

As many as 59,744 registered foreigners were reported to be resident in India on December 1, 1962, as against 61,705 in 1961.

The principal nationalities were : Tibetan—14,988 ; Chinese—10,627 ; Iranian—4,501 ; American—4,421 ; Afghan—3,648 ; German—2,930 ; Burmese—1,623 ; Russian—1,581 ; French—1,047 ; Italian—1,044 ; Japanese—937.

These figures do not include children below the age of 16 years and nationals of Commonwealth countries.

Consequent on the expiry of the Sino-Indian Agreement, exemptions from the provisions of the Indian Passport Rules, 1950, and the Foreigners (Protected Areas) Order, 1958, allowed to certain categories of Tibetans have been withdrawn.

The number of visas granted to foreigners during 1962 totalled 63,529.

### AGE GROUPS

Census Count by single year of Age for All India with males and females respectively in brackets :

*Notes:* R = Rural. U = Urban.

The percentage of religionwise population to the total population in the country and the percentage increase during 1951-61 in brackets are: Buddhists 0·74 (16·71); Christians 2·44 (27·38); Hindus 83·51 (20·29); Jains 0·46 (27·17); Muslims 10·69 (25·61); Sikhs 1·79 (25·13); others 0·37 (—13·07).

# LIVESTOCK

THE total livestock population in India is placed at 336·53 million, according to provisional estimates of the 1961 livestock census as against the 1956 census figure of 306·50 million. The net contribution of livestock to the national income at present is estimated to be over Rs. 10,000 million.

Meat from livestock is a valuable source of protein; about 0·9 per cent of the total cattle population is slaughtered for meat, and 36 and 32·5 per cent of the goat and sheep population respectively. The annual production of meat from goat is about 0·15 million tons and that of mutton 0·11 million tons. Production of beef, buffalo flesh and pork amounts to 0·12, 0·09 and 0·02 million tons respectively. The total annual production of meat from all species is estimated to be over 0·46 million tons valued at Rs. 760 million.

## CATTLE

Among the well-defined breeds of cattle (26 in all), three broad divisions are: dairy or milch and draught cattle and those that serve a dual purpose.

*Dairy Milch* :—The Sahiwal, the best milch breed, are responsive to environment, have an yield of 4,000 lbs. a year. The Sindhi are also responsive to environment, the Gir in Saurashtra and Rajasthan have an yield of 3,700 lbs. a year. In the order of the productivity of milk the cattle may be arranged as follows: the Sahiwal, the Kankrej, the Ongole.

*Draught* :—The Amritmahal Hallikar (Mysore) are good for draught purposes but are poor milkers.

*Dual* :—The Galo in Madhya Pradesh are draught animals but also good milkers, 3,000 lbs. The Kangayam in the south and south-east of the country are powerful draught animals of average milk yield. The Kankrej, are essentially draught but have milk potentialities (3,000 lbs.); they belong to Gujarat. The best known in this group are the Hariana (Punjab, 3,000 lbs.), Tharparkar (Gujarat and Rajasthan, 3,000 lbs.), and Ongole (Andhra).

The best known breeds of buffaloes (26 in all) are the Murrah, Nili and Ravi of the Punjab, the Jufferbadi of Kathiawad, Mehsana of Gujarat, Nagpuri of Vidarbha and the Surti and Pandharpuri (a type of Nagpuri buffaloes) of Maharashtra. All except the Nagpuri are noted dairy breeds. Murrah is adapted to all climates. They also yield on an average about 3,000 lbs. of milk for over 300 days in a year.

The average annual milk yield of a buffalo is 1,100 lbs. against 413 lbs. of the Indian cow. Buffalo milk being one and a half times as rich in fat content as cow milk, is more valued for butter and ghee production. Buffaloes are also better utilisers of coarse fodder and are less expensive to keep.

## LIVESTOCK DEVELOPMENT

During 1961–62, 1962–63 and 1963–64 the number of Gaushalas taken up for development as cattle breeding-cum-milk production centre for Governmental efforts was 22, 31 and 31 respectively, for the supply of good breeding bulls and increasing milk production. The Central Council of Gosamvardhan co-ordinated the State activities on the improvement of cattle wealth. In 1962–63 it distributed free of cost 1,100 productive cattle and 14 breeding bulls to *bona fide* cattle breeders, and during the same period it organised a seminar on "Approach to Cattle Development" at Bombay. During 1963–64, 27 breeding bulls were distributed, 33 young bulls were selected for subsidised rearing and two cattle shows were organised with a view to developing marketing facilities. The National Livestock Cttee. organised two regional cattle and poultry shows in 1961–62, and 1962–63 and one poultry show at Nagpur and All India Cattle Show at Nagpur in March 1964 and at Hissar in Feb. 1965. The scheme for rehabilitation of nomadic cattle breeders operated in 4 States in 1964–65 (Andhra, Gujarat, Rajasthan and Uttar Pradesh) and during 1963-64 a centrally sponsored scheme for the development of Ratni, Tharparkar and Sanchora breeds of cattle for rehabilitation breeders was sanctioned and was being continued in 1964–65.

Legislation for livestock improvement and control of contagious disease exists in all States (except in Jammu & Kashmir, Tripura, Rajasthan and U.P.).

Livestock Development is stepped up through special schemes such as key village blocks with cattle breeding farms and arrangements for bull rearing, artificial insemination, subsidised calf rearing and also Goshalas and Gosadans. The programme included also poultry development schemes. The achievements under the cattle development programme with the objective to bring about increased milk production and raising draught efficacy of cattle in selected areas during the first two Plans and the current Plan are tabulated below. The scope of the scheme was expanded during the current Plan.

*Cattle Development Programmes*

| Items | Achievement 1st & 2nd Plans 1951-61 | Third Plan Target | Achievement 1961-64 |
|---|---|---|---|
| *Key Village Blocks* (Nos.) | | | |
| (*a*) Established .. .. .. .. .. | 407 | 79 | 43 |
| (*b*) Expanded .. .. .. .. .. | 114 | 64 | 49 |
| (*c*) Central semen collection stations .. | 18 | — | — |
| (*d*) Marketing Cell .. .. .. .. | 9 | — | — |
| Subsidised rearing of calves (Nos.) .. .. | 34,791 | 44,440 | 12,048 |
| *Cattle breeding farms* (Nos.): | | | |
| Established .. .. .. .. .. | — | 10 | 2 |
| Expanded .. .. .. .. .. | — | 35 | 9 |
| Establishment of bull breeding farms (Nos.) .. | — | 13 | 4 |
| Goshalas. (Nos.) .. .. .. .. .. | 255 | 168 | 76 |
| Gosadans (Nos.) .. .. .. .. .. | 61 | 23 | 4 |
| *Feed and Fodder* | | | |
| (*a*) Pasture demonstration plots (No. established) .. .. .. .. .. | — | — | 180 |
| (*b*) Pasturage improvement .. .. .. | — | — | 14 |
| (*c*) Farms for forage seed .. .. .. | — | — | 7 |

*Service Training Centres* :—For the development of livestock six service training centres were established at the end of 1963–64. The services of F.A.O. experts have been obtained to conduct four practical training courses of two months' duration each in artificial insemination and physiology of reproduction.

*Feed and Fodder* :—During 1963–64 the programme of feed and fodder resources operated in all the States except Nagaland and three Union Territories. 68 pasture demonstration plots were in existence at the end of 1963–64. Production of seeds and other propagative material of fodder and forage grasses were taken up at four farms, while pasture improvement was taken up in nine farms in 1963–64. Fodder and grazing centres were set up in all the States except Assam, Jammu and Kashmir, Orissa and Nagaland and two Union Territories during 1963–64. A standing committee has been recently set up in the Ministry of Food and Agriculture to review the progress of work on feed and fodder resources of the country.

*Salvaging* :—Under the scheme for the salvage of superior calves from milk colonies, 809 calves of six months age and above were bought from Aarey and Haringhata milk colonies upto the end of 1961 and distributed freely to *bona fide* breeders. During 1962–63 and 1963–64, 2,409 and 980 respectively such calves were allotted from Haringhatta (Bengal) and Aarey (Bombay) milk colonies. The Government Livestock Farm, Hissar is reorganised to produce 750 Hariana bulls annually to meet the demand of other States after the requirement of the Punjab Govt. 579 breeding bulls of Hariana breed were produced during 1963–64 out of which 496 were distributed mainly in the Punjab.

*Gosadans* :—The Gosadan Scheme aims at the removal and segregation of old, unproductive and uneconomic cattle. Old, infirm and useless cattle are segregated and sent to gosadans located in remote forests and other waste lands where grazing facilities are not fully utilised. All male stock were castrated before admission into the gosadans. The remains of dead animals such as skins, hides and hoofs, etc. were to be utilised by setting up a small 'charmalaya' at each centre.

Against a target (revised) of 38 during the two Plans, 36 gosadans were established.

Emphasis is laid in the Third Plan on the establishment of collection centres to increase the number of admissions to Gosadans. During the first three years (1961-64) 5 Gosadans and 25 collection centres were set up. At the Model Training-cum-Production Centre, Lucknow, 46 and 31 candidates were trained in hide flaying ; 15 and 20 in tanning ; and 15 and 20 in footwear and leather utilisation during 1962-63 and 1963-64 respectively.

*Gaushala Development* : The object is to convert them into efficient milk production centres and to breed better cattle. Total number of gaushalas taken up for development since the initiation in the 2nd Five-Year Plan upto 1963–64 were 328.

To eliminate the damage to crops by wild and stray cattle a scheme to catch them and dispose of them had been in operation as a part of Gaushala Scheme for the last few years at Delhi, Jammu & Kashmir, M.P., U.P. and Punjab. During 1962-63, 18,063 cattle were rounded up out of which 2,471 productive ones, were distributed for breeding purposes and 7,843 unproductive ones sent to gosadans. During April to December 1964, 14,012 cattle were rounded up out of which 1,760 productive ones distributed for breeding, 5,840 unproductive sent to Gosadans and the remaining were auctioned and released on payment of fine. Some of the rounded up cattle are also being provided to Dandakaranya Project. The scheme now provides for the training of State catching teams and the establishment of concentration camps.

Milk production in rural areas will be linked with marketing surplus production in urban centres, the supply and collection being done through net-work of Producers Cooperative Societies in the villages. During the Third Plan period 55 new supply schemes will be taken up in cities of 1 lakh population and above and in growing industrial townships. For the development of rural milk pockets four milk product factories and two cheese factories have been established.

In the veterinary field, it is proposed to double the number of hospitals and dispensaries during the Third Plan from 4,000 to 8,000. Every development block will have at least one hospital or dispensary. The entire bovine population of the country were expected to be vaccinated by 1963–64 against contagious diseases.

## SHEEP

It has been estimated that the number of sheep in the country was about 40·3 million in 1961 as against 39 million in 1956 and that the total quantity of wool produced is 54 million lb. annually valued at Rs. 10·5 million. The yield of wool per sheep varies greatly in different parts of the country. In Punjab, Uttar Pradesh and Rajasthan, the annual production per sheep is estimated at between 3·1 lb. and 4 lb., while in the rest of the States it does not exceed 1 lb. The average for the whole of the country is in the neighbourhood of 2 lb. per sheep per year.

Sheep also supply meat worth about Rs. 120 million every year in addition to pelts and manure. Sheep manure is very much valued among other manures as it contains twice as much nitrogen and potassium as are present in cattle manure. An individual sheep contributes 0·5 to 0·7 tons of manure annually.

India still requires large quantities of wool. About 16 million pounds of wool, tops and yarns costing about Rs. 120 million are imported. At the same time, we export about 38 million pounds valued at Rs. 81 million annually.
